Ray Webber, ZS6RSW, is arranging an informal get-together of radio amateurs who were involved at the SARL Johannesburg Branch and the Duff Road clubhouse on Friday 21 May at 12:30 at Nino's at San Ridge Square in Midrand. It is an open invitation. Everyone pays his or her own way. Join in to reminisce about the good times in the 807. Please email Ray with your details. His email address is RWebber@fnb.co.za.

SARL RTA TO OFFER THREE NEW CONSTRUCTION KITS

The first SARL Radio Technology in Action symposium will be held in Durban on Saturday 29 May 2010 at the Durban Campus of the University of KwaZulu-Natal.

The programme offers exciting presentations and discussions. This year three construction kits will be available at the RTA. The kits are only available to persons attending the RTA but may be pre-ordered and paid for online or purchased and paid for at the actual event.

This year it is also possible to pre-book and pay the RTA registration fee online. The fee is R50 which includes light refreshments at lunch time and entry into the attendance draw. It will still be possible to book at the door.

Registration for the Durban RTA will open on Monday. Get the full load down on www.sarl.org.za and select RTA from there follow the links.

The three kits on offer are:

DSSS kit: 100 mW on 40 m band. Two Direct Sequence Spread Spectrum transceivers built in open pcb fashion as a learning tool for DSSS. All sections of each transmitter and receiver are able to be explored and tested with simple gear found in the shack. CD containing assembly and operating instructions is supplied but no cables, cost R350.

TDR, Time Domain Reflectometry 1 GHz Sampling Scope. Specifically designed for TDR work but can be used for other applications. It is a USB device that plugs into a Laptop or PC and runs a Windows program in the image of a normal scope. CD containing software, assembly, and operating instructions is supplied but no cables are supplied, cost R350.

DSP kit: Digital Signal Processing Speaker kit. For use on speaker output of any device to reduce or eliminate noise. It is ideal for HF Receivers. Built in open pcb fashion and ideal as a DSP learning tool. CD containing assembly and operating instructions is supplied but no cable, cost R325.

This project is fully presented in a technical presentation at the RTA.

SPECIAL STATION - ZS85SARL

The SARL was founded on the 25th May 1925 in Cape Town. To commemorate the 85th anniversary of this event in Cape Town, a group of radio amateurs will operate a station with the birthday call sign ZS85SARL on Saturday 22 May from Cape Town. The station will be on the air on 80, 40 and 20 m from 08:00 till 20:00 CAT.

The main aim of the station will be to obtain a WAZS within 12 hours.

A special QSL card will be printed for this event. SARL members will receive the QSL card at no cost via the bureau. Non-members will have to provide a franked and addressed envelope to cover postage.

The station will be located at the Ysterplaat Air Force Base. As from 11:00 fires will be available for visitors who wish to braai and operate the special call sign station and take part in the other festive activities.

NATIONAL RAE CANDIDATE LIST AND EXAMINATION NUMBERS TO BE PUBLISHED SOON

The SARL will be publishing all of the relevant RAE examination numbers as well as allocating the examination venues by the close of this weekend 09 May 2010. Please keep your eyes on the SARL web page for updates as soon as they become available.

Letters regarding the examination details will be sent to each candidate. The SARL urges each and every candidate to carefully check their details and to notify Mariska at the SARL office should any information be incorrect.

RaDAR CONTEST - CATEGORY SCORES

Over a 100 individual stations were logged during the April 2010 RaDAR contest. Most stations took part for fun. A few Potchefstroom club members took part individually sharing the same facilities and certainly can be commended for their high club spirit. From the logs received to date , the following category points were awarded:

Home stations using normal antennas and mains power. Theunis, ZS2EC/3 (QRP) - 43 Derek, ZS2J (QRP) - 20 Francois, ZS6BUU - 5.

Home stations not relying on their normal antennas or mains power. None.

Portable operation not relying on mains power, including all mobile stations. Andries, ZS6VL - 174 Pierre, ZS6BB (QRP) - 117 Coenie, ZS6PCO - 33 Carl, ZS6CFW - 21 Nico, ZS6NVR - 21 Kevin, ZS6KMD (QRP) - 15 Mike ,ZS6MEG - 6.

True RaDAR portable operations not relying on existing antennas or mains power. Tienie, ZS6MHH - 124.

True RaDAR portable operations as above and using QRP. Output power limited to 5 watts PEP. Eddie, ZS6BNE (QRP) - 250 Christo, ZR6LJK (QRP) - 210 Allen, ZR1AAH (QRP) - 105 John, ZS5J (QRP) - 45

Check log. Geoff, ZS6GRL.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Fortunately the days with no sunspots are broken and sunspots 1 069 and 1 070 are putting the smiles back on HF communicators. The effective sunspot number is expected to be less than 20 for the coming week.

15 m will provide the best opportunities for DX followed by 17 and 20 m. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings it will be good towards Europa. Contacts with the USA are once again becoming challenging. Contacts with Australia and New Zealand will be challenging. During the afternoons and evenings good 15 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. 20 m is very useful for contacts over the longer distances during the majority of the day.

80 m is the frequency of choice in the evenings. With the change of season the noise levels are also decreasing and some top band activity will once again become possible.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

9 May - AWA Valve QSO Party; 16 May - SARL 85th Anniversary Sprint, 12:00-15:00 UTC; 21 May - Ray Webber's and Duff Road old timers meet at 12:30 at Nino's; 22 May - ZS85SARL, Special station on the air at Ysterplaat; 29 May - RTA symposium in Durban; 24 July - RTA symposium in Cape Town; 21 August - RTA symposium in Port Elizabeth; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual; 18 September - RTA symposium in Gauteng; 30 September - closing date for phase 1 of the Innovation project.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE. Thank you for listening, 73.

352. 1st time tuning for HF

Newsgroup: rec.radio.amateur.misc
Date: 2010-05-09 02:30:07 UTC
From: Joe <invalid@email.account>
Message-ID: <20100508213007716807-invalid@emailaccount>
Source record: 5721

Hi,

This is the first time I've started working HF and I'm having a hard time getting my radio working properly so I can hear other contacts w/ my FT-857D. I've just bought my first HF antenna, it's a buddistick which is one of the only things that fits on my balcony. I'm not sure if it's me or if 40m just doesn't have a lot of talk going on, I'm just not sure what to expect.

The radio volume is almost turned all the way up. I've adjusted the RF gain till I hear not too much noise, but the other stations I hear are coming in very low, can't really make them out. The LDG FT multi-meters SWR reading sits at about 5.

I'm trying to find out how to get the incoming stations voice volume up, and turn the background noise down. Better yet, I'm just trying to figure out how to really use it.

Any help much appreciated.

*DIGITAL AMATEUR TELEVISION (DATV) EQUIPMENT
BULK PURCHASE SCHEME*

Following on from the success of the first bulk purchase scheme, the Wellington VHF Group Incorporated is accepting orders for a second scheme, closing at the end of June.

For more details please email:

zl2wa@clear.net.nz

****

Remit 4 Procedure at the NZART Annual General Meeting

The voting on Remit 4 does not give council a mandate re entry level licence. If passed it merely instructs Council to seek a mandate:

REMIT 4 Hastings Branch 13 Non - Transmitting

"That Council seek a mandate from the full membership before proceeding with the implementation of an entry level licence"

What I propose to do at the AGM is as follows:

1. Have the remit discussed and voted on.

2. After the remit is voted on I will then call for a poll from all branches as to whether they want an entry level licence or not.

This should settle the matter once and for all.

By polling all branches at the AGM - and counting how many votes they record which way - the matter of an entry level licence should be settled.

When discussing Remit 4 at branch meetings, could all branches please decide whether they want an entry level licence or not - and instruct their delegates accordingly.

The article about an entry level licence that appeared on page 14 of the March/April 2010 Break-In is intended as a discussion document and may not necessarily be the final version should an entry level licence be wanted.

Roy Symon ZL2KH
NZART (Inc) President
April 2010

****

Opportunity

NZART Transmitting Members are invited by NZART Council to provide guidance and assistance with a matter that is under consideration: *The Future of NZART*.

You are invited to enter,

starting at the TOP LINE on a single A4 sheet "*Submission on The Future of NZART*" followed by your name, callsign, postal address, and date,

OR,

in the address line of your email: "*Submission on The Future of NZART from*" and in the TOP LINE in the body of your email text, again: "*Submission on The Future of NZART from*" followed by your name, callsign, postal address, and date.

Add your NZART Membership Number too - or a statement that you are a current TRANSMITTING Member.

Constructive comments are wanted. Consider the present NZART circumstances and financial position as your start point. You are referred to March/April

2010 "_Break-In_". Previous history is not required.

A single A4 sheet, or if submitting electronically as an email or attachment, not more than one page with this required heading information and your constructive comments will be appreciated.

Submissions that do not meet these rules or which are in excess of these rules will impede the processing in the short time available so will be rejected unconsidered.

Submissions close at midday on Thursday 27 May, at NZART Headquarters, nine days before the AGM.

Please post A4 sheet submissions to: "SUBMISSIONS", NZART Headquarters, P.O. Box 40-525, UPPER HUTT 5140, and in adequate time to reach the destination before the closing time.

Please send emails to nzart.hq@clear.net.nz before the same closing time.

The A4 sheets and email submissions received become NZART Council working documents and the property of NZART Council. No acknowledgements will be given.

Submissions will be considered by Council at its face-to-face meeting on the day before the NZART AGM. The identity of originators of documents will not be disclosed outside NZART Council.

The release of results, statistical information, extracts from the texts received, and any further use of information received, is at the discretion of, and will be decided solely by, the NZART President.

Notes:

ï¿½ A single-sheet hard copy submission or a one page email submission has been deliberately requested to ensure fast processing and to study in the short time available before Conference. Your cooperation is requested.
ï¿½ NZART's principal concerns are the interests of its Transmitting Members.

****

President's Annual Report - 2009

President's Report Part 1 (covering January-2009 to May-2009)

Being a sometime Returning Officer for NZART Council and Presidential Elections I was particularly pleased at the firm and decisive action taken by the Returning Officer in relation to the Presidential and Council Elections which were required to be held in March for the positions of President and Councillors representing the Northern, Central and Southern Electoral Districts. A Returning Officer appointment can be in a lonely and vulnerable position so we must all take pride in Council's appointment of such a competent officer who in trying circumstances acquitted himself admirably. Printing irregularities occurred on this occasion and appropriate

remedial action was taken at minimal expense to NZART. So my thanks to Evan Sayer and his inspired appointment of former Association President, Peter Norden, ZL2SJ and former Councillor Bob Stewart, ZL2AMI Company Director and Software Engineer Loek Strik and Dr Anton Erasmusen Research Scientist as scrutineers for this election.

At the beginning of the year Council were fully conscious of planning arrangements for the 14th IARU R3 Conference subsequently and successfully held in Christchurch 12 -16 October, 2009. Other matters occupying our minds included progress of certain District Plan appeals and implications for all amateurs in relation to antennas, negotiations with Kordia and the perceived need to reduce equipment on some 9 co-location sites also required consideration.

Progress on the consideration of a "Foundation" type licence, a review of the Conference A-Z Handbook and an ongoing review of our Strategic plan dealt with progressively section by section and month by month.

One complex matter that had been occupying both my mind and the mind of Gerry ZL1BBS was how best to deal with AREC funding requirements. After many months the NZART AREC Emergency Funds Trust eventuated and was signed off in May, resulting in subsequent registration with the Charities Commission. Only 2 remits were submitted to Council this year and these were duly considered in anticipation of Conference.

One matter that received constant attention was the need to ensure the filling of officer vacancies. In February Bob Knowles ZL1BAD was appointed to temporarily hold the position of NZART Monitoring Service Co-ordinator (IARU Region 3). As a personal note some vacancies attract a number of high calibre individuals but others are more difficult (and sometimes prove "impossible" to fill). Even if the time is not right for you to put your name forward it is invaluable to know who is out there that may be prepared to lend a hand to hard working Councillors. Do show your interest, even if you can only volunteer for part of a role.

A successful F2F was held at the Wellington Airport on 28th February. Amongst a diverse range of topics Council noted the ruling made by the returning Officer to annul an election in progress and for the avoidance of doubt invoked its powers under clause 8.3 b. of the constitution by directing that the matter is to be determined in accordance with the Returning Officer's ruling.

Council has continued as in recent years to have occasional problems associated with our Web presence but these have - and are - worked through progressively. There is no doubt, however, that Jamie Pye ZL2NN has greatly enhanced our web presence at (now)

http://www.nzart.org.nz/.

In annual reports such as this details of everyday activities tend to be overlooked but is often these everyday activities that occupy Councillors whether it be in relation to "tweaking" processes and procedures, dealing with FMTAG recommendations or looking at ways to save costs, promote

membership and enhance member benefits. Additionally there is a need to consider who best to deal with matters requiring specialist input so for example in February NZART Council asked FMTAG to lead a review of the VHF-UHFSHF Beacon Band Plan.

In March/April 2009 Break-In, members were invited to comment on a proposal, prepared by the NZART IARU Liaison Committee, for the revision of the 40 metre band plan. A large majority of the submissions subsequently received pointed out the importance of aligning our band plan with the recently revised band plans of other countries, such as, for example, retaining Morse exclusivity at 7.000 to 7.030 MHz and digital modes at 7.030 to 7.040 MHz.

Towards the end of my term and in the 3 week lead-up to Conference I became critically ill and was admitted to the ICU in Wellington, during this period Vice-President Dr Stuart Watchman ZL2TW became acting President and ensured a smooth transition to the incoming President and Council. Though unable to attend Conference I had made sufficient recovery to be able with the assistance of Jim ZL2BHF to send from my hospital bed a vote of thanks to all Councillors and officers for their assistance to me over my 4 years as President and prior terms as Councillor I re-iterate those thanks again now. A last minute change to the conference venue resulted in a shift from the Hastings Racecourse to the Hawkes Bay Opera House in Hastings and though I was not present I understand that your acting President ably represented you on that occasion.

Bruce Douglas ZL2WP

President's Report Part 2 (covering June-2009 to December-2009)

As I became president in June, my report is of the second half of the year only. Prior to that Bruce Douglas ZL2WP ably filled the position, assisted by the then Vice President, Stuart Watchman ZL2TW, during Bruce's illness.

One of the Central District councillors, Lee Jennings ZL2AL, resigned early in the period. The next highest polling candidate, Max Wheatley ZL2MAX, was invited to fill the vacancy that arose and he accepted the invitation. I extend thanks to Lee for the work he did while a councillor and thanks to Max for filling the vacancy.

In October NZART hosted the Region 3 IARU triennial conference in Christchurch. This was a very successful event due in large part to the excellent work carried out by the Christchurch organising committee led by Terry Carrell ZL3QL. Thanks to a very generous sponsorship by Tait Electronics of the NZART hosted dinner the conference came in below budget. Reports of the conference have appeared in Break-In. Council are currently working on negotiations with Kordia regarding rental charges on their repeater sites and also towards implementing an entry level licence into amateur radio.

It was very pleasing to see AREC getting a most positive mention in the New Zealand Search and Rescue Council Annual Report. AREC is one of the important public services that we offer and congratulations go to all of those who work so hard and successfully in this service.

The NZART AREC Trust was established during the year to handle funding for AREC.

This is working well.

My grateful thanks go to our very capable Business Manager, Debby Morgan ZL2TDM, and our treasurer, Evan Sayer. We are lucky to have people of this calibre. Thanks also to all councillors, officers, and others who have given up their time and expertise to make sure our hobby thrives and prospers.

Roy Symon, ZL2KH

NZART President

****

From The Business Manager ZL2TDM

Debby says....

Branch Information

Some weeks ago I sent out a branch circular to all branch secretaries.

Of the number of items included there were two very important notices that required branch attention: One was to have Branch Secretaries return the details of the branch back to me for correction/inclusion in the upcoming call book.

I am rather loathe to start naming branches who have yet to respond, suffice to say I have only received 16 back so far out of a possible 76 posted out. Please send the form back either via e-mail or snail mail, or alternatively advise your branch details in any form that is easiest, but please remember to include everything asked for on the form. If there is no change then, please advise this, also.

The second important notice, was your branch membership statistics. These names were given for branches to vote on remits, to be presented at the upcoming conference. In order to ensure a quorum is attained at the AGM, these figures are essential. If your branch is NOT able to be represented, please let me know your branch voting figures, and also if you require a proxy to present the vote. It is therefore important to advise how many members were actually present when the vote was taken.

Finally while on the topic of branch figures...if for some reason your name does not appear on the list I have sent to the Secretary, please confirm the following:

Have you paid your sub?

Have you moved and not advised HQ of your new Club's details?

Do I prefer to have my branch vote counted at a Club other than in my own area?

Is your Branch in recess and you have not advised HQ of the branch you now attend?

There are a number of members whose details are still listed under branches that have been placed in recess for over 5 years. While it not essential that you regularly attend your local branch, Constitutionally and for the sake of the NZART database, you must be assigned a branch. This does not have to be in the area you reside, however will make it difficult to place a vote should you so desire.

I therefore urge all members to have a second look at your Break In label when you receive the June issue, this advises the branch to which you belong in my database.

Talk soon....Debby ZL2TDM

****

FMTAG NOTES FOR MAY 2010

PROPOSALS

Branch 13 Hastings-Havelock North has applied for a 9225 repeater at Kauahei, map reference NZ260 V22 265445. The repeater transmit frequency will be 439.225 MHz and the repeater receive frequency will be 434.225 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 13 Hastings-Havelock North has applied for a 4575 APRS Digipeater at Te Awaputahi, map reference NZ260 U24 031855. The digipeater transmit and receive frequency will be 144.575 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 13 Hastings-Havelock North has applied for a 4575 APRS Digipeater at Te Ahioteatua, map reference NZ260 W18 839525. The digipeater transmit and receive frequency will be 144.575 MHz. An engineering evaluation confirms that there will be no interference to other stations.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

Is There a Micro-Supercapacitor in Your Future?

ScienceDaily (Apr. 28, 2010) -- "Just think how often your fancy new mobile phone or computer has become little more than a paperweight because the battery lost its zeal for doing its job," says John Chmiola, a chemist with the Lawrence Berkeley National Laboratory (Berkeley Lab). "At a time when cellphones can do more than computers could do at the beginning of the Clinton presidency, it would be an understatement to say that batteries have not been holding up their end of the mobile device bargain."

=====
HF Contests

2010 NZART SANGSTER SHIELD QRP CW CONTEST
When :- Saturday, 15 May 2010 and Sunday, 16 May 2010
Times :- 2000 NZST until 2300 NZST each evening
Band :- 80m
Mode :- CW only.
The contest was established in 1927 at the time the late Mr. Ralph Sangster presented to the radio Amateurs of NZ the trophy, known as the Sangster Shield, for annual competition to be won by the most efficient station. It is pertinent to note not only did the efficiency of the station be taken into account, but also the efficiency of the operator concerned The terms of the gift of the trophy were that the competition was to be conducted on the 80 metre band using input power of not more than 5 watts and to be solely restricted to Morse operation.

2010 NZART MEMORIAL CONTEST
When :- 3 & 4 July 2010
Times :- 2000 NZST until 2300 NZST both evenings
Band :- 80m
Modes :- CW and Phone
The Memorial Contest was established soon after the end of World War 2 to commemorate those who lost their lives in the service of their country. It is a fitting way to honour those Hams and others who selflessly served their country so that we, today, may enjoy the freedoms that we do.
The Contest is split into a number of categories catering for all HF interests so please spare an hour, or two to honour those who paid the ultimate price that we now enjoy in our present lifestyles.
Contest Rules and Other Operating Information is available from the NZART Website :- http://www.nzart.org.nz/contests/index.html
Contest Rules and other Operating Information is available from the NZART website - http://www.nzart.org.nz/contests/index.html

For the contests below please see the latest "Contest Manager's Report"
This can be found on the NZART Web Contest page at:

Welcome to HF Amateur Radio. Your buddistick antenna is certainly a compromise. However it should prove serviceable. Q: is your antenna set-up as a vertical or a horizontal dipole? The current propagation report for both 80 & 40 meters is: Fair during the day time and Good at night. So I guess it begs the question of when are you operating? Activity during the day (currently) may leave something to be desired.

>The radio volume is almost turned all the way up. I've adjusted the RF

>coming in very low, can't really make them out. The LDG FT multi-meters
>SWR reading sits at about 5.

The RF gain should be set at or near its maximum. Adjust the AF gain for a comfortable listening level.

>I'm trying to find out how to get the incoming stations voice volume
>up, and turn the background noise down. Better yet, I'm just trying to
>figure out how to really use it.

Background noise, static, etc. is normal during HF operation. If you're not already a member of a local Amateur Radio club in your area, I highly recommend that you do so. You'll find a lot of like minded individuals willing to mentor you as you grow into this wonderful hobby.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 9th May 2010

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 7th July at 2pm in the ComReg Offices in Dublin and at other centres if warranted by the numbers.

Information on examination fees and other details please see 'Theory Examination' in the 'Information' section of the IRTS website at www.irts.ie

Intending candidates are also referred to 'Studying for the Amateur Radio Examination' in the 'Downloads' section of the website.

The latest date for receipt of applications to sit the examination is Wednesday, 23 June next but it is important to note that places at the exam are allocated on a first come first served basis.

International Summits on the Air Weekend

Summits on the Air (SOTA) is a programme that encourages radio amateurs who enjoy hill walking to take their radios with them and operate from the mountain tops. To promote interest in SOTA, an activity weekend for SOTA was held over the first weekend in May. Summits in more than 20 countries in Europe and North America were on air, with all bands from 80 metres to 70 cms in use by the activators.

Two Irish radio amateurs were out on the hills during the weekend - Ken GI4FLG was on 20 metres CW from Cairngaver in County Down, while Joe EI7GY was on 30 metres and 40 metres CW from Croaghanmoira in Wicklow. The SOTA programme is not just for hill walkers, however, as it relies heavily on the interest in summit activations by those who prefer to stay in the shack.

For more about the SOTA programme, see www.qsl.net/sotaei

Mills on the Air Weekend

This weekend radio amateurs all over Europe will be setting up stations in windmills and watermills. There has been a growing interest in this

annual gathering with interesting stories to be told about the Historic and working mills

---

Harley Davidson special event station - Portugal

Look for the amateur radio special event station CS2HD to hit the air waves between May 12-16th.

Activity is to celebrate the International Harley Davidson meeting in Tavira on May 15th and 16th.

All contacts will receive a QSL card from this activity via the Bureau or direct if requested (via CT2FPE), SWLs are always welcome. This activity will not use eQSL or LoTW, only paper QSL.

Check out the QSL on QRZ.com.

>From Spark to Space

>From Spark to Space is the title of a book published by the Saskatoon Amateur Radio Club, from Saskatchewan Canada. The book charts the history of Amateur Radio in Canada up until the late 60's.

This book is available as a free pdf download thanks to the generosity of the Saskatoon Amateur Radio club linking the download from their website.

Please note the download pdf file is 41MB in size, which translates into a 100 page document. The pdf is full of very interesting information of Early Experimental Radio in Canada and also includes an early callbook.

It is suggested when clicking on the link to save link as etc to prevent having a browser hang due tofile size.

The website is www.ve5aa.dyndns.org the link is located at the bottom of the menu. Please note that best practice need to be adhered to when downloading any files from any source.

4m Beacon

As of 12:00 UTC May 3rd, a Radio Science E-Skip propagation beacon has been activated from the eastern coast of North America. QRG is 70.005MHz. ERP is currently 3kW aimed at the EU.

The beacon is scheduled to run 24 hours a day until September 1st unless there are technical issues precluding that. The beacon is non-Amateur and sadly no 2-way QSOs could take place.

Any and all reception reports via e-mail to: wa1zms /at/ att.net

---

Anyone fancy a trip to Mozambique in October?

David, GI4FUM is running an amateur radio DXpedition to Bilene which is a costal resort on the Indian Ocean 150km north of Maputu. The Group will fly out from Heathrow on 13th October to Johannesburg and drive up to Mozambique. The Group plans to run a station for Jamboree on the Air with local scouts on the weekend of 16th/17th October and will also enter a station for CQWW SSB over the weekend of 30th/31st October.

There will be plenty of opportunity for individuals to operate under their own C91 callsigns and if you fancy sun bathing on an Indian Ocean beach in late African spring there will be plenty of opportunity for that too.

There are a few places on the team still available. If you want further details check out the CQ-DX African Safaris web site at http:/www.3da0ss.net

---

Rallies

Saturday 29th May 2010 Mid Ulster Amateur Radio Club Rally, Drumgor Youth Centre, Drumgor Heights, Craigavon Information:www.muarc.com

For further Rally info and contact details please check out the IRTS Website.

http://www.irts.ie/cgi/rallies.cgi

History this Week

1897 Sir J.C. Bose, India, demonstrates microwave transmissions.

1899 Lawnmower was patented.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Ohio/Penn DX Bulletin No. 959
The Ohio/Penn DX PacketCluster
DX Bulletin No. 959
BID: $OPDX.959
May 10, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, K8YSE, W8GEX (60m News), K9EL, AT International, CT1EWA, CT1ILT, DL7MAE & The DX News Letter, DX World.Net, F5NQL & UFT, F6AJA & Les Nouvelles DX, F6FQK, HK3ARR, I1JQJ/IK1ADH & 425 DX News, IK7JWX, JA1XGI, LU1ARG, OK1MU, ON8VM, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PY7ZY, RN1CW, RSGB IOTA Web Site, RW3GW, SM0BYD, VA3RJ & ICPO, VE3ZIK, VHF-DX-Portal (MMMonVHF) and ZL4PW for the following DX information.

** SPECIAL NOTE FROM EDITOR (By KB8NW): There will not be an OPDX Bulletin next week. I will be attending the Dayton HamVention. "IF" I receive a major announcement, I may send something out late Sunday or Monday. However, PLEASE continue to send your DX information. You never know what I might do.... 73 de Tedd KB8NW
P.S. Hope to see you at the HamVention Dayton at the NODXA Hospitality Suite at the Crown Plaza (See below)! I will also be at the ARRL Area on Sunday at the League's Legislation Booth.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd-May, through Sunday, 9th-May there were 203 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, UA, UA2, UA9, UK, UN, UR, V5, V7, V8, VE, VK, VP2V, VP8, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZK2, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3A, MONACO. John, K5HGX, will be active as 3A/K5HGX until May 17th. Activity will be on HF bands. QSL via his home callsigns.

3B8, MAURITIUS (EME!). Operators Rene/PE1L, Eltje/PA3CEE and Johan/PE9DX will be trying to make moonbounce QSOs from Mauritius between May 15-25th. They state on their Web page that 3B8 is the 3rd top most wanted DXCC entity on 144 MHz. The group has received a special moonbounce permit/ callsign for this operation - 3B8EME. QSL via PA3CEE. For more details, visit the Web page at: http://www.emelogger.com/mauritius/default.asp

3C9, EQUATORIAL GUINEA (IOTA Op!). On May 7th, the 3C0C Annobon Island team announced (edited): "If no setback or causes beyond our control, in mid-May start off Equatorial Guinea. Before traveling to Annobon (3C0C), we'll take a DXpedition to Equatorial Guinea, Bioko Island (AF-010), with the indicative 3C9B. The operation will take place over three days and we will be active on SSB, CW and RTTY. The exact dates will be announced shortly. Here in Bioko, we will collect all our needed supplies to live on the island of Annobon for 14 days, then depart to 3C0C. We thank all those who are helping us, Associations, Clubs and individuals, now Annobon Expedition and also the island of Bioko is a reality, thanks to everyone." For more details and updates on the 3C0C and 3C9B DXpedition, visit the Web page at: http://www.3c0c-annobon.com

5J0, SAN ANDRES ISLAND (6m Op). Dennis, K7BV, will once again activate San Andres Island (NA-033, ARLHS SAP-002, WLOTA 2990, WW Loc. EK92DM) between June 10-21st. This will be his third time in activating HK0-land on 6 meters. He was there during the "Es seasons" in 2008 and 2009, but he has mixed feelings about the operations and propagation. He hopes that "three time is a charm", and plans to use his new M2 6M8GJ 8 element 42' boom yagi and KW amplifier. Dennis is sure that he will be able to add many more of the deserving in the log for this DXCC entity. Visit his Web page at: http://www.qth.com/k7bv/caribe2010

6W, SENEGAL. William, F1TZG, will once again be active as 6W/F1TZG from Somone between May 8-15th. He will be operating from Jean- Francois's, 6W7RV, radio shack on 160-6 meters using SSB only. QSL via his home callsign.

8S, SWEDEN (Special Event - Museum Ships Weekend, June 5-6th). Look for the Missile Ship R-142 "YSTAD", a museum vessel, to be activated with her callsign 8S8RBB, from her base at Galo, east of Stockholm. They plan to be active for about 24 hours, from Saturday morning, June 5th, until Sunday morning. Activity will be on 160-10 meters using CW and SSB. Chief operators: Stellan/SM0LQB, assisted by Hans/SM0BYD and possibly one more. PLEASE QSL via the Bureau. Visit their home page at: http://www.navyradio.se

9A, CROATIA. Zrinko (Zik), VE3ZIK/DO7ZZ, will be once again be active as 9A/VE3ZIK between May 12-17th. Activity will take place during his spare

time, and more IOTA/IOCA activity can be expected during the summer of 2010. QSL via DO7ZZ, by the Bureau (answer 100%), LoTW and eQSL also "OK". E-mail requests are also available at: ve3zik@gmail.com

AY/LR/LV/LS/LT, ARGENTINA (Special Event). Argentina will be celebrating their "May Bicentennial Revolution" this month. In commemoration, the Radio Club Argentino (RCA), National IARU Member Society announced that all Argentine radio amateurs will be allowed to change their callsign's prefixes between May 22-25th, according to the following criteria:
LU stations will shift their prefixes to LR
LW to LV
AZ to LT
Amateur Radio Clubs and Associations to LS
Scouts Groups, Schools and any other institutions holding a license to AY.
A special two class award will be issued to radio amateurs and SWL's worldwide who achieve a certain number of prefixes. Since this event is a very special occasion for Argentina, they invite everybody to join them on the air. For more details, please visit: http://www.lu4aa.org/bi/awards.htm

CORRECTION TO NCDXF PRESS RELEASE. Glenn, W0GJ, Vice President of NCDXF, reports: "This 20 April 2010 NCDXF Press Release below (see OPDX.957) has an error in the second sentence of the first paragraph:
W6OAT (previously retired) should be K6RIM (who is "newly retired")
Sorry!..... Glenn W0GJ"

CS5, PORTUGAL (Special Event). Look for CS5FAT, the official callsign of the Fatima, to be active between May 10-13th, during the visit of Papa Bento XVI to the Sanctuary of Fatima and Portugal. QSL via the Bureau, direct to CT6ARL or the address on QRZ.com.

CU3, AZORES. Members of Azores DX Group will be active as CU3DX/p from Imperio de Santa Barbara (IOTA EU-175, WCA CT-01650, DMHP AZ-158, IDES 042, DMP 4302 and DDFP AGH-13) on May 17th. Operators mentioned are: Jose/CU3AV, Manuel/CU3BL, Luis/CU3BT, Durval/CU3BW, Alvaro/CU3EE, Leonel/CU3EJ and Artur/CU3FQ. QSL via CU3EJ, by the Bureau or direct.

D2, ANGOLA. Sergey, UT1EO, is expected to be active as D2QR from Lunda Norte Province in northeast Angola until April 22nd, 2011. He is currently installing antennas and is awaiting his TS450SAT transceiver. Activity will be on 40-10 meters on all modes. QSL via RW6HS.

D2, ANGOLA. Andrew, G7COD, has been sent to Luanda, the capital of the Republic of Angola, on a work assignment for the next 12 months. He has also been issued the callsign D2AK (since May 7th), and expects to be active at various times (both day and night) on 80-10 meters, including the 30/17/12 meter bands, using CW and SSB. So far no QSNs have been reported. Suggested frequencies are (+/- QRM):
CW - 3503, 7003, 10103, 14003, 18073, 21003, 24893 and 28003 kHz
SSB - 7063, 14190, 18133, 21253, 24953 and 28500 kHz
QSL only direct to G7COD: Andrew Kitchen, 4 Dairy Cottage, Newton Hall

Farm, Bank Newton, Skipton, North Yorkshire, BD23 3NT., England - U.K.
(Please send a SAE with 2 USDs. NO IRCs). He does not participate in the
LoTW, but he does QSL via eQSL. For more details see (D2AK) on QRZ.com.
A Web site will be available soon at: http://www.d2ak.freewebspace.com

DAYTON HAMVENTION DX HOSPITALITY SUITE. The Northern Ohio DX Association
(along with Janeen Hire, W8ZET) will once again sponsor a Hospitality
Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the
10th Club Floor of the Crowne Plaza Hotel on Thursday, Friday and Saturday
evenings (Look for signs!). All DXers/Contesters are welcome. Munchies
and refreshments will be available. Come and meet the members and friends
of NODXA.

DX0, SPRATLY ISLANDS (Update). A list of operators, for the 2011 DX-
pedition to Spratly Islands as DX0DX, have been announced. The following
operators will be active from Pagasa Island (AS-051) for three weeks in
January of 2011 are: Ed/4F1OZ, Fidel/4F8BOF, Eduardo/DU1EV, Dindo/DV1DIN,
Kaye/DV9XO, Oscar/EA1DR, George/EA2TA, Christian/EA3NT, Vincent/F4BKV,
Toshihiko/JA8BMK, San/K5YY, Arnold/N6HC, Robert/N6OX, Bjorn/SM0MDG,
Josette/VK2FXGR, Allan/VK2GR, Peter/VK3FGRC, Nikolaas/VK3FNIK, Keith/VK3FT,
Chris/VK3FY, Roger/VK3FZ, Jim/VK3PC, Wally/VK6YS, Stuie/VK8NSB and Charlie/
W6KK. More details should be forthcoming.

DXCC NEWS.....
* There will be card checking done at the Dayton Hamvention during all
operating hours of the convention Friday, Saturday and Sunday, May
14-16th, 2010. There are some important guidelines listed at the
following Web page that will help you make the card checking process
run smoothly at: http://www.arrl.org/awards-blog

SPECIAL LOTW NOTE: If you plan to do a Hybrid Application (LoTW with
paper) please be sure to do the LoTW element only 1-2 days before
leaving for the convention. DXCC may also assist you at the booth with
hybrid application, if necessary.

* Bill Moore, NC1L, Awards Branch Manager, reports that the blog is back
up, but he had to start a new one for now. He states, "I have access to
the old blog internally only, and as I can I will move the more
important
(older) postings to the new blog. It can be seen from the DXCC page and
is called 'Awards Blog'. You can create a shortcut to the direct link
at: http://www.arrl.org/awards-blog
Also, DXCC is now on Twitter, called DXCC_Desk."

* Bill Moore, NC1L, Awards Branch Manager, reports: The following
operation is approved for DXCC credit:
YI9PSE – Iraq; 2010 Operation

FP, ST. PIERRE AND MIQUELON. Eric, KV1J, will once again be active as
FP/homecall from Miquelon (NA-032, DIFO FP-002 WLOTA 1417, WW Loc. GN17TC)
between October 25th and November 2nd. Activity will be on 160-6 meters
and 70cm (Satellite AO-51), using CW, SSB, RTTY and PSK31, generally on

the highest frequency band that is open (no permission for 60m). Eric
will also be in the CQWW DX SSB Contest (October 30-31st) as a Single-Op/
High-Power entry. QSL via his home callsign, direct or by the Bureau.
Log will be uploaded to LoTW and eQSL about one week after his return.
Visit Eric's Web page for more details at:
http://www.kv1j.com/fp/october10.html

FS, FRENCH ST. MARTIN. John, K9EL, will once again be active from French
St. Martin (NA-105, DIFO FS-001, WLOTA 0383, Grid Loc. FK88) between
June 8-17th. Activity will be holiday style (on a family vacation) and
he will be operating as FS/K9EL whenever possible. He will be using an
IC7000 and verticals for 80-10 meters, possibly a yagi for 6 meters and
be on mainly CW and SSB. RTTY is possible as well. Skeds welcome. Please
QSL to his home callsign, Bureau cards are "OK".

HK0, SAN ANDRES ISLAND. Anibal, HK3ARR, who has been on the island since
May 7th, is active as HK3ARR/0 until May 11th. He is on holiday so activity
will be very limited. He informs OPDX that "this is mainly a joy trip with
some radio activity." Anibal is staying at the "San Luis Hotel, DeCameron":
http://www.decameron.com/esp/san_andres/san_luis/overview.html
He has with him: Yaesu FT450, Samlec 25Amp, home-made wire dipole for the
following bands: 10/15/20/40 + Fiber Glass Fishing pole (7.5m), Lenovo T60
for CAT + homemade interface for digimodes. He states, "So far I do not
have any schedule for operation, but I am planning to operate at least 2
hours during the day (10, 15, 20) and let see how the nights go (40m)."
QSL via the Bureau to YV5ARR (his Venezuelan callsign). QSL direct using
his direct mail address for HK3ARR (Please include SAE + 1 IRC).

HK0, SAN ANDRES ISLAND. Gerd, DL7VOG, states that his next DX trip in
November 2010 will be to San Andres Island (NA-033) as HK0GU. He is
expected to make side trip to other IOTA groups in Colombia. Announcement
is forthcoming.

IOTA NEWS.....
AS-115. A team of Czech operators will activate the Turkish Island of
Suluada in the Mediterranean Sea using the special callsign
TC07DX between May 15&#65533;19th. Operators mentioned are:
Pavel/TA2ZAF
(OK1MU), Vlada/OK1CW, Franta/OK1DF, Zdenek/OK1FIA, Slavek/OK1TN,
Zdeno/OK2ZW and Honza/OK2ZAW. The group will have two stations
on the air using CW and SSB, with some planned hours of operation
on RTTY. Radio equipment to be used are: two IC-746PRO and two
TS-480SAT with two 800W amps. Antennas are: 5 band Spiderbeam,
multiband vertical AV-640, loops for 30/40m, 2 elements on 50
MHz HB9CV and trapped dipole for 20/15/10 meters. QSL via OK2GZ,
by the Bureau or direct or via E-mail request. In case of an
InterNet connection on the island, they plan to have online
logs updated regularly. Visit the TC07DX Web site at:
http://www.okdxf.eu/expedice/tc07dx

EU-110. Members of the Modena DX Italy Team is organizing a DXpedition to Sveti Nikola Island in the Croatian Istra Island Group between May 13-17th. Operators will be signing 9A/homecall. Activity will be on the HF bands, including 30/17/12 meters, using CW, SSB, PSK and RTTY modes, and 100 watts into vertical antennas. Operators mentioned are: Sergio/IZ4BBF, Augusto/ IK4RQJ and Tony/IK2SNG. QSL via their home callsigns. Cards will be printed within 3 months after DXpedition.

EU-124. Operators Adrian/M3TVF, Mark/M0MTT and Adrian/MW0ZEN will be active as GB0FHI from Flat Holm Island, in the Bristal Channel off the coast of Wales, between May 29-30th. Activity will be on the HF bands between 1000-0000z each day. QSL via M3TVF.

EU-167. Operators Julio/CT1ZW, Jorge/CT1BOL, Manuel/CT1DSC, Jose/CT1CJJ, Jose/CT1EEB, Paulo/CT1EFS, Filipe/CT1ILT, Miguel/CT1IUA and Mino/CT1IZW will be active as CS2K from Ilha do Pessegueiro between July 23-25th. Activity will include the RSGB IOTA Contest (July 24-25th) as a Multi-Single/Low-Power entry. For more details, see: http://www.rep.pt/ct1ilt/cs2k
ADDED NOTE: Expect some activity on the bands before the contest by the operators using homecall/p.

EU-172. (Update) A group of the Belgian UBA Section Diest operators will be active as OZ5K from Langeland Island, Denmark, between May 12-18th. Activity will be on all HF bands, 80-10 meters and also 2 meters. QSL via ON4AMM, direct or by the Bureau. Operators mentioned are: Dominic/ON4AZP, Michel/ON4CAQ, Francois/ON6VP, Herman/ON7FH and Maurice/ON7KS. ADDED NOTE: Operators will also activate Lolland Island (EU-029) for one day. The Web page for this activity is at: http://www.on4dst.be/iota_eu172_1.html

NA-067. Operators Dan/N3ND, Nathan/N4YDU, Keith/W4KAZ and Jack/W0UCE will be active as N4A from Core Banks, North Carolina, between July 23-25th. Activity will be on 80-10 meters using CW and SSB. They will also participate in the RSGB IOTA Contest (July 24-25th) as a Multi-Single/Low-Power entry. QSL via N4YDU.

SA-041. (Update) Ciro, PY7ZY, informs OPDX that he was on Sao Luis Island during May 5-6th, verifying the operational preparations for the upcoming PW8J DXpedition to Lencois Island next June (see OPDX.945). We were advised that "Ciro met with the company entrusted of personnels and material transportation being defined
the whole itinerary of the trip. Materials as antennas, cables and generators are already in Sao Luis City awaiting the date of the embarkment, that it will be at 0700z on June 8th, as drifted." The group invites you to visit their Web page to see the itinerary and to inform everyone that they are still looking for support by DX groups and individuals to help off-set their expenses. Remember this is the 2nd most wanted IOTA group (Maranhao State West Group) in South America. Visit their Web

page at: http://www.pw8j.com

SA-071. A total of twelve operators (made up of two teams) will activate the Island of Moela Island (WLOTA 1335) between July 2-4th. Each team will use a different callsign.
PW2K - A team of 9 operators will have 2 stations on the air. Operators mentioned are: Gerson/PY2AC, Ric/PY2DEL, Fabio/ PY2XM, Walter/PY2IAY, Rogerio/PY2OE, Julio/PY2XV, Rabelo/PY2AN, Tony/PY2DY and Alex/PY2WAS.

PS2G - Another team, of only three operators, will participate in the 2010 WLOTA Contest (July 3-4th). Operators mentioned are: Ric/PY2EL, Carlos/PY2VM and Waldir/PY2WC. QSL both callsign to PY2WAS. This DXpedition was organized and supported by the LABRE-SP (the Brazilian Ham Radio Association - Section Sao Paulo), especially their president Aramir, PY2BY, and the MARINHA DO BRASIL (Brazilian Navy).

KH6BZF PROPAGATION FORECAST/REPORT (For May 10-16th)....
May 10 AN SOLAR REFERENCE KEYS
May 11 AN --------------------
May 12 AN BN - Below Normal
May 13 AN AN - Above Normal/Geomagnetic Level is QUIET
May 14 AN LN - Low Normal
May 15 AN HN - High Normal/Geomagnetic Level is UNSETTLED
May 16 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between 0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between 7-16 and "K" index will be 3 or less

OH0, ALAND ISLAND. Members of the Finish JKR Radio Club will be active as OH0Z during the CQWW DX RTTY Contest (September 25-26th) as a Multi-Single (possibly Multi-2, depending propagation) entry. QSL via W0MM.

PC100, THE NETHERLANDS (Special Event). Look for Frans, PC2F, to activate special event callsign PC100AR between May 29th and June 26th. Activity is to celebrate 100th anniversary (June 24, 1910) of the famous Italian car marque A.L.F.A. (Anonima Lombarda Fabbrica Automobili) later called Alfa Romeo. Activity will be on the HF bands. Frans is a big Alfa Romeo fan (so called ALFIST), and a collector of A.R. model-cars, A.R. post stamps and some other stuff, as well as owner of two old time Alfa Romeo cars (Giulia 1300TI and Giulia Spider 1600). A special QSL card will be made after this period and will be sent via the Bureau or direct (send SAE with 1€, 2$ or 1 new IRC). Also, an eQSL will be sent.

PJ7, ST. MAARTEN. Paul, K1XM, has announced that he will be leading a group of "Yankee Clipper Contest Club" members to St. Maarten in early October.

Activity will take place on or before October 10th, from the QTH of Mort, PJ7UQ. Operations are planned for 160-10 meters, using CW, SSB and RTTY. QSL via KQ1F. Look for more details, including the callsign, to be forthcoming.

QSL INFO AND NEWS.....
QSL CO4SM via direct to HA3JB. Operator is Eddy on IOTA NA-056. Address for HA3JB: Gabor Kutasi, H-8601 Siofok, P.O.Box 243, Hungary - Europe.
Gab's Web page is: http://www.ha3jb.com
Gab states, "Please write on your QSL card your E-mail address, if I received your QSL I will send an E-mail feedback."

OR8EU via UBA Bureau. Activity was by the European Union Amateur Radio Club in Brussels (OR5EU) on May 8th. On May 8th, the European Institutions are open to the public to show their activity and to celebrate the project of the European integration. More details available at: http://europa.eu/festivalofeurope/index_en.htm

The logs for the recent TS8P operation to Djerba Island (IOTA AF-083, WFFA 3VFF-008, ARLHS TUN-022 and WLOTA L-1394) are now available online at: http://www.i8lwl.it
The TS8P team is very happy to make 18,000 QSOs from Djerba Island.
See some pictures at: http://www.mdxc.org
QSL TS8P by the Bureau, or direct w/SASE to IK7JWX: Alfredo De Nisi, Vico della cavallerizza, 4-D, 73100 Lecce, Italy.

QSLS VIA LoTW: TS8P and YN2DD

QSLS RECEIVED VIA MAIL: 5Z0H, 8P9NX, A25NW, C56KR, R1ANR/A and V31RI

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SATELLITE DX ON FO-29! John, K8YSE, reports that FO-29 is in a 1300 km high orbit these days when it is between Europe and the northeastern part of the United States. The best pass is in the morning in the 0730-0930z time frame. Stations EA1BYC, EA1SAL, EA3DME, G7SVF, OZ1MY, PA1TNO, EA1QS, F1UGK, F6HRO, M0ITF, CU2JX, F1BBU, DD9HH, EA1BCA and OH7FES have been heard in Ohio (Grid EN91DH). There is also an evening pass for Europe around 2200z. FO-29 will not be in this high orbit forever, so now is the time to take advantage of the excellent signal from this SSB/CW linear bird.
ADDED NOTE: Check out John's satellite Web page for audio recordings as well as Great Circle Grid maps. If you want your map displayed on the site, send your list of girds confirmed and grids worked but not confirmed in a ".txt" file to his QRZ.com E-mail address. The satellite Web site is at: http://www.papays.com/sat
Stop by the Northern Ohio DX Association Hospitality Suite at the Crowne Plaza at the Dayton Hamvention and talk Satellite DX with K8YSE.

SILENT KEY. OPDX was informed that Glenn Gilley, KD5EZM, of Camden, TN, became a Silent Key (KS) on April 3rd, 2010, at the age of 74. OPDX and its reader send out our deepest sympathy to the family and friends of KD5EZM.

T30, WESTERN KIRIBATI (Update). Haru, JA1XGI/W8XGI, informs OPDX that he will be active once again from Western Kiribati as T30XG between June 3-9th. Activity will be on 40-6 meters, including 30/17/12m, using CW and the Digital modes. QSL via JA1XGI, direct or by the Bureau. He now has a Web page available at: http://island.geocities.jp/t30xg

TL, CENTRAL AFRICAN REPUBLIC. Just a reminder that Jan/DJ8NK and Paul/ F6EXV will be active as guest operators from Christian's, TL0A, station between May 13-26th. They plan to have 2 stations on the air simultaneously. Look for Jan to focus his activities on RTTY, while Paul will be on CW. Chris will continue his SSB operation and CW/RTTY from time to time after May 26th. Bands of activity will be on 40-6 meters, maybe some 160/80m (it is late in the season for the low bands, plus it is the rainy season in TL with daily storms). Operators will use standard DX frequencies, and always run "SPLIT". PLEASE NOTE THE QSL INFO! QSL direct to the QRZ.com TL0A address. "Neither Jan, nor Paul, will be able to confirm any contact. So we repeat, QSL ONLY via TL0A.

TP2, FRANCE (New Beacon). Francis, F6FQK, informs that a new beacon is now active from the Council of Europe Radio Amateur Club. Beacon details are: - TP2CE/B callsign - Power: 450 mW
- Frequency: 28.222.8 MHz - Antenna GP - R7000
All reports will be greatly appreciated on the Web site at: http://ewwa.free.fr

UFT DX MAIL LIST NOW QRT. OPDX is sad to report that Maurice, F5NQL, Editor/Manager of the Union Francaise des Telegraphistes (UFT) DX Mailing List for the last ten year, has announced that he can no longer maintain the list "due to some personal reasons". The UFT Mailing List ended effective on May 4th. OPDX and its readers would like to thank Maurice for all his years of devotion and info to the DX community.

VK0M, MACQUARIE ISLAND. Denis, ZL4DB, will be active as VK0/ZL4DB during a three month stay on Macquarie Island. Exact dates have not yet been announced. Activity will be SSB only. QSL via ZL4PW. Please note that Denis is not an experienced DXer, but is there involved in pest eradication (to curb the rabbit and rat population) on the island. Also, Macquarie Island is ranked #15 in The DX Magazine's "2009 Most Needed Countries Survey" (world-wide) list.

VP2M, MONTSERRAT. John, KB4CRT, will once again be active as VP2MRT from Gingerbread Hill, St. Peters Parish, Montserrat (NA-103, WLOTA 1475, WW Loc. FK86VS) between June 9-19th. Activity will be on 40-2 meters using CW, SSB, possibly PSK, and the June VHF Contest. He states that he will be running 100w, QRP 5w, HFpack 5w or 10w. QSL via KB4CRT, direct (w/SASE or DX 2GS). LoTW is "OK". His E-mail address for skeds operations via: vp2mrt2010@windstream.net

WFF GREENDAY 2010 CONTEST (A "Green" Day of activity under Biological Diversity Year). Radio amateurs throughout the world are invited to join in the "WFF GreenDay 2010" in having QSOs with radio stations working from various territories of the national natural parks and reserves of the world [Especially Protected Nature Territories (EPNT) &#65533; included

into the WFF Directory (see WFF Directory: http://www.wff44.com/en/list/)],
between June 12-13th. Activity is to promote the whole world to protect
the nature and environment. For more details, visit the World Flora Fauna
(WFF) Web page at: http://wff44.com/en

XV2, VIETNAM. Larry, W6NWS, will be active as XV2W between May 15th and
June 9th. Activity will include the CQWW WPX CW Contest (May 29-30th).
QSL via his home callsigns or LoTW.

ZD8, ASCENSION ISLAND. Takao, JE1WVQ, will be active as ZD8J from George-
town on Ascension Island (AF-003) between June 2-8th. QSL via his home
callsign.

ZS8M, MARION ISLAND (Update). Pierre, ZS1HF, on Marion Island (AF-021),
is expected to hit the air waves as ZS8M sometime this week or weekend.

(e-mail: dl7voa@darc.de)

D2 - ANGOLA
Andrew,G7COD, is staying in Luanda, the capital of Angola, since May 7.
He received his licence with the callsign D2AK and plans to be active
as much as possible during the next twelve months. Andrew wants to work
in SSB and CW on 80m-10m with 100 watts and inverted vee antennas.
His preferred frequencies are:
SSB: 7063, 14190, 18133, 21253, 24953, 28500 kHz
CW: 3503, 7003, 10103, 14003, 18073, 21003, 24893, 28003 kHz.
Andrew prefers QSL cards direct via Andrew Kitchen, 4 Dairy Cottage,
Newton Hall Farm, Bank Newton Skipton, North Yorkshire, BD23 3NT,
Great Britain. He will also answer eQSLs.

FK - FRENCH NEW CALEDONIA, OC-033
Don,VK2DON, and Curt,W3HQ, will be QRV as FK/W3HQ from Lifou belonging
to the Loyalty Islands (OC-033) in CW on 40m/30m/20m from May 13-16.
QSLs via W3HQ.

OH0 - ALAND ISLANDS, EU-002
OH0/PA2A, OH0/PA2AM, OH0/PA2VMA, OH0/PA3ALK, OH0/PA3BAG, OH0/PA0VHA and
OH0/PB5A will be active from Eckero (EU-002) working with three to four
stations in CW/SSB/RTTY on all bands (including 6m) from May 15-28.
QSLs via homecall. More information online at: http://www.pi4cc.nl

TA - TURKEY, AS-115
Vlada,OK1CW, Franta,OK1DF, Zdenek,OK1FIA, Slavek,OK1TN, Honza,OK2ZAW,
Zdeno,OK2ZW, and Pavel,TA2ZAF (OK1MU), will be active with two stations
in CW, SSB and some RTTY signing TC07DX from Suluada (AS-115) from
May 15-19. QSLs direct or via bureau to OK2GZ.
See also: http://www.okdxf.eu/expedice/tc07en/www

TK - CORSICA, EU-014
Alex,TK/IW5ELA, and Marco,TK/I5KOVI, are active in CW and SSB on
40m-12m from Calvi from May 12-16. They are working in holiday style

with 100 watts, verticals and a loop for 15m.
QSLs via bureau or direct to their homecalls.

TL - CENTRAL AFRICAN REPUBLIC
Jan,DJ8NK, and Paul,F6EXV, are going to visit Christian,TL0A, from May 13-26. They will use his callsign mainly in RTTY and on 40m-6m. If the conditions are good they want to try also 80m and 160m. Christian will leave the country in July and is expected to start his new job in Niger in September. He might show up as 5U5U from there.

VK0/M - MACQUARIE ISLAND, AN-005
Denis,ZL4DB, is working on Macqarie Island (AN-005) for the next three months. He is not an experienced DXer and will visit his shack from time to time to make a few SSB QSOs as VK0/ZL4DB. His QSL manager is Paul,ZL4PW, and he stays in contact with Denis via e-mail.
Macquarie is on rank 15 of the world's most wanted DXCC entities.

XV - VIETNAM
Larry,W6NWS will show up as XV2W from Vietnam between May 15 and Jun 9. He also plans to join the WPX CW and the SEANET Contest.
QSLs via bureau, direct or LoTW to his homecall.

3A - MONACO
John,3A/K5HGX, is active on the HF bands until May 17. QSLs via K5HGX.

3C - EQUATORIAL GUINEA, AF-010
Prior to their DXpedition to Annobon Island (3C0C) Elmo,EA5BYP, and Javi,EA5KM, are going to activate Bioko Island (AF-010) for three days signing 3C9B in SSB, CW and RTTY during the mid of May. QSL via EA7FTR.
An exact date has not been published yet but we will keep you informed about 3C0C in the next DX Newsletter.

6W - SENEGAL
William,6W/F1TZG, is working in SSB on 160m-6m from the shack of Jean-Francois,6W7RV, in Somone from May 8-15. QSLs via F1TZG.

7X - ALGERIA
Some members of the Great Desert of the World Djelfa Amateur Radio Club (7X2VFK) will use the special callsign 7U3GDW from May 17-22. All QSOs with this special event station will be confirmed with an award instead of QSL cards via 7X2DD, PO Box 467, CP 17000 Djelfa, Algeria.

9A - CROATIA
OM Zrinko (Zik),DO7ZZ, is QRV again from Croatia signing 9A/VE3ZIK from May 12-17. This is a preparation for his planned summer activities from Croatia (IOTA/IOCA/WFF). QSL via bureau to DO7ZZ, eQSL or LoTW.
Send your e-mail requests for the QSLs to: ve3zik@gmail.com

9H - MALTA, EU-023
9H3TK is the callsign of SP5NVX and SQ5NWA from May 12-18. They work in SSB and RTTY on 40m/20m/17m/15m from Comino Island (EU-023).
QSLs via SQ5NWA.

PACIFIC ODYSSEY 2010
Ukrainian DXpeditioners Team (UDXT) members Sergey,UX0HX (team leader),
Oleg,RK3FA, Alex,UT5UY, Leo,UR3HR, Yuriy,UT1HF, Oleg,US7UX, and
SWL Yuriy Grushevskiy plan to show up as follows:
5W0OX OC-097 Samoa May 18/19
T31X OC-043 Central Kiribati May 22-Jun 1
T31UR OC-043 Central Kiribati May 22-Jun 1
ZK3X OC-048 Tokelau Jun 2-6
Activities will take place in all modes and bands but their main focus
lies on the activation of T31 (Kanton Island/Phoenix Islands Group)
which is ranking seventh in Europe and 19th in the world.
Following frequencies were announced for all four callsigns:
BAND CW SSB DIGITAL
10m 28.003 28.480 28.083
12m 24.893 24.945 24.923
15m 21.003 21.280 21.083
17m 18.073 18.145 18.103
20m 14.003 14.190 14.083
30m 10.103 --- 10.143
40m 7.003 7.080 7.035
80m 3.503 3.780 3.583
160m 1.823 1.845 ---
Their pilot station is UT7QF (ut7qf@a-teleport.com). QSL cards for all
calls should be sent to UR3HR via bureau or direct to Leonid Babich,
PO Box 55, Poltava, 36000, Ukraine.
More information about the DXpedition itself and an online log (after
the DXpedition) can be found on their website:
http://www.uz1hz.com/pacificodyssey.html

BULGARIA, SPECIAL EVENT STATION
LZ2010KM is activated during May to celebrate the St. Kyril and
Methodius day on May 24. The two brothers Cyril and Methodius are
considered the inventors of the cyrillic alphabet und May 24 is one
of Bulgaria's most important national holidays.
QSLs via bureau, direct or LoTW to LZ1PJ.
More information can be found online at: http://www.qrz.com/db/LZ2010KM

KAZAKHSTAN, SPECIAL EVENT STATION
OM Vadim,UN7FW, is signing UP25F until Nov 30 to celebrate the
25th anniversary of the Ekibastuz coal mine. The QSL manager is IK2QPR.

PORTUGAL, SPECIAL EVENT STATIONS
Members of the "Associacao de Radioamadores do Distrito de Leiria" are
signing CS5FAT until May 13 to mark the visit of Pope Benedikt XVI. in
Fatima. QSL via CT6ARL, via bureau preferred.

CS2HD is QRV from the Harley Davidson meeting in Tavira from May 12-16.
QSL via CT2FPE.

DXCC: The recent YI9PSE DXpedition to Iraq is accepted for DXCC credit now.

PIRATE: The station which claimed to be 3B8BOA and 3B8/F4BOA mostly on 12m,
15m and 20m was a pirate. The holder of the licence is Joel Albert

Vallee,F4BOA, and is momentarily staying in France.

EP4ZG announced on May 2 that his QSL manager is UY0ZG. UY0ZG states
that this activity was fake as well.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

May 12-16: King of Spain Contest
May 13: QRP Minimal Art Session
May 15/16: MMAA CW Contest, see: http://www.powerline.com.br/cwjf

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-110, 9A, Istria Group: Sergio,IZ4BBF, Augusto,IK4RQJ, and Antonio,IK2SNG,
will sign 9A/homecalls from Sveti Nikola Island from May 13-17.
QSLs via homecalls (direct/bureau).

EU-172, OZ, Jylland East & Fyn Group: A group of Belgian OMs will be QRV as
OZ5K from Langeland (DIA FY-19) from May 12-18. If everything works
fine they will also try to activate Lolland (EU-029, WLOTA LH 2773) for
one day. QSL via ON4AMM (direct/bureau).

Harry,OZ/PA1H, and Nico,OZ/PA7PA, will be QRV from Langoe Island from
May 15-24. QSLs via homecalls (direct/bureau).

Tyrrhenian Sea sailing trip: Tomi,HA4DX, is on a sailing trip in the
Tyrrhenian Sea and will show up on the bands from May 15-22 as follows:
May 15 IA5/HA4DX EU-028 Elba Island
May 16 IA5/HA4DX EU-028 Capraia Island
May 17-18 TK/HA4DX EU-014 Corsica Island
May 19 TK/HA4DX EU-164 Giraglia Island
May 20 IA5/HA4DX EU-028 Elba Island

2nd Algarve Lighthouse Activity: The "Algarve STAR DX Team" is going to
activate all six lighthouses at the Algarve (southern Portugal) at the
same time with altogether sixteen operators:
CQ72LHA - Ponta do Altar Lighthouse
CQ72LHM - St. Maria LH (Culatra Island)
CQ72LHP - Ponta da Piedade Lighthouse
CQ72LHR - Vila Real St. Antonio LH
CQ72LHV - S.Vicente Lighthouse
CQ72LHZ - Alfanzina Lighthouse
For more information visit: http://algarvedx.com

Lighthouse activities (WLOTA/ARLHS/ILLW)

FK/W3HQ LH 0578 Lifou May 13-16

New beacon of the Council of Europe Radio Amateur Club

TP2CE/B on 28222.8 kHz is a new beacon operated by the Council of Europe
Radio Amateur Club. Its power is 450 mW and the antenna is a R7000 vertical.
Reception reports are welcome. For more information see: http://ewwa.free.fr

"UFT DX Mailing List" discontinued

Maurice,F5NQL, published the UFT DX Mailing List of the "Union Francaise des Telegraphistes" for the last ten years. The last bulletin was published on May 4, 2010, and we thank Maurice for all the interesting and up-to-date information.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, Les Nouvelles DX, CT1GFK, Pete's DX Newsdesk, DF6EX (WIN QSL), DH4PSG, DJ5AV, DJ6VM, DK8JB, DL1SBF, DL7VOA, DM1TT, DO3ME, DO7ZZ, F5NQL, F6FQK, HA0HW, HA3JB, HB9CRV, K2PF, NG3K, UT5UY, 3B8CF and others.

The German PDF version can be found on the DARC homepage at:

AF gain? That's a new one for me. I did a search for AF gain and found
this site which I'm currently trying to dig through.

http://wiki.contesting.com/index.php/Setting_receiver_gain_controls#Set_the_AF_gain_level

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

May 12, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Can You Hear Me Now? - European EME Contest
- WRTC-2010 - New West Coast Team
- Goonie Birds - Flown the Coop But Not Forgotten
- Contest TV Goes Live
- WPX CW Claimed Scores Online
- Compounding the Problem
- Amplifying Crystals
- Dayton Doings

NEW HF OPERATORS - THINGS TO DO

If you're not going to the Dayton Hamvention, pick up some of the South
American countries in the All America CW contest. South America is
under-represented on CW (although that is changing) and this is a good
way to pick up needed band-mode contacts for 5BDXCC.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Tony Rogozinski is W4OI/HK1AR and hasn't been N7BG in quite a while!
(Thanks, Wayne N7NG)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

May 15-16

- Portuguese Navy Day--Digital
- EU PSK DX Contest
- His Majesty King of Spain Contest--CW
- All America Contest--CW
- Worked All Britain - LF Phone--Phone
```

May 22-23

- EU EME Contest
- Baltic Contest

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

A flash WRTC-2010 <http://www.wrtc2010.ru/> news item - there is a new West Coast USA team! Team Leader, Mitch K7RL has had to withdraw from the competition and has been replaced by Bob K6XX, according to the WRTC-2010 selection procedures. At Monday's Northern California Contest Club meeting, K6XX announced the selection of Rick N6XI, to be his team mate. Good luck, guys!

In other WRTC news, the Contest Update recently published a team photo of Marv K5AW and Terry N4TZ, observing that they had never met except over the air. Well, they did manage to get together at Marv's QTH for the recent Russian DX Contest and worked out a few things, taking advantage of the contest's similar format to WRTC. "The contest itself was a great chance to get a feel for how to use two radios effectively when only one can transmit at a time. It made for a few awkward moments but by and large it turned out to work better than we anticipated, especially when doing S&P on both radios. Things get a little more complicated when running on one radio (much less two), especially when the rate goes up." There were some hardware issues to work out, as you might imagine, but the most important item learned was, "We found we got along well together and are good partners...and are both looking forward to having a great time at WRTC 2010!"

Dean Straw N6BV (former ARRL Antenna Book editor and author of the HFTA terrain analysis software), and Radioware announce the release of "N6BV Propagation Predictions <http://www.radio-ware.com/books/N6BV.html>" software on CD-ROM. Dean has put a lot of effort into this new software package. HF Contesters and DXpedition planners will find it useful in figuring out how to be on the right band at the right time. The CD-ROM will be available at the Dayton Hamvention, too.

The good folks behind DX Summit <http://www.dxsummit.fi/> have launched the "My Summit" feature, allowing you to customize your DX Summit interface and generate emailed notifications of rare station appearances. There are more features - take a look - the new battery-operated notification add-on looks quite useful! (Thanks, Martti OH2BH)

On April 15 the "LU Contest Group <http://www.lucg.com.ar/>" group celebrated its 10th anniversary. The LUCG has over 200 members, including most of the contesters in Argentina, and colleagues in seven countries. 80 members attended the celebration on April 24, held at one of Argentina's biggest contest stations - BadPower - LT1F, located in Alvarez, Santa Fe Province. Claudio LU7DW made the trip from Canada just for this event - enhorabuena, amigos! (Thanks, Diego LU8ADX and Hector XE2K)

Gonset is a storied name in ham radio - the famed "Goonie Birds <http://www.ominous-valve.com/ba-mfrs.html#GONSET>" were popular means of getting on the VHF bands "back in the day". Even though the Goonie Birds mostly perch on the shelf these days, the family name is still very active. Bob Gonsett W6VR carries on the family traditions as described by Radio World's online magazine <http://www.rwonline.com/article/100300>.

>From the Amateur Radio Newsline <http://www.arnewsline.org/> Report 1708 we learn that the big KP4AO EME weekend logged well over 200 stations in nearly 60 DXCC entities! Team leader K1JT reports huge pileups of signals coming off the Moon, so the completed QSO totals represent only a fraction of the workable signals. The KP4AO team will be going through the recordings to pull out more call signs.

You've heard and heard of frequency fights, but how about longitude fights? Bob N6TV relied this news item about an out-of-control broadcast satellite <http://www.aolnews.com/tech/article/zombie-satellite-galaxy-15-wins-first-round-against-the-humans/19467813> starting to menace other Clarke Orbit (geosynchronous) inhabitants. I guess falling asleep on the keying paddles isn't so bad after all!

Frequent contributor to the Contest Update, Jim K1TN recently donated a set of vintage DX Bulletins <http://www.arrl.org/news/arrl-receives-archive-set-of-em-the-dx-bulletin-em> to the ARRL. Readers of that newsletter will fondly remember the writings of Chod Harris, VP2ML, your editor's first ham radio publisher.

The voting is done and the cancer-fighting invention of John Kanzius K3TUP <http://yourerie.com/fulltext?nxd_id=112675> has been selected as the recipient of a $250,000 development grant! John's wife, Marianne, wishes to thank all of the hams that supported the project with their votes. (Thanks, Tim K3LR)

Web Site of the Week - Todd KC9BQA has published an eight-part series of articles <http://kc9bqa.com/?p=2641> aimed at newcomers to VHF+ contesting. The articles are designed to help someone get started with contests above 50 MHz. As Todd says, "If you want more VHF/UHF contest activity, then spread the word!"

WORD TO THE WISE

Apply the Power of Early - Dave, N9KT of Industrial Communication Engineers <http://www.iceradioproducts.com/> (I.C.E.) wrote to let me know that the company will be closed from June 21 through July 2 for the annual factory shutdown and remote Field Day event. As a result, they will be unable to fulfill last-minute orders by Field Day Chairpersons for band-pass filters and the like. This is good advice for Field Day and for all contests - upgrade the contesting software before Friday afternoon, take inventory and keep spare parts on hand, and do a station checkout with enough time to effect repairs before The

Big Day. Why wait until that last minute?

==> SIGHTS AND SOUNDS

ARRL "Contest TV" makes its prime-time debut with this online video <http://www.arrl.org/multimedia> featuring ARRL Contest Branch Manager, Sean KX9X and his goofy sidekick. Scroll down to the "Contest TV" link and enjoy!

Hector XE2K was very active with his digital camera and has posted many Visalia International DX Convention photos <http://picasaweb.google.com/Hector.xe2k/VISALIA2010XE2KPHOTOS> on-line for all of us to enjoy!

In the "Be Careful What You Wish For Department", Spaceweather.com <http://spaceweather.com/> reports, "This weekend, magnetic fields around sunspot 1069 became unstable and erupted--over and over again. On May 8th alone, the active region produced more than half a dozen flares. High-resolution movies from NASA's Solar Dynamics Observatory show that even the "minor" eruptions were jaw-dropping spectacles."

"Boom-boom! Out go the lights!" Watch as this LORAN tower changes polarization <http://www.youtube.com/watch?v=7zqj1hy9NS8> from vertical to horizontal in just a few seconds! (Thanks, Bob N6TV)

George K5TR notes that it is now easier to randomly browse the eham <http://eham.net> Spotlight photos. Click "Spotlight Gallery" to load pages of photo thumbnails.

I'm not sure the computer application shown in the video on this Web page <http://www.projectblah.info/propetcher> is ready for use as a contest logging program, but it might make a nice QSL designer! (Thanks, Rick KU0W)

==> RESULTS AND RECORDS

The claimed scores for the WPX SSB Contest 2010 <http://www.cqwpx.com/claimed.htm?mode=ph> are now online, representing 4,499 electronic logs received. (Scores from paper logs will be added later in the summer.) Scores can be sorted by continent and category and a search function is included so you can quickly locate a particular score. WPX Contest Director, Randy K5ZD has posted more about the calculation of the scores on his WPX Blog <http://www.cqwpx.com/blog/?p=62>.

OPERATING TIP

Accumulate time to reinforce your skills or, as the German's say, "Ubung macht den meister." (Practice makes the master) Even if it's just an hour here and there, it does keep those neurons limbered up for when you really want to apply them.

==> TECHNICAL TOPICS AND INFORMATION

When you're working away on your antenna system this summer, don't forget to use a small amount of anti-oxidation compound in aluminum-to-aluminum joints. Two of the better known and widely available brands are Penetrox and Noaxlox. Either or both may be available at your local hardware emporia and the latter is available from RadioShack <radioshack.com>.

Jim W7RY posted some photos of his homebrew 8877 amplifier <http://s900.photobucket.com/albums/ac206/w7ry/8877%20Amplifier/>, noting his metalworking technique of using aluminum angle and flat plates from Metal Supermarkets <http://www.metalsupermarkets.com/>. Jim cut the angle with an aluminum cutting blade in his table saw and reports excellent results.

Rick N6RK has posted photos of the bases for his irrigation-pipe vertical antennas - click "Flat falling derrick base" on his home page <http://www.n6rk.com/>. You'll find a lot of good information on his Web site.

Here's a handy reference for wind loading calculations <http://wiki.contesting.com/index.php/Wind_load_calculations> on Wikipedia. (Thanks, Gene AD3F)

Regarding the determination of GPS coordinates, Don W7WLL notes that, "While it may not apply to all counties, I found that [my] county surveyors were willing to provide the coordinates and elevation crosscheck for me. Other county or local government surveyors may also be willing to help if properly approached, and do the same for other amateurs."

Not a knot-knot joke for naught, here are two videos (video 1 <http://www.animatedknots.com/truckers/index.php?LogoImage=LogoGrog.jpg&Website=www.animatedknots.com>
and video 2 <http://www.youtube.com/watch?v=33jpnYqUgBg&feature=related>) showing how to tie knots similar to the "trucker's hitch". This knot is very useful for tensioning ropes. Someone on every ground crew should know it - be ready for Field Day! (Thanks, Grant KZ1W)

The shoveling, troweling, and cleaning are over - how long must you wait for that new tower base to be strong enough to get busy with the antenna work? Jim W6RMK has the answer, "28 days is when the concrete will have reached its "data sheet" spec. It still keeps getting stronger for years. You're [at] about 50% of the 28-day strength in 7 days. You MUST keep the surface wet for the entire cure time." Wet cloths such as old sheets from the thrift store or plastic sheeting with water sprayed underneath can be keep the surface damp. Jim also provided this reference, the Federal Highway Administration's "Guide for curing of portland cement pavements <http://www.fhwa.dot.gov/pavement/pccp/pubs/02099/index.cfm>".

What is that goopy white stuff in the bearings of variable capacitors? It's a lightweight, lithium grease called Lubriplate

<http://www.lubriplate.com/> and, yes, it's still available through lubricant distributors and is often used on bicycles. To remove the grease on old air-variables, try a spin through the dishwasher or a dip in some carburetor cleaner. (Thanks to the QRP-L reflector <http://mailman.qth.net/mailman/listinfo/qrp-l> readers)

Super-capacitors just seem to get better and better in pursuit of battery-like energy densities. Steve AG1YK found this IEEE article <http://spectrum.ieee.org/semiconductors/nanotechnology/better-baking-puts-the-super-in-chipscale-supercapacitor>
on a new process for making them by baking them.

Here's a prescient technical article from the QST archives, titled "The "Transistor" - An Amplifying Crystal". The original can be found in the online QST archives <http://www.arrl.org/arrl-periodicals-archive-search> for 1948 - open to ARRL Members. Do you think those "amplifying crystal" thingies ever caught on? (Thanks, Don N1DG)

Norm W1ITT wrote in with a tip about reducing galling in stainless steel hardware. "We found that if you mix different alloys of stainless in the nuts and bolts, galling was reduced. For example, if you buy 318-series stainless bolts, buy 314 or 316 for the nuts. The numbers don't seem to matter, just so long as they are different. Our theory was that one alloy will have different physical properties from another, and one will give when the other tries to grab. It was not a foolproof cure, but it did cut down on skinned knuckles and bad language."

Technical Web Site of the Week - A recent four-part series of eham <http://eham.net/> articles on propagation is worth a read. It's called "Plasma Physics For the Radio Amateur" by Eric KL7AJ. It covers a lot of the foundational physics not often available to a ham. While you're there, you can check out your editor's modern-day mystery, "Where Does 468 Come From?".

==> CONVERSATION

Dayton Doings

Overheard last year during a little squall, "It's just not Dayton without horizontal rain!" In case you're wondering, here's an online weather forecast for Dayton <http://www.wunderground.com/US/OH/Dayton.html>. As of noon on Tuesday, the probability of precipitation is dropping slightly on Friday and a welcome yellow Sun is peeking out on Saturday with temperatures in the upper-60's. Umbrella or sunscreen? Yes!

The past few years have seen a lot of construction on the way to the Hamvention <http://www.hamvention.org>. Here is a useful, interactive construction-camera-traffic map <http://www.buckeyetraffic.org/>
operated by the State of Ohio. (Thanks, Deb N9SJ)

The two room-fillers of top interest to contesters are:
Antenna Forum - Friday, May 14 - 2:30 to 5:00 pm in Room 1 of the HARA Arena - moderated by Tim Duffy, K3LR
Contesting Forum - Saturday, May 15 - 12:30 to 2:30 pm in Room 1 of the HARA Arena - moderated by Doug Grant, K1DG
You can also download the schedule <http://www.hamvention.org/forums.php> for all Dayton Hamvention forums.

Also of prime interest to contesters, yes, the Kansas City DX Club will be hosting the 30th consecutive running of its annual CW Pileup Competition <http://www.kcdxclub.com/pileupintro.html> at Dayton this year. The event will be held Saturday evening in the Kansas City DX Club's hospitality suite, Room 525 at the Dayton Crowne Plaza Hotel. The tests, lasting about 10 minutes, can be taken anytime from 8:00 pm until Midnight, at which time many excellent prizes will be awarded. Watching the assembled throng salute, cheer, and groan over the posting of a new batch of test results is priceless! (Thanks, Bill K0VBU)

Kenwood is rumored to have a new HF transceiver, succeeding the TS-570, and a new dual-band handheld radio with GPS built-in. More whispers of a new HF radio from Alinco have been making the rounds, but no sightings. A Chinese company, Wouxon <http://www.wouxun.us/>, is reported to be bringing a VHF/UHF dual-band handheld to Dayton, as well.

Don't miss up a chance to wander by the Discover Homebrew demo area, in the North Hall, on Friday and Saturday. Better yet, bring your favorite homebrew project to show off! Sponsored by Hamvention, and supported by the members of the Midwest VHF/UHF Society (MVUS), the demo area is located in booths 179, 180, 191, 192, 203, 204, 215, and 216. AC power and HF (and possibly VHF) antenna access will be available.

If last year's Hamvention is any indication, this year's will be a lot of fun and a big kickoff for the summer hamfest season across the country. See you there!

73, Ward N0AX

==> CONTESTS

May 12 through May 25

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Portuguese Navy Day--Digital, from May 15, 0800Z to May 15, 1500Z. Bands (MHz): 3.5-28. Exchange: RST, serial, CQ zone. Logs due: 20 days. Rules <http://www.nra.pt/>

EU PSK DX Contest--Digital, from May 15, 1200Z to May 16, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and EU area code or serial. Logs due: 30 days. Rules <http://www.eu.srars.org/>

His Majesty King of Spain Contest--CW, from May 15, 1200Z to May 16, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and serial or EA province. Logs due: Jun 10. Rules <http://www.ure.es/>

All America Contest--CW, from May 15, 1500Z to May 16, 2359Z. Bands (MHz): 3.5-28. Exchange: RST, continent, and category. Logs due: Jul 30. Rules <http://www.powerline.com.br/cwjf/eng4.htm>

Worked All Britain - LF Phone--Phone, from May 16, 1000Z to May 16, 1400Z. Bands (MHz): 1.8-7. Exchange: RS, serial, and WAB nr or DXCC entity. Logs due: 21 days. Rules <http://www.worked-all-britain.co.uk/>

Baltic Contest--Phone,CW, from May 22, 2100Z to May 23, 0200Z. Bands (MHz): 3.5. Exchange: RS(T) and serial. Logs due: Jul 1. Rules <http://www.lrsf.lt/bcontest/english/rules_html.htm>

VHF+ CONTESTS

EU EME Contest--Phone,CW, from May 22, 0000Z to May 23, 2400Z. Bands (MHz): 1.2G. Exchange: TMO/RS(T) and "R". Logs due: Jun 12. Rules <http://www.marsport.org.uk/dubus/EMEContest2010.pdf>

==> LOG DUE DATES

May 12 through May 25

May 12 - Araucaria VHF Contest, email logs to: log@avhfc.com, paper logs and diskettes to: (none). Rules <http://www.avhfc.com/rules/avhfc_ee.pdf>

May 13 - 432 MHz Spring Sprint, email logs to: springsprintlogs@gmail.com, paper logs and diskettes to: 2010 Spring Sprints, c/o Chuck Towner, W9KQJ, PO BOX 73, PALATINE, IL 60078-0073, USA. Rules <http://groups.google.com/group/springsprints/web/2010-announcement-rules>

May 14 - SKCC Weekend Sprint, post log summary at: http://www.skccgroup.com/sprint/wes/wes-submit.html, paper logs and diskettes to: (none). Rules <http://www.skccgroup.com/sprint/wes/>

May 15 - Georgia QSO Party, email logs to: gqplogs@iham.us, paper logs and diskettes to: John Laney, K4BAI, PO Box 421, Columbus, GA 31902-0421, USA. Rules <http://gqp.contesting.com/Rules.htm>

May 16 - TARA Skirmish Digital Prefix Contest, email logs to: (none), post log summary at: http://n2ty.org/seasons/tara_dpx_score.html, paper logs and diskettes to: (none). Rules <http://www.n2ty.org/seasons/tara_dpx_rules.html>

May 17 - 10-10 Int. Spring Contest, Digital, email logs to: tentencontest@roadrunner.com, paper logs and diskettes to: Dan Morris, KZ3T, 131 Valencia Lane, Statesville, NC 28625, USA. Rules

<http://www.ten-ten.org/Forms/QSOPartyRulesRevised.pdf>

May 17 - Michigan QSO Party, email logs to: logs@miqp.org, paper logs and diskettes to: Mad River Radio Club, c/o Dave Pruett, 2727 Harris Road, Ypsilanti, MI 48198, USA. Rules <http://www.miqp.org/Rules.htm>

May 17 - Microwave Spring Sprint, email logs to: springsprintlogs@gmail.com, paper logs and diskettes to: 2010 Spring Sprints, c/o Chuck Towner, W9KQJ, PO BOX 73, PALATINE, IL 60078-0073, USA. Rules <http://groups.google.com/group/springsprints/web/2010-announcement-rules>

May 18 - EA-QRP CW Contest, email logs to: eaqrp_test@yahoo.es, paper logs and diskettes to: Vocalia de concursos (Concurso CW), PO Box 17, E-16080, Cuenca, Spain. Rules <http://www.eaqrp.com/concurso/test_eaqrp_cw-en.htm>

May 18 - YU DX Contest, email logs to: yudx@yu1srs.org.rs, paper logs and diskettes to: Savez Radio-amatera Srbije, YU DX Contest, P.O. Box 48, 11001 BEOGRAD, Serbia. Rules <http://www.yu1srs.org.rs/dl/yudx/Files/yudxrules_2010_eng.pdf>

May 19 - Ontario QSO Party, upload log at: http://cco.ve3xd.com/oqp/submitlog.htm, paper logs and diskettes to: Contest Club Ontario, P.O. Box 93149, Burlington, Ontario L7M 4A3, Canada. Rules <http://cco.ve3xd.com/oqp/rules.htm>

May 20 - ES Open HF Championship, email logs to: esopen@erau.ee, paper logs and diskettes to: Toomas Soomets, ES5RY, P O Box 177, Tartu 50002, Estonia. Rules <http://www.erau.ee/modules.php?op=modload&name=Info&file=index&req=viewarticle&artid=64>

May 23 - AWA John Rollins Memorial DX Contest, email logs to: (no info), paper logs and diskettes to: (no info). Rules <http://www.antiquewireless.org/hamevents2010.htm>

May 25 - Florida QSO Party, email logs to: logs@floridaqsoparty.org, paper logs and diskettes to: Florida QSO Party, c/o Ron Wetjen, WD4AHZ, 5362 Castleman Dr., Sarasota, FL 34232, USA. Rules <http://www.floridaqsoparty.org/rules.html>

May 25 - 50 MHz Spring Sprint, email logs to: springsprintlogs@gmail.com, paper logs and diskettes to: 2010 Spring Sprints, c/o Chuck Towner, W9KQJ, PO BOX 73, PALATINE, IL 60078-0073, USA. Rules <http://groups.google.com/group/springsprints/web/2010-announcement-rules>

May 25 - SP DX RTTY Contest, email logs to: sprtty@pzk.org.pl, paper logs and diskettes to: (none). Rules <http://www.pkrvg.org/zbior.html>

==> ACKNOWLEDGEMENTS

ARRL Contest Update wishes to acknowledge information from WA7BNM's Contest Calendar <http://www.hornucopia.com/contestcal> and SM3CER's

Contest Calendar <http://www.sk3bg.se/contest>.

The ARRL Contest Update is published every other Wednesday (26 times each year). ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/contests/update/.

QNEWS - MAY 16 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

AR MAGAZINE VK4 QTC COLUMN
news for ar magazine to qtc@wia.org.au

may 16

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking about growing club membership.

Over the years we have seen some radio clubs "dis-incorporate" as numbers and interest in specific areas has dropped off. Some of these former bodies continue as social entities and this raises the questions of size and continuity. If our club is too small, it is extremely hard to complete the necessary organisational tasks as well provide the social glue that binds a group. Also it often means that certain people become fixtures in doing those jobs and training up others to keep the group running in coming years, just doesn't happen.

Like many other things, it is really not whether the jobs are being done well but whether they are recognised as being done, well or not. As club members we need to be honest enough to give praise when it works and ask the right questions when it falters.

As club members we need to nurture our comrades and gather new faces. We need to involve the converted and invite the interested.

Have you told some-one about amateur radio, this week?

I'm Geoff Emery and that's what I think......how about you?

CLUBBING -

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF with news from the Redcliffe AR Club.

At last Monday night's meeting, Peter VK4EA presented a slide presentation on the new repeaters cavities & setup of the equipment at the repeater site. Despite local cleaning around the site for the elimination of weeds and grass, all the work on the upgrade of the club's repeater is now been completed.

Club Secretary, Peter, VK4TAA, advised the meeting of the club's AGM to be held at the club rooms on Monday 21st June. Nominations forms for elected positions can be obtained directly from Peter via the club's website.

Next Monday 17 May will be the visit to the Brisbane airport traffic control tower. Those going are asked to meet at the club car park at 6pm - 6.15pm and a car pool will operate to take members to the venue. There are still several spots open for the air traffic control visit so contact Scotty, VK4FLAE or Charlie VK4YZ know if you will be going.

The 3rd Monday of each month is a technical talk held at the club rooms.
In June the tech talk night will be the 2nd Monday 14/6/10, due to AGM and James, VK4TJF will present Amateur DXing, DXpeditions and QSL cards.
Later in the year in August, Kevin VK4UH will discuss the DX Expedition to Norfolk Island and in September, Peter VK4TGV will discuss the Codan NGT radio and modems.

VK100WIA - 100 years of amateur radio. Kev VK4UH will be leading the club's hosting of the event on 30 August to 1 September 2010.

Peter VK4HOY, will hold a BBQ for the Club Monday 7th June starting 6pm at the club, followed by the usual club meeting. There will be rissoles, salad, buns Tea, coffee & soft drinks etc. This is a fund raising exercise for the club & proceeds will go direct to the club for equipment purchases. A suggested $5 for food plus usual club drink prices will apply. Please let Peter, VK4TAA, know by email if you are attending for the catering.

A working bee will be held at the club on Monday 14th June starting at 9am at the club. It is planned to relocate the mast, re-install the triband antenna & a series of new roof mounted antennas. The club will also conduct its yearly spring clean. This a large commitment so many hands are needed on deck to help. There will be the usual free sausage sizzle for the workers.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

World Fauna and Flora (WFF44) DX-pedition.

What is believed to be the first WFF44 activation of a National Park in VK will take place from 20 May to 23 May 2010 at Undara Volcanic National Park which is located to the east of Mount Surprise in Far North Queensland. Grid locator QH21is

The DX-pedition is in support of the World Fauna and Flora (WFF44) organisation and full details can be found at www.wff44.com/en

DX-pedition call-sign is VK4YN/P and will be operating on the 80/40/20/15/10M bands.

Operators will be: Gary VK4FD, Jeff VK4BOF and Dale VK4DMC.

Further information including operating frequencies are available at VK4FD's website at www.qsl.net/vk4fd/

(Dale - VK4DMC)

TOWNSVILLE
vk4wit@wia.org.au

www.tarc.org.au

GOOD MORNING AND GREETINGS! THIS IS DON VK4FNQA, WITH NEWS FROM NORTH QUEENSLAND.

ARE YOU GOING TO GO TO WHERE THERE IS SUN,
RELAXATION, GREAT SOCIALISING AND RADIO AT ONE
OF THE BEST PARTS OF THE QUEENSLAND COAST ?
IT IS NOW ONLY FOUR WEEKS AWAY UNTIL THE FAR
NORTH AND NORTH QUEENSLAND AMATEUR RADIO
GATHERING HAPPENING FROM 11TH TO 14TH JUNE
OVER THE LONG WEEKEND AT CARDWELL VILLAGE
BEACHCOMBER MOTEL AND TOURIST PARK.

IT IS THE YEARLY GATHERING FOR THOSE FROM
CAIRNS, ATHERTON TABLELANDS AND TOWNSVILLE
REGIONS PLUS LOTS OF PLACES IN BETWEEN AND
FAR AWAY.

PARTICIPATE IN THE GREAT TREC TRIVIA CHALLENGE !
TRY TO MAKE YOUR FORTUNE WITH THE 25 AND 50
CLUB GAMES OF SKILL AND CHANCE !
HELP DEFEND YOUR REGIONS HONOUR OR JUST HAVE
A GIGGLE AT THE SUNDAY MORNING FAR NORTH
QUEENSLAND V NORTH QUEENSLAND CRICKET
MATCH !
LEARN ONE THOUSAND AND ONE WAYS TO CONDUCT
THE PASTTIME OF SERIOUS LOAFING !

IF YOU HAVE NOT YET BOOKED THEN YOU NEED TO
RING RECEPTION AT THE PARK RIGHT NOW ON
1800 005633 TO SECURE YOUR ACCOMMODATION.
I HOPE TO SEE YOU THERE !

NOW, REMEMBER THAT NEXT SATURDAY 22ND MAY
IS THE DAY TO BRING YOUR BREKKIE ITEMS DOWN
TO THE BARBEQUES LOCATED EITHER SIDE OF THE
ENTRY TO STRAND JETTY FOR BREAKFAST WITH THE
PRESIDENT.
THE MAKING, BAKING AND COOKING ALL THE WHILE
WILL START FROM 7AM WITH SOCIALISING IN ONE OF
NORTH QUEENSLANDS AWARD WINNING SETTINGS.
BREAKFAST WITH THE PRESIDENT - EVERY FOURTH
SATURDAY OF THE MONTH -
BE THERE !

FINALLY, HERE IS A REMINDER THAT THE TARC SOCIAL
EVENING IS HAPPENING THIS TUESDAY FROM 7-30PM
AT THE CLUB ROOMS, ON TOP OF SES HEADQUARTERS,

GREEN STREET WEST END.
ALL ARE WELCOME TO COME ALONG AND HELP PUT
TOGETHER THE MAGAZINE OF RENOWN, BACK-SCATTER !
AFTER THE WORK IS DONE FEEL FREE TO MINGLE AND
SOCIALISE.
ALL WELCOME !

THAT'S ALL THE TIME WE HAVE TO BRING YOU QNEWS FOR
THIS SUNDAY SIXTEENTH OF MAY....

THIS HAS BEEN DON VK4FNQA IN BALMY TROPICAL PARADISE FOR THE TOWNSVILLE AMATEUR
RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO, AND ENJOYING QNEWS FROM VK4WIA.

New Repeater in Southern VK7

The great DX explosion of 1923/24

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING MAY 16 2010

WIA Centenary Update

In this report there&#65533;(tm)s the latest news about the WIA Centenary Convention to be held in Canberra in just two week&#65533;(tm)s time, the VK100WIA special call sign heard on air, we have more details about the ARISS contact to occur during the WIA Centenary Dinner.

There are some 170 registrations received so far for the WIA Centenary Convention to be held in Canberra on last Friday, Saturday and Sunday this month.

Proving to be very popular is the once in a life-time chance to see behind the scenes of the Canberra communications tower on the Friday evening plus dinner in the revolving Alto restaurant has 140 attending.

About the same number have indicated they will be at the WIA Annual General meeting.

The Saturday night Centenary Dinner is to be grand affair with 170 people including international guests and VIPs attending.

The partners program has 35 registered to enjoy a guided tour of some of the highlights of our national capital.

For those already registered for the WIA Centenary Convention, their packs were posted last week.

They contain a lanyard and identification, a full set of WIA AGM Open Forum Reports, a program guide, and information on the interesting Aviation and Radio Museum where the Sunday barbeque will be held.

Registrations must close on Monday the 24th of May, so to be part of this memorial weekend get onto the WIA website now and complete an online registration application.

WIA President Michael Owen VK3KI launched the special call sign VK100WIA on Friday the 14th of May.

That began the two weeks the call sign will be used by or on behalf of the WIA.

>From Western Victoria WIA Director Bob Bristow VK6POP put it on air yesterday and today a member of the WIA Centenary Committee is doing the same.

Amateur Radio Victoria on behalf of the WIA has the call sign on the 17th, 18th and 19th of May. This coincides with opening of the WIA Victoria time-capsule that was created during the WIA's 75th anniversary.

WIA President Michael Owen VK3KI has been invited to open the time-capsule at the Amateur Radio Victoria AGM on Wednesday the 19th of May.

Next will be Amateur Radio New South Wales operating VK100WIA on behalf of the WIA on the three days May the 20th, 21st and 22nd.

WIA Director Chris Platt VK5CP will be on air with the call sign Sunday the 23rd of May. And of course VK100WIA is to be heard during the WIA Centenary Convention in Canberra from Wednesday the 26th to Monday the 31st of May.

>From June the WIA affiliated clubs roster begins and runs through to the end of October. In June a total of 10 clubs in VK2, VK3, VK5 and VK7 will put VK100WIA on air.

And a reminder that all contacts made by VK100WIA will appear in the online log on the WIA website where clubs are able to enter their contacts in real time.

Contacts with the special callsign are required to qualify for the WIA Centenary Award.

Now for news about the ARISS Contact VK100WIA during the WIA Centenary Dinner, we cross to Australian ARISS Coordinator Tony Hutchison VK5ZAI.

One significant way in which Radio Amateurs can share their hobby with

the community is through the ARISS program. ARISS provides today&#65533;(tm)s youth with an opportunity to speak directly with the astronauts aboard the international space station by way of amateur radio and with the assistance of local radio amateurs and radio clubs. As part of the Centenary dinner program we will be making contact with the International Space Station via amateur radio and we will hear from the astronauts on the ISS. Ten students will have an opportunity to ask questions of the astronauts.

(heard in the audio along with Robert's interview with Carl the Principal)

HOME OF THE GOOD GUYS

Wal Dempsey VK3WD turns 100 Tomorrow Monday May 17!

Although no longer on air, Wal, VK3WD would no doubt be thrilled to be remembered by email to Daughter Cath, or card to 12 Drovers Lane Somerville Vic 3912.

Email Address : DempseyCath@bigpond.com

VKG Roundup http://www.police.nsw.gov.au/news

The Oxley Region Amateur Radio Club Inc 35th annual field day takes place in the Sea Scout Hall in Buller Street Port Macquarie NSW on Saturday the 12th and Sunday the 13th of June.

There will be all the usual attractions and events over the two days of the Field Day. The popular Field Day smorgasbord dinner will be held at the Port City Bowling Club at 6pm on the Saturday night.

Foxhunts will be conducted on both days. Sunday is the day for the traders and the trash and treasure tables. There is no charge to sellers so bring your treasure. The famous barbeque lunch will be available on both Saturday and Sunday. Mark your calendar now for Port Macquarie on the June Long Weekend in VK2.

Visit the Oxley Region Amateur Radio Club Inc website at www.orarc.org

or write to the club at PO Box 712 Port Macquarie NSW 2444.

A number of people have asked us about the ACMA third discussion paper on the replanning arrangements for the 400 MHz spectrum, released on 30 April.

Because the annual Radcomms Conference conducted by ACMA was on 5, 6 May we thought it better to wait the discussion of the preliminary outcomes at that conference, before commenting.

The WIA provided detailed submissions to the two papers in respect to the 70cm amateur UHF band allocation. In addition, the WIA is a member of the ACMA 400 MHz working group, where industry provided advice to ACMA on a number of important issues. The WIA was represented by WIA Director, Peter Young VK3MV.

Peter also represented us at the Radcomms Conference and tells us that he gained further insights on the likely impact to the amateur service in this band.

As this item is being recorded, Peter is on his way to the USA to attend the Dayton Hamvention. Also at Dayton will be another WIA Director, Chris Platt VK5CP, both I hasten to add in a private capacity.

But, in Peter&#65533;(tm)s absence, here is Peter&#65533;(tm)s report.

ACMA has confirmed that the segment between 430 to 440 MHz is out of scope for the purposes of the replanning exercise. Within this band the amateur service is a secondary user to Defence and these arrangements will continue into the future.

In the most recent ACMA paper, arrangements for services including the bands allocated to the amateur service within the bands 403–430 MHz and 440–520 MHz are within the scope of this paper. In the spectrum segment 420 to 430 MHz, the amateur service has already been excluded in NSW, Melbourne Perth and Sydney for use by government users. These exclusions will be extended to the rest of Australia over the coming years.

The 440–450 MHz band, which was out of scope in the previous Proposals Paper, is now within the scope of the paper. This band is included as an option to assist in the transition to a 10 MHz duplex frequency split in the 450–470 MHz band. Further information suggests that use of this spectrum may be of a temporary nature and once the re-arrangements are completed this segment will return to the existing arrangements.

The WIA will be consulted on the details and we will continue to highlight the amateur interests in the transitional arrangements. It should be noted that the transitional arrangements will take a number of years and will be biggest re-arrangement of UHF spectrum ever undertaken at the one time and will affect a wide range of industry sectors, including Police and Emergency Services, Transport, Utilities and the general communications sector.

Also of particular note is that ACMA has introduced the concept of increasing the number of UHF CB channels from 40 to 80 by the implementation of 12.5 kHz channelisation, with a corresponding phase-out of 25 kHz channel equipment. This will most likely take many years to occur where the availability and sale of equipment will be a big factor.

At the Radcoms 2010 conference, ACMA announced that it would be undertaking a series of “Spectrum Tune Up” sessions around Australia on the proposed arrangements for the 400 MHz spectrum. The WIA will be attending these sessions to provide the “amateur perspective” to the radiocommunications industry.

The ACMA has sought comments to The Way Ahead paper by 6th June 2010 and the WIA will be making a submission on the proposed arrangements. If you have any comments that could assist us, please send them to the WIA secretary at the WIA office either by mail or, better, by email to secretary@wia.org.au

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

HADARC, the Hornsby and Districts Amateur Radio Club, will be running examinations and practical assessments for all levels of licence on the morning of Saturday, 29 May in Waitara, near Hornsby in northern Sydney.

Bookings are essential, and those interested should contact the club promptly. The contact details and a contact form appear on their

website.

Contact page: http://www.hadarc.org.au/cgi-bin/hadarc/webmail.cgi

(Julian Sortland, VK2YJS. Publicity Officer, HADARC)

VK7 Southern News

Congratulations - Dean's Roll of Honour

Congratulations to Thomas Karpiniec VK7NML and Andrew Welch VK7AL for appearing on the University of Tasmania Dean's Roll of Honour for 2009.

Thomas for his Bachelor of Engineering studies and Andrew for his Bachelor of Science and Bachelor of Engineering studies.

(Justin, VK7TW)

VK7 Licence Examinations

There will be an assessment session for Standard and Foundation Licence on Tuesday 18 May at 7 :30 pm.

Candidates for Foundation Licence may also need to be available on Monday 17 May for the practical examination.

If interested then contact Reg VK7KK on 0417 391 607 regemm@ozemail.com.au

(73, Reg VK7KK, REAST Education Officer and Assessor)

SILENT KEYS

DON JOHNSON, W6AAQ, INVENTOR OF THE SCREWDRIVER ANTENNA - S.K.

Don Johnson, W6AAQ, inventor of the screwdriver mobile antenna has died at 91.

According to Al Melcher, W6ARM, when the FCC first authorized H-F mobile, a group of hams in the San Francisco Bay area decided to go mobile on 75 meters. They chose 3 point 995 MHz as an operating frequency to reduce the possibility of high power fixed stations interfering. And it was W6AAQ who came up with the idea of using a metal tube with a whip on top of a coil that fitted inside the tube. By raising and lowering the coil a resonant point could be found.

FAMED DX'ER VINCE THOMPSON, K5VT - S.K

The changing of the guard in ham radio continues with word of the passing of famed DX'er Vince Thompson, K5VT who passed away on April 24th. Thompson was best known as a DX-peditioner known for activating many African countries, and a founder of the Voodoo Contest Group.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Proposed 5MHz changes in USA

The FCC is proposing replacing one of the five Amateur Radio channels in the 60m band and increasing the power level to 100W ERP.

Acting on a 2006 Petition for Rulemaking filed by the ARRL, the FCC has issued a Notice of Proposed Rule Making to modify the rules that govern amateurs’(tm) secondary use of five channels in the 5 MHz frequency range known as 60 meters.

The proposed changes would substitute a new channel for one that is seldom available because of occupancy by the fixed service, which is primary in this range. Also proposed is an increase in power from 50 to 100 W effective radiated power and the addition of CW, PSK31 and PACTOR-III modes with provisions to ensure that such operations would be compatible with the primary service.

In February 1991, the FCC dropped the 5 WPM Morse code requirement for new Technician licensees, and in 1994, it created a new class of Amateur Radio license: the Technician-Plus, also called Tech-Plus. This new license differed from the Technician license in that Tech-Plus licensees had passed the code test and had more operating privileges on HF. Patricia Phillips, N3IGI, of Pittsburgh, Pennsylvania, received her Technician licensee on June 12, 1990. On March 21, 2000, she upgraded her license to Tech-Plus, and, at the same time, renewed her license, now set to expire June 12, 2010. This makes Phillips the last Tech-Plus in the FCC database. If she renews her Amateur Radio license, she will be a Technician.

arrl.org/news/the-last-tech-plus-license-to-expire-in-june

HAM RADIO IN SPACE: SOUTH AFRICA AMSAT ANNUONCES NEW HAM-SAT

And South Africa AMSAT has announced that it will be building its own ham radio CubeSat. The project will involve radio amateurs and school students. The currently proposed payload includes a transponder with a 30 kHz bandwidth, a telemetry beacon and several science projects, but that’(tm)s subject to change from the South African ham community. At this stage in the project SA AMSAT is inviting input from that nations amateur radio community before the final payload is decided on, and project teams will then be set up. If you are a South African ham and interested in becoming involved, you are invited to send an email with your contact details and areas of expertise to saamsat@intekom.co.za

NEW US BASED 4 METER BEACON ON THE AIR

A United States based 4 meter beacon is on the air, but its not a ham radio system. On Monday May 3rd , the 70.005 MHz beacon using the Experimental call WE9XFT took to the airwaves from Bedford, Virginia with a power level that may make it receivable in the British Isles and other areas of Europe.

The new beacon is the brain child of Brian Justin, WA1ZMS. Back in January Justin filed an application with the FCC for a Special Temporary Authority to operate a propagation beacon in the 4 meter band for domestic as well as

trans-Atlantic reception tests. The FCC granted the request as a non-amateur experimental license since there isn't a 70 MHz Amateur band in the United States.

WE9XFT is running 3 kilowatts Effective Radiated Power on 70.005 MHz beaming towards Europe. It is operating 24 hours a day and the experimental license is valid until September 1st. Reception reports should be sent to Brian by e-mail to wa1zms@att.net

WEIRD AND WONDERFUL

Enigma cracked again

An Enigma message sent over 65 years ago and thought to have been unbroken to this day has been cracked by a group of volunteer computer enthusiasts.

The 2,700+ strong group Enigmaathome.net has been using nearly 4,500 individual computers in a massive international effort to decode surviving unbroken messages.

The interface uses the standard BOINC distributed computing client software, and anyone can take part in the project.

To carry out the work of the project so far, a single computer would have to be left running for over 4000 years, such is the complexity of the Enigma system - a true testament to it's original design.

Here is a link to the project web site:
www.enigmaathome.net

There is no truth to the rumour the decoded message from mid-atlantic IN 1943 read, "in the year 2010 all WIA Directors will deliver their reports live on air, in the new modes of FM and SSB, to their members from the Canberra AGM when the WIA is 100 YEARS OF AGE".

(Dale &#65533;" VK4DMC)

New Repeater in Southern VK7

A quick reminder by Damien VK7HDS who lets us know that there is a new 70cm
repeater which will live on North Bruny Island covering the Channel area.
VK7RDS receives on 434.750MHz.
No tone is required, it has a 4 minute timeout with an identifier every 6mins.

(73, Damien, VK7HDS)

Early UK radio broadcasting

A new website MT2radio celebrates the early years of radio broadcasting in
the UK.

With the 90th anniversary of the Dame Nellie Melba broadcast due in June,
Chelmsford Amateur Radio Society member, Jim Salmon 2E0RMI has made his own

small tribute with a new website that celebrates the early years of radio broadcasting.

The site includes documentaries to listen to or download, YouTube videos, a 'radio tuner' page and features 'Chelmsford Calling' which is a Webradio service playing easy listening and vintage music.

Jim hopes to add further recordings over the coming months.

See the new MT2 site at http://www.mt2radio.co.uk/

Dame Nellie Melba made her famous broadcast from station MZX at the Marconi New Street site in Chelmsford on June 15, 1920. The Chelmsford Amateur Radio Society are celebrating the anniversary with the special event station GB90MZX.

http://www.g0mwt.org.uk/events/dame-melba-2010/dame-melba.htm

Dame Nellie Melba was approached as the leading opera singer of her time and agreed for a large sum of money (paid by the Daily Mail) to sing on the wireless. A figure of £1,000 has been quoted &#65533;" a lot of money in those days bearing in mind you could purchase a London detached house for £500.

Just prior to performing, our Diva Dame took a short walk around the workshop site. Pointing up to the wires suspended from the top of the two 450ft masts it was suggested that “from the top of the mast her voice would be heard throughout the World”.

History records she said “Young man, if you think I am going to climb up there you are very much mistaken. I am Dame Melba”.

Argentina - special amateur radio callsigns

Amateur Radio operators in Argentina will be celebrating their 'May Bicentennial Revolution' this month.

In commemoration, the Radio Club Argentino (RCA), National IARU Member Society announced that all Argentine radio amateurs will be allowed to change their callsign's prefixes between May 22-25th, according to the following criteria:

LU stations will shift their prefixes to LR
LW to LV
AZ to LT
Amateur Radio Clubs and Associations to LS
Scouts Groups, Schools and any other institutions holding a license to AY.

A special two class award will be issued to radio amateurs and SWL's worldwide who achieve a certain number of prefixes. Since this event is a very special occasion for Argentina, they invite everybody to join them on the air.

For more details, please visit:
http://www.lu4aa.org/bi/awards.htm

Alfa Romeo Special Event

Look for Frans, PC2F, to activate the special event callsign PC100AR between May 29th and June 26th.

Activity is to celebrate 100th anniversary (June 24, 1910) of the famous Italian car maker A.L.F.A., later called Alfa Romeo.

Activity will be on the HF bands.

A special QSL card will be made after this period and will be sent via the Bureau or direct. Also, an eQSL will be sent.

NEW 10 METER FM REPEATER IN PORTUGAL

A new 10 meter FM amateur radio repeater has come on the air in Portugal. Sponsored by the Ham Radio Association of Beira Alta, CQ0HAR

operates on European repeater channel RH4 with an input of 29.5 and an output of 29.6 MHz. A 67 hertz CTCSS tone is required for access CQ0HAR.

More on the system is on-line at www.ct1arb.com

AWARDS

JARL TO ACCEPT APPLICATIONS FOR IARU REGION 3 AWARD AT DAYTON HAMVENTION

Representatives from the Japan Amateur Radio League will forward the applications to the New Zealand Association of Radio Transmitters the award administrator.

NZART will then send applicants their award certificate with any endorsements after Hamvention.

Hams who present seven QSOs will be awarded the Basic Award.
Hams who present 15 QSOs the Silver Endorsement, while those who present 20 QSOs will receive the Gold Endorsement.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

SARL RTA to offer three new construction kits

The first SARL Radio Technology in Action symposium will be held in Durban on Saturday 29 May. The programme offers exciting presentations and discussions. This year three construction kits will be available at the RTA.

The three kits on offer are:

DSSS kit: 100 mW on 40 m band.
Two Direct Sequence Spread Spectrum transceivers built in open pcb fashion as a learning tool for DSSS.

TDR, Time Domain Reflectometry 1 GHz Sampling Scope.
Specifically designed for TDR work but can be used for other applications.
It is a USB device that plugs into a Laptop or PC and runs a Windows program

in the image of a normal scope.

DSP kit: Digital Signal Processing Speaker kit.
For use on speaker output of any device to reduce or eliminate noise. It is ideal for HF Receivers. Built in open pcb fashion and ideal as a DSP learning tool.

Rewind a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others, that is being published in the WIA journal Amateur Radio magazine.

The great ?DX explosion? of 1923/24

With commercial broadcasting beginning the experimenters were mostly confined to higher frequencies or shorter wavelengths ? thought to be of little value.

However the experimenters were about to experience another exciting time and arguably one of their greatest moments: The great ?DX explosion? of 1923/24.

This was the time when the world shrank for those experimenting with short waves.

The American Radio Relay League (ARRL) and the WIA collaborated in what were called ?Trans Pacific Tests?, as a bold attempt to receive wireless telegraphy from America.

When many stations were heard in Australia the newspapers eagerly reported the news and closely followed the advances being made in international communications.

The Melbourne Argus on the 19th of June 1923 reported on Max Howden of Box Hill in Melbourne&#65533;(tm)s east, having heard no fewer than 22 stations. Max went on to achieve the first two-way contact between Australia and America.

** SERVER Trouble at 2010-05-11/12 **

Sorry dear friends but as well like others we have had the trouble
with the Server and DENIC (.de pages was blocked a while).
In case of a sign "failure 403, forbidden..." please be patience.
We are always trying to be back as soon as possible. In these case
we have had no influence on what was happened! MMMonVHF-Team

** SPORADIC E saison, inputs to MMMonVHF and Observation 2010 **

In case of an ES opening on 144 MHz please remember to send all your
QSO in a short Log to MMMonVHF - HOW? PSE go to the MMMonVHF forum:
www.mmmonvhf.de/minibb/index.php?action=vthread&forum=11&topic=80
and read about our "call for reports". The text will be available
in several languages. or use direct the input at:
http://www.mmmonvhf.de/es.php >>> click on "Send your Report"
Remember please that we are going to publish ONLY 144 MHz Logs - if
we get input for 6m, 4m or 3m reports we do use it for the headline.
As you all know, the most necessary at a SPORADIC E Opening will be
to be at the right time at the right place. As well every of us will
have some "warning" systems for the time between May to August.

May 13th the team will start travelling to Mauritius. If all will go well we can be QRV Moonrise May 15th. TX frequency is 144.124MHz and 3B8EME always tx 1st. We will give priority to callers who have a record of dxpeditions or another contribution to moonbounce or to this expedition. Some tips to makes it more easy for us to work you: Add 3B8EME and LG89qt to your call3. Please call us when you CAN copy us. No need to have a good decode from us, you will decode us when we call you. DON'T stop calling us when we are in QSO with some one else, after a QSO we will call the next station but only if he was TX'ing the period before. Don't hop around, choose a freq to call us and stay there for a while. If you stop TX'ing, listen the next period and then change freq if you want. We will not TX 73, if a QSO is complete by RX'ing 73 from you we call CQ or another stn. (QSO is complete if both stations received both calls, a report and one or more R) Please send 73 after you got our RR, its good to know for us that we can call the next station. From time to time we have to turn antenna's (by hand); we have to stop 1 or 2 periods TX'ing than, please continue calling: we will RX! Condx will be vy good from our start, so don't wait till the end of the expedition to call us! Later in time condx will be not so good and sometimes we will be away for swimming with dolphins or explore some ancient dodo bones Hope to see you ! SOURCE: The Team of 3B8EME, direct to MMMonVHF

Foto on the Front of MMMonVHF is taken at the AIRPORT Dï¿½sseldorf (not Weeze, hi, Massimo (Insider...)) just before the departure to DUBAI of Rene, Eltje and Johan in afternoon of 13rd may... (PA4EME and DL8EBW from MMMonVHF Team made a small meeting there)

Sebastian, DG5CST, will be at holiday end of july in Norway and try to be qrv in holiday style around JP30/JP31/JP22 area. Plans looks that he might be active during some free time in evening and early morning hours from 30.7 to 31.7 at JP30si - maybe 31st to 1st at JP31 and later 1st to 2nd august than at JP22ne. Rig IC706 + 170w (maybe 350w Pa) + 11el Flexa-Yagi. So that is the plan for now but maybe he can as well be at other locations. PLEASE remember - thats a holiday trip and so 1st priority will be the holiday style which might be not allow to get on the air at all!
SOURCE: tnx to Sebastian, DG5CST direct to MMMonVHF

** ACTIVATING DL88 and DL89 **

The K5N saga continues! The K5N Activation Group has applied for
a "Special Use Permit" from the Big Bend National Park to activate
DL88 on 6M. DL88 is a very rare grid located at the very bottom
of the Park. We have received a verbal OK from a Park official on
our permit. However, the Park has a "No generators in the Outback"
rule, so we will not be able to run a generator while we are in the
Park. We plan to use two large battery banks--running from one and
charging the other from a vehicle alternator. We will be operating
from campsite Talley2 in the Park, which is just South of the DL88
line. Talley2 is located at DL88jx just off Talley Road. We will
be using an ICOM Pro2 with a TE Systems brick amp and a 6M5X ant.
We will NOT have Internet or cell phone coverage, but there is a 2M
repeater in the area that belongs to the Big Bend Amateur Radio Club
We are hoping that we can get someone from their club to help us
put messages out on the Internet. After the DL88 operation, we will
activate DL89. Find all details about that 50 MHz activity , times
team and so on at: http://www.mmmonvhf.de/latest.php?id=3229

Ciao guys and gals! Its OH1MN Markus here... just short info about
my trip to Malta... 9H3MK - Markus, OH1MN will be visiting the
island of Malta. (IOTA EU-023, MIA MM-001, WLOTA LH-1113) from 19th
June to 3rd July, 2010. Will work holiday style, When time and XYL
allows will be on air as 9H3MK. :) Equipment will be for 6-80m SSB
DIGITAL. QSL via OH1MN. 73 SOURCE: Markus OH1MN / 9H3MK via SRT-News

** 3C9B and 3C0C activity on HF and 50 MHz **

If no setback or causes beyond our control, in mid-May start off
Equatorial Guinea. Before traveling to Annobï¿½n 3C0C we take a DX
pedition to Equatorial Guinea, Bioko Island AF-010, with the
indicative 3C9B. The operation will take place over three days and
we will be active on SSB, CW and RTTY. The exact dates will announce
shortly. Here in Bioko, we collect all our needed supplies to live
on the island of Annobï¿½n for 14 days, then depart to 3C0C. We thank
all those who are helping us, Associations, Clubs and individual,
that Annobï¿½n Expedition and also the island of Bioko is a reality,
thanks to everyone.
Elmo, EA5BYP and Javier, EA5KM will be active from Annobï¿½n Island
AF-039 in May 2010 (the dates will be published asap). We'll operate
6 to 160m in CW, SSB and RTTY with an emphasis on the low bands and
CW. We'll try to be active with two stations but remember that we'll

be only two operators, so please be patient. During the operation from Annobï¿½n, we have not internet connection, so the logs will be published after the dxpedition. You can contact us at mail. Thanks and see you in the pile-up.

** SABLE ISLAND (CY0) next trial... **

UPDATE: The operational dates for the DXpedition to Sable Island have been set for 22 October-1 November. AA4VK/CY0, AI5P/CY0, N0TG/CY0 and WA4DAN/CY0 will be active on 160-6 metres CW, SSB and RTTY, with a "minimal effort for supplying the mulitiplier" during the CQ WW DX SSB Contest. All QSL requests via N0TG (an Online QSL Request System will be available). Individual contributions to assist the DXpedition are still appreciated. SOURCE: Dennis, K7BV, on KST-Chat

** TC07DX - IOTA **

IOTA: A team of Czech operators will activate the Turkish Island of Suluada in the Mediterranean Sea using the special callsign TC07DX between May 15ï¿½19th. Operators mentioned are: Pavel/TA2ZAF (OK1MU), Vlada/OK1CW, Franta/OK1DF, Zdenek/OK1FIA, Slavek/OK1TN, Zdeno/OK2ZW and Honza/OK2ZAW. The group will have two stations on the air using CW and SSB, with some planned hours of operation on RTTY. Radio equipment to be used are: two IC-746PRO and two TS-480SAT with two 800W amps. Antennas are: 5 band Spiderbeam, multi band vertical AV-640, loops for 30/40m, 2 elements on 50 MHz HB9CV and trapped dipole for 20/15/10 meters. QSL via OK2GZ, by the Bureau or direct or via E-mail request. In case of an InterNet connection on the island, they plan to have online logs updated regularly. Visit the TC07DX Web site at: http://www.okdxf.eu/expedice/tc07dx

==> FCC NEWS: FCC PROPOSES ADDITIONS, CHANGES TO AMATEUR 5 MHZ
ALLOCATION

Acting on a 2006 Petition for Rulemaking filed by the ARRL, the FCC has
issued a Notice of Proposed Rule Making (NPRM), ET Docket No 10-98 to
modify the rules that govern amateurs' secondary use of five

channels in the 5 MHz frequency range known as 60 meters. The
proposed changes would substitute a new channel for one that is seldom
available because of occupancy by the fixed service, which is primary
in this range. Also proposed is an increase in power from 50 to 100 W
effective radiated power (ERP) and the addition of CW, PSK31 and
PACTOR-III modes with provisions to ensure that such operations would
be compatible with the primary service. Read more here
<http://www.arrl.org/news/fcc-proposes-additions-changes-to-amateur-5-mhz-all
ocation>.

==> HAMVENTION: FCC FORUM AT DAYTON HAMVENTION TO FEATURE FCC EMERGENCY
COMMUNICATIONS EXPERT
```

The annual FCC forum at the 2010 Dayton Hamvention is scheduled for Saturday, May 15 9:15-10:15 AM in Forum Room 3 at the Hara Arena. Moderating again for 2010 will be Bill Cross, W3TN, of the FCC's Mobility Division. Cross's portfolio of responsibilities includes the Amateur Radio Service rules. Also speaking at this year's forum will be Curt Bartholomew, N3GQ, of the FCC's Public Safety and Homeland Security Bureau. Missing from this year's program will be Laura Smith, FCC Special Counsel who is responsible for Amateur Radio enforcement issues. She is unable to attend due to a previously scheduled family commitment.

==> PUBLIC SERVICE: NATIONAL HURRICANE CENTER'S WX4NHC SETS ON-THE-AIR STATION TEST

The annual WX4NHC On-the-Air Station Test from the National Hurricane Center (NHC) in Miami will take place Saturday, May 29, 1300-2100 UTC. "The purpose of this annual station test is to test all of our radio equipment, computers and antennas using as many modes and frequencies as possible," said WX4NHC Assistant Amateur Radio Volunteer Coordinator Julio Ripoll, WD4R. "This is not a contest or simulated hurricane exercise." WX4NHC also will be testing new computers and software, as well as conducting operator training, and NHC Director Bill Read, KB5FYA, will be at WX4NHC making contacts. Read more here <http://www.arrl.org/news/national-hurricane-center-s-wx4nhc-sets-on-the-air-station-test-2>.

==> ARRL FOUNDATION: ARRL FOUNDATION AWARDS 66 SCHOLARSHIPS IN 2010

The ARRL Foundation Board of Directors is pleased to announce the scholarship recipients for 2010. Each year, the Foundation's Directors have the honor and privilege of selecting Amateur Radio operators who will receive monetary assistance to further their undergraduate or

graduate education. For 2010, the Foundation awarded 65 annual scholarships to young Amateur Radio operators valued at $71,450, almost $17,000 more than awarded in 2009. Four new scholarships were added for 2010: The Ted, W4VHF, and Itice, W4LVV Goldthorpe Scholarship; The Magnolia DX Association Scholarship and The Gwinnett Amateur Radio Society Scholarship. A second scholarship for the Bill, W2ONV and Ann Salerno Memorial Scholarship was also added this year.

The application period for ARRL Foundation Scholarships opens October 1 each year and closes on February 1 the following year, with awards announced in May. Descriptions of all the available scholarships and selection criteria, as well as application instructions and forms can be found on the ARRL Foundation pages of the ARRL Web site. Beginning fall 2010, the application process for ARRL Foundation scholarships will "go green," with application forms and transcripts accepted via electronic means only. Click here <http://www.arrl.org/news/arrl-foundation-awards-66-scholarships-in-2010> for a list of the scholarship recipients.

==> ARRL FIELD DAY: ARRL ATLANTIC DIVISION TO HOST FIELD DAY WEBINAR

Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. On Wednesday, May 19 at 9 PM EDT, Atlantic Division

Director Bill Edgar, N3LLR -- along with some "Field Day Experts" -- will present a Field Day-oriented webinar entitled "Making the Most of Field Day." Moderated by ARRL Regulatory Information Branch Manager and Field Day Manager Dan Henderson, N1ND, the webinar will share information, hints and tips to individuals and groups to maximize their Field Day experience -- not just in terms of points, but in gaining valuable experience and knowledge to help groups and individuals to help maximize their Field Day fun! Read more here <http://www.arrl.org/news/arrl-atlantic-division-to-host-field-day-webinar>.

==> ARRL FIELD DAY MERCHANDISE NOW AVAILABLE

How can you be the best-dressed ham at your Field Day site this year? When you wear the official 2010 ARRL Field Day shirt -- accompanied by the 2010 ARRL Field Day hat -- of course! Field Day -- Amateur Radio's largest on-the-air operating event -- is just a little more than six weeks away, so be sure to get your shirts, hats and pins, as well as the new ARRL Field Day Handbook for Radio Amateurs and coffee mugs before they run out. Field Day shirts are offered in sizes Small-4XL and are royal blue with the 2010 Field Day logo on the left chest; the back of

the shirt says "Amateur Radio -- Goodwill • Service • Fun!" with www.arrl.org underneath. Fulfill all your Field Day apparel needs at the Field Day Supplies section of the ARRL Web site <http://www.arrl.org/shop/Field-Day-Supplies/>.

==> INTERNATIONAL: CANADIAN HAMS MAKE USE OF NEW PRIVILEGES

After several years of hard work by the Radio Amateurs of Canada (RAC) and Industry Canada (IC) -- Canada's equivalent to the FCC -- Canadian amateurs received privileges on 2200 meters (135.7-137.8 kHz) at the first of the year. Scott Tilley, VE7TIL, of Roberts Creek, British Columbia, and John Gibbs, VE7BDQ, of Delta, British Columbia, completed the first official Canadian two-way 2200 meter QSO on April 24. Using CW, the Canadian amateurs reported strong signals during daylight QSO on 137.100 kHz. Roberts Creek and Delta are about 41 miles (66 km) apart. Gibbs used a homebrew tube transverter at 100 W output into a short top-loaded backyard wire vertical, while Tilley was running 400 W from a homebrew FET transmitter into a 60 foot top-loaded wire antenna. "As well as heralding the arrival of a new 'top band,' the QSO demonstrates that even amateurs located in typically small city-sized lots can enjoy the challenges that 2200 meters has to offer," Tilley told the ARRL. "Hopefully many other Canadian amateurs will soon be melting solder to join the fun on our new band!" More information on Canadian 2200 meter activity may be found on Tilley's Web site <http://www3.telus.net/sthed/argo/> and at the VE7SL Radio Notebook Web site <http://members.shaw.ca/ve7sl/136.html>.

==> GOOD NEWS FROM RADIO KUWAIT: 7150 KHZ AND 7190 KHZ BOTH FREE!

The IARU Region 1 Monitoring System is ever vigilant in monitoring the amateur bands for intruders. It is ably led by Coordindators Wolf Hadel, DK2OM, and Uli Bihlmayer, DJ9KR. To aid in their work they initiated an online reporting system via intruderalert@iaru-r1.org last year. On April 12, Uli first observed a shortwave station on 7150 and 7190 and alerted the monitoring group to listen and send reports to their appropriate authorities. Through combined efforts, Uli identified the station as Radio Kuwait. Once the station was identified, Uli immediately informed the German Federal Net Agency (Bundesnetzagentur) to monitor the QRGs and to send an official complaint to KWT. Also he sent a FAX and an e-mail to the Embassy of KWT in Berlin and e-mails to Radio Kuwait (radiokuwait@radiokuwait.org <http://us.mc506.mail.yahoo.com/mc/compose?to=radiokuwait@radiokuwait.org>) and to the Ministry of Telecoms in Kuwait. Read more here <http://www.arrl.org/news/good-news-from-radio-kuwait-7150-and-7190-khz-both-free>.

==> SOLAR UPDATE

Tad "The Sun does not shine upon this fair earth to meet frowning eye <http://ebooks.adelaide.edu.au/d/dickens/charles/d54nn/>s" Cook, K7RA, reports: Sunspots disappeared again. After a strong

showing and nine days of sunspots, there have been four days with no sunspots. No indication when they will return, although the STEREO image <http://stereo.gsfc.nasa.gov/> shows an active area coming next week. With no sunspots again, perhaps our focus should return to low frequencies. Tom V. Segalstad, LA4LN, reports from Norway that a new temporary beacon on 509 kHz will be transmitting from grid-square JP20LL using a 35 meter (115 feet) tall vertical and 5 W until the middle of June. Look for more information on the ARRL Web site on Friday, May 14. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Charles Dickens' The Life and Adventures of Nicholas Nickleby <The%20Life%20and%20Adventures%20of%20Nicholas%20Nickleby> (Chapter 6).

==> THIS WEEK ON THE RADIO

This week, the Portuguese Navy Day Contest is May 15. The His Majesty King of Spain Contest (CW) and the Manchester Mineira All America

CW Contest are May 15-16. The Run for the Bacon QRP Contest is May 17. Next week, the Baltic Contest is May 22-23. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page

<http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, May 23, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, June 4, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

GB2RS NEWS

Sunday 16th May 2010

The news headlines

New 4m propagation beacon in USA

RSGB Convention bookings now online

Cray Valley Award returns

A new high power 4m beacon has gone on the air in the USA, thanks to Brian Justin, WA1ZMS. It operates at 70.005MHz with experimental callsign WE9XFT. As there is no US 4m amateur allocation, it is officially for propagation tests for US domestic and transatlantic commercial use. The WE9XFT beacon transmits 3kW ERP towards Europe from Bedford, Virginia. It is operational 24 hours a day and is licensed until 1 September. The RSGB Propagation Studies Committee is co-ordinating reception reports from the UK. Actual beacon reception reports are requested, along with reports where 50MHz was open to the USA but no signal was received on 70MHz. Reports should be emailed to john@g4bao.com. Please see the online GB2RS for detailed information of the requested format of reports.

You can now book your place at the RSGB Convention, which takes place from 8 to 10 October near Milton Keynes. Full details of the convention, booking information and prices, are on the www.rsgbevents.org website. Formerly known as the HFC, the RSGB Convention has broadened its remit to include the whole amateur spectrum. As usual there will be lectures by the very best amateur radio speakers on a wide range of topics.

Cray Valley Radio Society has re-launched its Cray Valley Award. It is available to any licensed radio amateur or short wave listener who works or hears Cray Valley members, their club call G3RCV, or one of the many special event stations the club have organised in the last 10 years. Full details of activity periods and Award rules are available at www.cvrs.org. Any profits from award applications received from non-members will be donated to radio related charities.

The Easter Harlaxton amateur radio get-together and field day had to be postponed due to bad weather. Organiser Jim, M0JHW has now re-arranged the event for 22 and 23 May. It's at the same venue, the Sports and social club, Harlaxton, near Grantham, which is postcode NG32 1HX. There will be amateur radio operations that visitors can join as well as plenty of tea and coffee. A barbecue is planned for the Saturday

afternoon.

On Saturday 22 May Wakefield & District Radio Society is starting a Foundation Licence Course. The cost will be ?60 which includes all fees, refreshments and temporary membership of the Society. Further details from the Chairman, Ken Quinn, 2E0SSQ, on 07900 563117 or by e-mail to 2e0ssq@wdrs.org.uk.

Installation work is under way for the new repeater on the channel island of Jersey. It is hoped to start on-air testing early next month. Status updates are on the GB3GJ website at www.radioclubs.net/gb3gj.

And now for the details of rallies for the coming week

Next weekend, on Sunday 23 May, the Dunstable Downs Radio Club is holding the National Amateur Radio Car Boot Sale at Stockwood Park, Luton. The postcode for your satnav is LU1 5NR. Doors open at 9am and entry is ?2. Details on the web at www.ddrcbootsale.org.

Now for the news of special events

To mark the 10th anniversary of the closure of the world's largest maritime radio station, Portishead Radio, GB10GKA is being activated until 27 May. Hours of operation will be dependent on individual operator's free time and operation will be primarily on CW. Mike, GW3UOF will operate until 20 May from Treorchy in Mid Glamorgan. The final leg will be taken by Pete G3TJE and Larry G4HLN from 21 to 27 May from Burnham on Sea. Special Anniversary QSL cards will be produced to mark this historic event, eQSL will also be used. Certificates for contacting GB10GKA on more than four HF bands will be available. Contact Tony Roskilly, G3ZRJ by e-mail at g3zrj.morsekey@btinternet.com.

Lough Erne Amateur Radio Club again this year will take part in the weekend international Geoparks Communication event on 22 & 23 May, with callsign GB2MAC at the Marble Arch Caves International Global Geopark. GB2MAC will seek contacts with similar Geopark stations, including the only other one in Ireland, EI2GEO at the Copper Coast Geopark in County Waterford. Other Geopark stations include GB5GEO in Merthyr Tydfil and GB6GEO from Kent's Cavern in Torquay.

The Radio Society of Harrow will be operating GB1RBP from Bentley Priory on 22 May. Operations are at the invitation of St Luke Hospice in association with the Bentley Priory Battle of Britain Trust. The Society will demonstrate amateur radio, Morse code and display some WWII communications equipment at the former RAF Bentley Priory in Stanmore, NW London. GB1RBP will be operational on HF, 2m and 70cm. The event is open to the public from 11 until 4. There is an entrance fee. Apart from the radio equipment there will be various displays, exhibitions, music, re-enactors in period uniform, refreshments and, weather permitting, a Spitfire flypast. Further details can be found at www.bentleypriory.org/pdf/1940s_Day_Booking.pdf.

And now the HF DX news compiled from 425 DX News and other sources.

Andrew, G7COD, has been issued with the callsign D2AK and will be operational nearly every day from Luanda, the capital of the Republic of Angola for the next 12 months while on a work assignment there. Expect transmissions to take place throughout both day and night with no fixed times on 80 to 10m including WARC frequencies using SSB and CW. For comprehensive details, please check D2AK on QRZ.COM where you will find more information concerning suggested frequencies, QSL procedure etc.

Larry, W6NWS will be in Vietnam until 9 June. He expects to be active as XV2W when time permits, mainly around the CQ WPX CW and SEANET contests. QSL via home call, direct or via the bureau and Logbook of The World.

Jan-Willem, PA7JWC will be active on the HF bands and 6 metres as 3B8/PA7JWC from Mauritius Island, which is IOTA reference AF-049, until 22 May. QSL via his home call, direct or via the bureau and Logbook of The World. He has a website at www.pa7jwc.nl.

Alex, M0SFR will be QRV as ZL/M0SFR/QRP on the Great Barrier Island, IOTA OC-201, from 21 to 23 May and will operate in weak signal modes including JT65A and Olivia 16/250, primarily on 20 and 30m bands. CW and SSB may be attempted if the conditions permit. Further information is on QRZ.com.

Now the contest news

Today, 16 May, sees the final hours of the 144MHz May contest. It finishes at 1400UTC. The exchange is signal report, serial number, locator and postcode.

Also today is the 1st 144MHz Backpackers contest from 1100 to 1500UTC.The exchange for this event is signal report, serial number and locator.

On 18 May the UHF UK Activity Contest takes place between 1900 and 2130UTC. Using all modes on the 1.3 and 2.3GHz bands the exchange is signal report, serial number and locator.

The CW leg of the 80m Club Championships takes place at 1900 to 2030UTC on 20 May. The exchange is signal report and serial number.

On 23 May the 70MHz Cumulative takes place between 1000 and 1200UTC. Using all modes the exchange is signal report, serial number and locator.

The EU PSK DX Contest on 22-23rd is unusual in that it is for BPSK63 only. It takes place between 1200 and 1200UTC on all bands between 3.5 and 28MHz. There are no fewer than 22 categories to enter, with the maximum permitted power in any of them being 100 watts. The exchange is also unusual in that it requires entrants to send their European Area Code. Click on the link at http://eu.srars.org/index.php for a full list.

Now the solar factual data for the period from the 3rd to the 9th of May, compiled by Neil Clarke, G0CAS on the 10th of May.

The solar disc had sunspot groups visible everyday. In fact on the 5th six groups were present. One of those groups grew rapidly in size and magnetic complexity. However by 9th it had decayed just before it rotated out of view. Before that the group had produced 7 C class and 1 M class solar flares. Solar activity increased to moderate levels on the 5th. Solar flux levels increased from 80 units on the 3rd to peak at 83 units by the 5th but then declined to 75 by the 9th. The average was 80 units. The 90 day solar flux average on the 9th was 81, that's the same level as last week. X-ray flux levels increased from A6.8 units on the 3rd to B1 by the 5th. The average was A7.2. The geomagnetic field started at `active' levels with the Ap index at 27 units, this was due to a recurring coronal hole. Activity then declined but only to unsettled levels. This is reflected in the weekly average which was Ap 11 units. The only quiet day was the 9th when the Ap was 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase to 750 kilometres per second on the 5th and then gradually declined to 360 by the 9th. Particle densities were low throughout and varied between 1 and 3 particles per cubic centimetre. Bz varied no more than between minus 6 and plus 5 nanoTeslas for the period.

VHF aurora was reported for many hours on the 3rd on both 50 and 144MHz, extending to southern England when the disturbance was at its peak. Just before the onset of the storm there was a marked enhancement of HF propagation over southerly paths, but MUFs were subsequently depressed by several MHz.

And now the solar forecast. This week the quiet side of the Sun is expected to be looking our way and with it solar activity should be at very low levels. As previously warned, it would only take one active sunspot group to change that. Solar flux levels with a quiet Sun should be in the high 70's for most of the week. Geomagnetic activity is expected to be mostly quiet until the end of the week when a recurring coronal hole disturbance is expected to arrive. MUFs during daylight hours at equal latitudes should be about 20MHz for the south and 17MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of about 27MHz. The optimum working frequency with a 90 per cent success rate will be around 21MHz. The best time to try this path will be between 110 and 1600 hours. Sporadic-E is expected to take place some days during the coming week with opening up to 70MHz expected during any larger openings.

And that's all for this week from the propagation team.

Next, the Local News:

NEWS FOR THE MIDLANDS

On Monday 17 May Gloucester Amateur Radio & Electronics Society is having a workshop and construction evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 17 May South Birmingham Radio Society has a committee meeting. Contact Don, on 0121 458 1603.

On Monday 17 May Telford & District Amateur Radio Society is having a quiz and curry night with G3JKX and M0TAW. Contact Mike, G3JKX, on 01952 299 677.

On Monday 17 May Welland Valley Amateur Radio Society is having a talk on DF and fox hunting by Bob, G3ORY. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Tuesday 18 May Derby & District Amateur Radio Society is watching a video. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 18 May Loughborough & District Amateur Radio Club is having a demonstration of 160m aerials by Brian, G4JCH and Art, G3KWY. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 19 May Bolsover Amateur Radio Society is having a DF practice night. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 19 May Hinckley Amateur Radio Society is on the air. Contact John, M0JAV, on 07836 731544.

On Wednesday 19 May Lincoln Short-Wave Club is having a quiz night. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 19 May Midland Amateur Radio Society is on the air and holding training and Morse classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 19 May South Notts Amateur Radio Club is having a talk on the component theory of inductors. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Thursday 20 May RAF Waddington Amateur Radio Club is having a shack and chat night with radio and antenna play. Details from Judy Rowlands, on 07544 456422.

On Thursday 20 May Salop Amateur Radio Society has a natter night and is running a Foundation Course practical evening. Details on the club website at www.salop-ars.org.uk.

On Friday 21 May Coventry Amateur Radio Society is having a wine & cheese evening. Contact John, G8SEQ, on 07958 777363.

On Friday 21 May Melton Mowbray Amateur Radio Society Annual construction Competition. For more information contact Geoff, G3STG, on 01664 480 733.

On Friday 21 May Nunsfield House Amateur Radio Group is working out its future club programme, so please bring ideas with you. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 21 May South Birmingham Radio Society has a construction evening. Contact Don, on 0121 458 1603.

On Friday 21 May Spalding & District Amateur Radio Society is having a presentation on community projects and the railway station by Alan North of South Holland Radio For more information contact Graham Boor, G8NWC, on 07947 76448.

On Saturday 22 May Lincoln Short-Wave Club is putting G5FZ on air. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 17 May Angel of the North Amateur Radio Club is having a talk by Mike Taylor on the basics of electrical safety and EMC testing. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 17 May Hornsea Amateur Radio Club is taking part in the SARS and HARC G3GBH Cup, at Scarborough. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Monday 17 May Sheffield Amateur Radio Club is having a talk on hip replacement & vacuum plasma spraying by G0OUG. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 17 May Thornton Cleveleys Amateur Radio Society is having a talk entitled ATC on the air by Roy Walker. Details from John Foster, 2E0EZY, on 01253 399377.

On Tuesday 18 May Chester & District Amateur Radio Society is building kits and operating radios. Details from Barbara Green on 07957 870770.

On Tuesday 18 May Halifax & District Amateur Radio Society is operating /P, followed by a pie feast at the Hobbit. Contact Anthony Vinters, on 01422 822636.

On Tuesday 18 May Morecambe Bay Amateur Radio Society is having a social evening. For more information contact Martin Hazel, M0ZIF, on 01524 848193.

On Wednesday 19 May Hornsea Amateur Radio Club has its third fox hunt with G4YTV and G3RMX. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 19 May Mid-Cheshire Amateur Radio Society is having a committee meeting coupled with the club project. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 20 May Hornsea Amateur Radio Club is taking part in the RSGB 80m CW Club Contest, home stations. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 20 May Preston Amateur Radio Society is having a talk on Morse keys by John, G3OWO. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 20 May South Cheshire Amateur Radio Society is holding a club net on 2m. Contact Chris Wiseman, G0RDK, on 01782 773185.

On Thursday 20 May South Manchester Radio and Computer Club is holding its AGM. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 20 May Wakefield & District Radio Society is having a committee meeting and is on the air. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 21 May East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 18 May Livingston & District Amateur Radio Society is having a club evening. For more information contact Norman, on 07740 946192.

On Thursday 20 May Aberdeen Amateur Radio Society is having a VHF fox hunt. More information from Lewis, GM4AJR, on 01224 575 663.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Monday 17 May Basingstoke Amateur Radio Club is comparing the performance of a magnetic loop versus a long wire with Garry, M0TIG. Details from Clive, G4ODM, on 01256 326050.

On Monday 17 May Braintree & District Amateur Radio Society is holding its AGM. For more information contact John, M5AJB, on 01787 460 947.

On Monday 17 May Burnham Beeches Radio Club Propagation 2 - G4XDU. Contact Dave, G4XDU, on 01628 625 720.

On Monday 17 May Felixtowe & District Amateur Radio Society is planning for ESWR. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday 17 May Milton Keynes Amateur Radio Society is having a shack open night. For more information go to www.mkars.org.uk.

On Tuesday 18 May Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 18 May Bromley & District Amateur Radio Society is having a talk on EMC by Colin Wooff, G3SPJ. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 18 May Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 18 May Verulam Amateur Radio Club is having a talk on contesting by G3YYD. Details from Ralph, on 01923 265572.

On Wednesday 19 May Bury St Edmonds Amateur Radio Society is having an RSGB evening with Deputy Regional Manger Steve, M1ACB. Details from. Details from George Woods, G3LPT on 01359 259518.

On Wednesday 19 May Chesham & District Amateur Radio Society is planning for the boot sale. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 19 May Dover Radio Club is having a natter and operating evening. For more information contact Brian, G4SAU, by email to g4sau@darc.org.uk.

On Wednesday 19 May Norfolk Amateur Radio Club is holding its AGM. Details from Chris Danby, G0DWV, on 01603 419204.

On Wednesday 19 May Worthing & District Amateur Radio Club is having a discussion evening. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 20 May Colchester Radio Amateurs are discussing ideas for the newly licensed and setting up a shack. Contact Kevan, 2E0WMG, on 07766 543784.

On Thursday 20 May Lowestoft & District PYE Amateur Radio Club is having a shack night. Details from Phil, G0JSG, on 01502 585448.

On Thursday 20 May Shefford & District Amateur Radio Society is having a 2m mobile DF hunt with Steve, M0DYR and Brian, M0HAS. Details from David, G8UOD, on 01234 742 757.

On Thursday 20 May Sutton & Cheam Radio Society is holding its AGM. More information from John, G0BWV, on 020 8644 9945.

On Friday 21 May Mid-Sussex Amateur Radio Society is having a talk on bats. Contact Peter, G4AKG, on 01444 239371.

On Friday 21 May Wey Valley Amateur Radio Group is holding the Hernia Cup inter-club competition. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 22 May Radio Society of Harrow is operating GB1RBP at Bentley Priory. More information from Linda, G7RJL, on 0208 386 8586.

On Sunday 23 May Chesham & District Amateur Radio Society is attending the Luton Boot sale at Stockwood Park. More details from Terry, G0VFW, on 01442 831 491.

NEWS FOR THE SOUTH WEST

On Monday 17 May Appledore & District Amateur Radio Club goes back to basics, looking at the role of the ATU and modulation with G4HXK and

G4CHD.. Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

On Tuesday 18 May Blackmoor Vale Amateur Radio Society is having an HF evening in the shack. Contact Tony, G0GFL, on 01258 860741.

On Tuesday 18 May West Devon Radio Club is having a VHF antenna construction night with construction tips and guides for beginners. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 19 May Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 19 May Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 20 May South Bristol Amateur Radio Club is holding a DX challenge. Contact Len, G4RZY, on 01275 834 282.

On Thursday 20 May Swindon & District Amateur Radio Club is having a quiz. Contact Den, M0ACM, on 07810 317750.

On Thursday 20 May Yeovil Amateur Radio Club is having a talk by G3MYM. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 21 May North Bristol Amateur Radio Club is having a talk on Echolink by Paul, G8YMM. Details from Dick on 01454 218362.

On Friday 21 May Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday 17 May Dragon Amateur Radio Club is having a junk sale. Contact Stewart Rolfe, GW0ETF, on 07833 620733.

On Monday 17 May Llanelli Amateur Radio Society is on the air. Contact Craig, MW0MXT, on 01269 840292.

On Tuesday 18 May Carmarthan Amateur Radio Society is having an exams tuition night. Contact Alastair Underwood, GW0AJU, on 01267 290822.

On Tuesday 18 May Wrexham Amateur Radio Society is on the air. For more information contact Glyn, MW0BNB, via the web at www.qsl.net/wars.

He meant the "volume" knob (AF knob), sometimes also called "AF gain",
"audio" or similar.

Yes, set RF gain to the maximum (especially with such a small antenna as
a buddipole) and make sure all other buttons are set as recommended in
the manual (especially IF shift should be "neutral").

Daylight operation on 40 might be disappointing but at night you can
have some nice DX. Try CW or the digi modes instead of SSB (SSB needs
bigger signals).

HTH, enjoy amateur radio,
73 from Hamburg/Germany,
Oliver (DL9QJ, N3NSF)

SARL NEWS - SUNDAY 16 MAY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is sad to announce that tragic Airbus accident in Tripoli claimed the lives of 2 well known South African amateur radio operators namely Norbert Taferner, ZS6ANL, and his wife Paula and Anton Matthee, ZS6A.

Norbert was associated with the Division of Civil Aviation, which looks after safety in the air, and it is sad that his life came to an end in an aircraft accident. As far as it is known he leaves a son.

Anton is survived by his wife Ilse and two daughters Inge and Anja.

Norman Merrifield, ZS6NKM, died on Saturday 8 May 2010 after a very painful battle with cancer.

Our sincerest condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today:

SARL CONTESTS - YOUR INPUT NEEDED

VHF/UHF/MICROWAVE INDABA - YOU ARE INVITED

SPECIAL LICENSE ARRANGEMENT FOR WORLD CUP VISITORS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SARL CONTESTS - YOUR INPUT NEEDED

Geoffrey Levey ,ZS6GRL, has been appointed as the SARL Contest Manager. He has set himself the task to increase the participation in all the contests so that they become a popular event on the calendar once again. "I do not know the full reason why participation or interest waned in the contests, but we now have a chance to correct the situation", he said. "I am prepared to modify the contests viz. rules, scoring etc to make it easier for the submission of logs, but for this to happen I need your input."

He said that he is aware of grumblings about some of the contests such as rules that have changed, scoring that is difficult and a host of other complaints. "If there were problems in the past between the SARL and the various clubs or individuals that caused this division, then let's put that all behind us and see if we can move forward with new ideas."

He also said that he is aware that the results of competitions are taking too long to be announced, and is planning on changing that situation. "I believe that the results should be announced within 12 days after the closing date for log submissions, to allow for postal submissions, and if certificates or prizes are to be awarded that they are posted shortly thereafter."

It is now your chance. If you would like to get involved in the planning of contests, or have positive suggestions, please drop Geoff an email to contest[at}sarl.org.za. Remember it is planned to have the draft copy of the contest "blue book" for 2011 ready by the end of August 2010.

Listen to an interview with Geoff on SARL's Amateur Radio Mirror International this morning or download it from the web for your club bulletin.

RADIO TECHNOLOGY IN ACTION - DON'T MISS THE DURBAN EVENT

Full details of the Durban RTA programme are now available on www.sarl.org.za. The event will be held at the University of KwaZulu-Natal on Saturday 29 May 2010. Learn more about D-Star with Multisource. Find out how to improve the audio from your HF radio with a DSP kit and how to get involved with a simple radio direction finding system to take part in an ARDF event.

There are attractive attendance prizes sponsored by RS Components and others.

The cost of attendance is R50 which includes refreshment at lunch time. Students and Learners pay only R20.

VHF/UHF/MICROWAVE INDABA - YOU ARE INVITED

The SARL will host a VHF/UHF/MICROWAVE Indaba on Saturday 26 June 2010 at the National Amateur Radio Centre at 12:00 for 13:00. The agenda includes discussions on VHF/UHF/Microwave operating, contesting and contest rules. Attendance is free, refreshment will be served and

participants will take part in a lucky draw for an ARRL Antenna Book and free software.

Clubs are requested to discuss their activities and Contesting in the spectrum above 30 MHz at their club meetings and on the air activities and brief their delegates to put their suggestion and proposals on the Indaba table for discussion. Clubs not able to send one or more representatives are requested to send in their proposals and suggestion to contest@sarl.org.za. To assist with arrangements please confirm attendance by email by 21 June. The address: contest@sarl.org.za.

After the Indaba you are invited to join an informal dinner at a nearby restaurant at your own expense.

An intecnet is planned for Sunday 18 July 2010 at 19:30 to give feedback and discuss the plans formulated on a national level.

SPECIAL LICENSE ARRANGEMENT FOR WORLD CUP VISITORS

Visitors to South Africa during the Soccer World Cup event may operate amateur radio while in South Africa using the prefix ZS10 in front of their own callsign for example ZS10/G3XYZ.

The South African Radio League negotiated an agreement with the Independent Communications Authority of South Africa to allow all licensed Radio Amateurs visiting South Africa during June and July 2010 to operate while in South Africa on condition that they register with the South African Radio League prior to arrival in the country. Full details and a registration form can be found on www.sarl.org.za.

NATIONAL RAE THIS THURSDAY 20 MAY 2010

The upcoming National RAE is taking place this Thursday 20 May 2010 at 19:00 at various examination centres around the country. There has been a record entry of 152 Candidates. The SARL would like to wish good luck to all candidates who are writing the examination. Please do not rush through your exam paper, there is plenty of time. Double check your answers before making a final choice.

Just a reminder to all Class B candidates that there are now 50 questions to complete. This was communicated at the National Convention of the SARL which was held in Port Elizabeth last month. There is still plenty of time to complete the examination in 60 minutes.

CONTEST NEWS

Today, 4 days before the real event, a three hour long sprint will commemorate the inauguration of the SARL on 20th May 1925, 85 years ago. The special call sign, ZS85SARL, will also be used for the first time during the contest. ZS85SARL will be on the air on phone from the Paarl on 80 and 40 m where it will be operated by the Boland Amateur Radio Club. . ZS85SARL will be on phone from Bloemfontein on 20 m. It will also be active on CW from Somerset West under the able hand of Vidi, ZS1EL.

The sprint will be on the air from 12:00 to 15:00 UTC (14:00 to 17:00 CAT). There are a large number of prizes to be won for individual achievements. In addition, all logs with more than 10 contacts will go into the lucky draw for an ARRL Handbook while the participant under 18 years of age on the day of the contest who achieves the highest score will also win an ARRL Handbook.

A special 85th Anniversary QSL card will also be available for stations who work ZS85SARL

Full details are on www.sarl.org.za and have been published in SARL HF Happenings.

Contest Results.

The Contest Committee received fifteen logs and one check log for the SARL Hamnet 40 metre Simulated Emergency Contest. The winners are as follows:

Single Operator, Stationary Mobile - Geoff Levey, ZS6GRL; Single Operator, Portable - Pierre van Deventer, ZS6BB; Multi-operator Portable - 7P8BHF [Andries Visage, ZS6VL, and Michael Roodt, ZS6BHF] Single Operator, Base station - Jan Botha, ZS4JAN.

The contest committee received four logs for the first leg of the SARL VHF/UHF analogue contest held in March 2010.

Multi operator station. 1st Pretoria ARC, ZS6PTA, 70 430 points; 2nd John Vorster Technological High School ARC, ZS6JVT, 2 264 points.

Single Operator Station. 1st Carl Minne, ZS6CBQ, 12 440 points; 2nd Philip Venter, ZS4PV, 2 561 points.

The contest committee received six logs for the first leg of the SARL 80 Metre QSO Party, this from 69 participants.

1st Jan Botha, ZS4JAN, 655 points; 2nd Phillip Esterhuizen, ZS4PJ, 645 points 3rd Theunis Potgieter, ZS2EC, 495 points.

The full results have been published in SARL HF Happenings 405, available on www.sarl.org.za or by e-mail.

CLUB NEWS

An important Flea Market for Radio Amateurs takes place on 5 June 2010 at 10:30 at the ZERABI reception centre located directly adjacent to the high-way approximately half-way between Klerksdorp and Potchefstroom.

Admission is free and no sales fees are charged, go and sell your items. Braai facilities, braai packs, hotdogs, refreshments and a cash bar as well as sleep-over facilities are available. Go and enjoy yourself.

For enquiries phone Stef, ZS6AOK, at 082 773 5297.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. The earth facing side of the sun remains blank of sunspots and solar activity should remain at very low levels. The effective sunspot number is expected to be less than 10 for this week.

15 m will provide the best opportunities for DX followed by 17 and 20 m. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings it will be good towards Europe. contacts with the USA are once again becoming challenging. Contacts with Australia and New Zealand will be challenging. During the afternoons and evenings 15 m contacts may also be possible with Brazil.

Local conditions are going to be good for this afternoon's SARL contest. Early in the afternoon 20 m will be best for the longer distance contacts. Later on 40 m will be best followed by 80 m late afternoon.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

16 May - SARL 85th Anniversary Sprint, 12:00-15:00 UTC; 20 May - RAE countrywide at 19:00; 21 May - Ray Webber's and Duff Road old timers meet at 12:30 at Nino's; 22 May - Special station ZS85SARL on the air at Ysterplaat; 29 May - RTA symposium in Durban; 5 June - Flea market at 10:30 at the ZERABI reception centre half-way between Klerksdorp and Potchefstroom; 26 June - VHF indaba at the NARC starting at 12:00; 18 July - Intechnet at 19:30 on VHF/UHF/MICROWAVE matters; 24 July - RTA symposium in Cape Town; 21 August - RTA symposium in Port Elizabeth; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual; 18 September - RTA symposium in Gauteng; 30 September - closing date for phase 1 of the Innovation project.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE. Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 16th May 2010

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 7th July at 2pm in the ComReg Offices in Dublin and at other centres if warranted by the numbers.

Information on examination fees and other details please see 'Theory Examination' in the 'Information' section of the IRTS website at www.irts.ie

Intending candidates are also referred to 'Studying for the Amateur Radio Examination' in the 'Downloads' section of the website.

The latest date for receipt of applications to sit the examination is Wednesday, 23 June next but it is important to note that places at the exam are allocated on a first come first served basis.

AREN News

AREN members Liam EI3HK, Chris EI7AAB, Nick EI2JL and Paul EI2CA, provided assistance last weekend to the Inland Waterways Association in bringing boats between locks into the Dublin Basin for the Dublin Rally. The return leg will be on 21-23 May & anyone available to assist is requested to contact Liam EI3HK on 01-8316266 or 086-2521542

Upcoming events for AREN include the Croi cyle race in Galway on 23 May and the Galtee Walking Festival on 5 & 6th June in Tipperary.
Please contact John Ronan EI7IG if you are available to help at any of these events, and new members are always welcome.

How did Amateurs get their bands?

On Tuesday May 4th, John Breen EI7BV gave a most interesting talk to South Dublin Radio Club. Titled "How did Amateur get their bands - the VHF, UHF, SHF & EHF bands", the talk was a follow-on to one he had given last year which covered the bands below 30 MHz. A large number of club members were in attendance together with guests from the Department of Communications, Energy and Natural Resources and ComReg.

John traced the origins of amateur allocations starting with the 1947 World Radiocommunication Conference in Atlantic City. He showed how, at subsequent conferences, new frequencies were allocated, but also detailed the extent to which allocations to the amateur service were eroded with a reduction of primary and exclusive amateur bands to secondary or shared use.

John emphasised the work of IRTS and IARU nationally and internationally over the years in both obtaining and defending allocations for the amateur radio and amateur satellite services. We should all remember that without access to spectrum our hobby would be dead.

CASHOTA activation in Co Louth.

Dundalk Amateur Radio Society, will be activating St. Johns Castle, Carlingford, Co Louth. On Sat / Sunday, 29 / 30th May 2010. Castle No. EI ??? / C

WAI squares, EI Counties, and CASHOTA, conditions will be available to stations who call in, operation will be on all HF bands, and on most of the VHF / UHF bands as well. All QSL routes will be catered for.

Call sign of the station will be EI7DAR/P,

The organizers of the Carlingford Oyster Festival have invited the Dundalk ARS to demonstrate Amateur Radio to the public, and there will also be some Tall Ships in Carlingford Lough over the weekend. A good outdoor activity is expected for all the family.

Full details of the event will be available on : www.ei7dar.com and www.cashota-ireland.org/

Please run for next few weeks. WAI and grid reference will be supplied soon !

Stolen Antenna, Drogheda

The antenna is a Watson Multi-Ranger 9. It is a distinctive antenna, as many of you will know. It has a black bottom part with six headphone-like sockets, and an extendable whip. Even at its shortest it is about four feet and fully extended is more than six feet.

This particular antenna has some recently-added distinguishing features. When it was stolen, the whip was shortened for six meters. If extended by opening the little nut with a hex key, there are four further black "rings" along the whip. So if anyone is offered one of these for sale, check the whip for five black rings, marked with permanent marker.

If anyone happens to be offered one of these for sale in the next while, Anthony EI2KC would appreciate an email or a call at 086-8335055.

Alfa Romeo Special Event

Look for Frans, PC2F, to activate the special event callsign PC100AR between May 29th and June 26th.

Activity is to celebrate 100th anniversary (June 24, 1910) of the famous Italian car. Activity will be on the HF bands.

A special QSL card will be made after this period and will be sent via the Bureau or direct Also, an eQSL will be sent.

Rallies

Saturday 29th May 2010 Mid Ulster Amateur Radio Club Rally, Drumgor Youth Centre, Drumgor Heights, Craigavon Information: www.muarc.com

For further Rally info and contact details please check out the IRTS Website.

http://www.irts.ie/cgi/rallies.cgi

History this Week

1896 Edison patents first fluorescent electric lamp.

1897 Marconi transmits 14.5 Kms across Bristol Channel.

1897 Braun displays his cathode ray tube, BostonExhibition

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Amateur Radio Newsline(tm) Report 1709 - May 14 2010

Amateur Radio Newsline report number 1709 with a release date of Friday, May 14, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Dayton opens its doors for Hamvention 2010, Australian hams fear the possible loss of 450 MHz, a ham accused of jamming police pleads not guilty and a broadcast transmitter is stolen while its on the air. Find out the details on Amateur Radio Newsline(tm) report number 1709 coming your way right now.

(Billboard Cart Here)

**

THE SOCIAL SCENE: HAMVENTION 2010 IS ON

The doors of the 2010 Dayton Hamvention are opening as we go to air. Since 1952 the Dayton Hamvention has been sponsored by Dayton Amateur Radio Association. It has grown to be the world's largest amateur radio gathering, attracting hams from throughout the globe. And according to Assistant General Chairman Mike Kalter, W8CI, this years Hamvention is dedicated to radio clubs and the work that they doworldwide:

--

Kalter: "This years theme is amateur radio clubs worldwide. We decided that as our club is a big club. The Dayton Amateur Radio Association. And it takes a lot of people to put on something like this, so we were thinking that there are a lot of clubs that do a lot of good in the world so we thought that this would be our theme this year. We even have a Club of the Year award that we instituted this year."

--

Mike Kalter made that comment in an interview with RAIN's Hap Holly, KC9RP. At the same time he said that 2010 may be a year of growth for the Hamvention itself:

--

Kalter: "We have sold more tickets to date than we did last year at this time. We have more inside exhibits and more Flea Market spaces sold than we did last year at this time. So it looks as though we are going to be successful on those counts."

--

And what can visitors expect this year? Again, Mike Kalter, W8CI:

--

Kalter: "We have some interesting things that are going to happen. "Discover Homebrew" will be in our demonstration area where anyone wants to bring their homebrew project and set it up.

"We will have a ham radio (training) class this year.

"Returning again this year will be the emergency communications display. That's been a big hit so we have that back as well.

"Also we have some D-Star information. The clubs W8BI Gateway will be linked to the 30-B reflector during Hamvention weekend.

"And this year at the (W8BI) special events station we will have speech units so that the visually impaired are able to participate -- so we are pretty excited about that. The exact frequencies are listed at our website at www.hamvention.org"

--

Kalter also says that there will be a lot of interesting speakers leading this years forums:

--

Kalter: "Dr. Paul Bernhart, KF4FOR, the Senior Research Physicist for the Naval Research Lab. He heads up the HAARP project at the Haval Research Lab in Alaska and Aricebo in Puerto Rico. He will be talking about HAARP which is the High Frequency Active Auroral Research Program.

"Gordon West will be there taking stage. He's going to talk about the latest in DSP speakers from Clear Speech and others. If you have never seen a Gordon West forum, they are always a lot of fun.

"Carole Perry is a professional educator from New York City and she will be presenting her Youth Forum.

"And Van Hoi, VR2HF, will be talking about what its like to be a ham in Hong Kong.

"The BalloonSat: forum will be back with Bill Brown, WB8ELK. And we are actually planning a balloon launch on Friday afternoon."

--

By way of background, the Dayton Hamvention started out life as the Southwestern Ohio Hamvention. The first organizational meeting was held in January 1952 with the convention taking place on March 22nd at the old Biltmore Hotel in downtown Dayton. And at that first gathering there were only seven exhibitors and six forums. Even so, it was a far greater success than the Dayton Amateur Radio Association could

have ever anticipated. They had hoped to attract 300 visitors but over 600 showed up. Now, almost six decades after John Willig, W8ACE, had asked the Dayton Amateur Radio Association to sponsor a ham radio convention the Dayton Hamvention remains the shining star in the ham radio sky.

We will have a full report on Hamvention 2010 next week. Meantime you can hear Hap Holly's complete interview with Mike Kalter, W8CI, by directing your web browser to www.therainreport.com and downloading this weeks Rain Report file. (ARNewsline(tm), RAIN)

**

RESTRUCTURING: 70CM IN JEOPARDY DOWN-UNDER

Radio Amateurs in Australia are worried that they may soon loose access to some or all of the 420 to 450 MHz band. This after the Australian Communications and Media Authority issues a statement on future use of the spectrum from 403 to 520 MHz.

Attachment 1 of the statement shows proposals for 420-430 MHz, there is no mention of the Amateur Service. With regard to 440-450 MHz the section on Proposed Transition Arrangements says that users in 452.5 to 453 MHz and 462 and 462.5 MHz spectrum will need to relocate either elsewhere in the 450 to 470 MHz band, or into another part of the 400 MHz band. Spectrum in 440 to 450 MHz will also be made available in consultation with the Department of Defense on a temporary basis.

The Australian Communications and Media Authority also propose to increase the number of UHF Citizen Band Radio Service channels from 40 to 80 by the use of 12.5 kHz channel spacing. More is on-line at www.acma.gov.au/WEB/STANDARD/pc_312108 (WIA)

**

RADIO RECORDS: FIRST ROS CONTACT ON 500 KHZ

While it may not yet be legal to use in the United States FCC rules, the first Q-S-O using the new ROS digital protocol has been made on 500 kHz between G0NBD and G4WGT.

The contact took place on April 30th over a 30 mile path. Initially they used ROS 500/16 mode and then the ROS E-M-E mode. During the contact power was reduced from 3 watts output to 30 milliwatts. The antennas were 35ft top loaded whips.

Practical Amateur antennas for this band are very hard to come by due to the wavelengths involved. It can require 50 or more watts of transmitter output just to get 100 milliwatts Effective Radiated Power. The success of the contact between the two U-K hams is proof that efficient weak signal modes such as R-O-S can help extend the communications range that is achieved using simple albeit inefficient antennas such as those used in this record setting test. (Southgate)

ENFORCEMENT: KJ6CEY PLEADS NOT GUILTY TO ALL CHARGES

A follow-up to last weeks story on the ham radio operator accused of making bomb threats, jamming police and fire channels, and interrupting the regions emergency radio traffic. Irene Marie Levy, KJ6CEY, has pleaded not guilty to felony charges of making criminal threats and making a false bomb report. She is also facing misdemeanor counts of maliciously interrupting a communications transmission and obstructing arrest.

According to the Desert Sun on-line newspaper, the intentional interference with police and fire radio communications allegation involved a bomb threat. Court papers say that it also contained what the newspaper terms as "specific" and "unequivocal" threats made to a certain sergeant, leading him to fear for the safety of his family,

Hemet police Lt. Mark Richards says that Levy was arrested at her home after investigators tracked her down by investigators using radio direction finding techniques according. A felony settlement conference was set for Wednesday May 12th and a preliminary hearing was tentatively scheduled a week later on May 20th. (Desert Sun, other published news reports)

**

TELECOMMUNICATIONS POLITICS: CONGRESSIONAL LEADERS SAY FCC MUST MOVE AHEAD ON BROADBAND

Two Washington lawmakers say that Congress should get ready to write new telecommunications policy, if needed. This following a recent court ruling that threw into doubt the government's ability to move forward with an ambitious broadband plan. Representative Henry Waxman and Senator John Rockefeller said the Federal Communications Commission should also consider short-term options, including a controversial idea to bring broadband under a stricter regulatory regime.

In a recent letter to the FCC, the lawmakers said that it is vitally important the agency be empowered to move forward with its National Broadband Plan unveiled earlier this year. To accomplish these objectives, the Commission should consider all viable options. This includes a change in classification of broadband, provided that doing so entails a light regulatory touch, with appropriate use of forbearance authority.

Reclassification would mean putting broadband under the same set of rules governing telephone services rather than its current status as a lightly regulated information service. For broadband providers, the option could mean more restrictions on pricing and having to share lines with competing Internet service providers. In the longer term, the lawmakers said that, if there is a need to craft a new telecommunications policy, that Congress will do so.

As previously reported here on Newsline, in April a Federal appeals court ruled that the FCC lacked the legal authority to stop Comcast from blocking online applications for distributing television shows and other large, bandwidth-hogging files. The FCC has since acknowledged the ruling does question its authority over broadband, but it vowed to press ahead. The big players in the industry including such entities as Verizon and Comcast fear reclassification would be overly burdensome and would likely challenge such a move in the courts. (Published news reports)

**

TELECOMMUNICATIONS POLITICS: STUDY SAYS 33% OF ALL AMERICANS LACK BROADBAND

Meantime, the FCC has determined that about one third of all Americans do not have a broadband Internet connection at home. According to a report from the regulatory agency the main barriers to adoption appear to be cost and literacy.

The FCC is working on a plan to deploy nationwide wireless broadband. The usage study titled Broadband Adoption and Usage in America was released at the Brookings Institute. But in the report there appears to be no mention of how many Americans do not want or feel that they have no need for any kind of broadband connectivity. (Telecom News)

HAMVENTION(R) NEWS: JARL TO ACCEPT IARU REGION 3 AWARD APPLICATIONS

The ARRL reports that representatives from the Japan Amateur Radio League will be attending the Dayton Hamvention and will accepting applications for the International Amateur Radio Union Region 3 Operating Award. The JARL will forward the applications to the New Zealand Association of Radio Transmitters who administers the award. NZART will then send applicants their certificate with any endorsements after Hamvention closes.

To be eligible for this honor, applicants must present a completed application, listing at least seven contacts from entities in IARU Region 3 whose amateur societies are member societies of the International Amateur Radio Union. No QSL cards are necessary, but only QSOs made after April 5, 1982 are eligible.

There are 35 available entities for the International Amateur Radio Union Region 3 Award. Hams who present seven QSOs will be awarded the

Basic Award. Hams who present 15 QSOs will be achieve the Silver Endorsement, while those who present 20 QSOs will receive the Gold Endorsement. The award fee is $4 or four International Reply Coupons. (ARRL)

**

THE SOCIAL SCENE: HAM RADIO EXHIBIT OPENS AT EUROPEAN PARLIAMENT

An amateur radio exhibition has opened in the European Parliament. Organized by the IARU Region 1 EUROCOM working group, the display focuses on emergency communications, education and space, with the aim to raise awareness among European politicians of the important role played by radio amateurs.

The new exhibition is sponsored by Mrs. Brigit Sippel. It was opened by IARU Region 1 President, Hans Blondeel Timmerman, PB2T. Photos of the event and further details are available on the IARU Region 1 website at www dot iaru-1 dot org. (IARU)

**

NAMES IN THE NEWS: GI4FUM FUN DXPEDITION TO MOZAMBIQUE

Some names in the news. First up is David Hutchinson, GI4FUM who is also known as 3DA0DJ. He is sponsoring a DXpedition to Bilene, Mozambique this coming October.

Bilene is a coastal resort on the Indian Ocean about 150 kilometers north of Maputu. GI4FUM says that he will fly from London's Heathrow Airport to Johannesburg and drive up to Mozambique. He says that plans are to run a station for Jamboree on the Air with local scouts on the weekend of October 16th and 17th and that they will also enter a station for CQWW SSB over the weekend of the 30th and 31st.

GI4FUM adds that there will be numerous opportunity for individuals to operate under their own C91 callsigns as well as sun bathing on an Indian Ocean beach in late African spring. More information on this fun sounding DX adventure is on line at www.3da0ss.net (Southgate)

**

NAMES IN THE NEWS: DIANA ENG, KC2UHB, DEVELOPS COLLAPSIBLE FABRIC YAGI

Designer and electronics enthusiast Diana Eng, KC2UHB, has developed a collapsible fabric Yagi for portable amateur radio satellite operation. In her column in MAKE Magazine she writes that one of her favorite ham radio activities is making contacts on satellites. She says that it is really fun to know that you're controlling something that's receiving and sending communications from space.

Eng notes that communicating with satellites means carrying a big Yagi antenna around. So she decided to use her fashion sewing skills to make a collapsible fabric Yagi antenna that's much easier to transport.

Eng notes that the actual antenna design is based on the work of engineer and writer Kent Britain, WA5VJB. The difference is the materials used in the final assembly. Thin brass tubing is used for the antenna elements while rolled up cloth doubles as both the boom and as a carrying case for the finished antenna. This makes it easily transportable as well as quick to set up in the field or for classroom satellite demonstrations. Full instructions on how to build one is on line at http://blog.makezine.com/archive/2010/05/collapsible_fabric_yagi_antenna.html (MAKE Magazine)

**

NAMES IN THE NEWS: K7BW TO OPERATE 6 METERS FROM SAN ANDREAS

Dennis Motschenbacher, K7BV will be active as 5J0BV from San Andreas Providencia from June 9th to the 20th. This to once again try and give out this extremely hard to contact location to Europeans on 6 meters. While not as rare in the USA, there still appears to be a large demand for this location world-wide even after Dennis's two previous operations devoted to 6 meters. More on this operation including QSL routing is on-line at tinyurl.com/2unguet (K7BV)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RADIO STRANGE: BROADCAST TRANSMITTER STOLEN WHILE ON THE AIR

Here's a story that may be hard to believe, but its true. The London Daily Record newspaper reports that a broadcast transmitter has been stolen while it was on the air.

The newspaper says that Mike Smith's Log In To Lunch show was being broadcast on Lanarkshire's radio station L107 when the airwaves went dead. After investigating the reason behind the sudden silence the station owners found that the transmitter had been taken from the 17th floor of an office building in the town of Hamilton.

Station managers told the police that the transmitter is about the size of a large refrigerator. Surveillance cameras from the office block show two men pushing it out on a dolly and loading it into a van. A potential audience numbering close to 600,000 listeners may have heard the popular station go off the air.

You can read more at http://tinyurl.com/3ay3492. And you thought these things only happened at remote, isolated hilltop radio sites. (RW)

**

EMERGING TECHNOLOGY: CELLPHONE RADIATION IMPROVES THE THOUGHT PROCESS OF MICE

>From the science page comes this interesting story regarding radiation from cellular telephones that claims it can improve your intelligence, but only if you are a mouse.

According to Gary Arendash of the University of South Florida in Tampa and colleagues, research being conducted using mice prone to an animal form of Alzheimer's disease showed that long-term exposure to electromagnetic radiation typical of cell phones slowed and reversed the course of the illness. Moreover, a similar exposure in normal mice for two hours a day over seven to nine months improved their cognitive abilities compared with control specimens.

Arendash and colleagues provided their data in a recent issue of the Journal of Alzheimer's Disease. They also say that the findings provide striking evidence for both protective and disease-reversing effects of long-term exposure to radiation at cell phone level.

But other experts cautioned that the science in the study while mainstream is still in its very early stages. Dr. Alan Lerner is a Neurologist at Case Western Reserve University in Cleveland, Ohio. In a public e-mail he said that the researchers took an an innovative approach to modulating Alzheimer's disease models in mice. but he said it's too early to say whether the finding have any relevance to humans. (Science OnLine)

**

HAM RADIO IN SPACE: SATELLITE LAUNCH DELAY

The launch of two amateur radio satellites, STUDSAT and TIsat-1, on the Indian PSLV-C15 launcher has been postponed until June. The rescheduling of the launch took place after a marginal drop in the pressure in second stage of the vehicle was noticed during the mandatory checks carried out on the launch vehicle. (AMSAT-UK, Southgate)

**

HAM RADIO IN SPACE: NEW AO-51 POWER MANAGEMENT SYSTEM ENABLED

A new power management system has been enabled on the Amsat Oscar 51 ham radio satellite. According to control station Drew Glasbrenner, KO4MA, if everything works right, the repeater should run at 1.01 watt while in sun, and 290 milliwatt while in eclipse and after exiting eclipse until the batteries recover to around 7.9 volts. Observations from the southern hemisphere while entering and leaving eclipse would be very helpful. They can be sent by e-mail to KO4MA (at) amsat dot

org. (ANS)

**

HAM RADIO NEAR SPACE: ALIEN-1 HAM BALLOON A BIG SUCCESS

The flight of the ALIEN-1 high altitude balloon package, built by three students at Reading School, in the United Kingdom has proved to be an overwhelming success. According to several sources the 434.075 MHz beacon worked as expected and over 3000 pictures were taken during the flight.

Due to the 434.075 MHz telemetry messages being sent at just 50 baud the payload could only send down one telemetry string every 15 seconds.

The highest altitude achieved by ALIEN-1 was 33.158km. This is believed the third highest in UK records. Some of the photos taken by ALIEN-1 Pictures on line at http://www.flickr.com/photos/alienhab/ (Southgate, WIA News)

**

ON THE AIR: TAIWAN SPECIAL EVENT STATIONS

On the air, keep an ear open for special event stations 3H100TW, 3T100TW and 3T0TW. All are operational from the capital city of Taipei, Taiwan, through December 31st. QSL's for all three stations should be sent via the BV bureau.

**

ON THE AIR: THE GREAT PATRIOTIC WAR

And if you worked Ukrainian special event station EO65JM between May 1st and the 15th you talked to an operator helping to commemorate the 65th anniversary of the victory in the great Patriotic War. The QSL Manager for this event is K2PF.

**

DX

In DX word that TU5KG will soon be fishing again around Crozet and Kerguelen islands. He has secured the callsigns FT5WQ and FT5XT and hopes to become active during shore leaves. No exact dates for his operation or QSL route has yet been announced

PA7JWC portable 3B8 is spending his holidays on Mauritius. He will be on the island through May 22nd or thereabouts. QSLs via his home call or via Logbook of the World.

K8LJG will be active portable 4 from Amelia Island, Florida in the Florida State North East Group through May 25th. He will be operating on 20 through 10 meters using CW and SSB, on the IOTA frequencies. QSL to John C. Kroll, K8LJG, 3528 Craig Drive, Flint, Michigan, 48506 in

the USA.

Lastly, VE3ZZ will be active as VE3ZZ stroke VY2 from Prince Edward Island between July 21st and the 26th. His operation will include an entry in the RSGB Islands on the Air Contest on July 24th and 25th as VY2X. QSL via his home callsign.

(Above from various DX news sources)

**

THAT FINAL ITEM: CONGRATULATIONS TO "BIG JIM" DAVIS W2JKD ON HIS 50 YEAR BROADCAST CAREER

And finally this week, here's a voice that's well known to listeners to this news service. It belongs to a ham who is about to pass a truly important milestone in his career and in his life. Take a listen:

--

Archive audio of W2JKD

--

Yes, that's Amateur Radio Newsline's longtime news anchor Jim Davis, W2JKD. And in just a few short weeks Jim will be celebrating his 50th year as a professional broadcaster both behind the microphone and behind the scenes.

Jim Davis, W2JKD, is a native of Buffalo, New York. He is a second generation and life long broadcaster who followed in the footsteps of his mother who was a singer on WKBW radio. In fact, "Big Jim" as he's known to his many friends began his career on June 19th, 1960 at a small radio station in Cheektowga, New York whose call letters were WNIA. Jim was only 14 at the time but convinced station managers that he was a lot older and went on the air using the name Mac Maguire. The first record he ever played was "Cathy's Clown" by the Everly Brothers. In the five decades he has been on the air, Jim has interviewed numerous politicians, radio, TV and film stars and has played an estimated 600,000 songs.

Over the years Jim has had successful runs at some of the nation's biggest radio stations. These include such well known calls as WOR - FM in New York City; KHJ in Los Angeles; CKLW in the "Motor City" of Detroit and Chicago's famed WLS-AM. While employed by RKO General Broadcasting, Jim was twice nominated for Billboard Magazine's "Major Market Air Personality Of The Year."

In 1981, Jim entered senior management by becoming Vice President and General Manager of Radio Station WVAF in Charleston, West Virginia. Currently, he is Vice President and General Manager for Florida's Vero Beach Broadcasters, L.L.C. which operates four FM and two AM stations. In December of 2008, and in addition to keeping the radio stations on the air, Jim was appointed Chief Operating Officer of Home Town Cable

Plus. This is a company that provides a state-of-the-art fiber-to-the-premises system in Port St. Lucie, Florida delivering High-Speed Internet, Cable TV, Telephone and Security Alarm Monitoring. Jim has also authored a book entitled "The Sales Success Spectrum-A System Of Radio Sales" which is used as a teaching and training manual radio stations.

In his spare time, Jim Davis is a licensed Multi Engine Commercial Instrument rated pilot and owner of a Piper Pathfinder. As a Civil Air Patrol member he has been trained as a Search and Rescue pilot and participates in looking for downed aircraft survivors.

Jim has been an amateur radio operator since age twelve and currently holds an Extra class license. He received a "designated examiner" status from the American Radio Relay League in 1985.

And since the early days of this news service when we were still the Westlink Radio Network, Jim has been an important part of the Newsline family. To many radio amateurs around the world W2JKD is considered as being "the voice" of Amateur Radio Newsline and a person that they have come to rely on for ham radio news since the early 1980's.

So please join us in congratulating Jim Davis, W2JKD, on an astonishing 50 years as a broadcaster who has contributed so mightily to the ongoing success of the radio broadcast industry and for his years of service to amateur radio as well. As Jim would likely be the first to tell you, its all been a truly fun ride. (ARNewsline)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only a week or so to nominate a deserving teen or pre-teen radio amateur for this yearly ham radio honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

NEWS RELEASE: By Rich Moseson, W2VU, Editor of CQ Amateur Radio, reports
(Friday, MayY 14, 2010 - 0400UTC):
CQ ANNOUNCES 2010 HALL OF FAME INDUCTEES(Dayton, OH - May 14, 2010) --
CQ magazine today announced its 2010 Hall of Fame inductees, welcoming 15
new members into the CQ Amateur Radio Hall of Fame, and two new members
each into the CQ DX Hall of Fame and the CQ Contest Hall of Fame.
The CQ Amateur Radio Hall of Fame honors those individuals, whether
licensed hams or not, who have made significant contributions to amateur
radio; and those amateurs who have made significant contributions either
to amateur radio, to their professional careers or to some other aspect
of life on our planet. The 2010 inductees (listed alphabetically) are:

Buchanan, Chester W3DZZ (SK) - Developer of the W3DZZ triband trap beam,
very popular with hams in the 1950s and '60s.
Cotner, Calvin K4JSI  Retired Director of Operations for Comsat World
Systems, awarded the 2009 Aerospace Communications
Award from the American Institute of Aeronautics
and Astronautics for "technical and strategic
leadership" in international cooperation in
satellite communications from the earliest days
to the present.
Dana, Forrest, 4AGR - Early Army Amateur Radio System member who (with
Ralph Hollis, 4AFC) provided critical communica-
tions after the Caribbean hurricane of 1928, main-
taining a link with the War Dept. and providing
information that brought help from the Army and
the Red Cross (2010 is the 85th anniversary of
AARS, the predecessor of MARS).
Harlan, Gene WB9MMM (SK) - Amateur radio magazine publisher. Editor/
Publisher, ATV Quarterly; founder, Cyberham
magazine.
```

Hart, George W1NJM - Former ARRL Communications Manager; chief
developer of the National Traffic System.
Hollis, Ralph 4AFC - See entry above for Forrest Dana, 4AGR.
Ingram, Dave K4TWJ (SK) • Prolific ham radio author; Contributing
Editor,
CQ magazine, 1982-2010, covering a wide variety
of topics and transmitting through the printed
word his unquenchable enthusiasm for ham radio.
Kangas, Paul W4LAA - Business news anchor on PBS for 30 years; known
as the "Walter Cronkite of business news."
Patz, Dr. Arnall ex-WA3EVC - Ophthalmologist who discovered and eliminat-
ed a major cause of blindness in premature babies.
Schmidt, Howard W7HAS - White House Cyber-security Coordinator.
Schneider, Bill K2TT - Chairman, Defense Science Board, an independent
federal committee advising the Secretary of
Defense.
Smith Jim, VK9NS (SK) • Noted DXer and DXpeditioner, author; longtime
member of the CQ DX Hall of Fame.
Smith, George AA2EJ - Inventor of the CCD (charge-coupled device)
sensor, which revolutionized digital imaging;
co-recipient of the 2009 Nobel Prize in Physics.
Stenning, Mark AA1AC • CEO, International Tennis Hall of Fame, Newport,
Rhode Island.
Wilson, George W4OYI (SK) - ARRL President Emeritus; ARRL President
1992-95; led ARRL portion of effort to create
vanity callsign program.

The CQ Contest and DX Halls of Fame honor those amateurs who not only
excel in personal performance in these major areas of amateur radio but
who also "give back" to the hobby in outstanding ways.

The 2010 inductees to the CQ Contest Hall of Fame are:
Don Hill, AA5AU - A major promoter of RTTY (radioteletype) contesting,
known among contesters as "the RTTY Elmer." Also
is a regular contributor on RTTY contesting to the
"National Contest Journal."
Larry Weaver, N6TW - Longtime member of the CQ World Wide Contest
Committee who developed some of the log-checking
software used today in scoring the CQWW and other
contests. Larry is also a past president of the
Southern California DX Club and a past Chairman of
the International DX Convention held each year in
Visalia, California.

The 2010 inductees to the CQ DX Hall of Fame are:
Robert Locher, W9KNI - An accomplished DXer, best known as an author
and mentor on effective DXing. His book, "The
Complete DXer," is the best-selling DX book ever
published; and his newest book, "A Year of DX,"
chronicles his effort to win the 2008 CQ DX

Marathon.
Lynn Lamb, W4NL - A co-founder of SEDCO, the Southeastern DX and
Contesting Organization, which sponsors an annual
convention featuring well-known speakers on DXing
and contesting. Lynn also writes regularly for "DX"
magazine and is a leading proponent of improved
DXing etiquette.

Formal inductions to the CQ Contest and DX Halls of Fame were scheduled
for the contest and DX dinners, respectively, at the Dayton Hamvention.

DXNL 1676 - May 19, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CT3 - MADEIRA, AF-014
Diethelm,CT3/DJ2YE, Norbert,CT3/DJ7JC, Kai,CT3/DL3HAH, Joerg,DL3QQ,
Ulrich,CT3/DJ9IE, Dieter,CT3/DJ8DS, Detlef,CT3/DK3QZ, Hans,CT3/DL1XW,
and Wil,CT3/PA0BWL, will be QRV from Madeira (AF-014) from May 25-28.
They will join the CQWW WPX CW Contest on May 29/30 signing CQ3L in a
multi OP category. DJ6QT handles the QSLs for CQ3L, all other QSL cards
should be sent via bureau to the appropriate homecalls.

IS0 - SARDINIA, EU-041
The special callsign IR0LVC will be activated with four stations in all
modes on all bands from Maddalena Island (EU-041) during the upcoming
Louis Vuitton Trophy between May 22 and Jun 6.
QSLs direct or via bureau to IS0MKX.

JT - MONGOLIA
Vasiliy,RW9YW, will show up as JT9YW from May 25 until Jun 2.
Unfortunately QSL only direct via PO Box 3233, Barnaul, 656015, Russia.

PJ4 - NETHERLAND ANTILLES, BONAIRE, SA-006
John,PJ4/K4BAI, is going to hit the airwaves from Bonaire (SA-006)
from May 25-31. He will sign PJ4A during the WPX CW Contest.
Bureau QSLs may be requested also via e-mail (k4bai@att.net).

VK9/LH - LORD HOWE ISLAND, OC-004
Tomas,VK2CCC (LY1F), will be QRV as VK9LL from Lord Howe (OC-004) from
May 24-31. Besides of his participation in the WPX CW Contest he will
focus especially on 80m/160m. QSL via bureau to LY1F, direct to VK2CCC,
LoTW or via OQRS on http://www.qrz.lt/ly1df/vk9ll.htm

VP5 - TURKS AND CAICOS ISLANDS, NA-002
Alex,VP5/PY2WAS, will be active in SSB and CW on 10m-80m from
Providenciales (NA-002) from May 20-23.
QSLs direct or via bureau to his homecall.

More information can be found at: http://vp5py2was.com

3C0 - ANNOBON ISLAND, AF-039
After signing 3C9B Elmo,EA5BYP, and Javier,EA5KM, will continue their activity as 3C0C from Annobon (AF-039) in CW/SSB/RTTY on 160m-10m from May 20 until Jun 2. They want to work with two stations at the same time as often as they can. Their online logbook will be made available after their return home on: http://www.3c0c-annobon.com
Their QSL manager is EA7FTR, Francisco Lianez Suero, Asturias #23, 21110 Aljaraque, Huelva, Spain.
Please allow a runtime of about one year for bureau QSLs.

6W - SENEGAL
Just,6W/LA9DL, Erling,6W/LA6VM, and Halvard,6W/LA7XK, will be active in CW, SSB and digital modes from May 18-26.
QSLs direct or via LA bureau to their homecalls.

8Q - MALEDIVES, AS-013
Thomas,OE2ATN, plans an activity as 8Q7AT from Velidhu Island (AS-013) between May 23 and Jun 4. Using his FT-897D and a G5RV antenna he will work mainly in SSB on 80m, 40m and 20m. QSLs via his homecall.

ARGENTINA, SPECIAL EVENT STATIONS
The "Radio Club Ushuaia" (LU8XW) is planning an activity from the city Tolhuin (SA-008, WAP WACA Ref ARG-23) to celebrate its 25th anniversary Operation will take place in SSB, CW, PSK, RTTY and via satellites from May 22, 0100 UTC, until May 24, 0300 UTC. QSLs via WD9EWK or LoTW.
All QSOs count for the "Radio Club Ushuaia Permanent Diploma". Further information is available via e-mail to lu8xw@lu8xw.com.ar or you can check their website at: http://www.lu8xw.com.ar
---
To celebrate the 200th anniversary of the revolution Argentinian HAMs may use following special prefixes from May 22-25:
LU stations: LR
LW stations: LV
AZ stations: LT
Clubstations: LS
Schools and scouts: AY
A special award for radio amateurs and SWLs will be issued as well.
For more information please visit: http://www.lu4aa.org/bi/awards.htm

CHILE, SPECIAL EVENT STATION
The special callsign 3G3ITU is activated to mark the 75th anniversary of the ITU until May 31. QSL via CE3AA.

ITALY, SPECIAL EVENT STATION
Giuseppe Garibaldi defeated General Landi fighting for the House of Bourbon at Calatafimi-Segesta (near Trapani) on May 15, 1860. He organized the so-called "Expedition of the Thousand" which was an important step in the creation of a newly unified Kingdom of Italy.
Members of the ARI Marsala are using the callsign IR9ITALY until Jun 30 to remember this historic Italian moment. QSL via IT9FXY.

PORTUGAL, SPECIAL EVENT STATIONS
The special callsign CS2BV will be activated by several members of the club "Radioamadores do Entroncamento" in CW/SSB/digital modes on all HF bands on May 22/23. The QSOs from Belver castle (WCA CT-0053, DMP 1209, DCFP C-053, DMHP PG-018) count for the Portuguese castles award!

SOUTH AFRICA, SPECIAL EVENT STATIONS
The South African Radio League (SARL) celebrates its 85th birthday with ZS85SARL operated on 80/40/20m from the Ysterplaat Air Force Base (near Cape Town) on May 22, 0600-1800 UTC.

Visitors of the 2010 FIFA World Cup who are holding an amateur radio license may use the special prefix ZS10/ in front of their homecall during the months of June and July.
Find more information at: http://www.amateurradio.org.za/worldcup.htm

SILENT KEYS: Khos,JT1CD, informed the DX community that wellknown the DXer Surenjav,JT1BH, passed away on May 12, aged 58. Other HAMs who have left the community are Donald Moses (W6UY), Paul "Tom" Varney (K8PV), Glenn Gilley (KD5EZM), Richard Sanner (W9NG), Joseph Rozploch (ZS2JSR). Norbert Taferner (ZS6ANL) and Anton Matthee (ZS6A) lost their lives in the horrible airplane crash of Afriqiyah Airways in Tripolis on May 12.

LINKS: Current SOTA activities (mountain summits) are announced at: http://www.sotawatch.org
---
Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

May 22/23: Baltic Contest
May 23: Hamburg Contest
May 29/30: CQ WPX Contest, CW

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-043, SM, Vinga Island: SM6U, SB6A, SM6IQD, SM6MIS, SM6UQL, SM6VAO,SM6WET, SM6XMY and SM6YOF will be active with four stations in SSB, CW and RTTY signing 7S6W from May 20-23. See also: http://sm6.se/7s6w

EU-125, OZ, Jylland West Group: Yogi,OZ/DB5YB, will be QRV from the island Fano (aka Fanoe, DIA NS-002) between May 21 and Jun 2. QSL via DB5YB.

EU-125, OZ, Romo: A group of German radio scouts is going to activate the Danish island Romo (DIA NS-001) signing OZ1RDP from May 21-25. Eight to ten HAMs will use several radios mainly in SSB and PSK31 (some CW) on 20m, 40m and 80m, but also on 30m/17m/15m/10m/6m/2m.
QSL: ONLY via DL9BCP: via DARC bureau is ok, but NOT via OZ bureau!
Their website is: http://www.oz1rdp.de

EU-172, OZ, Langeland: Mic,OZ/DG5LAC/p, is QRV in SSB on 80m-10m "holiday style" from May 16-21. QSL via homecall.

373. MMMonVHF Newsletter 2010-05-20

Newsgroup: rec.radio.amateur.misc
Date: 2010-05-20 11:28:30 UTC
From: MMMonVHF News Mailer <nl@mmmonvhf.de>
Message-ID: <201005200937.o4K9bsBx015562@server13.web4a.de>
Source record: 5742
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.info

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-05-20
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page:
http://www.mmmonvhf.de/latest.php - welcome and enjoy...

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** NEWSLETTER at MMMonVHF **

As you might be noticed in past weeks I was in need to spread the
MMMonVHF Newsletter mostly on thursday and not anymore on friday.
The circumstances at my QRL are the reason and I hope youll not
have any problem with it - if the times at QRL chances again I
will try to work it out for fridays again but next future please
do welcome it as well in afternoon or evening at thursdays (special
Newsletters will spread out when Special News occurs with out a
fixed weekday or time, of course!). If you have any suggestions
about the Newsletter (pos. or neg. critic, some adds, or...) pse
do send a message via the contact form: www.mmmonvhf.de/kontact.php
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** SPORADIC E Saison 2010 **

The Saison on 144 MHz with the first Sporadic E opening have had
started past week (have a look last Newsletter). Since the may 11st
we saw nearly day by day high MUF and at 5 days the MUF did reach
the 144 MHz segment. Most openings occured south and south east of
europe and was accompanied by some FAI openings... In case of an
Sporadic E opening please do remember to send your report to us:

http://www.mmmonvhf.de/es.php >>> click on "Send your Report"

Remember please that we are going to publish ONLY 144 MHz Logs - if
we get input for 6m, 4m or 3m reports we do use it for the headline.
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** 8Q7QQ summery, photos, logs and QSL rx/tx **

Dear friends, finally I had time to finalize the 8Q7QQ 2010 summery.
I have also added 49 photos to give you an idea about life at 8Q7QQ.

Also included are the full logs by band with the information of QSL cards received so far and QSL sent up to today. We have sent our QSL today to all stations we got already a QSL from (we do only confirm QSL). If you have sent a QSL you can check if we did get it and if the QSL for you is on the way. I will update this section every few days. The summery has information about problems encountered and conditions experienced, both may be of interest for you - You find all info at: http://hb9q.ch/joomla/index.php?option=com_content Enjoy reading! vy 73 Dan, HB9CRQ/KT6Q/8Q7RQ for the 8Q7QQ team SOURCE: Dan, HB9CRQ/KT6Q/8Q7R via MoonNet

** Beacon PI7CIS OFF AIR **

Hi all, Frank PE1EWR informs me that the mains cable for the 'CIS beacons has been badly damaged and the beacons will be off air for some time. Damage is thought to be due ageing, and not anything sinister. SOURCE: Bob, G8HGN, via VHF-Reflector

MOONBOUNCE from MAURITIUS (3B8 / LG89QT)
Rene PE1L and his Team is qrv via moonbounce qsos from Mauritius, a top3 most wanted DXCC on 144 MHz. This time Eltje PA3CEE and Johan PE9DX will join the party. We will be qrv moonbounce 2 meter as 3B8EME. The Group is qrv since May 15th until May 26th 2010, 3B8EME will be active from Mauritius on 144.124 MHz - JT65B - 1st The locator is LG89qt - LATEST NEWS from the Team, dated 2010-05-20: LATEST NEWS from the Team, dated 2010-05-19:
Another successful day. We now have worked 247 inits in 45 DXCC. A lot of single yagi stations made it into our log and also some nice entities were added: CN, GW, PJ4, OY, OA and XE. Still missing OE, HS, KP4, LU, LY, VE to name a few. But we will be on the coming days and as said before: the conditions are just superb now. So please: GIVE IT A TRY !!! 144124 3B8EME first. This weekend the emphasis will be on 70cm. We have a small station, but we think PI9CAM, DL9KR (CW off course), HB9Q and who knows more are possible. Well see. 2M is also on the air so dont worry... more at the NEWSPAGE ...
SOURCE: tnx to 3B8EME direct to MMMonVHF

BV2A on 2m EME
Hello fellows, I am in Taiwan since about two weeks and already

contacted local hams to get permission and equipment to operate EME
from here. I will probably stay until November so there is quite
some time to do the one or other activity from Taiwan. Coming week
end we have already planned a 2m activity from the very North of
the country. Since the equipment is capable for EME, I suggested to
try it. Its not sure yet but please consider to watch out for us.
We will be QRV from Saturday 22nd around 1300UTC until Sunday 23rd
around 0800UTC. Please, this activity is intend to introduce EME
and to wake some interest. Further activities of course will follow
but I think it would be a good start already to get most out of this
opportunity. More details at: www.mmmonvhf.de/latest.php?id=3247

** KL7/KB7Q QRV on 6m EME **

Greetings all. The 6M EME Dxpedition from the Kenai Peninsula
goes well. I've completed with W7GJ (-22/-28) while I was elevated
OK1RD (-23/-21), and ZL3NW (-21/-21) off my moonset. CT1HZE and I
were down to final RRR when the moon went away here - drat! My moon
set over the salt water is a killer! When the tide is out my effect
antenna height is up around 45 feet which seems to bring my lobes
close to the horizon, ihigh tide gives me an effective height of 25
feet. It really starts to happen from 10 degrees down to the horizon
Anyhow I'm QRV. Check www.geneshea.com for specifics on the single
Yagi station equipment and a photo. 73,Gene, KL7/KB7Q Alaska Blog:
http://kb7q.blogspot.com SOURCE: Gene, KB7Q direct to MMMonVHF

** GM0KZG/MM on 6m again **

LATEST INFO from Andy, G0KZG dated 2010-05-20: I hope to be QRV
again from the 27/28th May until about the 11/12th June from the
Marine Patrol Vessel Norna on 6m again subject to QRL! Working
areas should be west and north of Scotland - possibly as far west
as IO36. QRG 50.160, and 50.260 for JT6M (2nd period), operating
times 0500 to 0700, 1800 +, hopefully with some afternoon operation
at weekends, subject to QRL! Equipment FT847, Eagle 3dx Yagi. 100w
SOURCE: Andy, G0KZG, direct to MMMonVHF

** Wake Island KH9 on 6m EME **

A number of people have been inquiring regarding the status of KH9
so I wanted to pass along this update. I just heard from WA2YUN
that he expects to receive his repaired K3 the next mail flight
to Wake Island, which is May 21. The good news is that the radio
is now functioning 100% again and is extremely sensitive. He is
horizon only, and is using a K3 with the PR6 preamp. His grid

locator is RK39hh. The bad news is that Colin will be leaving the island on that same plane, and will not return for a month. However he promises to do everything possible to become active on 6m EME and Es after he returns to Wake Island on June 18. GL and VY 73
SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF

** BREHAT ISL. - IOTA **

>From my 21 to 28 the Charente DX Group (CDXG) will sign TM0B, with 4/5 stations all modes and all HF bands (+ 50Mhz if possible) from Brehat Island references : IOTA EU074, DIFM MA012, EPC#11091 aera FR021). We will be in the EU PSK DX contest from may 22/23 with one station. The crew : Joel F1BLQ - Michel F5EOT - Eric F5LOW - Laurent F5MNK - Fabrice F5NBQ - Bertrand F6HKA - Leon ON4ZD/OS0S. QSL via F6ANA & log online after activity at http://users.belgacom.net/cdxg Hope to hear you from Brehat Island SOURCE: TM0B Webpage

** SV / KN20 **

Laci, HA0HW will be active as J48HW and SV8/HA0HW from Thassos from 27 May to 7 June. He will operate mainly CW, with some SSB, RTTY and PSK31 as well, on the HF bands (mainly on 40, 30, 20 and 17 metres) and on 6 metres. He will take part in the CQ WW WPX CW Contest as J48HW. QSL via home call, direct or bureau.

** CT / IM57 **

Joachim, DL8HCZ, will be back at his QTH in Portugal from mid of May 2010. As well some friends of him plan activities from there or on the way... CT7/DL8LAQ, Norbert, will be qrv from may 22nd until june 6th. He specially looks for ES oepnings... From 25th to 28th of may 2010 CT7/G0KSC will be there and make some antenna experieces... Also on the way will be Ralf as CT7/DL9XAT from up 2nd until 11st june. he will be mostly qrv on 6m and as well mobile qrv with call signs F/DL9XAT/m and EA/DL9XAT/m and be qrv with 100W and vertical on 6m. SOURCE: UKW-DX-Telegramm 6/10 (by DL8HCZ)

** J49A / IOTA **

The RASC DX Team plan to operate the special call J49A from Gavdos Island (EU-187, GIOTA KRS-021, MIA MGC-010, WLOTA LH-1885, WW KM24) in the RSGB IOTA Contest (24-25 July). Operators include SV9JI, SV9LM, SV9ANJ, SV9BMJ, SV9BKZ, SV9COL, SV9CJO, SV9DJO, SV9DJR, SV9FBK, SV9FBG, SV9IOI, SV9GPV, SV9GPY and possibly others. QSL via SV9GPV. Futher info at: j49a.blogspot.com/
SOURCE: NG3K DX-News

** 6V **

Silvia EA1AP, Juanjo EA1CJ, Alberto EA1SA and Raul EA5KA will be active from Senegal (requested call 6V7EA) on 25-31 July. They will operate SSB, CW and RTTY on 160-6 metres with three stations. QSL

via operator's instructions. Further information can be found at
6v7ea.dxciting.com SOURCE: [TNX EA3GHZ] via 425 DX News #993

** EO40 50MHz Grid Activation **

VUCC grid hunters who need Canadian grid EO40 may want to listen
for WB8BZK / VE3 who will activate EO40ud for six days from
Seseganaga Lake in Ontario between May 29 and June 3.
Band: 50 MHz SSB & CW - Frequencies: 50.135 MHz (starting on the
calling freq, 50.125 MHz and moving up to 50.135 during an opening)
Looking forward to a few band openings or maybe some aurora action.
Willing to make a few 1230Z SSB Meteor Scatter Sequence skeds. I
will QSL to all who need the grid. Send SASE to WB8BZK address on
QRZ.com - SOURCE: Mike WB8BZK/VE3 via VHF Reflector
For more details check http://www.mmmonvhf.de/latest.php?id=3243

** 50 (144) MHz Activity from LA & SM **

Ingo, SM6CMU, is going on his regular holiday trip to Lofoten
and try to be qrv on 50 MHz (maybe as well 144 MHz) from LA and SM
He is planing to go on a regular 2 week trip to Lofoten at the end
of July - beginning of August and 6M is for sure with his IC706MkII
transceivers one in the car and one to use in the cottages. 50 MHz
is now open for everywhere in Sweden so he will find some new ones
along the road which not could be used before. Will also do some
JT6M in the evenings/mornings. More details when time closer at:
http://www.mmmonvhf.de/latest.php?id=3245
SOURCE: tnx to Ingo, SM6CMU, direct to MMMonVHF

==> PUBLIC SERVICE: AMATEUR RADIO OPERATORS "STAND DOWN" FROM CHINESE
EARTHQUAKE RELIEF

The earthquake that struck China's Qinghai province on April 14
killed more than 2000 people and left thousands injured and homeless.
According to Fan Bin, BA1RB, of the Chinese Radio Sports Association
(CRSA), relief efforts are continuing for those left homeless. Amateur
radio operators from Beijing, Sichuan, Shandong, Anhui, Qinghai and
Jiangsu were widely involved in the disaster relief actions, traveling
to the disaster center. Working through the poor weather conditions,
they helped with transportation of medicines, tents, food and clothes
to the disaster area. The Amateur Radio operators were even directly
involved in disaster rescue activities -- one Beijing Amateur Radio
rescue team saved six people. Read more here

```

thquake-relief>.

==> ARRL AUDIO NEWS TO RETURN MAY 27

After a hiatus of four months, the ARRL Audio News is scheduled to return Thursday, May 27. With the advent of the new ARRL Web site, we have had to make some changes in the way the Audio News is presented. It will only be available as one mp3 file; we will no longer be breaking it up into segments. For the time being, it will not be available by telephone, but that feature may return in the future. You can find the ARRL Audio News here <http://www.arrl.org/arrl-audio-news> on the ARRL Web site.

==> THE 2010 ARRL EXPO AT THE DAYTON HAMVENTION®: LOVING EVERY MINUTE OF IT!

It just wouldn't be a "real" Hamvention if the weather didn't cooperate, and on Friday -- the first day of the 2010 Dayton Hamvention -- the humidity was brutal. Be it too much rain, too much sun (or not enough!) or maybe even a snowstorm, thousands of radio amateurs flock to Hara Arena. But late on Friday afternoon, the sweltering atmosphere gave way to clear skies and frisky breezes, a harbinger of the rest of the weekend.

Inside Hara, aisles were packed with hams from all over the world seeking the latest in Amateur Radio technology, products, gadgets, gizmos and more. It's said that if you can't find it at Dayton, it just doesn't exist. If you were looking for the latest in top-of-the-line transceivers, there were more than a few to choose from. If you needed a 45 tube for your 1920s-era TNT oscillator, take your pick from the more than 200 exhibitors and vendors - not to mention the acres of flea market booths -- attending Hamvention.

The largest exhibit at Dayton is the ARRL EXPO. Almost 150 ARRL staff members, officers, Board members and volunteers made their way to Dayton, bringing with them the best that Amateur Radio has to offer. With 25 exhibits and activities located in the EXPO area -- ranging from youth activities, kit building, QSL card checking and an expanded ARRL Bookstore -- throngs of amateurs wound their way through to check everything out. Read more here <http://www.arrl.org/news/the-2010-arrl-expo-at-the-dayton-hamvention-loving-every-minute-of-it>.

==> ARRL'S ANNUAL DONOR RECEPTION WELCOMES RECORD CROWD

The annual reception for ARRL donors in Dayton welcomed the largest attendance since its inception in 2002. Nearly 150 donors who contributed $1000 or more during the previous year enjoyed the reception on May 13 at the Meadowbrook Country Club in Clayton, Ohio. Guests at the reception included international visitors IARU President Tim Ellam, VE6SH; IARU Region 2 Secretary Ramon Santoyo, XE1KK; IARU Secretary Rod Stafford, W6ROD; IARU Region 1 President Hans Blondeel Timmerman, PB2T, and his wife Margareet, K2XYL; Seike Hidefumi, JA5CKZ;

Keko Diez, TI5KD, and Deutscher Amateur Radio Club (DARC) Board Member Mitch Wolfson, DJ0QN.

The Guest of Honor was new ARRL President Kay Craigie, N3KN, who mingled with the crowd and shared her thoughts on what it takes to be successful in the Amateur Radio world. Her comments began with the story of how she launched her involvement with the ARRL as an Assistant Section Manager in Eastern Pennsylvania when she said "yes" to a request for her to prepare the Section's newsletter. Her steps to the Presidency of ARRL continued with her role as Section Manger, Vice Director, Director, Vice President, culminating with her election to ARRL President in January 2010. Her message to the audience was simple but straightforward -- those who continue to say "yes" make a commitment to service, as well as a willingness to contribute generously to support the League make significant contributions to both Amateur Radio and to the ARRL.

At the conclusion of President Craigie's remarks, the ARRL announced new members of the Maxim Society. Current Maxim Society Donors gathered to recognize William Fugate, W8IYD; Kenneth Goodwin Jr, K5RG; Charles Heath, K6ZIZ; Henry Pownall, W4FWR; Walter Wooten, W1LW; Kurt Pauer, W6PH, Ted Goldthorpe, W4VHF, and his wife Itice Goldthorpe, K4LVV. The ARRL Maxim Society recognizes donors whose lifetime giving to various ARRL funds reaches $10,000 or more. As of May 2010, the Maxim Society numbers 67 members. For more information -- including all the benefits of membership in the Maxim Society -- visit the Maxim Society Web page on the ARRL Web site <http://www.arrl.org/maxim-society> or call the ARRL Development Office at 860-594-0397.

==> FCC NEWS: FCC SEEKS COMMENTS ON NEWLY PROPOSED RULES FOR AMATEUR RADIO OPERATORS USING SPREAD SPECTRUM COMMUNICATIONS

In March, the FCC released
<http://www.arrl.org/news/fcc-proposes-to-eliminate-spread-spectrum-apc-requirement-reduce-spread-spectrum-power-limit-cleans>
a Notice of Proposed Rulemaking (NPRM
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-45A1.pdf>)
that proposed to amend Part 97 to facilitate the use of spread spectrum communications technologies by eliminating the requirement that amateur stations use automatic power control (APC) to reduce transmitter power when the station transmits a spread spectrum (SS) emission, and reducing the maximum transmitter power output when transmitting a SS emission (WT Docket No 10-62). On May 14, a summary of the NPRM and the Order was published in the Federal Register; the FCC is seeking comments on the NPRM. Comments must be filed on or before June 14, 2010 (30 days after publication in the Federal Register); reply comments must be filed on or before June 28, 2010 (45 days after publication in the Federal Register). Instructions on how to file comments are listed beginning on page 5 of the NPRM
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-38A1.pdf>.

The Commission also attached an Order <http://edocket.access.gpo.gov/2010/pdf/2010-11385.pdf> to the NPRM that makes certain non-substantive revisions to Part 97. According to the FCC, the rules are necessary to amend the Amateur Service rules or conform them to prior Commission decisions, enhancing the usefulness of the Amateur Service rules by making them conform with other Commission rules, thereby eliminating licensee confusion when applying the rules to Amateur Service operations. According to the Federal Register, the new rules take effect July 13, 2010.

==> FCC NEWS: FCC AGAIN DENIES AMATEUR'S PETITION REGARDING STATION IDENTIFICATION

On May 18, the FCC denied a Petition for Reconsideration filed by Glen Zook, K9STH, that asked for changes in Part 97 regarding how often amateurs must identify themselves on the air. This action follows the Commission's denial of Zook's April 2009 Petition for Rulemaking requesting that the Commission amend Section 97.119(a) to change how often amateur stations must identify themselves, specifically "to require that an amateur station transmit its call sign during the first transmission of any communication or series of transmissions, and to allow an amateur station to not transmit its call sign at the end of a communication when the communication or series of transmissions lasts less than three minutes." Read more here <http://www.arrl.org/news/fcc-again-denies-amateur-s-em-petition-em-regarding-station-identification>.

==> ARRL SECTION NEWS: SPRING SECTION MANAGER ELECTION RESULTS

In the only Section Manager race this spring, Tom Ciciora, KA9QPN, of Sandwich, was re-elected as the ARRL Illinois Section Manager with 954 votes. His opponent, Michael J. Schulz, W9MJS, of Wayne, received 799 votes. Election ballots were counted Tuesday at ARRL Headquarters. Ciciora starts his new third two-year term of office on July 1, 2010; he was first elected Section Manager in 2006. The following incumbent ARRL Section Managers did not face opposition and were declared elected for their next terms of office beginning July 1: John Poindexter, W3ML, Indiana; Bill Woodhead, N1KAT, Maine; Paul Eakin, KJ4G, Northern Florida; Bonnie Altus, AB7ZQ, Oregon; Paul Gayet, AA1SU, Vermont, and Don Michalski, W9IXG, Wisconsin. There were no nominations received for the next term of office of Section Manager in the Santa Clara Valley Section. Nominations will be re-solicited this summer for an 18-month term of office starting in January 2011.

==> THERE'S STILL TIME TO ENTER THE 2010 ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2011 ARRL Calendar. For more information, including rules and requirements, click

here
<http://www.arrl.org/news/there-s-still-time-to-enter-the-2010-arrl-photo-con
test>.

==> CQ ANNOUNCES 2010 HALL OF FAME INDUCTEES

On May 14, CQ magazine announced its 2010 Hall of Fame inductees, welcoming 15 new members into the CQ Amateur Radio Hall of Fame and two new members each into the CQ DX Hall of Fame and the CQ Contest Hall of Fame. The CQ Amateur Radio Hall of Fame honors those individuals -- whether licensed hams or not -- who have made significant contributions to Amateur Radio, as well as those amateurs who have made significant contributions either to Amateur Radio, to their professional careers or to some other aspect of life on our planet. The CQ Contest and DX Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of Amateur Radio, but who also "give back" to the hobby in outstanding ways. Read more about the 19 new inductees here <http://www.arrl.org/news/cq-announces-2010-hall-of-fame-inductees>.

==> AMATEUR RADIO OUTREACH: MAKER FAIRE TO FEATURE AMATEUR RADIO AGAIN IN 2010

Ham radio demonstrations and displays are in the works for Maker Faire, the world's largest do-it-yourself (DIY) festival. As in 2009, the festival will take place at the San Mateo County Expo Center in San Mateo, California on May 22-23. According to ARRL Sales and Marketing Manager Bob Inderbitzen, NQ1R, this annual event showcases the country's best innovations in science and technology, engineering, arts and crafts, food and music. "Like last year, there is a very well-coordinated effort among area groups to help represent the Amateur Radio Service at Maker Faire," Inderbitzen explained. "Volunteers are planning a variety of visual, interactive and hands-on displays for the thousands of attendees." Read more here
<http://www.arrl.org/news/maker-faire-to-feature-amateur-radio-again-in-2010>
.

==> ARRL FIELD DAY MERCHANDISE NOW AVAILABLE

<https://www.arrl.org/shop/Field-Day-Supplies/> How can you be the best-dressed ham at your Field Day site this year? When you wear the official 2010 ARRL Field Day shirt -- accompanied by the 2010 ARRL Field Day hat -- of course! Field Day -- Amateur Radio's largest on-the-air operating event -- is just a little more than five weeks away, so be sure to get your shirts, hats and pins, as well as the new ARRL Field Day Handbook for Radio Amateurs and coffee mugs before they run out. Field Day shirts are offered in sizes Small-4XL and are royal blue with the 2010 Field Day logo on the left chest; the back of the shirt says "Amateur Radio -- Goodwill • Service • Fun!" with www.arrl.org underneath. Fulfill all your Field Day apparel needs at the Field Day Supplies section of the ARRL Web site
<http://www.arrl.org/shop/Field-Day-Supplies/>.

==> SOLAR UPDATE

Tad "The wonderfulness of the sundown, or stars shining so quiet and bright <http://www.daypoems.net/poems/2084.html>" Cook, K7RA, reports: We've now seen 11 days with no sunspots. The average daily solar flux from May 6-12 dropped from 75.8 to 69.2 for the week of May 13-19. This may end soon, as sunspot group 1063 is due to return in the next two days, and predictions show a rising solar flux: 70 for May 20-21, 72 for May 22-23, 74 for May 24-25, 76 for May 26 and 80 for May 27-June 4. There is also a prediction of geomagnetic instability for today, May 20, with planetary A index for May 20-23 of 18, 15, 8 and 5. The latest issue of WorldRadio online is available for download <http://www.worldradiomagazine.com/> and it contains an interesting propagation column from Carl Luetzelschwab, K9LA, with an analysis of 6 meter propagation from California to New Zealand. Look for more information, including a look at 6 meter propagation reports, on the ARRL Web site on Friday, May 21. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Walt Whitman's Miracles <http://www.daypoems.net/poems/2084.html>.

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/multimedia> This week, the Baltic Contest is May 22-23. Next week, the CQWW WPX Contest (CW) is May 29-30. The Michigan QRP Memorial Day CW Sprint is May 30-31. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, May 23, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, June 4, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

GB2RS NEWS

Sunday 23rd May 2010

The news headlines

New 5MHz NoV licences available

ITU tasked to work on Smart grid standards

RSGB to review education and training

Following a request by the RSGB last November, Ofcom announced on 14 May they were able to permit operation of stations by amateur radio Full licensees, using specified frequencies in the 5MHz experimental band, after the existing NoV expired on 30 June 2010 and until 30 June 2015. This follows Ofcom gaining consent from the Ministry of Defence for continued amateur experimentation on these channels. The terms and conditions of the new NoV remain unchanged. Note that existing NoV holders, as well as Full licensees who have not previously held a 5MHz NoV, wishing to operate in the 5MHz experimental band after 30 June 2010 must obtain a new NoV by completing an updated application form that is available on Ofcom's website. Go to www.ofcom.org.uk and search for 5MHz.

Some of the world's biggest ICT companies have tasked a new ITU group with identifying standards needed for the world's new Smart Grid deployments, which will bring the benefits of digital technology to the existing electricity network. Many governments have earmarked significant portions of their stimulus packages for Smart Grids. In the United States, for example, the American Reinvestment and Recovery Act has allocated 4.5 billion US dollars for investments in the Smart Grid. In Europe, the European Parliament has approved an agreement reached by the EU Institutions on a package of legislation to liberalise energy markets, including electricity and gas directives, which require EU member states to ensure the implementation of intelligent metering systems.

The RSGB Board has established a new working group to review the Education and Training provision made by the Society. Persons with a background of work in education or training who are interested in contributing are invited to contact Robin, GM3ZYE, by email to GM3ZYE@rsgb.org.uk, enclosing a brief CV.

The launch of two amateur radio satellites, STUDSAT and TIsat-1, on the Indian PSLV-C15 launcher has been postponed until June. The rescheduling

of the launch took place after a marginal drop in the pressure in second stage of the vehicle was noticed during the mandatory checks carried out on the launch vehicle.

During the evening of Monday 17 May, RSGB VHF Manager David Butler, G4ASR, contacted stations in Greece on the 2m band. SSB contacts were made via Sporadic-E propagation to SV2JL at 2300 kilometres and SW6KRV at 2286 kilometres. A few minutes earlier G4ASR had SSB contacts on 4m with SV1DH at 2590 kilometres and SV2DCD at 2253 kilometres. On Friday 14 May the 50MHz band was open to Bahrain, with a 5270 kilometre contact being made between G4ASR and A92IO.

Waters and Stanton are holding their 20th annual Open Day at their Hockley premises from 10am on Sunday 30 May. There will be free food and drink, special offers and representatives from Yaesu, Kenwood, Icom, bhi and others. Details at www.wsplc.com.

The Arfon Repeater Group's amateur television repeater, GB3GW, located near the town of Criccieth in North West Wales and operational on 1310MHz, changed its mode of operation on 13 May. The transmission mode has been changed from analogue to the digital DVB-S system, which is compatible with free to air satellite TV receivers. GB3GW's receive system has not been changed so that users can still transmit on the input frequency of 1280MHz in analogue mode. Reports to date indicate that the system is working fine. Repeater keeper Derek, GW3FDZ would welcome reports on the new transmitter. GB3GW joins GB3TM in digital mode; this completes the transfer to digital DVB-S system by the Arfon Repeater Group of their ATV repeaters. Further information and reports on the Arfon Repeater group's website at www.arfon.info.

A new power management system has been enabled on the AMSAT Oscar 51 satellite. According to control station Drew, KO4MA, if everything works right the repeater should run at 1.01 watt while in sun, and at 290 milliwatts while in eclipse. The transmitter will remain at the low power after exiting eclipse until the batteries recover to around 7.9 volts.

The June RadCom includes a competition. Unfortunately, gremlins crept in and the published closing date of 1 June is incorrect. The winning entry will be drawn on Thursday 1 July and details published in the August edition of RadCom. The editorial team apologises for this error.

And now for the details of rallies and events for the coming week

Today, 23 May, the Dunstable Downs Radio Club is holding the National Amateur Radio Car Boot Sale at Stockwood Park, Luton. The postcode for your satnav is LU1 5NR. Doors open at 9am and entry is ?2. Details on the web at www.ddrcbootsale.org.

The Easter Harlaxton amateur radio get-together and field day had to be postponed due to bad weather. Organiser Jim, M0JHW re-arranged the event and today, 23 May, is the second day of the new event. It's at the same venue, the Sports and social club, Harlaxton, near Grantham, which is

postcode NG32 1HX. There will be amateur radio operations that visitors can join as well as plenty of tea and coffee.

The Mid Ulster Amateur Radio Club will be holding their annual Radio Rally and Boot Sale on Saturday, 29 May, from 11am till 4pm. It is being held at Drumgor Youth Centre, Drumgor Heights, Craigavon, BT65 4AP. There will be a talk in station on 2m as well as signage for directions. At the rally will be a number of traders and private sellers as well as information stalls by The Short Wave League, CASHOTA-NI and Community Safety as well as the usual Bring & Buy for individuals. Hot and cold refreshments will be provided by the coffee shop. Entry is ?2.50, which includes free entry into the raffle. Car boot pitches are ?5 per car and ?10 per van or 4x4. More information can be found at www.muarc.com, or Bobby, MI0RYL on 07751 007 490.

The Sausage and Scouse Net Summer Meeting will be on 30 May at The Old Quay, The Parade, Parkgate CH64 6SB. Starting at midday, you can join them for a carvery lunch or just call in for a drink and a chat. Amateurs, friends and SWLs welcome. More information from Bill, G4USW on 07870 325537.

Now for the news of special events

To mark the 10th anniversary of the closure of the world's largest maritime radio station, Portishead Radio, GB10GKA is being activated until 27 May. Hours of operation will be dependent on individual operator's free time and operation will be primarily on CW. The final leg will be taken by Pete G3TJE and Larry G4HLN from 21 to 27 May from Burnham on Sea. Special Anniversary QSL cards will be produced to mark this historic event, and eQSL will also be used. Certificates for contacting GB10GKA on more than four HF bands will be available. Contact Tony Roskilly, G3ZRJ by email to g3zrj.morsekey@btinternet.com.

The Geoparks Communication event finishes today, 23 May. Listen out for GB2MAC at the Marble Arch Caves International Global Geopark, EI2GEO at the Copper Coast Geopark in County Waterford, GB5GEO in Merthyr Tydfil and GB6GEO from Kent's Cavern in Torquay amongst others.

A special callsign will be activated for the famous 24 hour car race in Le Mans, France. TM24H will be on the air from the 30 May to 13 June. The QSL manager will be F6KFI.

And now the HF DX news compiled from 425 DX News and other sources.

Tony Howell-Jones, M0THJ will be operating as F/M0THJ/P from near Prissac, France, locator JP06PM on 80 through to 10m SSB from Sunday 23 May to Friday 28 May. Normally operating 100W he will power down to 5W for any QRP voice contacts. All QSOs acknowledged with local QSL card via RSGB bureau.

Denis, ZL4DB is going to Macquarie Island, which is IOTA reference AN-005, on a 3 month job assignment. He hopes to operate SSB only as VK0/ZL4DB, when time permits, from mid-late May until mid-August. He is

not an experienced DXer and, according to his QSL manager, ham radio activity will be minimal. QSL via ZL4PW, direct or via the bureau.

Larry, W6NWS will be in Vietnam until 9 June. He expects to be active as XV2W when time permits, mainly around the CQ WPX CW and SEANET contests. QSL via home call, direct or bureau and Logbook of The World.

The Ukrainian DXpeditioners Team has a new project called `Pacific Odyssey 2010'. On the team are UX0HX, RK3FA, UT5UY, UT1HF, US7UX, UR3HR and SWL Yuriy Grushevskiy. They plan to be active as T31X, Central Kiribati, 22 May to 1 June; and ZK3X, Tokelau, 2 to 6 June. T31 is ranked most needed number 7 in Europe, number 19 worldwide. Tokelau is number 29 in Europe and number 35 worldwide.

Members of the Tifariti Gang are heading to Palestine. Look for E4X to be active from 28 May to 6 June.

Now the contest news

On May 25 the 50MHz UK Activity Contest takes place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

Next weekend, May 29 and 30, the CQWW WPX CW Contest takes place between 0000 and 2359UTC. Using the 1.8 to 28MHz bands the exchange is signal report and serial number.

The Bath Buildathon Contest is primarily intended to activate the radios built at the Bath Buildathon events, although it is open to all. The maximum power is 10 watts. The event takes place between 30 May and 5 June at various times. You must use SSB on the 3.5MHz band. The exchange is signal report, the make and model of your transceiver and the power. Full rules can be found on the internet. Using your favourite search engine, search for Bath Buildathon Contest.

Now the solar factual data for the period from the 10th to the 16th of May, compiled by Neil Clarke, G0CAS on the 17th of May.

On Friday the 14 May at the Goddard Space Flight Centre the Solar Dynamics Observatory was declared an operational mission. A spokesman said ``this means we have shown that the spacecraft and instruments are ready to collect science data. The science teams are working on making that data available to the scientists and space-weather public very soon.''

The latest smoothed monthly sunspot numbers are available and are for August, September and October 2009 and are 4.8, 6.1 and 7.0 respectively.

The solar disc was spotless everyday. Solar activity was very low with no solar flares taking place. Solar flux levels declined from 74 units on the 10th to 69 by the 13th, that's the lowest level since the 9th of October last year. The average was 71 units, that's the lowest weekly average so far this year. The 90 day solar flux average on the 16th was

80. That's one unit down on last week. X-ray flux levels averaged A1.9 units and varied little day to day. Geomagnetic activity was quiet everyday with the 11th the most disturbed day with an Ap index of 8 units. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 320 and 520 kilometres per second. Particle densities were low throughout. Bz never varied no more than minus 5 and plus 7 nanoTeslas during the period.

And finally the solar forecast. Without the emergence of any sunspot groups which are impossible to forecast the solar disc could be spotless on some days during the coming week. Solar activity is expected to be at very low levels. Solar flux levels with a spotless Sun will be in the low 70's and maybe in the 80's if any decent sized spots do appear. Geomagnetic activity is expected to be at quiet levels until next weekend when activity is expected to increase due to a recurring coronal hole. On its last rotation this hole produced an Ap index of 39 units. MUFs during daylight hours at equal latitudes should be around 21MHz for the south and 18MHz for the north. Darkness hour lows should be about 11MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 19MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 1000 and 1400 hours. Sporadic-E should take place on some days this week. Openings up to 70MHz are expected.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 24 May Gloucester Amateur Radio & Electronics Society is operating on VHF. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 24 May South Birmingham Radio Society is planning for field day. Contact Don, on 0121 458 1603.

On Monday 24 May Stratford Upon Avon District Radio Society is having an informal and video evening. Contact G0CHO, on 01608 664488.

On Tuesday 25 May Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 25 May Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 25 May Mid-Warwickshire Amateur Radio Society is having a hands-on workshop on Arduino Boards by Garry Bulmer. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 25 May Wythall Radio Club is having a talk on dams and underground tunnels by Vic Smallshire. Contact Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 26 May Bolsover Amateur Radio Society is holding a committee meeting. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 26 May Hinckley Amateur Radio Society is having a talk on contesting by Mack, M0CUS. Details from John, M0JAV, on 07836 731544.

On Wednesday 26 May Lincoln Short-Wave Club is putting G5FZ on the air and having a natter night. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 26 May Midland Amateur Radio Society is having a laptop computer, training and Morse class evening. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 26 May South Notts Amateur Radio Club is having an open forum for members only. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 26 May Telford & District Amateur Radio Society is having a talk by G3UKV on our sun and its effects on propagation. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 27 May RAF Waddington Amateur Radio Club is having a shack and chat night with radio and antenna play. New faces are always welcome. Details from Judy Rowlands, on 07544 456422.

On Friday 28 May Coventry Amateur Radio Society is having a radio workshop, operating 6m, 4m, 2m and 70cm plus satellites. Contact John, G8SEQ, on 07958 777363.

On Friday 28 May Nunsfield House Amateur Radio Group is having a shack & natter night. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 28 May South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 29 May Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 29 May Wythall Radio Club commences its Intermediate Course. Contact Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

NEWS FOR THE NORTH OF ENGLAND

On Monday 24 May Angel of the North Amateur Radio Club is having a talk by Mike Taylor on the basics of electrical safety and EMC testing. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 24 May Bolton Wireless Club is holding a 2m DF hunt, starting from the Britannia Hotel, Beaumont Road, Bolton, at 7.30pm. For details, send an email to boltonwireless@gmail.com.

On Monday 24 May Sheffield Amateur Radio Club is holding a contest workshop followed by a VHF NFD and IOTA contest planning meeting. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 24 May South Manchester Radio and Computer Club has its monthly technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Monday 24 May Thornton Cleveleys Amateur Radio Society is having a talk on bicycle mobile by Dave, G4AKC. Details from John Foster, 2E0EZY, on 01253 399377.

On Tuesday 25 May Chester & District Amateur Radio Society is holding its annual dinner at Cheshire View, Plough Lane, Christleton. Details from Barbara Green on 07957 870770.

On Wednesday 26 May Hornsea Amateur Radio Club is having a committee meeting. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 27 May Brigg & District Amateur Radio Club is discussing talks for future meetings. Contact John, 2E0III, on 01652 632038.

On Thursday 27 May South Cheshire Amateur Radio Society continues its Intermediate Course. Contact Chris Wiseman, G0RDK, on 01782 773185.

On Thursday 27 May South Manchester Radio and Computer Club has a talk by Dave, G3YQD, exploring the question of who really invented wireless. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 27 May Wakefield & District Radio Society is having a fast food evening at HQ. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 28 May East Cleveland Amateur Radio Club is having a radio components catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 25 May Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 25 May Livingston & District Amateur Radio Society is running Morse code practice. For more information contact Norman, on 07740 946192.

On Wednesday 26 May Ayr Amateur Radio Group is having a construction night. Contact Charlie, MM0GNS, on 01563 551704.

On Wednesday 26 May Lothians Radio Society is having a DF hunt with Peter Dick, GM4DTH. Contact Andy Sinclair, by email to lrs_secretary@moosedata.com.

On Wednesday 26 May Paisley YMCA Amateur Radio Club is holding a training evening. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Thursday 27 May Aberdeen Amateur Radio Society is planning for NFD and having an equipment check. More information from Lewis, GM4AJR, on 01224 575 663.

On Sunday 30 May Stirling District Amateur Radio Society is having an open day. All are welcome, whether licensed or not. Drinks plus hot and cold food are available all day. Contact John McGowan, by email to gm0fsv@gm6nx.com.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Sunday 23 May Chesham & District Amateur Radio Society is attending the DDRC Luton Boot sale at Stockwood Park. More details from Terry, G0VFW, on 01442 831 491.

On Monday 24 May Milton Keynes Amateur Radio Society is having a general chat night. For more information go to www.mkars.org.uk.

On Monday 24 May Surrey Radio Contact Club is having a fix-it and natter night. More information from Ray, G4FFY, on 01732 357474.

On Tuesday 25 May Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 25 May Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 25 May Dorking & District Radio Society is having a talk by Professor Tony Davies on the British Army's battlefield radio in World War 2. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 25 May Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524844.

On Tuesday 25 May Horndean & District Amateur Radio Club is having a talk on the International Beacon Project by Leslie Butterfields, G0CIB. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 26 May Chesham & District Amateur Radio Society is holding a construction project evening. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 26 May Darenth Valley Radio Society is having a visit to Chatham Docks. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 26 May Farnborough & District Radio Society is holding a junk sale. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 26 May Hastings Electronics and Radio Club is looking at construction projects. Details from Gordon, on 01424 431 909.

On Wednesday 26 May Newbury & District Amateur Radio Society is holding its AGM. Details from Richard, G3ZGC, on 01635 46241.

On Wednesday 26 May Norfolk Amateur Radio Club is having an informal, construction, workshop and Bright Sparks evening. Details from Chris Danby, G0DWV, on 01603 419204.

On Wednesday 26 May Peterborough & District Amateur Radio Club is having a talk by Steve, G6ALU, on the MKARS 80 transceiver. Details from David Howlett, M0VTG, by email to padarc@tesco.net.

On Wednesday 26 May Worthing & District Amateur Radio Club is putting GX3WOR on the air and having a discussion evening. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 27 May Edgware & District Radio Society is running its constructors contest. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 27 May Horsham Amateur Radio Club has its Thursday evening Fox Hunt. Details are on the web at www.harc.org.uk.

On Thursday 27 May Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 27 May Reading & District Amateur Radio Club is having a specialised data surprise by Des Howlett, G8FIF. Details from Pete, G8FRC, on 01189 695 697.

On Friday 28 May Itchen Valley Amateur Radio Club is having a talk on military communications by Brigadier Ted Flint. Contact Charlie, M0WYM, on 02380 439560.

On Friday 28 May Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Peter, G4AKG, on 01444 239371.

On Friday 28 May Radio Society of Harrow is holding a French evening. More information from Linda, G7RJL, on 0208 386 8586.

On Friday 28 May Waterlooville Amateur Radio Club is holding an EGM. Details from Rich, G4IBW, on 02392 680852.

On Friday 28 May Whitton Amateur Radio Group is preparing for the CQ WPX CW contest. Details on the web at www.warg.info.

On Friday 28 May Wimbledon & District Amateur Radio Society is having a vintage rig evening. Contact Jim, M0CON, on 020 8874 7456.

On Saturday 29 May Gorleston Amateur Radio Society has its lunch time meeting at the Short Blue Hotel, Gorleston. Contact David, G3OEP, on 01493 662 323.

NEWS FOR THE SOUTH WEST

On Tuesday 25 May Blackmoor Vale Amateur Radio Society is having a natter night. Contact Tony, G0GFL, on 01258 860741.

On Wednesday 26 May Taunton & District Amateur Radio Club is operating the club station. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 26 May Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 27 May South Bristol Amateur Radio Club is having an on the air evening supervised by David, G7PKJ. Contact Len, G4RZY, on 01275 834 282.

On Thursday 27 May Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Thursday 27 May Yeovil Amateur Radio Club is on the air and having a committee meeting. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 28 May North Bristol Amateur Radio Club is having an operating evening. Details from Dick on 01454 218362.

On Friday 28 May Torbay Amateur Radio Society is holding a 90/10 sale. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday 24 May Llanelli Amateur Radio Society is holding a junk sale. Contact Craig, MW0MXT, on 01269 840292.

On Tuesday 25 May Marches Amateur Radio Society is erecting the club antenna. For more information contact Dave, MW0AYM, on 01691 777242.

376. Amateur Radio Newsline(tm) Report 1710 - May 21 2010

Amateur Radio Newsline Report 1710 - May 21 2010

Amateur Radio Newsline report number 1710 with a release date of Friday, May 21, 2010 to follow in 5-4-3-2-1. The following is a Q-S-T. Hamvention 2010 is a big hit. We take you there. Also, an I-A-R-U report says that hams saved lives following the April earthquake, Kenya gives its hams expanded privileges on 40 meters and super-capacitors may replace batteries in critical uses. Find out the details on Amateur Radio Newsline report number 1710 coming your wayright now.

(Billboard Cart Here)
**

The 2010 Dayton Hamvention is now history and by all accounts this years event was bigger than last even considering the poor economy, as we hear from Henry Raminsky, Hamvention's Media and Public Relations Chairman.

(AUDIO Raminsky opening morning)

Heil sounds Chip Margelli, K7JA, echoes Henry's observations about the increased attendance at this years Hamvention.

(AUDIO Margelli)

Henry goes on to tell us that Hamvention is a lot more than just new toys at the vendors and manufacturers inside and everything under the sun outside in the flea market. There's something for just abouteveryone.

(AUDIO Raminsky balloon and forums)

One of the best attended and most anticipated forums is Fridays Ham Radio and the Law forum. Since 1980 James O'Connell, W9WU, has kept attendees abreast of the latest developments as they relate to covenants and antenna restrictions.

(AUDIO O'Connell 1)

If you're thinking about erecting a tower or large antenna this is one forum you really need to attend.

(AUDIO O'Connell 2)

Of course, it wouldn't be Hamvention without the Amateur Radio Newsline Town Hall Meeting. Several hams, well known and not so well known explained how your ham ticket could open the door to your next job.

Well have more on the Town Hall Meeting next week.

**

HAMVENTION 2010: SOME OF THE NEW GEAR

In addition to the Wouxon dual band hand held we told you about previously, there were a number of other new products of interest to those strolling the display area at the HARA arena. Among them, the long awaited Kenwood TS-590S HF/50 MHz All-Mode Transceiver. According to Kenwood, the new radio features a 32-bit floating-point DSP, advanced receiver performance and an extensive range of features that make it ideal for beginner and seasoned DXer alike. The radio's exceptional ease of operation, true to the Kenwood tradition, will be especially welcome for contest and mobile operations. No firm manufacturers suggested retail price for the TS-590 was announced.

But the TS-590S was not the only new entry from Kenwood. Also displayed was the companys APRS capable TH-D72 144 and 430MHz dual band FM Portable. Kenwood says that thanks to the internal GPS unit, APRS operations will be more enjoyable than ever. The TH-D72 also offers Echolink memory compatibility and a mini-USB connector for enhanced computer connectivity.

On the audio side, here's Bob Heil, K9EID on his new microphone and headset offerings.

(AUDIO Bob Heil)

There was lots more new gear shown at Hamvention 2010. We will cover some of it in upcoming Newsline reports.

RESCUE RADIO: CHINA QUAKE IARU R-1 FINAL REPORT

Hams in China became true first responders following last April's Qinghai earthquake. According to a report on the IA-R-Us Region One website, one Beijing based amateur radio rescue team was responsible for saving the lives of 6 people following the tremor. In its final report on ham radio activities following the 7.1 Richter scale earthquake that struck on April 14th the I-A-R-U say that amateur radio operators in China were widely involved in the disaster relief activities. The report says that hams traveled from as far away as Beijing, Sichuan, Shandong, Anhui, Qinghai and Jiangsu to provide

communications aid.

The quake killed more than 2,000 people and relief efforts are continuing for those left homeless. The high altitude caused 90% of the amateur radio rescue team members to suffer altitude sickness, but no one was injured during their efforts to help others affected by the earthquake disaster. (IARU R-1)

**

RESTRUCTURING: KENYA EXPANDS 40 METER PRIVILEGES

The Communications Commission of Kenya has just approved an extension of the amateur radio 40-metre band in that nation. This gives radio amateurs in Kenya the use of the sub-band 7100 to 7200 kHz in the 40 meter band. More is on line at the web link found in this weeks text version of Newsline at www dot newsline dot org.

(DO NOT READ: Communications Commission of Kenya (CCK) http://www.cck.go.ke/) (Southgate)

**

RADIO LAW: FCC SEEKS COMMENTS ON SPREAD SPECTRUM NPRM

The FCC says its time for you to voice your opinion on liberalizing the use of spread spectrum in ham radio.

According to the ARRL, in March the FCC released a Notice of Proposed Rulemaking in WT Docket No 10-62 that suggested amending Part 97 to facilitate the use of spread spectrum communications technologies by eliminating the requirement that amateur stations use automatic power control. This, to reduce transmitter power when the station transmits a spread spectrum emission, and reducing the maximum transmitter power output when transmitting a Spread Spectrum signal.

On May 14th, a summary of the NPRM and the Order was published in the Federal Register and the FCC is seeking comments on the NPRM. Comments must be filed on or before June 14th and reply comments must be filed on or before June 28th. The Commission also attached an Order to the NPRM that makes certain non-substantive revisions to Part 97.

(ARRL)

**

HAM HONORS: CQ ANNOUNCES 2010 HALL OF FAME INDUCTEES

CQ magazine has announced its 2010 Hall of Fame inductees. The 15 new members include some names well known in the hobby. Among these is late ARRL President George S. Wilson who led the ARRL portion of the effort to create the vanity call sign program.

Also being honored this year is the late Gene Harlan, WB9MMM, who was the editor and publisher of ATV Quarterly and founder of Cyberham

magazine. The 2010 inductees to the CQ DX Hall of Fame are writer and DXer Robert Locher, W9KNI, author of the "The Complete DXer" and Lynn Lamb, W4NL who is a co-founder of the Southeastern DX and Contesting Organization. This group sponsors an annual convention featuring well-known speakers on DXing and contesting. Last but by no means least are Don Hill, AA5AU and Larry Weaver, N6TW who have been inducted into the CQ Contest Hall of Fame. The complete list of this year's inductees can be found on-line at www dot cq dash amateur dash radio dot com.

**

RADIO BUSINESS: BELTRONICS TO ABANDON HAM RADIO REPAIR

The Nashua Telegraph reports that Beltronics is ending ham radio repairs because of too much demand.

Until last month, the company had two employees who did part-time repair work on amateur radio gear. When one of those employees retired, company co-owner Dorothy Peabody said, the decision was made to get out of that business because there were more requests for repairs than the one remaining worker could handle.

Dorothy Peabody owns Beltronics with her husband Bernie. She told the newspaper that the desire for repair work is so great that over the past decade Beltronics has repaired radios mailed from as far away as Saudi Arabia, Puerto Rico and South America. The company will now concentrate on its core business of commercial, municipal and ambulance radiosystems.

(DO NOT READ: You can read the full Nashua Telegraph story dated Friday,May 14 at http://www.nashuatelegraph.com/news/738077-196/beltronics-ending-ham-radio-repairs.html)

**

TELECOMMUNICATIONS LAW: SUPREME COURT REFUSES CHALLENGE TO MUST CARRY RULE

The United States Supreme Court has declined to take up a challenge from a cable television system operator. This, to the FCC's 18 year old requirement that cablecasters carry local broadcast stations on theirsystems.

On Monday, May 17th the justices rejected an appeal from Cablevision Corporation. Instead the court upheld a federal "Must Carry" law, enacted in 1992.

Cablevision, the nation's fifth-largest cable TV operator, sued the Federal Communications Commission over its ruling that forced Cablevision to carry the signal of a distant home-shopping station on its Long Island cable systems. The federal appeals court in New York had previously upheld the FCC's determination that the cablecaster

provide a channel for WRNN, based in the town of Kingston which is about 90 miles north of New York City. The case was assigned the designation Cablevision v. FCC, 09-901.

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: KEN MILLER K6IR - S.K.

We are very sad to report the passing of 1999 Dayton Radio Amateur of the Year, Kenneth Miller, K6IR, on March 24th.

Ken Millers professional career spanned over four decades in the executive management and development of products in the electronic equipment manufacturing business segment of industry in the United States, Europe and Asia. In his role as an executive with Lear Jet, Motorola, American Standard, Penril, the Singer Company and other well known corporations, K6IR participated in the production and marketing of a broad array of high-tech electronic products including airborne and ground based communications, navigation instrumentation and digital communications devices.

In ham radio, Ken Miller served the Radio Club of America for several years as Chairman of the Grants-in-Aid Committee. The Quarter Century Wireless Association had named K6IR as recipient of its 1995 Distinguished Service Award for his "engineering accomplishments and his leadership of the Radio Club of America Scholarship Program."

(RCA, QCWA)

**

THE CHANGING OF THE GUARD: TWO SOUTH AFRICAN HAMS KILLED IN PLANE CRASH

The recent airline accident in Tripoli has claimed the lives of 2 well-known South African amateur radio operators. Norbert Taferner, ZS6ANL, his wife Paula and Anton Matthee, ZS6A were killed when the Airbus aircraft they were passengers on crashed.

According to Dennis Green, ZS4BS, Norbert Tafener will be remembered for his years of involvement with the Johannesburg Branch of the South African Radio League. Although retired, he was still active in teaching and lecturing to young and new amateur radio operators in helping them to obtain their licenses. The Tafeners are survived by

one son.

Anton Matthee, ZS6A, lived in Stellenbosch and was a keen off road adventurer, painter and photographer. From reports, he was a truly outgoing person. (Southgate)

**

HAM RADIO IN SPACE: VIETNAM TO LAUNCH HAMSAT

News has been received from XV9AA in Hanoi of a Vietnamese Amateur Radio CubeSat under development. The new bird is designated as F-1. It is expected to be launched by the end of 2010 into a Sun-synchronous, 98 deg inclination low earth orbit.

The satellite F-1 will carry several low-resolution cameras to take photos of the Earth along with temperature and magnetic sensors to study space environment. The satellite will use amateur VHF and UHF frequencies. The IARU has coordinated a downlink frequency of 437.485 MHz to support a 1200 baud AX.25 telemetry link. The F-1 satellite will also transmit a beacon using a modulated Morse code audio signal on FM when it is not in range of the earth station in Hanoi.

(DO NOT READ: More is on line at: http://fspace.fsoft.com.vn/) (Southgate)

**

HAM RADIO IN SPACE; VIOLET SAT TO LAUNCH IN 2011

And the Violet is an Amateur Radio satellite being built at Cornell University. It will launch in early 2011. This bird is described as a 50 cm cube sat and will carry 4k8 UHF simplex packet links with 5 watts of RF downlink power. It will use a star tracker and fiber optic gyro for fine attitude estimation and propagation.

A submission for frequencies has been made to the IARU Amateur Satellite Frequency Coordination panel for operational frequency assignments. The name Violet is derived from its ultraviolet telescope, which includes flight-spare Deep Impact CCDs.

**

HAM RADIO NEAR SPACE: THE ALIEN-1 BALLOON LAUNCH

The flight of ALIEN-1, a high altitude balloon built by three students at Reading School, proved a success. This despite the 50 baud transmission rate of the payload. That meant it could only send down one telemetry string every 15 seconds. As a result it initially looked as though the highest altitude achieved was 33.116km. However, having recovered the payload they got the second-by-second GPS log and this shows the highest achieved altitude was 33.158km: It is believed this altitude is the third highest in the UKHAS UK records. The 434.075 MHz beacon worked well and some great pictures were taken.

**

DX

In DX, G7COD has been issued the call sign D2AK and will be operational nearly every day from the capital of the Republic of Angola. This, for the next 12 months while on a work assignment there. His operation will be on 80 to 10 meters, including WARC frequencies, using SSB and CW. QSL via G7COD, direct only to Andrew Kitchen, 4 Dairy Cottage, Newton Hall Farm, Bank Newton, Skipton, North Yorkshire, BD23 3NT, England.

The Dundalk Amateur Radio Society, using the call EI7DAR stroke P will be activating St. Johns Castle, Carlingford, County Louth Ireland on Saturday and Sunday, May 29th and 30th. Full details of the event are on line at www dot ei7dr dot com. Lastly, ZS1HF is now active as ZS8M from Marion Island. He's reportedly been heard on 7.140, 14.250, 18.150 and 21.266 Mhz. He will be on Marion Island for a full year so there will be plenty of time to have a chat. QSL as he directs on the air.

**

THAT FINAL ITEM: SUPERCAPACITORS MAY REPLACE BATTERIES

And finally this week, failed batteries are a problem that plague both cell-phones and Amateur Radio satellites. But Micro-Super capacitors may provide a solution.

Science Daily reports that Berkeley Lab researcher John Chmiola believes he has found a solution in electrochemical capacitors, which are commonly referred to as "super capacitors." This is because of their higher energy storage densities than conventional dielectric capacitors and higher abuse tolerance than batteries.

In a paper published in the April 23rd issue of the journal Science, titled "Monolithic Carbide-Derived Carbon Films for Micro-Super capacitors," Chmiola and Yury Gogotsi of Drexel University, along with other co-authors, describe a unique new technique for integrating high performance micro-sized super capacitors into a variety of portable electronic devices through common micro-fabrication techniques. They say that this evolving technology could eventually lead to an end to failed batteries in critical equipment including satellites where there is no way to replace a defective battery once the bird has been launched and is on-orbit.

(DO NOT READ: You can Read the full ScienceDaily article 'Is There a Micro-Super capacitor in Your Future?' at http://www.sciencedaily.com/releases/2010/04/1 00426092805.htm)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline. Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline, 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only a week or so to nominate a deserving teen or pre-teen radio amateur for this yearly ham radio honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both mail-in and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, back home in Picayune, Mississippi, after enjoying Hamvention 2010. I also say 73 and we thank you for listening.

VK4 SILENT KEYS @ 2009 - 2010 QAC YEAR

Bernie Leech (ex vk4bel) 13/05/2010 Advised by Vk4jdf John.

AR MAGAZINE VK4 QTC COLUMN
Written by Chris Comollattie VK4VKR
news for ar magazine to qtc@wia.org.au

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.......

A few years ago, when the radio bug first bit, hearing the first radio signals from a space satellite augured a massive change in the hobby of amateur radio. Thermionic devices had been the mainstay of electronics for near 50 years but the newly announced transistor was in the throws of commercial development. The semiconductor revolution changed the face of amateur radio as technology produced more and more developments and as the vinyl disk was supplanted, now the CD is ready to be archived itself. The computer has evolved from a mansion full of electronics to the common place tool in the shack.

This has been an interesting journey with discovery and frustration and awe and joy along the way. As the official commencement of the centenary of organised amateur radio is about to take place in Canberra, we can all reflect on this journey and where it will take us .

One invention in waiting is the Murphy Flush. Our News Editor, VK4BB, is most interested in an effective way of not succumbing to Murphy's Law especially during the anniversary events in Canberra. Please forward your prototype device to Graham for his assessment and be tuned next week for WIA News, live from the national capital.

I'm, Geoff Emery and that's what I think....how about you?

CLUBBING -

Ipswich and District Radio Club

Hi, I'm Mike VK4QS, President of the Ipswich & District Radio Club.

Today I would like to let you know about the W.I.A. Centenary Medallion our club produced to celebrate 100 years of the Wireless Institute of Australia. This medallion is available from our club website www.ipswichdistrictradioclub.webnode.com

Now for just $10.00 plus $5.00 postage around Australia, International of course would be a little extra, you too could have one of these fantastic commemorative medallions.

If your club would like to produce something similar, then all the details are on our website front page.

Our club will be first club in Queensland to host the VK100WIA callsign.

We'll kick off operations on Thursday July 1st through to Saturday July 3rd 2010.

We are looking to operate 24 hours a day from our clubhouse at Denmark Hill, Ipswich.

The club will host a sausage sizzle on Saturday July 3rd for all members and guests at the clubhouse from 11am.

So on behalf of everybody at the Ipswich & District Radio Club, we look forward to working you.

73's, I'm Mike VK4QS.

This seperate feed will cease at end of June next month... instead you will be able to pick it up from either the RSS feed on wia.org.au (that's been running fine since about Feb 2009) and it is emailed to you in text or direct from the wia page at wia.org.au

www.tarc.org.au

GREETINGS ! THIS IS DON VK4FNQA, WITH NEWS FROM NORTH QUEENSLAND WHERE THE CURRENT CLIMATE HAS TO BE THE BEST AROUND THE GLOBE !

THE FAR NORTH AND NORTH QUEENSLAND AMATEUR RADIO GATHERING IS NOW ONLY THREE WEEKS AWAY.

APART FROM LOTS OF SERIOUS LOAFING AND GREAT SOCIALISING THAT WILL HAPPEN AT THE CARDWELL VILLAGE BEACHCOMBER MOTEL AND TOURIST PARK FROM FRIDAY 11TH TO MONDAY 14TH OF JUNE, A FEW SCHEDULED EVENTS WILL ALSO TAKE PLACE.

YOU WILL BE ABLE TO TRY AND WIN YOUR FORTUNE AND GET RID OF ALL THAT PESKY SMALL CHANGE WITH THE 25 AND 50 CLUBS THAT RAY VK4NET AND WENDY WILL BE RUNNING FROM COMFY CHAIRS.

YOU WILL HAVE A TONNE OF FUNNE AND EXERCISE THE BRAIN CELLS AT THE FAMOUS TREC TRIVIA CHALLENGE AS QUIZ MASTER DALE VK4DMC CONDUCTS AN EVENING OF MIRTH AND FACTS.

YOU WILL GET TO DEFEND THE HONOUR OF YOUR REGION, OR HAVE HEAPS OF GIGGLES AT SOME OF THE ANTICS THAT HAPPEN AT THE TRADITIONAL NORTH QUEENSLAND VERSUS FAR NORTH QUEENSLAND CRICKET MATCH - AND THEN TEAM UP WITH EVERYONE ELSE FOR THE CLASSIC GROUP PHOTO SESSION.

YOU HAVE THE CHANCE TO OBTAIN VK100WIA COMMEMORATIVE PLATES AND MUGS THAT CHERYL VK4FRYL WILL HAVE ON DISPLAY AND WILL BE SELLING FOR A SHORT WHILE DURING THE WEEKEND.

PUT UP AN AERIAL AND ACTIVATE THE CASSOWARY COAST REGION FOR THE VK SHIRES CONTEST !

GET CRACKING AND ARRANGE YOUR ACCOMMODATION AS IT IS ALL RUNNING OUT FAST !
RING RECEPTION AT THE PARK RIGHT NOW ON 1800 005633.
I HOPE TO SEE YOU THERE.

NOW HERE IS A CHANCE TO INVOLVE THE FAMILY IN AN OUTDOOR EVENT WHICH INVOLVES RELAXING, EXERCISING, SOCIALISING AND EVEN SOME RADIO OPERATING.

KAYAK ON THE RIVER IS HAPPENING TODAY FROM 11-30AM.
IT IS BASED NEAR THE RIVERSIDE GARDENS COMMUNITY CENTRE,
55 RIVERSIDE BOULEVARD, DOUGLAS AND USES A VERY QUIET PART
OF THE ROSS RIVER.
IN THE TOWNSVILLE REGION THE NEWS TRANSMISSION IS BEING DONE
LIVE FROM THE VENUE. BE SURE TO ASK GAVIN FOR A WEATHER REPORT
DURING CALLBACKS !
OFF STREET PARKING IS AVAILABLE AND THE RIVER AND FACILITIES
ARE IN EASY REACH.
BRING YOUR OWN CHAIRS, HATS, DRINKS AND THINGS TO COOK ON
THE ELECTRIC BARBEQUES FOR LUNCH.

EVERYONE WELCOME INCLUDING FAMILIES AND GRANDCHILDREN.

BRING YOUR OWN KAYAK OR CANOE OR RUBBER TYRE IF YOU HAVE ONE
TO JOIN IN THE FUN.
THERE WILL BE A FEW SPARE CRAFT AT THE PARK WITH SAFETY GEAR
IF YOU WANT TO TRY A KAYAK FOR THE FIRST TIME.
REMEMBER TO TAKE A RADIO IN A PLASTIC BAG WITH YOU AS THOSE
ON SHORE WILL WANT TO TRY AND TALK TO YOU.

FINALLY, HERE IS A REMINDER THAT ONE OF THE FRIENDLIEST RADIO NETS
IN THE LAND HAPPENS THIS TUESDAY EVENING FROM 7-30PM ON THE
TOWNSVILLE VHF REPEATER.

THE ANN RENTON MEMORIAL LADIES NET IS OPEN TO YOUNG AND OLD,
YL OR OM OR EVEN SECOND OPERATORS GETTING ON AIR FOR THE
VERY FIRST TIME !
SO JOIN IN THIS TUESDAY EVENING NET AND LETS SEE IF THE YL'S
CAN OUT-NUMBER THE OM'S !

TIME FLIES WHILE YOU ARE HAVING FUN AND THAT'S ALL THE TIME
WE HAVE FOR QNEWS THIS SUNDAY TWENTY THIRD OF MAY....

THIS HAS BEEN DON VK4FNQA IN TROPICAL PARADISE MODE
FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE
BEEN LISTENING TO, AND ENJOYING QNEWS FROM VK4WIA..

WIA Centenary Update

Wow, the WIA Centenary callsign is red hot

The special callsign VK100WIA for the Centenary of Organised Amateur Radio in Australia and the foundation of the WIA, logged its first 1,000 contacts by last Wednesday.

Among them were some 25 DX different countries. Stations have also been worked in all VK states, the Northern Territory and Norfolk Island.

The callsign was launched by the WIA President Michael Owen VK3KI, next to operate was WIA Director Bob Bristow VK6POP and then WIA Centenary Committee member Jim Linton VK3PC.

The WIA had invited Amateur Radio Victoria to operate the callsign on its behalf last Monday, Tuesday and Wednesday.

A roster of four of its members, Keith Proctor VK3FT, Terry Murphy VK3UP, David McAuley VK3EW and Noel Ferguson VK3FI, did their best to keep up with the on air demand for contacts.

Then it was Amateur Radio New South Wales turn on Thursday Friday & Yesterday Saturday with its members helping to push the contact tally even further.

Another measure of worldwide interest in this special callsign is the well over 2,000 hits received for its listing on the qrz.com callsign database.

VK100WIA will be active from Canberra during the WIA Centenary Convention. Check out wia.org.au for more details about the callsign roster, the

online logging, and the associated WIA Centenary Award
Remember that registration close on Monday 0900 for the WIA anniversary weekend and AGM.
If you are not registered two things will happen you won't have a pass for the event and the caterers will have trouble feeding you as they have to have the numbers on Monday evening. Jump on line and register now.

WIA NATIONAL NEWS AT 100th AGM

The proposed timetable is as follows

6:30am tent is set up courtesy of CRARC

7:00am microphones & recording equipment setup

8:00am Broadcast simulcast recording and live transmission over Canberra's 2m & 70cm repeaters courtesy of CRARC

8:30am Broadcast concludes and MP3 file is saved

8:40am wianews_64 uploaded to both the WIA website and the Qnews backup

FTP server

8:45am wianews_64 ready for download (and wianews_32 & wianews_128 are uploaded to the backup server)

9:00am broadcast equipment packed up and the tent will be used for a public display of Amateir Radio courtesy of CRARC

All broadcasters, reporters and callback ops SHOULD be subscribed to the yahoogroup for wiabroadcasters.

A blank email with word subscribe in title or subject field and posted to

wiabroadcasters-subscribe@yahoogroups.com

WIA receives well wishes from around the globe

A number of IARU radio societies have written to the Wireless Institute of Australia to extending their best wishes and congratulating in on its Centenary.

These are being received by the WIA President Michael Owen VK3KI and will be progressively posted on the WIA website.

Here are a few of them.

The IARU Liaison Officer for the Finnish Amateur Radio League SRAL - Jukka Heikinheimo OH2BR said the WIA is one of the worlds most respected national amateur radio associations.

It has developed into a modern organisation representing the radio amateurs of Australia.

RSGB General Manager Peter Kirby G0TWW on behalf of the RSGB President, Board and Members said the Centenary is a wonderful achievement.

He commented that it would not have been reached without the outstanding commitment of many thousands of volunteers who have worked tirelessly for the WIA over the past 100 years.

Irish Radio Transmitters Society President, Paul Martin EI2CA extended best wishes to all on the occasion of the Centenary celebrations and acknowledged the work of the Wireless Institute of Australia.

He added that the IRTS will be raising a glass to toast the WIA during its celebrations in Canberra.

Now joining us with Centenary News is Mike VK4QS, President of the Ipswich & District Radio Club.

Today I would like to let you know about the W.I.A. Centenary Medallion our club produced to celebrate 100 years of the Wireless Institute of Australia. This medallion is available from our club website www.ipswichdistrictradioclub.webnode.com

Now for just $10.00 plus $5.00 postage around Australia, International of course would be a little extra, you too could have one of these fantastic commemorative medallions.

If your club would like to produce something similar, then all the details are on our website front page.

73's, I'm Mike VK4QS.

The Australian Communications and Media Authority is issuing licences which will allow the Nine Network and the SBS to conduct scientific trials of 3D TV in Sydney, Melbourne, Brisbane, Adelaide, Perth, Newcastle and Wollongong.

The licences allow the trial operators to test new radiocommunications technologies now until 19 July 2010 by broadcasting 3D high definition television to viewers with access to 3D-enabled digital television receivers. The trials will include live telecasts of the three State of Origin rugby league matches.

'The ACMA supports the development and demonstration of new broadcasting technologies and is pleased to be able to assist with the trialling of 3D TV,' said ACMA Chairman, Chris Chapman. 'It is important people are aware that these trials have only been approved for this two month period,' said Mr Chapman.

HAMS ACROSS AUSTRALIA.

Macquarie Island, VK0.

Denis, ZL4DB is QRV as VK0/homecall for the next three months while on work assignment. He is active in his spare time using SSB. QSL via ZL4PW.

VK1

Canberra Region Amateur Radio Club members and amateurs in the ACT region welcome fellow amateurs for the celebration of 100 years of organised amateur activity in Australia. We will be assisting with the activation of the VK100WIA special event callsign over the WIA AGM three day event and demonstration of amateur radio commencing at 0800 Sunday morning right opposite the entrance to Questacon in the Parliamentary triangle.

VK2

If you are a Westlake's club member and want to learn what is happening at your club in the coming weeks join the group each Saturday at 8am for the EZB net on 146.775 MHz where those joining in have a round table discussion of what they have been doing during the past week and what is ahead for the next one. Early risers are reminded to tune to 3.588MHz each Saturday morning at 6am for the Stone the Crows Net with Ted VK2UI as Master of Ceremonies.

Henry Lundell VK2ZHE President, Oxley Region Amateur Radio Club reminds us it's now only 3 weeks to the Oxley Region Amateur Radio Club Inc 35th annual field day at Port Macquarie on Saturday the 12th and Sunday the 13th of June 2010. Full details are available on the club's website

VK4 - QNEWS
http://www.wiaq.com/ftp/vk4_qnews_64.mp3

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking..... but first..

Gwen VK4CB is looking for details on the Exicom 70-340B (RT85C) Midland
Any information would useful, manual, CTSS info would be even better.
07 3202 7137

A few years ago, when the radio bug first bit, hearing the first radio signals from a space satellite augured a massive change in the hobby of amateur radio. Thermionic devices had been the mainstay of electronics for near 50 years but the newly announced transistor was in the throws of commercial development. The semiconductor revolution changed the face of amateur radio as technology produced more and more developments and as the vinyl disk was supplanted, now the CD is ready to be archived itself. The computer has evolved from a mansion full of electronics to the common place tool in the shack.

This has been an interesting journey with discovery and frustration and awe and joy along the way. As the official commencement of the centenary of organised amateur radio is about to take place in Canberra, we can all reflect on this journey and where it will take us .

One invention in waiting is the Murphy Flush. Our News Editor, VK4BB, is most interested in an effective way of not succumbing to Murphy's Law especially during the anniversary events in Canberra. Please forward your prototype device to Graham for his assessment and be tuned next week for WIA News, live from the national capital.

I'm, Geoff Emery and that's what I think....how about you?

Ipswich and District Radio Club

Hi, I'm Mike VK4QS, President of the Ipswich & District Radio Club again,

Our club will be first club in Queensland to host the VK100WIA callsign.

We'll kick off operations on Thursday July 1st through to Saturday July 3rd 2010.

We are looking to operate 24 hours a day from our clubhouse at Denmark Hill, Ipswich.

The club will host a sausage sizzle on Saturday July 3rd for all members and guests at the clubhouse from 11am.

So on behalf of everybody at the Ipswich & District Radio Club, we look forward to working you.

73's, I'm Mike VK4QS.

TOWNSVILLE

po box 333 Garbutt East, QLD 4814
www.tarc.org.au

GREETINGS ! THIS IS DON VK4FNQA, WITH NEWS FROM NORTH QUEENSLAND WHERE THE CURRENT CLIMATE HAS TO BE THE BEST AROUND THE GLOBE !

THE FAR NORTH AND NORTH QUEENSLAND AMATEUR RADIO GATHERING IS NOW ONLY THREE WEEKS AWAY.

APART FROM LOTS OF SERIOUS LOAFING AND GREAT SOCIALISING THAT WILL HAPPEN AT THE CARDWELL VILLAGE BEACHCOMBER MOTEL AND TOURIST PARK FROM FRIDAY 11TH TO MONDAY 14TH OF JUNE, A FEW SCHEDULED EVENTS WILL ALSO TAKE PLACE.

YOU WILL BE ABLE TO TRY AND WIN YOUR FORTUNE AND GET RID OF ALL THAT PESKY SMALL CHANGE WITH THE 25 AND 50 CLUBS THAT RAY VK4NET AND WENDY WILL BE RUNNING FROM COMFY CHAIRS.

YOU WILL HAVE A TONNE OF FUNNE AND EXERCISE THE BRAIN CELLS AT THE FAMOUS TREC TRIVIA CHALLENGE AS QUIZ MASTER DALE VK4DMC CONDUCTS AN EVENING OF MIRTH AND FACTS.

YOU WILL GET TO DEFEND THE HONOUR OF YOUR REGION, OR HAVE HEAPS OF GIGGLES AT SOME OF THE ANTICS THAT HAPPEN AT THE TRADITIONAL NORTH QUEENSLAND VERSUS FAR NORTH QUEENSLAND CRICKET MATCH - AND THEN TEAM UP WITH EVERYONE ELSE FOR THE CLASSIC GROUP PHOTO SESSION.

YOU HAVE THE CHANCE TO OBTAIN VK100WIA COMMEMORATIVE PLATES AND MUGS THAT CHERYL VK4FRYL WILL HAVE ON DISPLAY AND WILL BE SELLING FOR A SHORT WHILE DURING THE WEEKEND.

PUT UP AN AERIAL AND ACTIVATE THE CASSOWARY COAST REGION FOR THE VK SHIRES CONTEST !

GET CRACKING AND ARRANGE YOUR ACCOMMODATION AS IT IS ALL RUNNING
OUT FAST !
RING RECEPTION AT THE PARK RIGHT NOW ON 1800 005633.
I HOPE TO SEE YOU THERE.

NOW HERE IS A CHANCE TO INVOLVE THE FAMILY IN AN OUTDOOR EVENT
WHICH INVOLVES RELAXING, EXERCISING, SOCIALISING AND EVEN
SOME RADIO OPERATING.
KAYAK ON THE RIVER IS HAPPENING TODAY FROM 11-30AM.
IT IS BASED NEAR THE RIVERSIDE GARDENS COMMUNITY CENTRE,
55 RIVERSIDE BOULEVARD, DOUGLAS AND USES A VERY QUIET PART
OF THE ROSS RIVER.
IN THE TOWNSVILLE REGION THE NEWS TRANSMISSION IS BEING DONE
LIVE FROM THE VENUE. BE SURE TO ASK GAVIN FOR A WEATHER REPORT
DURING CALLBACKS !
OFF STREET PARKING IS AVAILABLE AND THE RIVER AND FACILITIES
ARE IN EASY REACH.
BRING YOUR OWN CHAIRS, HATS, DRINKS AND THINGS TO COOK ON
THE ELECTRIC BARBEQUES FOR LUNCH.

EVERYONE WELCOME INCLUDING FAMILIES AND GRANDCHILDREN.

BRING YOUR OWN KAYAK OR CANOE OR RUBBER TYRE IF YOU HAVE ONE
TO JOIN IN THE FUN.
THERE WILL BE A FEW SPARE CRAFT AT THE PARK WITH SAFETY GEAR
IF YOU WANT TO TRY A KAYAK FOR THE FIRST TIME.
REMEMBER TO TAKE A RADIO IN A PLASTIC BAG WITH YOU AS THOSE
ON SHORE WILL WANT TO TRY AND TALK TO YOU.

FINALLY, HERE IS A REMINDER THAT ONE OF THE FRIENDLIEST RADIO NETS
IN THE LAND HAPPENS THIS TUESDAY EVENING FROM 7-30PM ON THE
TOWNSVILLE VHF REPEATER.

THE ANN RENTON MEMORIAL LADIES NET IS OPEN TO YOUNG AND OLD,
YL OR OM OR EVEN SECOND OPERATORS GETTING ON AIR FOR THE
VERY FIRST TIME !
SO JOIN IN THIS TUESDAY EVENING NET AND LETS SEE IF THE YL'S
CAN OUT-NUMBER THE OM'S !

TIME FLIES WHILE YOU ARE HAVING FUN AND THAT'S ALL THE TIME
WE HAVE FOR QNEWS THIS SUNDAY TWENTY THIRD OF MAY....

THIS HAS BEEN DON VK4FNQA IN TROPICAL PARADISE MODE
FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE
BEEN LISTENING TO, AND ENJOYING QNEWS FROM VK4WIA..

VK7

The Hobart Vintage Machinery Society will be conducting a working display at
the Sorell Men's Shed today Sunday the 23rd of May 9am till 2 pm.

See these old machines running and also the static displays of memorabilia.
Mostly all displays will be under cover in case of bad weather.

Men's Shed Shop will be open with lots of pre loved items for sale.

VK7SMS Radio Station will be on air call on 146.700 if you get lost.

REAST June Presentation
Dr Graham Denyer VK7JN who is currently working at the Australian Antarctic Division will be presenting his experiences of operating amateur radio and telemedicine in Antarctica.
Starts 8pm in the Queen's Domain Clubrooms

NORTH WEST NEWS

NEXT CLUB GENERAL MEETING

The next General Meeting of the North West Tasmania Amateur Television Group is scheduled for Saturday 5th June 2010 commencing around 2.00PM. The venue for this meeting will be confirmed shortly.

As usual all persons are invited and welcome to attend.

(Tony VK7AX, News Officer NWT-ATV Group)

This seperate feed will cease at end of June next month... instead you will be able to pick it up from either the RSS feed on wia.org.au (that's been running fine since about Feb 2009) and it is emailed to you in text or direct from the wia page at wia.org.au

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Final Report on the Qinghai Earthquake

The 7.1 Richter scale earthquake that struck China's Qinghai province on the 14th of April killed more than 2,000 people and relief efforts are continuing for those left homeless.

Amateur radio operators from within Qinghai and others who travelled from other areas to the disaster centre did a fine job.

There in poor weather conditions they helped in the transportation of medicines, tents, food and clothes to the disaster area.

The amateur radio operators were even directly involved in disaster rescue activities. One Beijing amateur radio rescue team saved 6 people.

The high altitude caused 90% of the amateur radio rescue team members to have Plateau Reaction (altitude sickness), but no one was injured during their efforts to help others affected by the disaster.

The Chinese Radio Sports Association reports that the experience and lessons learnt from the Sichuan earthquake in 2008, resulted in amateur radio disaster relief evolving into a practical level.

The radio hams were connected to government disaster relief organisations, the Red Cross and volunteer rescue teams.

All amateur radio teams brought relief supplies. The Sichuan amateur radio rescue team arrived very quickly, and set up a 70cm repeater to help provide communication and coordinate all amateur radio operators coming into the area. HF was also used during the disaster relief.

Now, all of the amateur radio operators have returned to their daily life, we will never forget their contributions in the disaster relief.

(Report provided by Fan Bin BA1RB, CRSA Coordinator IARU Region 3 Disaster Communications Committee and Chairman Jim Linton VK3PC)

Visitors to South Africa during the Soccer World Cup event may operate amateur radio while in South Africa using the prefix ZS10 in front of their own callsign for example ZS10/VK1ABC

The South African Radio League negotiated an agreement with the Independent Communications Authority of South Africa to allow all licensed Radio Amateurs visiting South Africa during June and July 2010 to operate while in South Africa on condition that they register with the South African Radio League prior to arrival in the country.

Extension of amateur radio 40-metre band in Kenya
The Communications Commission of Kenya has just approved the use by radio amateurs in Kenya of the sub-band 7100 kHz to 7200 kHz.

CELLPHONE RADIATION IMPROVES THE THOUGHT PROCESS OF MICE

>From the science page comes this interesting story regarding radiation from cellular telephones that claims it can improve your intelligence, but only if you are a mouse.

According to Gary Arendash of the University of South Florida in Tampa and colleagues, research being conducted using mice prone to an animal form of Alzheimer's disease showed that long-term exposure to electromagnetic radiation typical of cell phones slowed and reversed the course of the illness. Moreover, a similar exposure in normal mice for two hours a day over seven to nine months improved their cognitive abilities compared with control specimens.

Arendash and colleagues provided their data in a recent issue of the Journal of Alzheimer's Disease. They also say that the findings provide striking evidence for both protective and disease-reversing effects of long-term exposure to radiation at cell phone level.

NEW PRODUCTS: CUBA UNVEILS FIRST DOMESTICALLY PRODUCED TRANSCEIVER

Cuba is going into the ham radio transceiver business. At least domestically. This as a prototype of A low cost 1.8 MHz transceiver presented at the 8th Congress of the Cuban Ham Radio Federation.

The Chair of the Cuban Ham Radio Federation is Pedro CO2RP. He told the Cuban News Agency that the first 600 units are ready for delivery to Cuban amateur radio operators. The radios primary purpose is to help to support emergency communication in Cuba.

WEIRD AND WONDERFUL

Enigma cracked again

An Enigma message sent over 65 years ago and thought to have been unbroken to this day has been cracked by a group of volunteer computer enthusiasts.

The 2,700+ strong group Enigmaathome.net has been using nearly 4,500 individual computers in a massive international effort to decode surviving unbroken messages.

The interface uses the standard BOINC distributed computing client software, and anyone can take part in the project.

To carry out the work of the project so far, a single computer would have to be left running for over 4000 years, such is the complexity of the Enigma system - a true testament to it's original design.

There is no truth to the rumour the decoded message from mid-atlantic IN 1943 read, "in the year 2010 all WIA Directors will deliver their reports live on air, in the new modes of FM and SSB, to their members from the Canberra AGM when the WIA is 100 YEARS OF AGE".

World Fauna and Flora (WFF44) DX-pedition.

What is believed to be the first WFF44 activation of a National Park in VK is taking place until 23 May at Undara Volcanic National Park which is located to the east of Mount Surprise in Far North Queensland.

Grid locator QH21

The DX-pedition is in support of the World Fauna and Flora (WFF44) organisation and full details can be found at www.wff44.com/en

DX-pedition call-sign is VK4YN/P and will be operating on the 80/40/20/15/10M bands.

Operators will be: Gary VK4FD, Jeff VK4BOF and Dale VK4DMC.

Further information including operating frequencies are available at VK4FD's website at www.qsl.net/vk4fd/

(Dale - VK4DMC)

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE

Larry, W6NWS will be in Vietnam until 9th June. He expects to be active as XV2W when time permits, mainly around the CQ WPX CW and SEANET contests. QSL via home call, direct or via the bureau and Logbook of The World.

Westlake's club news say that the popular internet site "DX Summit" is rolling out a newly personalized web site, calling it "My DX Summit," giving amateur radio operators of all interests the chance to improve DX alerts and the way that spots are delivered to users around the world. And some of the future changes could be targeted to contesters.

On the air, keep an ear open for special event stations 3H100TW, 3T100TW and 3T0TW. All are operational from the capital city of Taipei, Taiwan, through December 31st. QSL's for all three stations should be sent via the BV bureau.

MEDIA WATCH

UK PREPARES FOR DIGITAL RADIO SWITCHOVER

The United Kingdom's Digital Economy Bill which will force all analogue radio off the air in coming years has become law. The move came barely a week after a British Parliament's House of Lords report questioned the wisdom of moving all national and regional radio broadcasting to Digital Audio Broadcasting. It echoed many criticisms voiced over the bill, which is

likely to consign all FM and AM radios to landfill in five years, except for listening to ultra-local FM stations.

But digital radio switch-over arguments are unlikely to cease for long time. This is because the new law constructs a framework of conditions

rather than fixing a date. It requires Digital Audio Broadcasting coverage and listening-share to reach a certain level before FM switch-off can be initiated. This in turn will be followed by a delay before the transmitters are actually turned off.

VK3 STATE D-STAR WORKSHOP DAY

June 19, the Macedon Ranges Amateur Radio Club is hosting a State D-Star workshop. A full day of training for new users, advanced users and system administrators. A great opportunity for networking and fun. The event will be fully catered by MRARC. Cost is $30 per participant inc Lunch etc. Participants are encouraged to bring their D-Star equipment.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Vietnamese CubeSat under development

News of a Vietnamese Amateur Radio 2U CubeSat under development.

They hope to complete a F-1 satellite by the end of 2010 and launch it to Sun-synchronous, 98 deg inclination LEO.

At the moment they are negotiating with several launch providers to find a way into orbit but the high launch cost is really an issue.

Project goals for the F-1 satellite include:

Students to learn about aerospace engineering.
Survive in space environment for at least a year.

The satellite will use amateur VHF and UHF frequencies. The IARU has coordinated at downlink frequency of 437.485 MHz to support a 1200 baud AX.25 telemetry link. The F-1 satellite will also transmit a beacon using a modulated Morse code audio signal on FM carrier when it is not in range of the earth station in Hanoi. In case of emergency, DTMF tones can be used to control the satellite to some extent.

GI4FUM FUN DXPEDITION TO MOZAMBIQUE

David Hutchinson, GI4FUM who is also known as 3DA0DJ is sponsoring a DXpedition to Bilene, Mozambique this coming October.
He says that plans are to run a station for Jamboree on the Air with local scouts on the weekend of October 16th and 17th and that they will also enter a station for CQWW SSB over the weekend of the 30thth and 31st.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

Emergency Communications in Brunei

The May 10 issue of The Brunei Times newspaper reported on the vital role of Radio Amateurs in emergency communications.

The newspaper says "Amateur radio operators in the country could provide assistance in times of disaster by providing communications support and situational updates."

The national society is the Brunei Darussalam Amateur Radio Association

(BDARA) and they have always worked closely with the National Disaster Management Centre (NDMC). During the 2009 flood disaster Radio Amateurs were instrumental in helping the government.

Rewind a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others, that is being published in the WIA journal Amateur Radio magazine.

WIA federal representation formed

A Wireless Exhibition organised in May 1924 by the Victorian Division of the WIA in the Melbourne Town Hall not only was a wonderful showcase of wireless, it also resulted in even closer ties with the various state branches of the Institute.

The Exhibition's souvenir program said: ?It will come as a surprise to many people to learn that the Wireless Institute of Australia is a very old established organisation, and was formed in 1910.?

The program went on to state for nearly a decade before the start of the WIA there had been individual members of the community carrying out valuable experiments and assisting to disclose the fundamental principles of one of the most wonderful and useful sciences which have been offered to mankind.

The Exhibition included a convention, convened by the Victorian Division of the WIA, that resulted in establishing a representative body for the entire Commonwealth of Australia.

New South Wales and Tasmania sent representatives, while Queensland, South Australia and Western Australia relied on proxies supplied by Victoria.

The formation of a Federal Executive by the WIA was instantly welcomed as facilitating Australia-wide representation which had long been desired by the Postmaster General.

SOCIAL SCENE

2010

Julian Sortland, VK2YJS tells us that with the theme of "Access all areas", this coming week, May 25 to 30 is Library and Information Week. It is a good opportunity to check out what radio and electronics material your local library holds, or maybe to suggest they update what they hold in this area. A number of libraries are also taking part in Australia's Biggest Morning Tea on Thursday.

MAY 4-7 2012 VK5
YL International 2012 Australia (vk5tmc@bigpond.com)

At the end of the month we celebrate the 100th anniversary of organised amateur radio activity in Australia. We should take a moment to remember one of the original radio Amateurs, Marconi.

Marconi established the world's first equipped and functioning wireless telegraphy station in November 1897 on the Isle of Wight.

In the summer of 1900 a station was established at Plodhu Cornwell from where Marconi hoped to archive communications across the Atlantic.

In the summer of 1901 the spark generated by the transmitter produced a thunder clap which echoed around the hill and coves. The sparks generated were a foot long and as thick as a man's wrist.

The sending of Morse using their equipment was defiantly not a speed event, the keying contact was at the far end of a 6ft length of timber and the

operators stuffed cotton wool in their ears to reduce the effects of the thunder claps generated by the spark.

Can you imagine using such equipment and the effects on the neighbours today?

But it was the beginning of radio a hobby which we enjoy today.

Remember that registration close on Monday 0900 for the WIA anniversary weekend and AGM.

If you are not registered two things will happen you won't have a pass for the event and the caterers will have trouble feeding you as they have to have

the numbers on Monday evening.

Jump on line and register now.

This seperate feed will cease at end of June next month... instead you will be able to pick it up from either the RSS feed on wia.org.au (that's been running fine since about Feb 2009) and it is emailed to you in text or direct from the wia page at wia.org.au

On behalf of the Canberra Region Amateur Radio Club and the WIA
this has been Peter VK1PE technical producer and Alan VK1WX, with thanks
to the studios of Canberra's 1RPH Good Morning!

Changes followed by "|".

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

379. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2010-05-22 06:05:01 UTC
From: rram@panix.com
Message-ID: <radio/rec-radio-info/guidelines-1-1274508301@panix.com>
Source record: 5748
Cross-posted to: rec.radio.info,rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.answers,news.answers

```

Archive-name: radio/rec-radio-info/guidelines
Revision: 1.5 2007/03/22 16:30:49
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

380. SARL NEWS - SUNDAY 23 MAY 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-05-22 19:00:12 UTC
From: website@sarl.org.za
Message-ID: <20100522190005.4B92033CC2@panix2.panix.com>
Source record: 5749
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 23 MAY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with regret that w&#65533; have to announce that the key of Kobie Furstenberg, ZS6ALE, became silent on Sunday the 9th May 2010 in the age of 75 years. Kobie was a pioneer in the development of E.M.E. in the RSA. H&#65533; leaves his wife Alet, one son and three daughters.

Milne Buchan, ZS5NZ, passed away on the morning of 21 May 2010. He was a Honorary Life Member of MARC and also of of SARL. Milne was legal adviser for SARL in the past. He is survived by his daughter Anne.

Our sincerest condolences to the relatives and friends of the deceased.

In the news today:

SARL CELEBRATES 85th ANNIVERSARY

RADIO TECHNOLOGY IN ACTION TO HIT DURBAN NEXT SATURDAY

SA AMATEUR RADIO DEVELOPMENT TRUST RECOGNIZES THREE RADIO AMATEURS FOR CONTRIBUTION TO THE HOBBY

SARL SPRINT TO CELEBRATE YOUTH DAY 16 JUNE 2010

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SARL CELEBRATES 85th ANNIVERSARY

"Happy 85th birthday SARL!" said SARL President, Dennis Green, ZS4BS. In his message, Dennis says "on Wednesday 20 May 1925, a group of radio amateurs got together in Cape Town and formed the South African Radio Relay League. It was, I am sure, a momentous occasion for these radio amateurs. I wonder what the challenges were that faced the SARRL in those first years. The organisation grew and later the name was changed to the South African Radio League.

We can think back of many highlights that the SARL has had over the past 85 years, of many radio amateurs who have served the organisation as members with honour and dedication and what has been achieved. We think of the radio amateurs who have served on branch or club committees and on the council of the SARL. I would like to acknowledge every radio amateur that has and is playing a role in promoting amateur radio and the South African Radio League.

As we look to the future, we are faced with some challenges to the organisation and to the hobby. I think the recruitment of members is important, not only the young people, but also those more settled. Are the clubs effective in promoting amateur radio? Do we take amateur radio to the public?

Technologies change very rapidly and we as radio amateurs must stay abreast of development, we must be part of that development, we must take the lead. Our hobby has so many facets, there are some many things we can get involved in, the sky is the limit.

In our 85th year, I ask you to take up the challenge and let us strengthen the South African Radio League by being radioactive, developing technologies and increasing our membership base. Are you with me?"

RADIO TECHNOLOGY IN ACTION TO HIT DURBAN NEXT SATURDAY

The first of the SARL Radio Technology in Action 2010 events will be held in Durban on Saturday 29 May at the University of KwaZulu-Natal in Durban. It is an event not to be missed, great presentations and attendance prizes. This year there are two special features: Learn more about D-Star with Deon Swanepoel, ZS5DD, and how to improve audio from your rig with DSP. Also how to get involved in Amateur Radio Direction Finding (ARDF) with easy to build equipment.

Get the full programme on the web or send a mail to RTA with Durban RTA in the address line and a copy will be mailed to you.

If you are in KwaZulu-Natal, whatever you do make sure it is attending the RTA.

SA AMATEUR RADIO DEVELOPMENT TRUST RECOGNIZES THREE RADIO AMATEURS FOR CONTRIBUTION TO THE HOBBY

On Monday last week, the South African Amateur Radio Development Trust presented three radio amateurs with awards recognising their contribution to the hobby. The presentations took place during a gala

lunch held at the Midrand Protea Hotel. The guest speaker was well-known Scenario Planner and author, Clem Sunter.

The Garth Milne Technology award was presented to Jan-Albert Koekemoer, ZS1JAK, for his unstinting work on SumbandilaSat and in particular to get the Amateur payload fully operational soon after launch. SO67, as the amateur radio payload on SumbandilaSat is known, has already created worldwide interest. During the past few weeks Jan-Albert has been working on new software that will allow the transponder to remain on for the 15 minute pass making it easier for radio amateurs using hand-held antennas to operate through the satellite. SO67 operation schedules will soon be published on www.amsatsa.org.za.

The Nokia Siemens Network Radio Amateur of the Year Award was presented to Eddie Leighton, ZS6BNE. Eddie was recognized for his efforts in popularizing satellite activity in South Africa and taking the "rig in sack" concept to RaDAR - Rapid Deployment Amateur Radio promoting field operation with the objective to set up a portable station in the shortest possible time.

The Nokia Siemens Networks Amateur Radio Community Service award was bestowed on Dr Lee-Anne Mc Kinnell, ZS2LAW, for her work in the field of space weather and how it affects amateur radio, in initiating the 40 metre beacon project, which in its revised form will be rolled out later this year, and her support of the Radio Technology in Action programme. Unfortunately Lee-Anne could not attend and the award was received on her behalf by her mother, Lyn Willescroft.

In congratulating the winners Thobi Mkhize, of Nokia Siemens Networks, said NSN was proud to be associated with the awards programme and the work for which the recipients were recognized. She said that it is important that excellence is recognized. As amateur radio is a powerful activity to influence young people to take up careers in the electronics and communications sector Thobi urged all radio amateurs to adopt a young person with the objective of involving him or her in the hobby.

The Radio Amateur of the year awards are annually sponsored by Nokia Siemens Networks.

The SA Amateur Radio Development Trust also presented a certificate of appreciation to Multisource for their support of the Amateur Radio Innovation Project which was launched earlier this year.

"Innovation in Amateur Radio" is an eighteen month project aimed at promoting innovation in Amateur Radio. Radio amateurs and technologists are invited to submit projects that will innovate amateur radio whether it is software, amateur radio and the Internet, the development of compact HF antennas for flat and complex dwellers or innovation in Emergency Communications.

More about the awards and the innovation project on www.amateurradio.org.za.

SARL SPRINT TO CELEBRATE YOUTH DAY 16 JUNE 2010

"With the World Cup in full swing and schools on holiday Radio Amateurs have an unique opportunity to celebrate youth day on 16 June with the SARL Sprint and give South Africa's young people a taste of Amateur Radio and hands-on experience", says Gerhard Coetzee, ZS3TG, SARL Councillor for Youth Activity.

Clubs are encouraged to set up stations in public areas like shopping malls to demonstrate amateur radio as the greatest of all scientific hobbies and a great primer to encourage young people to take up careers in electronics and communications.

There are many prizes to be won during the sprint as well as lucky draw prizes for all who submit a log with a minimum of 10 entries.

Clubs setting up stations are requested to send details to armi@sarl.org.za for inclusion in media releases to be handled by the SARL PIO Network.

Full details of the event are available on www.sarl.org.za from the home page click on youth activity.

Individual radio amateurs are invited to adopt young people for the day and invite them into the shack to operate under your supervision.

CONTEST NEWS

Here are the results of the SARL Autumn QRP Sprint that took place on the 18th April 2010. 19 logs were received. Points were deducted because of incorrect call signs and RST reports. Contestants must please read point 11 under general rules in the Contest manual, the "Blue Book". The points scored are as follows:

1st - Jan Botha, ZS4JAN 12 960

2nd - Pierre van Deventer, ZS6BB 5 120

3rd - Andre Botes, ZS2ACP 4 960

4th - Johan Groenewald, ZS2CX 4 760

5th - Andre van Deventer, ZS2BK 3 780

6th - Phillip Esterhuizen, ZS4 2 552

7th - Andre le Roux, ZS2AL 1 216

8th - Andrew Dekenah, ZR6DEK 1 400

9th - Marius Preston, ZS4MP 864 10th - Pam Momberg, ZS6APT 768 11th - Quartus de Witt, ZS6QDW 608 12th - John Kramer, ZS5J 540 13th - Kevin McDonald, ZS6KMD 504 14th - Romeo Nardini, ZS6ARQ 504 15th - Pieter Bosman ZS3AOR 480 16th - Derek Stuart ZS2J 480 17th - Geoff Levey, ZS6GRL 456 18th - Tony Allen, ZR2TX 132 19th - Benjamin Scholtz, ZU1BEN 16

Once again thanks to everyone who took part in this contest and a special thank you to the guys/gals who submitted their logs.

VHF/UHF CONTEST RULES

A draft copy of the VHF/UHF contest rules is available for download from the website.

This document will be used as a platform at the Indaba on 26th June 2010 to begin discussions on the rules for the VHF/UHF contest.

CLUB NEWS

The Port Elizabeth Amateur Radio Society held its Annual General Meeting on Saturday 15 May at the Walmer Scout Hall in Port Elizabeth. The following committee members were elected: Chairman: ZS2AG, Ashley Goosen. Committee members: Glen Cummings, ZS2GV; Clive Fife, ZS2RT; Basie du Plessis, ZR2BA; Bill Hodges, ZS2ABZ; Chris Scarr, ZS2AAW.

Portfolios will be allocated at the inaugural committee meeting to be held soon.

The Society thanks the outgoing committee and chairman for their good work during 2009-2010.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP reports that the solar activity is still at low levels. A small sunspot is forming in the southern hemisphere of the sun. It formed during the later portion of Thursday and has not yet received an official sunspot number. The effective sunspot number is expected to be less than 10 for the coming week.

15 m will provide the best opportunities for DX followed by 17 and 20 m. Conditions to India will be good from the afternoon onwards. During the late afternoon and early evenings it will be good towards Europa. contacts with the USA are once again becoming challenging. Contacts with Australia and New Zealand will be challenging. During the afternoons and evenings 15 m contacts may also be possible with Brazil although conditions are becoming slightly challenging.

Local conditions are going to be good during the day time on 40 m. 20 m is still useful over the longer distances. 80 m is best for the shorter distances and also early morning and late afternoon.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

29 May - RTA symposium in Durban; 5 June - Flea market at 10:30 at the ZERABI reception centre half-way between Klerksdorp and Potchefstroom; 16 June - Youth Day celebrations, SARL Sprint; 26 June - VHF indaba at the NARC starting at 12:00; 18 July - Intechnet at 19:30 on VHF/UHF/MICROWAVE matters; 24 July - RTA symposium in Cape Town; 21

August - RTA symposium in Port Elizabeth; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual; 18 September - RTA symposium in Gauteng; 30 September - closing date for phase 1 of the Innovation project.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE. Thank you for listening, 73.

DIGITAL AMATEUR TELEVISION (DATV) EQUIPMENT
BULK PURCHASE SCHEME

Following on from the success of the first bulk purchase scheme, the Wellington VHF Group Incorporated is accepting orders for a second scheme, closing at the end of June.

For more details please email:

zl2wa@clear.net.nz

****

>From The Business Manager ZL2TDM

Debby says....

Last call for branches to submit their voting results if they wish to have a proxy represent them at the AGM. Please send them to me before the end of this coming week.

Thank you to all those branches who have submitted their branch details to me. My apologies for not having clearly advised where these were to be sent, which obviously had some branches confused. I assumed that as the circular had been posted out from HQ that secretaries would automatically return them to me.

Hope to see as many of you as possible at conference in Auckland.

Talk soon....Debby ZL2TDM

****

RSM Call Book Database to be Put Onto The NZART Website

The NZART Administration Liaison Officer, Don Wallace ZL2TLL, is to obtain a pre-Call Book copy of the RSM Call Book Database that is to be placed on the NZART Website.

The purpose of this is to give people the ability to check their own and their friends listings and for the person with the entry in error to get in touch with RSM to correct any errors. This will then give us a more accurate Call Book.

Details can be updated either online at

http://www.rsm.govt.nz/smart-web/smart/page/-smart/WelcomePage.wdk

(you will need your log in details) or by phoning RSM on 0508 776 463.

For Silent Keys, there is a form available at

http://www.nzart.org.nz/policies/2006-callsign-removal-form.html

and this can be filled in and posted to Debby at HQ (PO Box 40-525 Upper Hutt 5140) with relevant supporting documentation by a person authorised to do so.

For further information, please see the help files online at

http://www.nzart.org.nz/call-book/index.html

or contact RSM as above

Competitors Vie to Provide Earthquake-Proof Radios

Can you hear me now?

By Bill Ray of The A Register ï¿½ Biting the hand that feeds IT

Posted in Wireless, 13th May 2010 12:53 GMT

The Wireless Innovation Forum has announced the winners of its competition to find a radio technology suitable for use following a 15 gigaton earthquake.

Skipping over the huge loss of life and general destruction wreaked by a magnitude 10 earthquake - more than 10 times the size of the Indian Ocean quake of 2004 - the Forum asked teams to develop a radio system that could provide connectivity to emergency services descending on the area from around the world....

For further information please goto:

http://www.theregister.co.uk/2010/05/13/competition/

A thank you to John ZL1GWE, for suggesting this item

INTRUDER ALERTS

___oooOOOooo___

Date:19-MAY-2010 06:17 a.m.

14348.170 kHz center, OFDM72 (72 tones, 2700 bandwidth), daily audible from 10 - 12 utc and longer, location: Canary islands, bearings from the German PTT

73 from Wolf DK2OM

___oooOOOooo___

Date:11-MAY-2010 06:17 a.m.

Buenos dï¿½as, Uli

They are Spanish fishermen talking in galician. It is similar to portuguese but clearly it was galician and they were fishermen from the content of the conversation.

We will pass the claim to the Spanish PTT (DGTel). Unfortunatelly it is quite common lately.

Gracias , Uli.

73 Salvador EA5DY

___oooOOOooo___

>Date: 04/05/2010 06:17 a.m.

7001.5 kHz - daily in the evening hours: MIL-188-110A hybrid modem (serial + parallel), 75 Bd - about 2500 Hz shift.

Location: Israel

The German PTT will be informed.

73 from Wolf, DK2OM

>Subject: [INTRUDER ALERT] Myanma Radio 7185,7 and SLBC Sri Lanka 7190 kHz

Sent by: intruderalert-bounces@iaru-r1.org

Dear fellow Intruder Busters, last night I have heard myself for the 1st time:-

*** Myanma(r) Radio on 7185,750 kHz, time 2333 - 2351 UTC with R4-5 S8 with traditional music

*** SLBC Sri Lanka on 7190,0 kHz, time 0024 - 0112 UTC with R 4-5 S9 with Indian film music.

It was necessary to listen only with one sideband and to change this sideband sometimes, as the activity by Hams on qRGs lower and higher was too strong.

My antenna: Inverted-Vee dipole, Rx-Tx FT-1000

Keep on listening and reporting to IARU MonSys Region 1.

Vy 73 de:-

Uli, DJ9KR

NZART Membership From 1950 to 2010

This graph shows that the membership increased from 1950 until its peak in 1982. From 1982 the membership has decreased until now it is at the same number of members as there were in 1953.

****

Remit 4 Procedure at the NZART Annual General Meeting

The voting on Remit 4 does not give council a mandate re entry level licence. If passed it merely instructs Council to seek a mandate:

REMIT 4 Hastings Branch 13 Non - Transmitting

"That Council seek a mandate from the full membership before proceeding with the implementation of an entry level licence"

What I propose to do at the AGM is as follows:

1. Have the remit discussed and voted on.

2. After the remit is voted on I will then call for a poll from all branches as to whether they want an entry level licence or not.

This should settle the matter once and for all.

By polling all branches at the AGM - and counting how many votes they record which way - the matter of an entry level licence should be settled.

When discussing Remit 4 at branch meetings, could all branches please decide whether they want an entry level licence or not - and instruct their delegates accordingly.

The article about an entry level licence that appeared on page 14 of the March/April 2010 Break-In is intended as a discussion document and may not necessarily be the final version should an entry level licence be wanted.

Roy Symon ZL2KH
NZART (Inc) President
April 2010

****

Opportunity

NZART Transmitting Members are invited by NZART Council to provide guidance and assistance with a matter that is under consideration: The Future of NZART.

You are invited to enter, starting at the TOP LINE on a single A4 sheet "Submission on The Future of NZART" followed by your name, callsign, postal address, and date,

OR,

In the address line of your email: "Submission on The Future of NZART from" and in the TOP LINE in the body of your email text, again: "Submission on The Future of NZART from" followed by your name, callsign, postal address, and date.

Add your NZART Membership Number too - or a statement that you are a current TRANSMITTING Member.

Constructive comments are wanted. Consider the present NZART circumstances and financial position as your start point. You are referred to March/April 2010 "Break-In". Previous history is not required.

A single A4 sheet, or if submitting electronically as an email or attachment, not more than one page with this required heading information and your constructive comments will be appreciated.

Submissions that do not meet these rules or which are in excess of these rules will impede the processing in the short time available so will be rejected unconsidered.

Submissions close at midday on Thursday 27 May, at NZART Headquarters, nine days before the AGM.

Please post A4 sheet submissions to: "SUBMISSIONS", NZART Headquarters, P.O. Box 40-525, UPPER HUTT 5140, and in adequate time to reach the destination before the closing time.

Please send emails to nzart.hq@clear.net.nz before the same closing time.

The A4 sheets and email submissions received become NZART Council working documents and the property of NZART Council. No acknowledgements will be given.

Submissions will be considered by Council at its face-to-face meeting on the day before the NZART AGM. The identity of originators of documents will not be disclosed outside NZART Council.

The release of results, statistical information, extracts from the texts received, and any further use of information received, is at the discretion of, and will be decided solely by, the NZART President.

Notes:

a.. A single-sheet hard copy submission or a one page email submission has been deliberately requested to ensure fast processing and to study in the short time available before Conference. Your cooperation is requested.
b.. NZART's principal concerns are the interests of its Transmitting Members.
****

NZART Council Working Action Points

2010 NZART MEMORIAL CONTEST
When :- 3 & 4 July 2010
Times :- 2000 NZST until 2300 NZST both evenings
Band :- 80m
Modes :- CW and Phone
The Memorial Contest was established soon after the end of World War 2 to commemorate those who lost their lives in the service of their country. It is a fitting way to honour those Hams and others who selflessly served their country so that we, today, may enjoy the freedoms that we do.
The Contest is split into a number of categories catering for all HF interests so please spare an hour, or two to honour those who paid the ultimate price that we now enjoy in our present lifestyles.
Contest Rules and Other Operating Information is available from the NZART Website :- http://www.nzart.org.nz/contests/index.html
Contest Rules and other Operating Information is available from the NZART website - http://www.nzart.org.nz/contests/index.html

> HAM RADIO IN SPACE; ?VIOLET SAT TO LAUNCH IN 2011
>
> And the Violet is an Amateur Radio satellite being built at Cornell
> University. ?It will launch in early 2011. This bird is described as a
> 50 cm cube sat and will carry 4k8 UHF simplex packet links with 5 watts
> of RF downlink power. ?It will use a star tracker and fiber optic gyro
> for fine attitude estimation and propagation.
>
> A submission for frequencies has been made to the IARU Amateur
> Satellite Frequency Coordination panel for operational frequency
> assignments. The name Violet is derived from its ultraviolet telescope,
> which includes flight-spare Deep Impact CCDs.
>
> **
>
> HAM RADIO NEAR SPACE: ?THE ALIEN-1 BALLOON LAUNCH
>
> The flight of ALIEN-1, a high altitude balloon built by three students
> at Reading School, proved a success. ?This despite the 50 baud
> transmission rate of the payload. ?That meant it could only send down
> one telemetry string every 15 seconds. ?As a result it initially looked
> as though the highest altitude achieved was 33.116km. ?However, having
> recovered the payload they got the second-by-second GPS log and this
> shows the highest achieved altitude was 33.158km: ?It is believed this
> altitude is the third highest in the UKHAS UK records. ?The 434.075 MHz
> beacon worked well and some great pictures were taken.
>
> **

>
> THAT FINAL ITEM: SUPERCAPACITORS MAY REPLACE BATTERIES
>
> And finally this week, failed batteries are a problem that plague both
> cell-phones and Amateur Radio satellites. But Micro-Super capacitors
> may provide a solution.
>
> Science Daily reports that Berkeley Lab researcher John Chmiola
> believes he has found a solution in electrochemical capacitors, which
> are commonly referred to as "super capacitors." This is because of
> their higher energy storage densities than conventional dielectric
> capacitors and higher abuse tolerance than batteries.
>
> In a paper published in the April 23rd issue of the journal Science,
> titled "Monolithic Carbide-Derived Carbon Films for Micro-Super
> capacitors," Chmiola and Yury Gogotsi of Drexel University, along with
> other co-authors, describe a unique new technique for integrating high
> performance micro-sized super capacitors into a variety of portable
> electronic devices through common micro-fabrication techniques. They
> say that this evolving technology could eventually lead to an end to
> failed batteries in critical equipment including satellites where there
> is no way to replace a defective battery once the bird has been
> launched and is on-orbit.
>

Amateur Radio NewslineT Report 1709 - May 14 2010

Amateur Radio Newsline report number 1709 with a release date of Friday, May 14, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Dayton opens its doors for Hamvention 2010, Australian hams fear the possible loss of 450 MHz, a ham accused of jamming police pleads not guilty and a broadcast transmitter is stolen while its on the air. Find out the details on Amateur Radio NewslineT report number 1709 coming your way right now.

(Billboard Cart Here)

**

THE SOCIAL SCENE: HAMVENTION 2010 IS ON

The doors of the 2010 Dayton Hamvention are opening as we go to air. Since 1952 the Dayton Hamvention has been sponsored by Dayton Amateur Radio Association. It has grown to be the world's largest amateur radio gathering, attracting hams from throughout the globe. And according to Assistant General Chairman Mike Kalter, W8CI, this years Hamvention is dedicated to radio clubs and the work that they doworldwide:

--

Kalter: "This years theme is amateur radio clubs worldwide. We decided that as our club is a big club. The Dayton Amateur Radio Association. And it takes a lot of people to put on something like this, so we were thinking that there are a lot of clubs that do a lot of good in the world so we thought that this would be our theme this year. We even have a Club of the Year award that we instituted this year."

--

Mike Kalter made that comment in an interview with RAIN's Hap Holly, KC9RP. At the same time he said that 2010 may be a year of growth for the Hamvention itself:

--

Kalter: "We have sold more tickets to date than we did last year at this time. We have more inside exhibits and more Flea Market spaces sold than we did last year at this time. So it looks as though we are going to be successful on those counts."

--

And what can visitors expect this year? Again, Mike Kalter, W8CI:

--

Kalter: "We have some interesting things that are going to happen. "Discover Homebrew" will be in our demonstration area where anyone wants to bring their homebrew project and set it up.

"We will have a ham radio (training) class this year.

"Returning again this year will be the emergency communications display. That's been a big hit so we have that back as well.

"Also we have some D-Star information. The clubs W8BI Gateway will be linked to the 30-B reflevtor during Hamvention weekend.

"And this year at the (W8BI) special events station we will have speech units so that the visually impaired are able to participate -- so we are pretty excited about that. The exact frequencies are listed at our website at www.hamvention.org"

--

Kalter also says that there will be a lot of interesting speakers leading this years forums:

--

Kalter: "Dr. Paul Bernhart, KF4FOR, the Senior Research Physicist for the Naval Research Lab. He heads up the HAARP project at the Haval Research Lab in Alaska and Aericebo in Pureto Rico. He will be talking about HAARP which is the High Frequency Active Auroral Research Program.

"Gordon West will be there taking stage. He's going to talk about the latest in DSP speakers from Clear Speech and others. If you have never seen a Gordon West forum, they are always a lot of fun.

"Carole Perry is a professional educator from New YorknCity and she will be presenting her Youth Forum.

"And Van Hoi, VR2HF, will be talking about what its like to be a ham in Hong Kong.

"The BalloonSat: forum will be back with Bill Brown, WB8ELK. And we are actually planning a balloon launch on Friday afternoon."

--

By way of background, the Dayton Hamvention started out life as the Southwestern Ohio Hamvention. The first organizational meeting was held in January 1952 with the convention taking place on March 22nd at the old Biltmore Hotel in downtown Dayton. And at that first gathering there were only seven exhibitors and six forums. Even so, it was a far greater success than the Dayton Amateur Radio Association could have ever anticipated. They had hoped to attract 300 visitors but over 600 showed up. Now, almost six decades after John Willig, W8ACE, had asked the Dayton Amateur Radio Association to sponsor a ham radio convention the Dayton Hamvention remains the shining star in the ham radio sky.

We will have a full report on Hamvention 2010 next week. Meantime you can hear Hap Holly's complete interview with Mike Kalter, W8CI, by directing your web browser to www.therainreport.com and downloading this weeks Rain Report file. (ARNewslineT, RAIN)

**

RESTRUCTURING: 70CM IN JEOPARDY DOWN-UNDER

Radio Amateurs in Australia are worried that they may soon loose access to some or all of the 420 to 450 MHz band. This after the Australian Communications and Media Authority issues a statement on future use of the spectrum from 403 to 520 MHz.

Attachment 1 of the statement shows proposals for 420-430 MHz, there is no mention of the Amateur Service. With regard to 440-450 MHz the section on Proposed Transition Arrangements says that users in 452.5 to 453 MHz and 462 and 462.5 MHz spectrum will need to relocate either elsewhere in the 450 to 470 MHz band, or into another part of the 400 MHz band. Spectrum in 440 to 450 MHz will also be made available in consultation with the Department of Defense on a temporary basis.

The Australian Communications and Media Authority also propose to increase the number of UHF Citizen Band Radio Service channels from 40 to 80 by the use of 12.5 kHz channel spacing. More is on-line at www.acma.gov.au/WEB/STANDARD/pc=PC_312108 (WIA)

**

RADIO RECORDS: FIRST ROS CONTACT ON 500 KHZ

While it may not yet be legal to use in the United States FCC rules, the first Q-S-O using the new ROS digital protocol has been made on 500 kHz between G0NBD and G4WGT.

The contact took place on April 30th over a 30 mile path. Initially they used ROS 500/16 mode and then the ROS E-M-E mode. During the contact power was reduced from 3 watts output to 30 milliwatts. The antennas were 35ft top loaded whips.

Practical Amateur antennas for this band are very hard to come by due to the wavelengths involved. It can require 50 or more watts of transmitter output just to get 100 milliwatts Effective Radiated Power.

The success of the contact between the two U-K hams is proof that efficient weak signal modes such as R-O-S can help extend the communications range that is achieved using simple albeit inefficient antennas such as those used in this record setting test. (Southgate)

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Hamvention repeater, W8BI, serving greater Dayton, Ohio on FM and D-Star.

ENFORCEMENT: KJ6CEY PLEADS NOT GUILTY TO ALL CHARGES

A follow-up to last weeks story on the ham radio operator accused of making bomb threats, jamming police and fire channels, and interrupting the regions emergency radio traffic. Irene Marie Levy, KJ6CEY, has pleaded not guilty to felony charges of making criminal threats and making a false bomb report. She is also facing misdemeanor counts of maliciously interrupting a communications transmission and obstructing arrest.

According to the Desert Sun on-line newspaper, the intentional interference with police and fire radio communications allegation involved a bomb threat. Court papers say that it also contained what the newspaper terms as "specific" and "unequivocal" threats made to a certain sergeant, leading him to fear for the safety of his family,

Hemet police Lt. Mark Richards says that Levy was arrested at her home after investigators tracked her down by investigators using radio direction finding techniques according. A felony settlement conference was set for Wednesday May 12th and a preliminary hearing was tentatively scheduled a week later on May 20th. (Desert Sun, other published news reports)

**

TELECOMMUNICATIONS POLITICS: CONGRESSIONAL LEADERS SAY FCC MUST MOVE AHEAD ON BROADBAND

Two Washington lawmakers say that Congress should get ready to write new telecommunications policy, if needed. This following a recent court ruling that threw into doubt the government's ability to move forward with an ambitious broadband plan. Representative Henry Waxman and Senator John Rockefeller said the Federal Communications Commission should also consider short-term options, including a controversial idea to bring broadband under a stricter regulatory regime.

In a recent letter to the FCC, the lawmakers said that it is vitally important the agency be empowered to move forward with its National Broadband Plan unveiled earlier this year. To accomplish these objectives, the Commission should consider all viable options. This includes a change in classification of broadband, provided that doing so entails a light regulatory touch, with appropriate use of forbearance authority.

Reclassification would mean putting broadband under the same set of rules governing telephone services rather than its current status as a lightly regulated information service. For broadband providers, the option could mean more restrictions on pricing and having to share lines with competing Internet service providers. In the longer term, the lawmakers said that, if there is a need to craft a new telecommunications policy, that Congress will do so.

As previously reported here on Newsline, in April a Federal appeals court ruled that the FCC lacked the legal authority to stop Comcast from blocking online applications for distributing television shows and other large, bandwidth-hogging files. The FCC has since acknowledged the ruling does question its authority over broadband, but it vowed to press ahead. The big players in the industry including such entities as Verizon and Comcast fear reclassification would be overly burdensome and would likely challenge such a move in the courts. (Published news reports)

**

TELECOMMUNICATIONS POLITICS: STUDY SAYS 33% OF ALL AMERICANS LACK BROADBAND

Meantime, the FCC has determined that about one third of all Americans do not have a broadband Internet connection at home. According to a report from the regulatory agency the main barriers to adoption appear to be cost and literacy.

The FCC is working on a plan to deploy nationwide wireless broadband. The usage study titled Broadband Adoption and Usage in America was released at the Brookings Institute. But in the report there appears to be no mention of how many Americans do not want or feel that they have no need for any kind of broadband connectivity. (Telecom News)

**

HAMVENTIONr NEWS: JARL TO ACCEPT IARU REGION 3 AWARD APPLICATIONS

The ARRL reports that representatives from the Japan Amateur Radio League will be attending the Dayton Hamvention and will accepting applications for the International Amateur Radio Union Region 3 Operating Award. The JARL will forward the applications to the New Zealand Association of Radio Transmitters who administers the award. NZART will then send applicants their certificate with any endorsements after Hamvention closes.

To be eligible for this honor, applicants must present a completed application, listing at least seven contacts from entities in IARU Region 3 whose amateur societies are member societies of the International Amateur Radio Union. No QSL cards are necessary, but only QSOs made after April 5, 1982 are eligible.

There are 35 available entities for the International Amateur Radio Union Region 3 Award. Hams who present seven QSOs will be awarded the Basic Award. Hams who present 15 QSOs will be achieve the Silver Endorsement, while those who present 20 QSOs will receive the Gold Endorsement. The award fee is $4 or four International Reply Coupons. (ARRL)

**

THE SOCIAL SCENE: HAM RADIO EXHIBIT OPENS AT EUROPEAN PARLIAMENT

An amateur radio exhibition has opened in the European Parliament. Organized by the IARU Region 1 EUROCOM working group, the display focuses on emergency communications, education and space, with the aim to raise awareness among European politicians of the important role played by radio amateurs.

The new exhibition is sponsored by Mrs. Brigit Sippel. It was opened by IARU Region 1 President, Hans Blondeel Timmerman, PB2T. Photos of the event and further details are available on the IARU Region 1 website at www dot iaru-1 dot org. (IARU)

**

NAMES IN THE NEWS: GI4FUM FUN DXPEDITION TO MOZAMBIQUE

Some names in the news. First up is David Hutchinson, GI4FUM who is also known as 3DA0DJ. He is sponsoring a DXpedition to Bilene, Mozambique this coming October.

Bilene is a costal resort on the Indian Ocean about 150 kilometers north of Maputu. GI4FUM says that he will fly from London's Heathrow Airport to Johannesburg and drive up to Mozambique. He says that plans are to run a station for Jamboree on the Air with local scouts on the weekend of October 16th and 17th and that they will also enter a station for CQWW SSB over the weekend of the 30thth and 31st.

GI4FUM adds that there will be numerous opportunity for individuals to operate under their own C91 callsigns as well as sun bathing on an Indian Ocean beach in late African spring. More information on this fun sounding DX adventure is on line at www.3da0ss.net (Southgate)

**

NAMES IN THE NEWS: DIANA ENG, KC2UHB, DEVELOPS COLLAPSABLE FABRIC YAGI

Designer and electronics enthusiast Diana Eng, KC2UHB, has developed a collapsible fabric Yagi for portable amateur radio satellite operation. In her column in MAKE Magazine she writes that one of her favorite ham

radio activities is making contacts on satellites. She says that it is really fun to know that you're controlling something that's receiving and sending communications from space.

Eng notes that communicating with satellites means carrying a big Yagi antenna around. So she decided to use her fashion sewing skills to make a collapsible fabric Yagi antenna that's much easier to transport.

Eng notes that the actual antenna design is based on the work of engineer and writer Kent Britain, WA5VJB. The difference is the materials used in the final assembly. Thin brass tubing is used for the antenna elements while rolled up cloth doubles as both the boom and as a carrying case for the finished antenna. This makes it easily transportable as well as quick to set up in the field or for classroom satellite demonstrations. Full instructions on how to build one is on line at http://blog.makezine.com/archive/2010/05/collapsible_fabric_yagi_antenna.html (MAKE Magazine)

**

NAMES IN THE NEWS: K7BW TO OPERATE 6 METERS FROM SAN ANDREAS

Dennis Motschenbacher, K7BV will be active as 5J0BV from San Andreas Providencia from June 9th to the 20th. This to once again try and give out this extremely hard to contact location to Europeans on 6 meters. While not as rare in the USA, there still appears to be a large demand for this location world-wide even after Dennis's two previous operations devoted to 6 meters. More on this operation including QSL routing is on-line at tinyurl.com/2unguet (K7BV)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RADIO STRANGE: BROADCAST TRANSMITTER STOLEN WHILE ON THE AIR

Here's a story that may be hard to believe, but its true. The London Daily Record newspaper reports that a broadcast transmitter has been stolen while it was on the air.

The newspaper says that Mike Smith's Log In To Lunch show was being broadcast on Lanarkshire's radio station L107when the airwaves went dead. After investigating the reason behind the sudden silence the station owners found that the transmitter had been taken from the 17th

floor of an office building in the town of Hamilton.

Station managers told the police that the transmitter is about the size of a large refrigerator. Surveillance cameras from the office block show two men pushing it out on a dolly and loading it into a van. A potential audience numbering close to 600,000 listeners may have heard the popular station go off the air.

You can read more at http://tinyurl.com/3ay3492. And you thought these things only happened at remote, isolated hilltop radio sites. (RW)

**

EMERGING TECHNOLOGY: CELLPHONE RADIATION IMPROVES THE THOUGHT PROCESS OF MICE

From the science page comes this interesting story regarding radiation from cellular telephones that claims it can improve your intelligence, but only if you are a mouse.

According to Gary Arendash of the University of South Florida in Tampa and colleagues, research being conducted using mice prone to an animal form of Alzheimer's disease showed that long-term exposure to electromagnetic radiation typical of cell phones slowed and reversed the course of the illness. Moreover, a similar exposure in normal mice for two hours a day over seven to nine months improved their cognitive abilities compared with control specimens.

Arendash and colleagues provided their data in a recent issue of the Journal of Alzheimer's Disease. They also say that the findings provide striking evidence for both protective and disease-reversing effects of long-term exposure to radiation at cell phone level.

But other experts cautioned that the science in the study while mainstream is still in its very early stages. Dr. Alan Lerner is a Neurologist at Case Western Reserve University in Cleveland, Ohio. In a public e-mail he said that the researchers took an an innovative approach to modulating Alzheimer's disease models in mice. but he said it's too early to say whether the finding have any relevance to humans. (Science OnLine)

**

HAM RADIO IN SPACE: SATELLITE LAUNCH DELAY

The launch of two amateur radio satellites, STUDSAT and TIsat-1, on the Indian PSLV-C15 launcher has been postponed until June. The rescheduling of the launch took place after a marginal drop in the pressure in second stage of the vehicle was noticed during the mandatory checks carried out on the launch vehicle. (AMSAT-UK, Southgate)

**

HAM RADIO IN SPACE: NEW AO-51 POWER MANAGEMENT SYSTEM ENABLED

A new power management system has been enabled on the Amsat Oscar 51 ham radio satellite. According to control station Drew Glasbrenner, KO4MA, if everything works right, the repeater should run at 1.01 watt while in sun, and 290 milliwatt while in eclipse and after exiting eclipse until the batteries recover to around 7.9 volts. Observations from the southern hemisphere while entering and leaving eclipse would be very helpful. They can be sent by e-mail to KO4MA (at) amsat dot org. (ANS)

**

HAM RADIO NEAR SPACE: ALIEN-1 HAM BALLOON A BIG SUCCESS

The flight of the ALIEN-1 high altitude balloon package, built by three students at Reading School, in the United Kingdom has proved to be an overwhelming success. According to several sources the 434.075 MHz beacon worked as expected and over 3000 pictures were taken during the flight.

Due to the 434.075 MHz telemetry messages being sent at just 50 baud the
payload could only send down one telemetry string every 15 seconds.

The highest altitude achieved by ALIEN-1 was 33.158km. This is believed the third highest in UK records. Some of the photos taken by ALIEN-1 Pictures on line at http://www.flickr.com/photos/alienhab/ (Southgate, WIA News)

**

ON THE AIR: TAIWAN SPECIAL EVENT STATIONS

On the air, keep an ear open for special event stations 3H100TW, 3T100TW and 3T0TW. All are operational from the capital city of Taipei, Taiwan, through December 31st. QSL's for all three stations should be sent via the BV bureau.

**

ON THE AIR: THE GREAT PATRIOTIC WAR

And if you worked Ukranian special event station EO65JM between May 1st and the 15th you talked to an operator helping to commemorate the 65th anniversary of the victory in the great Patriotic War. The QSL Manager for this event is K2PF.

**

DX

In DX word that TU5KG will soon be fishing again around Crozet and Kerguelen islands. He has secured the callsigns FT5WQ and FT5XT and hopes to become active during shore leaves. No exact dates for his operation or QSL route has yet been announced

PA7JWC poprtable 3B8 is spending his holidays on Mauritius. He will be on the island through May 22nd or there abouts. QSLs via his home call or via Logbook of the World.

K8LJG will be active portable 4 from Amelia Island, Florida in the Florida State North East Group through May 25th. He will be operating on 20 through 10 meters using CW and SSB, on the IOTA frequencies. QSL to John C. Kroll, K8LJG, 3528 Craig Drive, Flint, Michigan, 48506 in the USA.

Lastly, VE3ZZ will be active as VE3ZZ stroke VY2 from Prince Edward Island between July 21st and the 26th. His operation will include an entry in the RSGB Islands on the Air Contest on July 24th and 25th as VY2X. QSL via his home callsign.

(Above from various DX news sources)

**

THAT FINAL ITEM: CONGRATULATIONS TO "BIG JIM" DAVIS W2JKD ON HIS 50 YEAR BROADCAST CAREER

And finally this week, here's a voice that's well known to listeners to this news service. It belongs to a ham who is about to pass a truly important milestone in his career and in his life. Take a listen:

--

Archive audio of W2JKD

--

Yes, that's Amateur Radio Newsline's longtime news anchor Jim Davis, W2JKD. And in just a few short weeks Jim will be celebrating his 50th year as a professional broadcaster both behind the microphone and behind the scenes.

Jim Davis, W2JKD, is a native of Buffalo, New York. He is a second generation and life long broadcaster who followed in the footsteps of his mother who was a singer on WKBW radio. In fact, "Big Jim" as he's known to his many friends began his career on June 19th, 1960 at a small radio station in Cheektowga, New York whose call letters were WNIA. Jim was only 14 at the time but convinced station managers that he was a lot older and went on the air using the name Mac Maguire. The first record he ever played was "Cathy's Clown" by the Everly Brothers. In the five decades he has been on the air, Jim has interviewed numerous politicians, radio, TV and film stars and has played an estimated 600,000 songs.

Over the years Jim has had successful runs at some of the nation's biggest radio stations. These include such well known calls as WOR - FM in New York City; KHJ in Los Angeles; CKLW in the "Motor City" of Detroit and Chicago's famed WLS-AM. While employed by RKO General Broadcasting, Jim was twice nominated for Billboard Magazine's "Major Market Air Personality Of The Year."

In 1981, Jim entered senior management by becoming Vice President and General Manager of Radio Station WVAF in Charleston, West Virginia. Currently, he is Vice President and General Manager for Folrida's Vero Beach Broadcasters, L.L.C. which operates four FM and two AM stations. In December of 2008, and in addition to keeping the radio stations on the air, Jim was appointed Chief Operating Officer of Home Town Cable Plus. This is a company that provides a state-of-the-art fiber-to-the-premises system in Port St. Lucie, Florida delivering High-Speed Internet, Cable TV, Telephone and Security Alarm Monitoring. Jim has also authored a book entitled "The Sales Success Spectrum-A System Of Radio Sales" which is used as a teaching and training manual radio stations.

In his spare time, Jim Davis is a licensed Multi Engine Commercial Instrument rated pilot and owner of a Piper Pathfinder. As a Civil Air Patrol member he has been trained as a Search and Rescue pilot and participates in looking for downed aircraft survivors.

Jim has been an amateur radio operator since age twelve and currently holds an Extra class license. He received a "designated examiner" status from the American Radio Relay League in 1985.

And since the early days of this news service when we were still the Westlink Radio Network, Jim has been an important part of the Newsline family. To many radio amateurs around the world W2JKD is considered as being "the voice" of Amateur Radio Newsline and a person that they have come to rely on for ham radio news since the early 1980's.

So please join us in congratulating Jim Davis, W2JKD, on an astonishing 50 years as a broadcaster who has contributed so mightily to the ongoing success of the radio broadcast industry and for his years of service to amateur radio as well. As Jim would likely be the first to tell you, its all been a truly fun ride. (ARNewsline)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio NewslineT. Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline'sT only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio NewslineT, 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only a week or so to nominate a deserving teen or pre-teen radio amateur for this yearly ham radio honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear

-- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

Amateur Radio Newsline(tm) Report 1710 - May 21 2010

Note: Audio bytes not transcribed. To hear the commentary please download and play the MP3 version of this newscast availble at <http://www.arnewsline.org>http://www.arnewsline.org

Amateur Radio Newsline report number 1710 with a release date of Friday, May 21, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hamvention 2010 is a big hit. We take you there. Also, an I-A-R-U report says that hams saved lives following the April earthquake, Kenya gives its hams expanded privileges on 40 meters and super-capicators my replace batteries in critical uses. Find out the details on Amateur Radio Newsline(tm) report number 1710 coming your way right now.

(Billboard Cart Here)

**

The 2010 Dayton Hamvention is now history and by all accounts this year's event was bigger than last even considering the poor economy, as we hear from Henry Raminsky, Hamventions's Media and Public Relations Chairman&

(AUDIO Raminsky opening morning)

Heil sound's Chip Margelli, K7JA, echoes Henry's observations about the increased attendance at this year's Hamvention.

(AUDIO Margelli)

Henry goes on to tell us that Hamvention is a lot more than just new toys at the vendors and manufacturers inside and everything under the sun outside in the flea market. There's something for just about everyone.

(AUDIO Raminsky balloon and forums)

One of the best attended and most anticipated forums is Friday's Ham Radio and the Law forum. Since 1980 James O'Connell, W9WU, has kept attendees abreast of the latest developments as they relate to covenants and antenna restrictions.

(AUDIO O'Connell 1)

If you're thinking about erecting a tower or large antenna this is one forum you really need to attend.

(AUDIO O'Connell 2)

Of course, it wouldn't be Hamvention without the Amateur Radio Newsline Town Hall Meeting. Several hams, well known and not so well known explained how your ham ticket could open the door to your next job. We'll have more on the Town Hall Meeting next week.

**

HAMVENTION 2010: SOME OF THE NEW GEAR

In addition to the Wouxon dual band hand held we told you about previously, there were a number of other new products of interest to those strolling the display area at the HARA arena. Among them, the long awaited Kenwood TS-590S HF/50MHz All-Mode Transceiver. According to Kenwood, the new radio features a 32-bit floating-point DSP, advanced receiver performance and an extensive range of features that make it ideal for beginner and seasoned DX'er alike. The radio's exceptional ease of operation, true to the Kenwood tradition, will be especially welcome for contest and mobile operations. No firm manufacturers suggested retail price for the TS-590 was announced.

But the TS-590S was not the only new entry from Kenwood. Also displayed was the company's APRS capable TH-D72 144 and 430MHz dual band FM Portable. Kenwood says that thanks to the internal GPS unit, APRS operations will be more enjoyable than ever. The TH-D72 also offers Echolink memory compatibility and a mini-USB connector for enhanced computer connectivity.

On the audio side, here's Bob Heil, K9EID on his new microphone and headset offerings.

(AUDIO Bob Heil)

There was lots more new gear shown at Hamvention 2010. We will cover some of it in upcoming Newsline reports.

RESCUE RADIO: CHINA QUAKE IARU R-1 FINAL REPORT

Hams in China became true first responders following last April's Qinghai earthquake. According to a report on the IA-R-U's Region One website, one Beijing based amateur radio rescue team was responsible for saving the lives of 6 people following the temblor. In its final report on ham radio activities following the 7.1 Richter scale

earthquake that struck on April 14th the I-A-R-U say that amateur radio operators in China were widely involved in the disaster relief activities. The report says that hams traveled from as far away as Beijing, Sichuan, Shandong, Anhui, Qinghai and Jiangsu to provide communications aid.

The quake killed more than 2,000 people and relief efforts are continuing for those left homeless. The high altitude caused 90% of the amateur radio rescue team members to suffer altitude sickness, but no one was injured during their efforts to help others affected by the earthquake disaster.(IARU R-1)

**

RESTRUCURING: KENYA EXPANDS 40 METER PRIVELEGES

The Communications Commission of Kenya has just approved an extension of the amateur radio 40-metre band in that nation. This gives radio amateurs in Kenya the use of the sub-band 7100 to 7200 kHz in the 40 meter band. More is on line at the web link found at <http://www.cck.go.ke/>http://www.cck.go.ke/ (Southgate)

**

RADIO LAW: FCC SEEKS COMMENTS ON SPREAD SPECTRUM NPRM

The FCC says its time for you to voice your opinion on liberalizing the use of spread spectrum in ham radio.

According to the ARRL, in March the FCC released a Notice of Proposed Rulemaking in WT Docket No 10-62 that suggested amending Part 97 to facilitate the use of spread spectrum communications technologies by eliminating the requirement that amateur stations use automatic power control, This, to reduce transmitter power when the station transmits a spread spectrum emission, and reducing the maximum transmitter power output when transmitting a Spread Spectrum signal.

On May 14th , a summary of the NPRM and the Order was published in the Federal Register and the FCC is seeking comments on the NPRM. Comments must be filed on or before June 14th and reply comments must be filed on or before June 28th.

The Commission also attached an Order to the NPRM that makes certain non-substantive revisions to Part 97.

(ARRL)

**

HAM HONORS: CQ ANNOUNCES 2010 HALL OF FAME INDUCTEES

CQ magazine has announced its 2010 Hall of Fame inductees. The 15 new members include some names well known in the hobby. Among these is late ARRL President George S. Wilson who led the ARRL portion of the effort to create the vanity call sign program.

Also being honored this year is the late Gene Harlan, WB9MMM, who was the editor and publisher of ATV Quarterly and founder of Cyberham magazine.

The 2010 inductees to the CQ DX Hall of Fame are writer and DXer Robert Locher, W9KNI, author of the "The Complete DXer" and Lynn Lamb, W4NL who is a co-founder of the Southeastern DX and Contesting Organization. This group sponsors an annual convention featuring well-known speakers on DXing and contesting.

Last but by no means least are Don Hill, AA5AU and Larry Weaver, N6TW who have been inducted into the CQ Contest Hall of Fame. The complete list of this year's inductees can be found on-line at www dot cq dash amateur dash radio dot com. (CQ)

**

RADIO BUSINESS: BELTRONICS TO ABANDON HAM RADIO REPAIR

The Nashua Telegraph reports that Beltronics is ending ham radio repairs because of too much demand.

Until last month, the company had two employees who did part-time repair work on amateur radio gear. When one of those employees retired, company co-owner Dorothy Peabody said, the decision was made to get out of that business because there were more requests for repairs than the one remaining worker could handle.

Dorothy Peabody owns Beltronics with her husband Bernie. She told the newspaper that the desire for repair work is so great that over the past decade Beltronics has repaired radios mailed from as far away as Saudi Arabia, Puerto Rico and South America. The company will now concentrate on its core business of commercial, municipal and ambulance radio systems.

You can read the full Nashua Telegraph story dated Friday, May 14 at <http://www.nashuatelegraph.com/news/738077-196/beltronics-ending-ham-radio-repairs.html>http://www.nashuatelegraph.com/news/738077-196/beltronics-ending-ham-radio-repairs.html (Southgate)

**

TELECOMMUNICATIONS LAW: SUPREME COURT REFUSES CHALLENGE TO MUST CARY RULE

The United States Supreme Court has declined to take up a challenge from a cable television system operator. This, to the FCC's 18 year old requirement that cablecasters carry local broadcast stations on their systems.

On Monday, May 17th the justices rejected an appeal from Cablevision Corporation. Instead the court upheld a federal "Must Carry" law, enacted in 1992.

Cablevision, the nation's fifth-largest cable TV operator, sued the Federal Communications Commission over its ruling that forced Cablevision to carry the signal of a distant home-shopping station on its Long Island cable systems. The federal appeals court in New York had previously upheld the FCC's determination that the cablecaster provide a channel for WRNN, based in the town of Kingston which is about 90 miles north of New York City. The case was assigned the designation Cablevision v. FCC, 09-901

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: KEN MILLER K6IR -S.K

We are very sad to report the passing of 1999 Dayton Radio Amateur of the Year, Kenneth Miller, K6IR, on March 24th.

Ken Millers professional career spanned over four decades in the executive management and development of products in the electronic equipment manufacturing business segment of industry in the United States, Europe and Asia. In his role as an executive with Lear Jet, Motorola, American Standard, Penril, the Singer Company and other well known corporations, K6IR participated in the production and marketing of a broad array of high-tech electronic products including airborne and ground based communications, navigation instrumentation and digital communications devices.

In ham radio, Ken Miller served the Radio Club of America for several years as Chairman of the Grants-in-Aid Committee. The Quarter Century Wireless Association had named K6IR as recipient of its 1995 Distinguished Service Award for his "engineering accomplishments and his leadership of the Radio Club of America Scholarship Program."

(RCA, QCWA)

**

THE CHANGING OF THE GUARD: TWO SOUTH AFRICAN HAMS KILED IN PLANE CRASH

The recent airline accident in Tripoli has claimed the lives of 2 well-known South African amateur radio operators. ?Norbert Taferner, ZS6ANL, his wife Paula and Anton Matthee, ZS6A were killed when the Airbus aircraft they were passengers on crashed.

According to Dennis Green, ZS4BS, Norbert Tafener will be remembered for his years of involvement with the Johannesburg Branch of the South

African Radio League. Although retired, he was still active in teaching and lecturing to young and new amateur radio operators in helping them to obtain their licenses. The Tafener's are survived by one son.

Anton Matthee, ZS6A, lived in Stellenbosch and was a keen off road adventurer, painter and photographer. From reports, he was a truly outgoing person. (Southgate)

**

HAM RADIO IN SPACE: VIETNAM TO LAUNCH HAMSAT

News has been received from XV9AA in Hanoi of a Vietnamese Amateur Radio CubeSat under development. The new bird is designated as F-1. It is expected to be launched by the end of 2010 into a Sun-synchronous, 98 deg inclination low earth orbit.

The satellite F-1 will carry several low-resolution cameras to take photos of the Earth along with temperature and magnetic sensors to study space environment. The satellite will use amateur VHF and UHF frequencies. The IARU has coordinated a downlink frequency of 437.485 MHz to support a 1200 baud AX.25 telemetry link. The F-1 satellite will also transmit a beacon using a modulated Morse code audio signal on FM when it is not in range of the earth station in Hanoi.

More is on line at :
<http://fspace.fsoft.com.vn/>http://fspace.fsoft.com.vn/ (Southgate)

**

HAM RADIO IN SPACE; VIOLET SAT TO LAUNCH IN 2011

And the Violet is an Amateur Radio satellite being built at Cornell University. It will launch in early 2011. This bird is described as a 50 cm cube sat and will carry 4k8 UHF simplex packet links with 5 watts of RF downlink power. It will use a star tracker and fiber optic gyro for fine attitude estimation and propagation.

A submission for frequencies has been made to the IARU Amateur Satellite Frequency Coordination panel for operational frequency assignments. The name Violet is derived from its ultraviolet telescope, which includes flight-spare Deep Impact CCDs. (ANS)

**

HAM RADIO NEAR SPACE: THE ALIEN-1 BALLOON LAUNCH

The flight of ALIEN-1, a high altitude balloon built by three students at Reading School, proved a success. This despite the 50 baud transmission rate of the payload. That meant it could only send down one telemetry string every 15 seconds. As a result it initially looked as though the highest altitude achieved was 33.116km. However, having recovered the payload they got the second-by-second GPS log and this

shows the highest achieved altitude was 33.158km: It is believed this altitude is the third highest in the UKHAS UK records. The 434.075 MHz beacon worked well and some great pictures were taken. (Various)

**

DX

In DX, G7COD has been issued the call sign D2AK and will be operational nearly every day from the capital of the Republic of Angola. This, for the next 12 months while on a work assignment there. His operation will be on 80 to 10 meters, including WARC frequencies, using SSB and CW. QSL via G7COD, direct only to Andrew Kitchen, 4 Dairy Cottage, Newton Hall Farm, Bank Newton, Skipton, North Yorkshire, BD23 3NT, England.

The Dundalk Amateur Radio Society, using the call EI7DAR stroke P will be activating St. Johns Castle, Carlingford, County Louth Ireland on Saturday and Sunday, May 29th and 30th. Full details of the event are on line at www dot ei7dr dot com. Lastly, ZS1HF is now active as ZS8M from Marion Island. He's reportedly been heard on 7.140, 14.250, 18.150 and 21.266 Mhz. He will be on Marion Island for a full year so there will be plenty of time to have a chat. QSL as he directs on the air.

(Above from various DX ews sources)

**

THAT FINAL ITEM: SUPERCAPICITORS MAY REPLACE BATTERIES

And finally this week, failed batteries are a problem that plague both cell-phones and Amateur Radio satellites. But Micro-Super capacitors may provide a solution.

Science Daily reports that Berkeley Lab researcher John Chmiola believes he has found a solution in electrochemical capacitors, which are commonly referred to as "super capacitors." This is because of their higher energy storage densities than conventional dielectric capacitors and higher abuse tolerance than batteries.

In a paper published in the April 23rd issue of the journal Science, titled "Monolithic Carbide-Derived Carbon Films for Micro-Super capacitors," Chmiola and Yury Gogotsi of Drexel University, along with other co-authors, describe a unique new technique for integrating high performance micro-sized super capacitors into a variety of portable electronic devices through common micro-fabrication techniques. They say that this evolving technology could eventually lead to an end to failed batteries in critical equipment including satellites where there is no way to replace a defective battery once the bird has been launched and is on-orbit.

You can Read the full ScienceDaily article 'Is There a Micro-Super capacitor in Your Future?' at

<http://www.sciencedaily.com/releases/2010/04/100426092805.htm>http://www.sciencedaily.com/releases/2010/04/100426092805.htm

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is <mailto:newsline%40arnewsline.org>newsline@arnewsline.org. More information is available at Amateur Radio Newsline's" only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award closes on May 30th. That gives you only a week or so to nominate a deserving teen or pre-teen radio amateur for this yearly ham radio honor.

Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www.arnewsline.org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, back home in Picayune, Mississippi, after enjoying Hamvention 2010. I also say 73 and we thank you for listening.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th-May, through Sunday, 23rd-May there were 216 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4X, 5B, 5N, 5R, 5V, 5W, 5Z, 6W, 6Y, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H2, H3, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J5, J6, J8, JA, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V5, V8, VE, VK, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

6V7, SENEGAL. Operators Silvia/EA1AP, Juanjo/EA1CJ, Alberto/EA1SA and Raul/EA5KA will be active as 6V7W between July 24-31st. The team will try to have three stations on the air at the same time. Activity will be on 160-6 meters using CW, SSB and RTTY. There will be a special emphasis

on the 6 meters band (Grid Locator IK14LL). Suggested frequencies are:
CW - 1824, 3527, 7027, 10117, 14027, 18077, 21027, 24897, 28027 and
50100
SSB - 1840, 3790, 7060, 14190, 18140, 21290, 24940, 28490 and 50110
RTTY - 3590, 7040, 10145, 14085, 18105, 21080, 24920 and 28080 kHz
QSL via EA5KA: Raul Blasco Villarroya, P.O Box 20, 12080 Castellon, Spain.
They plan to have logs online during the operation. Visit the 6V7W Web
page at: http://6v7w.dxciting.com

9H3, MALTA. Markus, OH1MN, will be visiting the island of Malta (IOTA
EU-023, MIA MM-001 and WLOTA LH-1113) between June 19th and July 3rd.
Activity will be holiday style (when time and XYL allows), and he will
be on air as 9H3MK. Operations will be on 80-6 meters using SSB and
the Digital modes. QSL via OH1MN.

9H3, MALTA. A group of Italian operators will be active as 9H3Y between
July 24-31st. No other details were provided, but it seems that they will
be there for the RSGB IOTA Contest (July 24-25th). Operators mentioned
are: Marcello/IT9ABY, Peter/IT9WKU, Delly/IT9ZRU, Antonella/IW9HJT and
possibly others. QSL via IT9ABY, prefered direct and Bureau accepted.

C6, BAHAMAS. Operators Mark/NA6M (C6AMS), Renee/N5BW (C6AMR), Scott/K2CK
(C6ASH), Alan/K5AB (C6AAB) and Carolyne/W5ETY (C6ATY) plan to have some
fun in the sun and activate Eleuthera Island (NA-001) between July 9-25th.
No other details were available, but a Web page is under construction at:
http://www.c6ams.com/index.php

CARIBBEAN TOUR. Operators Andrea/IK1PMR and Claudia/PA3LEO will be active
from two islands between June 8-21st. Their schedule is as follows:
June 8-12th - Sint Maarten; callsign PJ7/IK1PMR and PJ7/PA3LEO
June 12-21st - Anguilla; requested callsigns VP2EMR and VP2ECF
Activity will be holiday style with a focus on 30/17/12 meters using
CW and RTTY. QSL via PA3LEO.

CM, CUBA (NA-015). Frank, CM2IR, informs OPDX that he plans to work on
40 meters mainly (possibly 15 and 10m) on SSB only between now and June
1st. He repaired his antennas and tested it with QSOs. He is especially
looking for Europe, Islands, Asia and African stations. He works with
only 100 watts and plans to stay around 7123 kHz (approx). QSL via his
Manager David, EB7DX. No eQSL or LoTW. PLEASE, ONLY DIRECT. More details
are available at: http://www.qrz.com/db/cm2ir

CT, PORTUGAL (60m). Jose, CT1EEB, reported he has just received authori-
zation for 5 MHz. He can use of 5371.5 and 5403.5 on A1A and J3E for the
months of May, June and July. It is suggested to watch between 2300-0100z.
Jose will use his Kenwood TS-2000 and his 160m band inverted L for the
time being, but if time allows he will put up a 5 MHz antenna.

DAYTON HAMVENTION DX AWARDS. Every year the Southwest Ohio DX Association
(SWODXA) hosts the DX Dinner Banquet and DX Forums at the Dayton Ham-
Vention. They have been doing it for over 25 years. During their banquet,
they present awards for "DXpedition of the Year" and a "Special or

DXpeditioner of the Year". The 2010 awards for this year were presented to: K4M Midway Atoll - DXpedition of the Year
TX3A Chesterfield Island - Special Award
Congratulations to both operations. For more details see SWODXA Blog at: http://swodxa.blogspot.com

DX0, SPRATLY ISLANDS (Update). A Web page is now available online for the 2011 DX0DX DXpedition to (Thitu Island) Pagasa Island (AS-051), Spratly Islands. Activity will take place between January 6-24th, with operations on 160-6 meters (possibly 2m, 70cm, 23cm) using CW, SSB and RTTY. Operators were mentioned in OPDX.959, but bios on the operators are now available on the new Web page. There is also a survey being taken on the page for bands and modes needs. Visit the DX9DX page at: http://www.dx0dx.net

E4, PALESTINE (Update). Just a reminder that the upcoming E4X operation will take place this week between May 28th and June 6th. The operators mentioned are: Antonio/EA5RM (Team Leader), Roberto/EA2RY, Fernando/EA5FX, Manuel/EA7AJR, Jose/EA7KW, Florent/F5CWU, Alain/F6ENO, Bernard/F9IE, Fabrizio/IN3ZNR and Valery/UT7CR. Operations will be on 160-6 meters including 30/17/12 meters using CW, SSB and RTTY with at least 3 stations on the air at the same time on different bands and modes. QSL via EA5RM: Antonio Gonzalez, P.O. Box 930, E-03200 Elche, SPAIN. Remember that a band and mode survey is being taken on their Web page at: http://www.dxfriends.com/e4x/index.php

FH8, MAYOTTE. Lionel, F5PSA/TJ3SL, will be active as FH8ND from Mayotte (AF-027) for three months starting May 23rd. Activity will be on the HF bands using SSB. He usually likes 20 and 17 meters. QSL via F1OKV.

HG30, HUNGARY. Members of MOM Radio Club (HA5KFV) will activate special event station HG30FHA to commemorate the 30th anniversary of the first Hungarian space flight by astronaut Farkas Bertalan. Activity will last until December 31st, 2010. QSL via HA5KFV and by the LoTW.

IOTA NEWS.....
EU-017. Operators Vincenzo/IT9EJP, Sebastiano/IT9ZIR, Dario/IT9ZZO, Filippo/IW9FRB and Ferdinando/IW9HSK will be active from Stromboli Island (IIA ME-016) as ID9/homecall between May 29th and June 2nd. QSL via their home callsigns. More informations can be found at: http://www.iw9frb.it/stromboli

EU-084. Operators Aloys/PA3DAT and Femma/PA3DWK will be active as SM0/PA3DAT from possibly Singo Island between July 23-25th. They will be an entry in the RSGB IOTA Contest (July 24-25th). For more details, see: http://www.pa3dat.nl

EU-103. Operators Bernard/EI4II and Olivier/ON4EI will be active as EJ4II from Saltee Islands between July 23-25th. Activity will be on 160-10 meters using CW and SSB. They also plan to be in the RSGB IOTA Contest (July 24-25th). QSL via EI4II. Details about the Saltee Islands can be found at:

http://users.telenet.be/on5kl/eu103.htm

EU-127. Peter, DF6QC, will be active from Helgoland Island during the RSGB IOTA Contest (July 24-25th) as a 12H/SSB/Low-Power entry. QSL via DF6QC. For more details, see: http://www.df6qc.de

NA-044. Operators Curt/W3HQ and Cliff/KI4IW will be active from Battle Island as VO2/homecall during the RSGB IOTA Contest (July 24-25th) as a 24H/CW and SSB/All-Bands entry. Afterwards, the operators will activate a local lighthouse (name and reference numbers not provided) running QRP on CW on 40/30/20 meters.

NA-151. Operators Gabi/DF9TM, Heiko/DL1RTL, Frank/DL2SWW and Ric/DL2VFR are in the planning stages of an IOTA operation to Tasiilaq/ Ammassalik to take place between October 20-30th. Look for the operators to sign OX/homecall and operate on CW, SSB and RTTY. More details will be forthcoming. They are focused on giving everybody a new IOTA. NA-151 is based on the "most wanted list" as a semi-rare IOTA (25% confirmed). There has not been any larger activity since 2005. The island group was activated mostly on SSB so far. QSL route to be announced later. Website: http://www.iota-expedition.com

SA-071. A team of Brazilian operators will activate Moela Island (WLOTA 1335) between July 2-4th. There will be 1 station for the WLOTA contest using the PS2G callsign and another 2 stations for DX using the PW2K callsign. QSL both callsigns via PY2WAS. The team of 12 operators are: Gerson/PY2AC, Rabelo/PY2AN, Ric/ PY2DEL, Tony/PY2DY, Ric/PY2EL, Ricardo/PY2OE, Walter/PY2IAY, Carlos/PY2VM, Fabio/PY2XM, Julio/PY2XV, Waldir/PY2WC and Alex/PY2WAS. Activity will be on 160-10 meters using CW, SSB, PSK31 and RTTY.

J48/SV8, GREECE (IOTA Op). Laci, HA0HW, will be active as J48HW and SV8/HA0HW from Thassos Island (IOTA: EU-174, GIOTA: NAS-037, MIA: MG-124, WLOTA: LH-4186, QRA: KN20HS) between May 27th and June 7th. He will operate mainly CW, with some SSB, RTTY and PSK31 as well, on the HF bands (mainly on 40/30/20/17 meters) and on 6 meters. He will enter the CQWW WPX CW Contest (May 29-30th) as J48HW. His rigs are a FT-840 with a MOS-FET amplifier and an IC-706 (for 6m only). Antennas are a monoband Gps and dipoles on fishing poles. QSL via his home callsign, direct or by the HA Bureau.

KH0, MARIANA ISLANDS (2011 Op!). JA operators Kirk/WE8A and K8RLY will be active as WE8A/KH0 and K8RLY/KH0 from Northern Mariana Island (OC-086) between March 30th and April 2nd, 2011. Kirt will focus on 80-6 meters including the 30/17/12 meter bands, using CW and SSB, while K8RLY will operate only SSB including the AM mode if requested. QSL ONLY direct to their JA addresses (QRZ.com).

KH5, JARVIS ISLAND (Update). It was announced at the Dayton HamVention that the callsign for the 2010 November operation would be N5E. Also

announced at the DX Forum in Dayton is the Radio Expeditions Inc. new Web page called "DXInsight" that will go online for the DXpedition and will have all kinds of bells and whistles. Stay tuned!

KH6BZF PROPAGATION FORECAST/REPORT (For May 24-30th)....
May 24 AN SOLAR REFERENCE KEYS
May 25 AN --------------------
May 26 AN BN - Below Normal
May 27 AN AN - Above Normal/Geomagnetic Level is QUIET
May 28 AN LN - Low Normal
May 29 AN HN - High Normal/Geomagnetic Level is UNSETTLED
May 30 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

PACIFIC ODYSSEY 2010 TOUR (Update). Members of the Ukrainian DXpeditioners Team (UDXT) announced on May 23rd, that they have left Samoa. They are late leaving 5W-land because of some technical problems. They are currently in the Pacific Ocean sailing towards Central Kiribati which will take two days. Be listening for T31X and T31UR. Activity will be on all bands and modes. The QSL Manager for all Pacific Odyssey callsigns (5W0OX, T31UR, T31X and ZK3X) is UR3HR. QSL direct or by the Bureau. For more information please visit the DXpedition's Web site at:
http://www.uz1hz.com/pacificodyssey.html

PJ2, NETHERLANDS ANTILLES. Operators Rich/K3RWN, Steve/KB3EYY, Larry/AB3ER, Bob/KG3F and Bob/K3RMB will be active as PJ2S during the CQWW DX RTTY Contest (September 25-26th) as a Multi-Single entry. QSL via K3MJW.

PJ2, NETHERLANDS ANTILLES. Jeff, K8ND and possibly others will be active as PJ2/K8ND on Curacao (SA-006, WLOTA LH-0942) between October 8-18th. Activity will probably be on all HF bands using CW and SSB. QSL via K8ND or LoTW.

PJ7, ST. MAARTEN (Change in Plans). Joe, W8GEX, has announced a change in their plans to activate St. Maarten in October. They had planned to operate from St. Eustatius, but have now moved to operate from St. Maarten. All plans are moving ahead very nicely and he is looking forward to another great and fun DXpedition.

5N7M QSL STATUS. Dan, KB0EO, who received an E-mail from Ivan, OM3CGN, reports that he is now in Slovakia. QSL is ready for print and cards will be sent out next week or a litle bit later from the Czech Republic. He states that he will be very busy up to May 28th, but expects to do all direct QSL from his P.O. Box listed on QRZ.com. So, if you are waiting for a card from 5N7M, looks like it's right around the corner.

QSL 9A0GEO via 9A2MF (by the Bureau). Activity took place during this past weekend's Geoparks Communication Weekend. Operators were the founders of Croatian Flora Fauna Program (9A2MF, 9A2WJ, 9A6NDD and 9A6AA).

PIRATE ALERT. Jacky, 3B8CF, Secretary of Mauritius Amateur Radio Society (MARS), inform us that the stations 3B8BOA and/or 3B8/F4BOA are illegal. The real owner, F4BOA, confirms that he was never active from Mauritius.

Javier, LU5FF, reports that he is slowly uploading his QSOs as EA6/LU5FF from Baleares islands, to eQSL and LOTW. Those contacts were logged on paper and there are close to 10,000 QSOs. If you are in a hurry to confirm these QSOs via LOTW or eQSL, you can send him an E-mail request to: lu5ff@yahoo.com.ar
Paper QSLs will be handled only via EA5KB.

QSL LS8YE via EA7FTR. Activity by the Radio Club de los Andes will be on the air until May 25th. Operations are to celebrate the bicentennial of Argentina.

SPECIAL NOTICE. Trent, VK4TI, reports that "QSL Manager Bill Horner, VK4FW, currently has NO InterNet capability, including an E-MAIL address. Therefore, any E-mails will bounce &#65533; We should be operational with a new
ISP within 10 days &#65533; changing over presently. Please forward to other DX Bulletins."

QSL TC3DEU via TA3X. This is a special event station to celebrate the 2nd Electronic Communications Festival at Izmir Dokuz Eylul University (DEU) Vocational High School.

UA4WHX QSL CARD STATUS. According to Vlad, UA4WHX, he is over 70% done on his QSLing of cards. For complete details, see QRZ.com at: http://www.qrz.com/db/UA4WHX

NEW QSL MANAGER. Joey, W5TFW, announced that he is now the new QSL Manager for V44KAI. He states, "I am GOOD in QRZ, PLEASE enclose an SASE with your cards and have a little patience while I get his cards ordered and delivered."

QSLS VIA LoTW: 5R8FU, 5W0OU, C37URE, CN8KD, CX5UR, A31A, DF0DS, DL2OE, DL7BW, DV1JM, E51XIW, EA1EAU, EA5AWC, EA3GHZ, EA5GPC, GW4BKG, HK0TU, I4GAD, I6NO, IK2QPR, IK5ACO, IK8SEU, IT9HLR, IX2KPE, JE1LFX, LA5XGA, LU8EKC, NP2KW, OE1MBB, OE6IMD, OE7FMH, OK1NZJ, P29VKJ, RA3CQ, RK6CK, RU4UR, RX3AGC, SP1MHZ, ST2AR, T77C, TF3SG, TN5SN, TS8P, TX3D, UA4CC, UA4LU/3, VK7XX, VP2MDG, YB1ALL, YJ0MM and ZK3OU

QSLS RECEIVED VIA MAIL: 3V3S, 3Z80PZK, 5R8GZ, 5W0OU, 5W0YA, 6W/GM4FDM, 6Y9V, 8R1PY, 9K2F, 9V1SV, A61BK, A71EL, AP2DKH, BD1ISI, CN8KD, CT9/DL3KWR, E76C, EA1NL, EA1SAL, EA6SA, EJ6DX, FM1HN, GU4CHY, HJ8BCB, HR5/F2JD, HV0A, J28AA, J38XX, K4M, KH6/K3Y, LY2KM, OD5/DL6SN, OE10M, P29VJY, P43JB, PJ6/K4UEE, PY0FF, R1ANB, R1ANR/A, RA9LI/0, S79GM, ST2AR, T30KI, TI7XX, TX4T, V31QS, V63T, VK0/VK5ABN/MM, VK4SWE, VQ9LA, XV2RZ, YN2WW, YS1/W3MKT, Z21BB, Z36T, ZB2FK, ZK3OU, ZK3YA, ZP6CW and ZS6RJ

QSLS RECEIVED VIA THE BUREAU: 2D0NCG, 6W1RY, AO1WAP, CT8K, EA5KV, F4DPT, H2E, LZ01WFF, PT7GLC, RA9AU, SX1L, TA3/LZ1LF, TF/PD9DX, TT8PK, UA9CDV and V25V

SILENT KEYS.....
JT1BH - S. Surenjav, JT1BH, became Silent Key suddenly on May 12th at the age of 58.

HB9TL - Jakob Laib, HB9TL (VK6CTL), became a Silent Key on April 24th, at his 2nd home in Perth, West Australia, leaving his wife Marianne, two sons and a daughter. Jack, as he liked to be called, was licensed in 1956, became a passionate DXer and for many years held the position #23 among the worldwide Honor Roll #1 members. Unforgettable are his early DXpeditions to the Saudi Arabia/Kuwait Neutral Zone (now deleted) where he signed 9K3TL/NZ or together with his friend Erwin, HB9QR to the Cocos-Keeling and Christmas Islands. He was 82 years old.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of JT1BH and HB9TL.

TC3, TURKEY (WFF Op). Members of the Bulgarian (LZ) Fauna Flora Club have organized a WFF expedition to Turkish Nature Reserve Kuscenneti (TAFF-022) • Asiatic part of Turkey, and will be active as TC3WFF between May 26-30th. Activity will be on all bands. Prior to CQWW WPX CW Contest (May 29-30th), operations will be on SSB and the 30/17/12 meter bands. Only during the WPX Contest will you be able to work TC3WFF on 160, 80, 40, 20, 15 and 10 meters CW. QSL via LZ44WFF. More info is available on: http://www.qrz.com/db/lz44wff

TM6, FRANCE (Special Event). Arnault, F4GAJ, will use the special callsign TM6OVE between June 5-19th. Activity is to commemorate the "Overlord Operation" (the code name for the invasion of western Europe during World

War II by Allied forces) on June 6th, 1944. QSL F4GAJ, direct or by the Bureau. For more info on the "Overlord Operation", see Wikipedia at: http://en.wikipedia.org/wiki/Operation_Overlord

UPCOMING CQWW WPX CW CONTEST (May 29-30th) STATIONS.....
4L0A - Operator Andi, UU0JM, from Georgia, will be active as a Single-Op/All-Band/High-Power entry. QSL via LoTW.

B7P - Operators Terry/BA7NQ, Yang/BD7IXG, Shiyu/BD7KSF, Paul/BA7JS and possibly others will be active from China as a Multi-Single entry. QSL via BD7IXG.

EG8GCA - Operator Franky, EA8DA, will be active as a Single-Op/Low-Power entry. QSL via EA8TH. Activity is taking place during a Canary Day Celebration (May 30th) from Gran Canaria Island (AF-004).

KP2B - Operator Jaime, WP3A, will be active from St. Croix, Virgin Island, as a Single-Op/All-Band/Low-Power entry. QSL via EA7FTR.

KP3Z - Operator Felipe, NP4Z, will be active from Puerto Rico as a Single-Op/All-Band/High-Power entry. QSL via N4AO.

LX7I - Operators Andy/HB9CVQ, Will/DF4PD, Chris/DL7CS, Mike/DF3VM, Hubert/DJ8VH and Philippe/LX2A will be active as a Multi-2 entry. QSL via LX2A. Live Webcam is at: http://www.lx2a.com

P49Y - Operator Andy, AE6Y, will once again active as a Single-Op/All-Band/Low-Power entry. QSL via AE6Y.

RW2F - Members of the UA2 Contest Club from Kaliningrad will be active as a Multi-Multi entry. QSL via DK4VW.

V2, ANTIGUA & BARBUDA. After an 11 year absence, Darrell, AB2E, will be returning to activate V26E for the 2010 CQWW WPX CW Contest (May 29-30th) as Single-Op entry. He will possibly be active on the air from Thursday, May 27th through Monday, May 31st. Look for activity to be focused on the 30/17/12 meter bands and lower bands before and after the contest (all on CW). Darrell tells OPDX that "New QSLs will be ordered for the occasion, and all logs will be uploaded to LoTW upon my return." QSL direct via AB2E for any and all operations of V26E from 1993 to present.

V85, BRUNEI. Members of the GEMILANG Radio of Persatuan Gemilang Daerah Tutong will once again will be active on HF band with special callsign V84SGR (new edition of V8GRS) on a Field Day to commemorate the 5th anniversary of the inception of the Association on May 30-31st. The Beach on the Air (BOTA) station will be active on 1000z, May 30th, until 0400z May 31st, at the Seri Kenangan Beach in Tutong. V85SGR will be operating SSB and the Digital modes on 40/30/20/17/15 meters. QSL via V8MVE.

VOACAP GOES ONLINE <http://online.voacap.com>. Jari, OH6BG, informs OPDX: "I am glad to inform that making point-to-point HF propagation predictions is now easier than ever as VOACAP Online has been opened to the public.

The service uses VOACAP (Voice of America Coverage Analysis Program)
which is arguably one of the best HF prediction engines available on the
market today.
VOACAP Online is free to all and makes using VOACAP a no-brainer. Just
enter the coordinates of the transmitter and the receiver, and that's
all. To find the coordinates, you can use the Google Maps based QTH
Locator at: http://www.voacap.com/qth.html
The prediction is given as a 'circuit reliability' graph that shows
the probability of achieving a CW-grade transmission quality between
the transmitter and the receiver.
VOACAP Online is brought to you by Jari Perkiomaki/OH6BG, James Watson/
HZ1JW and Juho Juopperi/OH8GLV."

VP2, MONTSERRAT (NA-103). Graham, M0AEP, will once again activate VP2MDD
between June 14th and July 12th. Activity will be mainly on 6 meters,
but also on HF bands, including 60 meters. He will use a TS480HX into a
Carolina Windom (80-10m [incl. 60m], 5 element Eagle 50 MHz yagi on 18'
boom and a 50 MHz half-wave vertical. QSL via M0AEP, by the Bureau or
direct.

XU7, CAMBODIA. Laurent, F8ATM, will be active as XU7ATM from a Hill Side
View Guest house in Sihanoukville between August 10-17th. Activity will
be on the HF bands using SSB and RTTY. An online log search will be
available at: http://www.clublog.org/logsearch/XU7ATM
QSL via F8ATM, by the Bureau or direct. For direct QSL request, please
include a SAE and sufficient postage (IRC or 2 USDs). All QSOs will be
uploaded to LoTW when he returns to France.

ZS8M, MARION ISLAND (Update). Pierre, ZS1HF, on Marion Island (AF-021),
has been very active on 20 and especially 17 meters this past week.
He has also been reported on 40 and 15 meters. Best times to watch are
between 0630-1000z and various other times. Frequencies he has been on
are: 7140, 14200-14225, 14243, 18150 and 21266 kHz.

Radio News Bulletin
Sunday 23rd May 2010

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 7th July at 2pm in the ComReg Offices in Dublin and at other centres if warranted by the numbers.

Information on examination fees and other details please see 'Theory Examination' in the 'Information' section of the IRTS website at www.irts.ie

Intending candidates are also referred to 'Studying for the Amateur Radio Examination' in the 'Downloads' section of the website.

The latest date for receipt of applications to sit the examination is Wednesday, 23 June next but it is important to note that places at the exam are allocated on a first come first served basis.

Award for Eamon EI9GQ

We were delighted to see that at the recent AGM of the RSGB Eamon EI9GQ was awarded the Ostermeyer Trophy for his series of construction articles in RadCom. We are sure that all who receive RadCom will agree that the award is well merited for the high quality informative articles which he writes. In 2007, the IRTS awarded the Collins Cup to Eamon in recognition of his work through these articles in promoting home construction and the self training aspect of amateur radio.

Pat Conway Cup

There is a nice picture in the June RadCom of IRTS President Paul EI2CA presenting the Pat Conway Cup to Herbie Graham GI6JPO at the recent AGM in Dundalk. The cup was awarded to Herbie in recognition of his work for amateur radio particularly through his active support of the Lough Erne Amateur Radio Club. Herbie is a regular caller to this News bulletin and we always welcome his reports

---

CQ CQ calling news items

As is common through the year we have occasional lulls in news. If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

CASHOTA activation in Co Louth.

Dundalk Amateur Radio Society, will be activating St. Johns Castle, Carlingford, Co Louth. On Sat / Sunday, 29 / 30th May 2010.

WAI squares, EI Counties, and CASHOTA, conditions will be available to stations who call in, operation will be on all HF bands, and on most of the VHF / UHF bands as well. All QSL routes will be catered for.

Call sign of the station will be EI7DAR/P,

The organizers of the Carlingford Oyster Festival have invited the Dundalk ARS to demonstrate Amateur Radio to the public, and there will also be some Tall Ships in Carlingford Lough over the weekend. A good outdoor activity is expected for all the family.

Full details of the event will be available on : www.ei7dar.com and www.cashota-ireland.org/

DAR AGM

All DAR Members are requested to attend the AGM at 8.30pm Wednesday 2nd June at the clubhouse in Dundalk.

Amateur Radio & Hollywood

The sale of KE6PZH's Amateur Radio equipment has been re listed on eBay after not selling in a recent auction. Although listed on the FCC Data base as Martin Brandeaux he would be known more Internationally as Marlon Brando! Also the holder of Callsign FO?GJ , he was also QRV occasionally from his from his private French Polynesian Island.

Extension of amateur radio 40-metre band in Kenya

The Communications Commission of Kenya has just approved the use by radio amateurs in Kenya of the sub-band 7100 kHz to 7200 kHz.

Rallies

Saturday 29th May 2010 Mid Ulster Amateur Radio Club Rally, Drumgor Youth Centre, Drumgor Heights, Craigavon Information: www.muarc.com

For further Rally info and contact details please check out the IRTS Website.

http://www.irts.ie/cgi/rallies.cgi

History this Week

1785 Benjamin Franklin invents bifocal glasses.

1904 Hulsemeyer, Germany, demonstrates his radio detection system (RADAR). Couldn't sell it. Authorities not interested.

1916 Daylight Saving Time introduced in England.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

F5CWU, F6ENO, F9IE, IN3ZNR and UT7CR) will show up as E4X working with
at least three stations simultaneously in CW, SSB and RTTY on 160m-6m
between May 28 and Jun 6. Their QSL manager will be EA5RM.
Updates and more information can be found on their website:
http://www.dxfriends.com/e4x
Following frequencies (in MHz) were announced for E4X:
BAND CW SSB RTTY
6m 50.103 50.103 ---
10m 28.024 28.495 28.080
12m 24.894 24.945 24.920
15m 21.024 21.295 21.080
17m 18.074 18.145 18.100
20m 14.024 14.195 14.080
30m 10.104 --- 10.140
40m 7.004 7.056/7.180 7.035
80m 3.501 3.780 ---
160m 1.824 1.845 ---

EA8 - CANARY ISLANDS, AF-004
Celebrating the anniversary of the local autonomous Parliament's first
session (in 1983) the Canary Islands Day is held every year on May 30.
For this event eight special event stations will be activated from all
inhabited islands of the archipelago on May 29/30:
EG8FTV from Fuerteventura
EG8GCA from Gran Canaria
EG8GOM from La Gomera
EG8GRA from La Graciosa
EG8HIE from El Hierro
EG8LPM from La Palma
EG8LZT from Lanzarote

EG8TFE from Teneriffa
Activities will take place in SSB, CW and digital modes on all bands.
The QSL manager for all callsigns is EA8TH.

FH - MAYOTTE ISLAND, AF-027
Lionel,F5PSL, is working in SSB on 80m-6m signing FH8ND from
Mayotte (AF-027) between May 23 and Aug 15.
QSL direct or via bureau to F1OKV.

PJ2 - NETHERLAND ANTILLES, CURACAO, SA-006
Jim,PJ2/WI9WI (QSL via homecall), is working from Signal Point on
Curacao (SA-006) from May 23 until Jun 2.
He also plans to join the CQ WPX CW Contest as PJ2T (QSL via N9AG).

SV - GREECE, EU-174
Laci,SV8/HA0HW, will be active from Thassos (EU-174, GIOTA: NAS-037,
MIA: MG-124, WLOTA: LH-4186) between May 27 and Jun 7. He prefers
working in CW on the WARC bands, 40m and 6m, but also in SSB/RTTY/PSK31
on all other bands. He will sign J48HW in the WPX CW Contest.
QSL cards should be sent via the HA bureau to his homecall.

TA - TURKEY
Members of the "LZ Flora Fauna Club" (LZ44WFF) will sign TC3WFF from
the Kuscenneti national park (TAFF-022) from May 26-30. They will take
part also in the upcoming WPX CW Contest signing TC3A in the Multi/2
category. They will also work in SSB and on the WARC bands before the
contest. QSLs for both calls via LZ1ZF, NOT via the TA bureau!

TK - CORSICA, EU-014
Some members of the "Valle Brembana DX and Contest Team" (Fabio,IZ2GMT,
Andrea,IZ2AJE, Diego,IW2MZX, Claudio,IK2AOO, and Enzo,IZ2GLU) will be
QRV on 80m-10m signing TK9E from Corsica (EU-014) from May 26-31.
Their QSL manager is IZ2GLU. You can find more information at:
http://www.radioamatori.vallebrembana.org/vbdxc/Spedizioni/Corsica_2010/TK9E.htm

V2 - ANTIGUA AND BARBUDA, NA-100
Darrell,AB2E, is going to be active as V26E from Antigua (NA-100) from
May 27-31. He will also take part in the WPX CW Contest (SOAB). Darrell
will work in CW especially on the WARC and low bands before and after
the contest. QSLs should be sent direct to his homecall or via LoTW.

V3 - BELIZE, NA-073
Mike,VE2XB, is working as V31XB from Caye Caulker (NA-073) in CW/SSB
on all HF bands and 6m between May 25 and Jun 14. QSL via homecall.

V8 - BRUNEI
Several members of the "GEMILANG Radio of Persatuan Gemilang Daerah
Tutong" will activate the special callsign V84SGR during a fieldday on
Seri Kenangan Beach in Tutong on May 30/31. They will work in SSB and
digital modes on 40m/30m/20m/17m/15m. QSLs via V8MVE.

YN - NICARAGUA
Once again Eric,K9GY, is visiting Octavio,YN2N, and will show up in CW

on the WARC bands signing YN2GY from May 27-31. If you want to work him
on the five classic bands listen for him in the CQ WPX CW Contest.
QSLs via bureau, direct or LoTW to his homecall.

ZS8 - MARION AND PRINCE EDWARD ISLAND, AF-021
Pierre,ZS8M, who is working on Marion Island (AF-021) for one year,
was very active during the last week especially on 20m and 17m from
0630-1000 UTC. He has been spotted on following frequencies:
7.140, 14.243, 14.200-14.225, 18.150 and 21.266 MHz.

CHINA, SPECIAL EVENT STATION
The Harbin Institute celebrates its 90th anniversary and the special
event station BT90HIT will be QRV from Jun 1-10. QSL via BY2HIT.

FRANCE, SPECIAL EVENT STATION
The special event station TM24H is working in CW/SSB/PSK/RTTY on HF,
VHF and 6m from the 78th edition of the legendary 24 Hours of Le Mans
between May 30 and Jun 13. Special QSLs will be available as every year
The QSL manager is F6KFI, via bureau is ok.
More information online at: http://www.guillaumefrancoise.fr/TM24H

HUNGARY, SPECIAL EVENT STATION
The special event station HG30FHA celebrates the 30th anniversary of
the first flight of the Hungarian astronaut Farkas Bertalan. The call
is activated by the "MOM Radio Club" (HA5KFV) until Dec 31.
QSL via HA5KFV, LoTW is possible as well.

THE NETHERLANDS, SPECIAL EVENT STATION
Frans,PC2F, will activate the special callsign PC100AR from May 29
until Jun 26. This call stands for 100 years Alfa Romeo. Frans is
collecting everything by Alfa Romeo and so it was clear for him to
activate a special callsign for this anniversary. The QSLs will be
printed after Jun 26 and can be requested via bureau or direct or eQSL.

DXCC: Once again you will have the possibility to use the DXCC field check
at the ARRL booth on the HAM RADIO fair in Friedrichshafen.

SILENT KEY: The wellknown DXer and DXpeditioner Jakob Laib,HB9TL (VK6CTL),
passed away on Apr 24, at the age of 82. Jakob was Honor Roll #1 member
of the DXCC and among others he activated also the neutral zone (mean-
while deleted) in former years.

PIRATE: ZK3T was ative in CW in December 2009 and announced DK8JB as his
QSL manager. After the first QSLs have arrived DK8JB states that he
cannot answer those requests because this wwas the work of a pirate.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

May 29/30: CQ WPX Contest, CW

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-017, IT9, Stromboli: ID9/IT9EJP, ID9/IT9ZIR, ID9/IT9ZZO, ID9/IW9FRB and
ID9/IW9HSK will activate Stromboli (IIA ME-016) in SSB, RTTY and PSK
on 80m-6m from May 29 until Jun 2. QSLs via homecalls (direct/bureau).

EU-028, I, Elba: Paolo,IA5/IK2MLS, will spend his holidays here from May 30
until Jun 4. Expect some activities in holiday style.

EU-124, GW/MW, Welsh Coastal Islands: Adrian,M3TVF, Mark,M0MTT, and
Adrian,MW0ZEN, will sign GB0FHI from Flatholm Island from May 28-31.
QSL via M3TVF.

EU-125, OZ, Jylland West Group: Tom,OZ/DL4VM, is working in CW and PSK on
40m/30m/15m/6m from Fano Island (aka Fanoe, DIA NS-00, OZFF-004) from
May 29 until Jun 12. He will work with 20 watts and a dipole.
QSL via homecall.

Lighthouse activities (WLOTA/ARLHS/ILLW)

GB0FHI LH 0007 Flatholm May 28-31

Following lighthouses were added to the WLOTA list recently:

LH 4627 SM2 Farstuggrunden
LH 2750 DL Tegeler Plate
LH 2751 LA Hornoya
LH 2773 OZ Lolland
LH 2776 YB0-3 Payung Besar
LH 2778 DL Belum. Range Rear

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

May 26, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Ditmania - WPX CW
- WRTC-2010 Competition For the Rest of Us
- Pileup Competition Winners
- Winning Above 50 MHz
- Expanded ARRL Contest Results
- Remotes and RFI - Two New Books
- Fabric Antenna Fun
- Ham Radio Homecoming

NEW HF OPERATORS - THINGS TO DO

If you had a good time with the WPX SSB contest in late March, why not
give its Morse equivalent a try? Everything is exactly the same -
exchange a signal report and serial number. You can enjoy the late
spring DX propagation, too!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Bob W5OV corrected my reference from "goonie birds" to "goonie boxes"
referring to Gonset radios. I guess I fell into that booby trap by
winging it. And I omitted noting that Jim K1TN was the founder of the
DX Bulletin and was its editor from 1979 through 1986, the years of the
set of bulletins donated to the ARRL. Jim sold the newsletter to VP2ML
in 1986, who published another 500 issues before his death in 1999. If
any reader has a set of the VP2ML-published newsletters, the ARRL would
be glad to complete their collection.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

May 29-30
```

- CQ WW WPX Contest--CW
- QRP ARCI Hootowl Sprint--CW (May 30)
- MI QRP Memorial Day CW Sprint (May 31)

June 5-6

- SEANET Contest

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The WRTC-2010 Committee <http://wrtc2010.ru/> has announced a competition for those of us who will be filling the logs of the WRTC-2010 competitors from home. There will special trophies, plaques, T-shirts, and certificates for working the WRTC stations that will be using the distinctive call signs block R30A - R39Z. You'll need to send your log to the committee as soon as the contest is over - that will help to make log checking as thorough as possible. The committee also asks that you be ready to QSY to another band when requested by a WRTC station as that is an important source of QSO points for them!

The Contest Club of Finland (CCF)'s PDF magazine Pileup!, issue 14(2), is now available for downloading <http://www.contestclubfinland.com/CCF/>. The theme of the issue is "Low-Cost Contesting" - a useful and timely subject for the post-Hamvention timeframe! (Thanks, Pileup! Editor, Ilkka OH1WZ)

AMSAT reports in weekly bulletin ANS-136 that on May 17 Japan's Space Agency JAXA plans to launch its Planet-C Venus Climate Orbiter "AKATSUKI" mission to Venus. Also aboard the rocket will be UNITEC-1 <http://sites.google.com/site/unitec1ops/amservice>, a 15 kg, 35cm cubed nano-satellite developed by twenty-two universities and colleges of UNISEC (University Space Engineering Consortium). This will be the first university satellite to pass beyond lunar orbit and they will be depending on amateurs - such as the expert VHF+ contesters - to receive the microwave downlink signals. The team has created an Amateur Radio forum <http://sites.google.com/site/unitec1ops/amservice> that will evolve into a site for the latest information as well as provide a path to upload received data. They'll be using a special version of SPECTRAN software that can be downloaded from Alberto I2PHD's weak-signal operating Web site <http://www.weaksignals.com/>.

Using Internet mapping software enables some pretty interesting applications. Here's a mapper <http://hams.mapmash.com/hammap.php> from KE6UZM for finding the local hams by grid square, Zip code, or call sign. (Thanks, Alan KB7MBI)

Jari OH6BG writes to let us all know that VOACAP (Voice of America Coverage Analysis Program) Online <http://online.voacap.com/> has been opened to the public. VOACAP is a well-known HF propagation prediction program. The online package uses a QTH locator based on Google Maps. The prediction is given as a color-coded "circuit reliability" graph showing the probability of achieving a CW-grade transmission quality between the transmitter and the receiver. VOACAP Online was developed by Jari OH6BG, James KZ1JW, and Juho OH8GLV.

More from the Flying Finns as the soft launch of the new DX Summit <http://www.dxsummit.fi/> was opened to all users on May 15. With additional capacity now in place, the team is seeking new application ideas via a discussion forum with the software gurus of Radio Arcala <http://www.radioarcala.com/>. (Thanks, Jarmo OH2BN)

Don VE3XD informs Contest Update that the Web site for Contest Club Ontario can now be found using the new URL of www.va3cco.com <http://www.va3cco.com/>.

In the 19 May issue of the Daily DX <http://dailydx.com/>, Al WA3GFM describes how to purchase IRCs directly from the USPS Web site <http://www.usps.com/>. On the home page, enter "international reply coupons" in the search window. The first link returned should be page to order IRCs.

Do you know someone whose subscription to this newsletter has suddenly "gone missing"? It may be due to a problem with their ARRL Member Options. Here's an easy way to restore your subscriptions for any ARRL email publication:
1) Log on to the Web site <http://arrl.org/> and click "Edit Your Profile"
2) Click "Edit Email Subscriptions"
3) Clear the ARRL Contest Update check-box
4) Click "Save"
5) Check the ARRL Contest Update check-box
6) Click "Save"

In the "End Of An Era Department", Ken K1EA officially declares CT development for DOS "dead". The required elements to maintain that code are long-gone. A tip of the Contest Update cap acknowledges a program that really did change the world of contesting. Remember your first contest on computer? No more cramped hands and scribbled log sheets. Logs ready for submitting within minutes instead of weeks. Actual scoring during the contest! Technology may have bypassed CT for DOS, but like the first word processor, it seeded the future. Thanks, Ken!

Dayton Hamvention Items

The 30th running of the Kansas City DX Club's CW Pileup Competition <http://www.kcdxclub.com/> was a hit again this year, filling the hospitality suite with cheers and jeers until the wee hours of Sunday morning. When the last of the 99 scores were tallied, the winners were K1VR, K4BAI, W9WI, K1TO and YT6W tied with VE3DZ for fifth. (That should have provoked a refrain of "99 listings of calls on the wall, 99 listings of calls..." but it did not for reasons unclear to your editor.) The call signs used by K0VXU were a historical set based on the 1932-1938 logs of long-time KC DX Club member and recent Silent Key, W0JM. There were some seriously interesting calls in the log!

The two newest CQ Contest Hall of Fame members, Larry Weaver N6TW and Don Hill AA5AU, were formally inducted at the Dayton Contest Dinner, attended by more than 400 from around the world.

Congratulations to these deserving fellows!

The four excellent papers that were presented during the sometimes-standing-room-only Hamvention Antenna Forum are now online <http://www.k3lr.com/> courtesy of K5TR and K8CX. In fact, you can find the Antenna Forum presentations back to 2004 at that Web page. (Thanks, Antenna Forum Coordinator, Tim K3LR)

One of my must-acquire stops was consummated this year as I carted home some of Gerry WB6IVF's chocolate espresso bars. Gerry's company, The Unseen Bean <http://www.theunseenbean.com/>, produces not only great coffee, but a 72% bittersweet chocolate bar with fresh-roasted Malawi coffee, too. Combining ham radio, dark chocolate, and java is a hit in my book!

I'm really enjoying my pair of "graphic novelettes" featuring Dash! The Dog-faced Ham <http://dashtoons.com> by Jeff K1NSS. They capture quite well the heady days of discovering and entering ham radio in ways familiar to many of us and with a modern graphic style.

Hendricks QRP Kits <http://www.qrpkits.com/index.html> had a couple of really nice new transceiver kits available by designers KD1JV (a dual-band kit) and N7VE (a single-bander). These guys really know how to pack the performance of "eight great tomatoes in a tiny, little can!"

Web Site of the Week - How is your personal frequency response? Ken WO1N reports that the High Frequency Response and Hearing Test <http://www.audiodesignline.com/showArticle.jhtml?articleID=224900358> shows that he's "still good up to 13 kHz" and he suggests that such an evaluation "might be of interest to us contesters that frequently punish our hearing for 48 hours at a time."

WORD TO THE WISE

The Right Height - In a Field Day Q&A session at this past week's Contest University, when asked about what power level was appropriate for a competitive Field Day entry, I liked Frank W3LPL's answer far better than mine ("More"). Frank pointed out that even a 100-watt station could make winning numbers of QSOs with an efficient antenna at the right height - plan ahead!

==> SIGHTS AND SOUNDS

By the time this edition has been emailed, QST's "World Above 50 MHz" columnist and Grid Pirates contest team member, Gene W3ZZ, will have presented a Potomac Valley Radio Club <http://www.pvrc.org/> (PVRC) Webinar entitled: "VHF Contesting: What to do and How to Win". You can view this Webinar after the fact by clicking "Recorded Webinars" on the PVRC home page.

What can you do with a used cellular monopole? Why, make it into a sculpture

<http://www.usedtowers.com/MONOPOLE%20ART/MONOPOLE%20ART.htm>, of course! (Thanks, Ralph K9ZO)

The Web site There, I Fixed It <http://thereifixedit.com> should probably be in the Technical Section, but the potential for amusement was just too good. The real question is, "How Many Of These Could Have Been Taken In Your Shack?" Once browsing, plan on a long stay, punctuated by outbursts of laughter, then self-recognition! (Thanks, Jim Foley)

I had a great time at Dayton this year, blogging <http://www.arrl.org/ham-zero-dayton-blog-by-ward-silver-n0ax> away for the ARRL and beating feet through every mile of the hamfest. Thanks to the Hamvention <http://hamvention.com/> staff for putting on another great show - one visible and welcome addition was Rest Stations at strategic intervals in the flea markets. They seemed to be in constant use! Along with the blog photos, I hope you enjoy some of the extra photos in this issue from my Hamvention Holiday!

==> RESULTS AND RECORDS

ARRL Contest Branch Manager, Sean KX9X, reports that the full online package <http://www.arrl.org/contest-results-articles> including log-checking reports (LCRs) is released (or about to be released) for the 2009 160 Meter and 10 Meter contests and the 2010 RTTY Roundup and Jan VHF Sweepstakes up now and 2009 10 Meter contests. Plaques and certificates for the 2009 June VHF QSO Party are out the door on their way to your mailbox. In fact, a new Contest Awards Processing Status <http://www.arrl.org/plaques-and-certificates> page is available on the Web site to keep you up to date.

In IARU HF Championship news, the DARC response to log-padding allegations has been posted on the interim ARRL Contest Branch blog <http://kx9x.wordpress.com/>. The ARRL is continuing to work on this issue.

The online CQ WPX score database <http://www.cqwpx.com/score_db.htm> now includes the complete results from 30 years of the WPX CW Contest (1979 - 2009). Thanks to SP5UAF, LB1G, K1ZR, N5IE, and W4AU for their work to type in the last six years of scores. Enter your call sign into the search box to see your personal results. If you do find an error, send a note to WPX Contest Director, Randy K5ZD <k5zd@cqwpx.com>. While you're there, you should take a peek at the records and participation to get ready for this weekend's WPX CW contest.

Rick K6VVA (a.k.a. "The Locust" for his effect on a station's stock of comestibles) has created a couple of prizes waiting to be claimed for setting the following records during a single NS Ladder <http://www.ncccsprint.com/> event during 2010:

- The Locust X-Prize - for the first operator to score 3,000 points
- The Locust Y-Prize - for the first operator to bag 50 mults

The more we participate, the more reachable those achievements!

For those who took part in the 2009 LZ DX Contest <http://lzdx.bfra.org/results2009en.html>, Wally LZ2CJ reports that the results are now available on-line.

The preliminary results of the January 2010 NAQP CW Contest <http://www.ncjweb.com/naqpcwprelim.php> are now available. Please let NAQP Manager Bruce, WA7BNM <bhorn@hornucopia.com> know as soon as possible of any problems. SSB preliminary results will be posted within a week.

Tack JE1CKA reports that he has uploaded the 2009 JIDX Phone contest results <http://jidx.org/jidx2009ph.html> to the JIDX home page.

OPERATING TIP

Hold Your Fire - If you aren't blessed with an awesome and powerful signal, getting through the pileups quickly takes more than just blasting away. Little Pistols can sometimes pick off their larger caliber competition by holding off a half-second or two before sending their call. While all the other 20-over-9 four-character calls mash themselves into AGC-bending mush, you wait, then slip your call out there in the clear when the Big Noise stops.

==> TECHNICAL TOPICS AND INFORMATION

Two new books <http://www.arrl.org/news/two-new-books-available-from-arrl> of interest to the contest community have been released by the ARRL - WB8IMY's Remote Operating for Amateur Radio and a new edition of the ARRL RFI Book. It's interesting that the first topic (remote stations) is somewhat driven by considerations of the second (RFI). Nevertheless, both supply good information of use to more and more of us every day.

Here's Lynn N7CFO's solution to a common problem -hook-and-loop tape with adhesive that gives up at high-temperatures, leaving a big sticky mess. Coil-n-wrap <http://www.coilnwrap.com/more/hightemp.htm> tape has a high-temperature adhesive that will hold up even on your dashboard in the Texas sun. Rovers may want to give this product a try!

Making SSB intermodulation distortion measurements <http://w4neq.com/pdf/ssb_im.pdf> is addressed in this classic Motorola paper, Engineering Bulletin EB-38 by Helge Granberg. (Thanks, Martin W2RWJ)

Larry N6NC adds a clarification about the suggestion to avoid galling by mixing grades of stainless steel fasteners. "The design and failure strengths of fasteners are calculated assuming the same alloy strength. If you use softer alloy parts with harder alloy parts, you are just asking for trouble as the harder parts under stress will strip out the softer parts before either reaches failure strength." So it may not be a good trade-off (galling vs strength) to mix parts in a high-stress application. In that case, use an anti-sieze compound as recommended

originally.

In case you're a bit of a mathophile, you'll want to browse the new National Institute of Standards "Handbook of Mathematical Functions <http://www.nist.gov/itl/math/math_051110.cfm>". It's freely available online and includes a lot of graphics that the text it replaces couldn't provide.

Here's something you needed to know - the German term for open-wire feed line is "Huehner-Leiter" ("chicken ladder").

The term "Windom" is applied to all sorts of off-center-fed antennas, but how about taking a look at the original? The original article from Loren Windom can be retrieved from the QST archives <http://www.arrl.org/arrl-periodicals-archive-search> in the September 1929 issue of QST (and reprinted in December 1966) and is entitled "Notes on Ethereal Adornments," sub-titled "Practical Design Data for Single-Wire-Fed Hertz Antenna." (Thanks, Paul W9AC)

Gene AD3F reminds us at the beginning of antenna and tower season of the QST article, "Install a House-Bracketed Tower -- The Right Way." It's in the August 1996 issue on page 35 - another plum to be pulled from the QST archives <http://www.arrl.org/arrl-periodicals-archive-search>. Since doing things the wrong way can damage the house, this might be a good read before designing your installation!

Here's an antenna you can roll up and stash between hilltop stops. Take a look at Diana KC2UHB's <http://blog.makezine.com/archive/author/diana_eng/> Make Online how-to article on building a dual-band VHF/UHF Yagi <http://blog.makezine.com/archive/2010/05/collapsible_fabric_yagi_antenna.html> using fabric and Nylon webbing to hold metal rods and tubes in place. The idea is similar to collapsible kites and could easily be extended to a two-element 6 meter Yagi. Diana has published lots of how-to's on the site.

ARRL Handbook contributor, Ron N0IVN, has an article on velocity of propagation published in the March 2010 online issue of Communications Technology <http://www.cable360.net/ct/sections/columns/bullpen/40153.html> magazine.

Tektronix is pretty much synonymous with "oscilloscope". Test equipment aficionados around the world will be pleased to learn of the Tektronix Museum <http://vintagetek.org/>. One of the founders is long-time contester, Stan W7NI, who has amassed a second-to-none collection of Tektronix equipment. Check out this interview <http://www.opb.org/programs/oregonexperience/programs/29-The-Spirit-of-Tek/video_galleries/9> with Stan! (Thanks, Tree N6TR)

Chip K7JA notes that Lubriplate low-temperature grease is outstanding for re-lubricating rotators if their bearings have seized up because the grease has lost viscosity in very cold weather.

Technical Web Site of the Week - Happy 50th Birthday to the LASER <http://www.press.uchicago.edu/Misc/Chicago/284158_townes.html>! What was once a lab-only device now costs nearly nothing and appears nearly everywhere. Zap!

==> CONVERSATION

Ham Radio Homecoming

Beginning with the 2010 ARRL November Sweepstakes, the prohibition against alumni operating at a School Club station has been repealed! The goal is to get more school clubs active for Sweepstakes and on HF. Sweepstakes is just a little over five months away - the first and third weekends of November! What are your plans? Wouldn't it be nice to hear the call sign of your alma mater ringing out in the middle of the Sweepstakes exchange? Sure it would!

Entering Sweepstakes in the Multioperator category was once a staple of the fall semester's competitive atmosphere, but many high-school and collegiate clubs have fallen silent or nearly so over the past decades. Your school club might be interested in hosting an alumnus or two - why not contact them? If the club station has been inactive in recent years, this would be a good way to help get activity jump-started again. To get the juices flowing, challenge a nearby club or try to beat a score from days gone by.

If you want to help put the S back in SS, the station must be on-campus or on University property. If no such station is available, a local station may be used this year with the approval of the club trustee. Otherwise, there are no limits on alumni participation. Take advantage of a wonderful opportunity to help with a work party or string up some antennas. You can have fun and be a contesting Elmer at the same time - the goal of the rule change. Make it a priority to involve as many of the club members as possible, not to create the Alumni Nostalgia QSO Party.

Check out the School Club records <http://www.arrl.org/contest-records> on the ARRL Contest Branch Web page. There might be some "low-hanging fruit" to be picked...for a while, that is. While you're working up a plan, check out WM5R's Collegiate Championship <http://www.collegiatechampionship.org/> Web page and two-contest scoring system. If you are really motivated, the ARRL Contest Branch is looking for a volunteer to go through the records for the Multioperator and School Club categories and organize them by NCAA and NAIA Conferences. What is the NCAA Big Ten record for CW SS? How about the NAIA Sunrise Conference record for SS Phone?

The energy and goodwill of alumni across the US and Canada can help return vitality to a category that should be a hotbed of activity in the November Sweepstakes. Why not contact your club and see if there is

an opening in Sweepstakes 101? For more information and questions about participating, contact Sweepstakes Manager, Dan Street K1TO <k1to@arrl.net> or ARRL Contest Branch manager, Sean Kutzko KX9X. <kx9x@arrl.org>

==> CONTESTS

26 May through 8 June 2010

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CQ WW WPX Contest--CW, from May 29, 0000Z to May 30, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Jun 27. Rules <http://www.cqwpx.com/>

QRP ARCI Hootowl Sprint--CW, from May 30, 8 PM to May 30, Midnight. Bands (MHz): 3.5-28. Exchange: RST, S/P/C QRP number or power. Logs due: Jun 30. Rules <http://www.qrparci.org/>

MI QRP Memorial Day CW Sprint--CW, from May 31, 2300Z to Jun 1, 0300Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, MI QRP number or power. Logs due: 30 days. Rules <http://www.miqrp.org/>

SEANET Contest--Phone, CW, Digital, from Jun 5, 1200Z to Jun 6, 1200Z. Bands (MHz): 3.5-28. Frequencies (MHz): CW--3.525, 7.025, 14.025, 21.025, 28.025; SSB--3.540/3.790, 7.090, 14.320, 21.320, 28.320. Exchange: RS(T), serial. Logs due: Jul 31. Rules <http://www.sabah.net.my/seanet/the_contest.htm>

VHF+ CONTESTS

No VHF+ contests are scheduled.

==> LOG DUE DATES

26 May through 8 June 2010

May 26 - Helvetia Contest, email logs to: contest@uska.ch, paper logs and diskettes to: Dominik Bugmann, HB9CZF, Im Geeren 27a, 8112 Otelfingen, Switzerland. Rules <http://www.uska.ch/typo/fileadmin/download/Contest/KW/1-static/KW-Contest_english_2010.pdf>

May 27 - RSGB 80m Club Championship, CW, upload log at: http://www.rsgbcc.org/cgi-bin/hfenter.pl, paper logs and diskettes to: (none). Rules <http://www.rsgbcc.org/hf/rules/2010/r80mcc.shtml>

May 27 - QRP Minimal Art Session, email logs to: mas@qrpcc.de, paper logs and diskettes to: DL1RNN, Lutz Gutheil, Bergstrasse 17, D-38446 Wolfsburg, Germany. Rules

<http://www.qrpcc.de/contestrules/mas/qrpmasr-e.html>

May 29 - Portuguese Navy Day Contest, email logs to: contest@nra.pt, paper logs and diskettes to: (none). Rules http://www.nra.pt/regulations.html

May 29 - VK/Trans-Tasman 80m Contest, Phone, email logs to: VK: vktasman@hotmail.com, ZL: vktasman@robglassey.com, paper logs and diskettes to: VK:, VK/trans-Tasman Contest, 28 Crampton Crescent, Rosanna, VIC 3084, Australia, , ZL:, VK/trans-Tasman Contest, P.O. Box 21-363, Christchurch 8143, New Zealand. Rules <http://home.iprimus.com.au/vktasman/RULES.HTM>

May 30 - International Vintage Contest HF, email logs to: iv3ehh@iv3ehh.it, paper logs and diskettes to: (none). Rules <http://www.beepworld.it/members/contestvintage/rules.htm>

May 31 - MIE 33 Contest, email logs to: je2mde@jarl.com, paper logs and diskettes to: JARL Mie Branch, c/o H. Masuda, 750-30 Kanonjicho, Tsu, Mie 514-0062, Japan. Rules <http://www.ztv.ne.jp/isoda/33/annual/33/33rule-e.html>

May 31 - Holyland DX Contest, email logs to: 4Z4KX@iarc.org, paper logs and diskettes to: Contest Manager 4Z4KX, Israel Amateur Radio Club, Box 17600, Tel Aviv 61176, Israel. Rules <http://www.iarc.org/?page_id=983>

May 31 - Nebraska QSO Party, email logs to: nqp@hdxa.net, paper logs and diskettes to: HDXA NQP, P.O. Box 375, Elkhorn, NE 68022-0375, USA. Rules <http://www.hdxa.net/neqso/neqso.htm>

May 31 - Montana QSO Party, email logs to: normsclassicradio@yahoo.com, paper logs and diskettes to: Norm Palin K7NCR, 68 Silver Leaf Drive, Kalispell, MT 59901, USA. Rules <http://www.fvarc.org/?q=node/77>

May 31 - JIDX CW Contest, email logs to: cw@jidx.org, paper logs and diskettes to: JIDX CW Contest, c/o Five-Nine Magazine, P.O. Box 59, Kamata, Tokyo 144-8691, Japan. Rules <http://www.jidx.org/jidxrule-e.html>

May 31 - AGCW QRP/QRP Party, email logs to: qrp-party@agcw.de, paper logs and diskettes to: Manager, Jo (Juergen) Mertens, DJ4EY, Am Muehlenbruch 32, D-59581 Warstein, Germany. Rules <http://www.agcw.org/en/?Contests:QRP-QRP-Party>

May 31 - MARAC CW QSO Party, email logs to: ka3qlf@comcast.net, paper logs and diskettes to: KA3QLF, Scott Petty, 2063 N. Turnpike Rd., Dalton, PA 18414, USA. Rules <http://marac.org/cwrules.htm>

May 31 - MARAC SSB QSO Party, email logs to: ka3qlf@comcast.net, paper logs and diskettes to: KA3QLF, Scott Petty, 2063 N. Turnpike Rd., Dalton, PA 18414, USA. Rules http://marac.org/ssbrules.htm

June 1 - Feld Hell Sprint, email logs to: (none), post log summary at: http://sites.google.com/site/feldhellclub/Home/contests, paper logs and

diskettes to: (none). Rules
<http://sites.google.com/site/feldhellclub/Home/contests>

June 1 - New England QSO Party, email logs to: logs@neqp.org, paper
logs and diskettes to: NEQP, PO Box J, West Suffield, CT 06093, USA.
Rules <http://www.neqp.org/rules.html>

June 1 - ARI International DX Contest, email logs to:
aricontest@kkn.net, paper logs and diskettes to: ARI Contest Manager,
c/o ARI, Via Scarlatti 31, 20124 Milano, Italy. Rules
<http://www.associazioneradioamatoritaliani.it/images/stories/filespdf/ARIDX2009rules.pdf>

June 1 - QRP to the Field, email logs to: na5n@zianet.com, paper logs
and diskettes to: Paul Harden, NA5N, QRPTTF 2008, P.O. Box 757,
Socorro, NM 87801, USA. Rules
<http://www.zianet.com/qrp/QRPTTF/ttf.html>

June 4 - Portuguese Navy Day Contest, Digital, email logs to:

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** SPORADIC E Saison 2010, 23 may **

Great Sporadic E today! The first QSO's were reported at 12:36 GMT
and the last at 17:56 GMT. Sofar, we received 81 logs with the total
of 1249 QSO's. Best DX reported was a QSO between USoGB (KN67UA) and
EA9IB (IM85NG) over 3292 km. Have a look at:
http://www.mmmonvhf.de/es.php?year=2010&month=05&day=23
As well next days, every day an opening occured...
In case of an Sporadic E opening please send your report to us:

** Meteor observations by IAP OSWIN / SKiYMET systems **

The VHF-MST radar OSWIN (JO54) operated by the Leibniz-Institute of
Atmospheric Physics Kï¿½hlungsborn (IAP) has been recently switched
to summer mode. The radar is now used exclusively to probe the
mesosphere/LT (~ 78-115km height) and troposphere. This means for
this period OSWIN is not used for any meteor trail observation and
hence NO meteor occurrence rates or distributions are shown on the
website. Alternatively I hardly recommend to have a look to the
SKiYMET systems in JO64 operated by IAP as they are superior to
OSWIN measurements regarding meteor observations. Read more and
in detail (with some LINKS abt the Systems) at the MMMonVHF FORUM:
www.mmmonvhf.de/minibb/index.php?action=vthread&forum=10&topic=105#msg292

BV2A (PL05SH) activities on 144 MHz EME
LATEST NEWS from BW/DL3OCH, dated 2010-05-24: Hi fellows, as I said we wanted to try some EME. I saw the equipment over here for the first time and I must say that they have a very good base for further activities. On Saturday night we did 11 QSOs.There were quite a lot others that I decoded but didnt QSO. There was alot of QSB. Signals went from -24dB down to nothing.
This time we used 350W on a 17ele. Unfortunately we didnt have a PreAmp so the effect of about 20m (if not 30m, I didnt measure...) cable was definately present. My reports were very similar to what I remember from my previous Dxpeditions so I think it doesnt work so bad. We had to take everything down on Sunday around noon. There was bad weather coming and we also still had to drive home. So, there was not much activity on Sunday afternoon anymore. I tried to use the 2x8ele for EME but didnt copy anything and nobody copied me I dont know what was wrong there. With all that said, I am happy that I could show some EME over here. We will definately be back soon (maybe already in June) for further and improved activity on 2m. 70cm and 23cm will follow later. There is no equipment yet here but I might have to go for a few weeks back to Switzerland in August I then will bring the transverter for 23cm and maybe antenna and Amplifier for 70cm. For those who worked us already, you may request your QSL via Bruce, BV2KI. By the way, we did not just set every thing up for 11 EME QSOs. This was only one part of the activity. Over here were excellent conditions on 6m and 2m tropo to JA and BY. We did more than 600QSOs on this one day activity. Last but not least I want to thank all friends over here that worked so hard for this short activity. Its really great fun to work with these ent-husiastic guys. 73 de Bodo

** W1W 6M Grid Activator FN51AW **

The Special Event Station W1W will be active June 20th till June 26th from rare FN51AW. Operators Walter W1ATV and Dave KE1AV. We will be operating from Paines Campground in South Wellfleet, MA. QSL INFO: Direct to W1ATV w/sase any donations received will go towards the printing of a nice Special Event QSL card. Cards will be printed after returning home. Please allow a least two months for printing and mailing. Contact Info: Grid ONLY- Thank You
SOURCE: tnx to Andy, N8OFS, direct to MMMonVHF

** U.S.A. - 26YRS ACJR RAILROADS - N8OFS/P - EN91OR **

Andy, N8OFS will be N8OFS/p (Caboose) for the ARRL June VHF Contest (12-14th June) from Grid Locator EN91OR. Counts for Railroad Depots On The Air (RRDOTA); AC&J Railroad, Jefferson, Ohio, (reference OH -0001). Running Kenwood TS-60, 90W and PAR OA-50 Loop at around 30ft There will be only one frequency used, 50.225 USB from 1800z-2200z both days, hunt and pounce outside that window. QSL info: eQSL preferred (send to N8OFS/P), direct is OK (send to N8OFS/P) to either address listed on QRZ.com. This operation is also to help

celebrate the AC&J (ACJR) Railroads 26th Aniversary.
SOURCE: tnx to Andy, N8OFS, direct to MMMonVHF

** ID9 / IOTA **

Look for ID9/IT9EJP, ID9/IT9ZIR, ID9/IT9ZZO, ID9/IW9FRB and
ID9/IW9HSK to be active from Stromboli Island (EU-017, IIA
ME-016) They will be active from Stromboli Island between 29 May
and 2 June. They will operate SSB, RTTY and BPSK on 80-6 metres
QSL via home calls, direct or bureau.
SOURCE: [TNX IT9EJW] via [425ENG] 425 DX News #994

** GW / IOTA **

Adrian/M3TVF, Mark/M0MTT and Adrian/MW0ZEN will be active as GB0FHI
from Flat Holm Island (EU-124) on 29 and 30 May. They will be QRV
from 10am to midnight each day. Expect them to operate SSB on 80,
40 and 20 metres, plus 2m SSB and FM. QSL via M3TVF.
SOURCE: [TNX rsgbiota.org] via [425ENG] 425 DX News #994

** FH8ND qrv from Mayotte **

Lionel, F5PSL will be active as FH8ND from Mayotte (AF-027) from
23 May until 15 August. He plans to operate SSB on 80-6 metres
QSL via F1OKV, direct or bureau.
SOURCE: [TNX The Daily DX] via [425ENG] 425 DX News #994

** Western Mongolia qv HF/50 MHz **

Look for JT0YAB (UA9YAB), JT0YW (RW9YW) and JT0YPS (UA9YPS)
to be active from Lake Khoton, Altai Tavan Bogd National Park
(western Mongolia) on 3-8 June. They plan to operate on all
bands and modes with two stations and special attention for
6 metres. QSL via home calls (direct only) and LoTW.
SOURCE: [TNX UA9YAB] via [425ENG] 425 DX News #994

** The Gambia (C5) in the air on HF and 6m in a few weeks **

A group of us will be active from The Gambia (C5) in a few weeks
arriving 25 June and departing 6 July, with the usual focus on 6m
We will be operating from what should be an excellent location on
the beach, so we hope to make many QSO's. Look for us on 50.103.
Our callsign is still pending and I'm not sure yet about internet
access -- more details as they become available. 73, Arliss W7XU
SOURCE: Arliss ,W7XU, direct to MMMonVHF

** Sudan, ST **

Arne SM7AED has found the following report from ST2AR -and added
the comment, What an operator! (Well is hard not to agree e.d.
OZ6OM) 24 May 2010 - 6 meters. What an opening on 6 meters last
night!!! 400 CW and over 200 SSB QSOs in merely three and a half
hours! This time the path was much broader, ranging from UR/UX all
the way to F and UK. But only one EA and no CTs worked, although I

tried to play around with the antenna. Signals on my side were extremely strong especially from SP, S5 and UX/UR, and at one point I could not work anything else but Italy. Generally, one can see a nearly instant propagation shift all the way from Southern EU into the northern areas (PA, DL, ON), and in the next few minutes UK was ï¿½beatingï¿½ the rest. Amazing! 24 May 2010
SOURCE: CQ Six - 50 MHz DX News #20100526

** DX0DX DXpedition to Spratly Islands in January 2011 **

A Web page is now available online for the 2011 DX0DX DXpedition to Spratly Islands. Activity will take place between January 6-24th with operations on 160-6 meters (possibly 2m, 70cm, 23cm) using CW, SSB and RTTY. Operators were mentioned in OPDX.959, but bios on the operators are now available on the new Web page. There is also a survey being taken on the page for bands and modes needs. Visit the DX9DX page at: http://www.dx0dx.net - SOURCE: OPDX Bulletin #960

VK4 SILENT KEYS @ 2009 - 2010 QAC YEAR

Bernie Leech (ex vk4bel) 13/05/2010 Advised by Vk4jdf John.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I'm applauding
100yrs of growth.

This weekend, as we have heard, marks the centenary of organised amateur
radio in the land down under. With technology tours, ARISS contact and formal
recognition of the history by the WIA at its Canberra meeting, we all have
been privileged to participate in something both historic and ceremonial.

Live broadcasts are taken for granted these days, in a news hungry world, but
we don't often have the pleasure of such an activity on the amateur bands.

The fact that the radio amateur participates in a practice which incorporates
so much in the wide, wide world from radio astronomy and space communications
to the comfort of the musical and broadcast programs we have in our homes and

with which we travel, seems to take us from vicarious pleasure to the sense of participation and immediacy that few other hobbies can.

To all those people who have made the effort to promote this first 100 years of the hobby, I say thank you. As the year goes on and the voices of VK100WIA move around the country, let us all reflect and enjoy this year; this is the year for amateur radio in VKland, for all amateurs.

In remembering the past we must now ask "where to in the future?"

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING -

GOLD COAST AMATEUR RADIO SOCIETY
http://www.goldcoastamateurradio.com
IRLP Node 6702

There will be a Annual General Meeting at the Club Rooms 85 Harper St., Nerang at 10.am on Saturday 19th June. Look for as many members as possible to attend this meeting.

(Kaye VK4VKS)

Ipswich and District Radio Club

Allan VK4FABR on behalf of Ipswich and District Radio Club president Mike VK4QS, members and friends.

We invite you to come and join some interclub radio fellowship at the "interclub BBQ & boot sale" Sunday June 6 from 10.30am.

We'll have a BBQ sausage sizzle, BYO steak if you like. The venue is our clubhouse 10 Deebing Street, Ipswich

Come and enjoy a great day on June 6th. Bring whatever radio gear you have for sale. The car boot sale will be in the car park next door to the club.

We are also hoping to have a fox hunt on the day. For more information visit the club website www.ipswichdistrictradioclub.webnode.com

RSVP by May 30 to
empire1915@optusnet.com.au

or phone Mike VK4QS - 07 3282 9539

Noosa Century Bike Ride
SCARC provided safety comunications for the recent USM events Noosa Century bike ride on Sunday 23 May. The bike ride consisted of 2 courses, a 100km and a 160km course that included some mountainous terrain to test the bike riders. The course ran from Noosa out to Pomona and Bellie creek then across to Yandina, Bli Bli and finally up the coast. Operators also

came from Gympie Communications and Electronics group and Caboolture ARC.
The lead vehicles and one of the SAG cars had APRS
trackers fitted as a trial. Due to the terrain there were a few black spots
that even a temporary digipeater couldn't help. Next year will be better and
the event organisers have already booked SCARC for next year.

Well done to all that helped.

Global SET
SCARC was the VK representative for the recent Global Simulated
Emergency Test. Conditions were not the best however messages were
passed to YB0Z in Indonesia and also relayed for ZK6R. The club has
particpated 3 times in this event and is well served by the experience
of Bill VK4WB and Wayne VK4WS

Until next time, this is Gordon VK4VP.

TOWNSVILLE

GREETINGS ! THIS IS DON VK4FNQA, WITH NEWS FROM
THE CAPITAL OF NORTH QUEENSLAND, TOWNSVILLE !

THE FAR NORTH AND NORTH QUEENSLAND AMATEUR
RADIO GATHERING IS NOW ONLY TWO WEEKS AWAY.

DURING NEXT SUNDAYS NEWS TRANSMISSION I WILL
GIVE YOU AN UPDATE ON THINGS THAT WILL BE
HAPPENING....
MEANTIME IT IS GENTLE REMINDER TIME...
SO GET CRACKING AND ARRANGE YOUR ACCOMMODATION
AS IT IS ALL RUNNING OUT FAST !
RING RECEPTION AT THE PARK RIGHT NOW ON 1800 005633
AND BOOK IN FROM FRIDAY 11TH TO MONDAY 14TH JUNE.
I HOPE TO SEE YOU WHERE >>> 'CARDWELL BY THE SEA'...
OF COURSE!

AS THIS SPECIAL EDITION OF QNEWS GOES TO AIR, SOME
RADIO OPERATORS ARE OUT ON THE MOUNT STUART ROAD
PROVIDING TIME CONTROL COMMUNICATIONS SUPPORT
PLUS SOME CIRCUIT MARSHALL, TIME KEEPING AND
SAFETY COMMUNICATIONS SUPPORT. IT IS ALL FOR THE
SECOND ROUND OF THE KING OF THE HILL AUTOSPORTS
HILLCLIMB.
THE OPERATORS HAVE BEEN ON SITE SINCE SEVEN THIRTY
A.M. AND COMPETITION STARTED AT NINE A.M.
THAT FREE AUTOSPORTS BURGER IS LOOKING REALLY
GOOD AT LUNCHTIME AND THE OPERATORS SHOULD
COMPLETE OPERATIONS BY FOUR P.M. THIS AFTERNOON.

NOW THE TARC COMMUNICATIONS SUPPORT
CO-ORDINATOR IS ASKING THAT ANY HAMS NOT GOING
TO CARDWELL ON THE JUNE LONG WEEKEND PLEASE
CONSIDER HELPING OUT WITH THE TOWNSVILLE TARMAC
RALLY.
GAVIN VK4ZZ IS DESPERATELY SHORT OF OPERATORS
NEEDED TO PROVIDE COMMUNICATIONS SUPPORT FOR
THE SATURDAY EVENT WHICH IS BEING HELD ON PART
OF THE VEE EIGHT RACETRACK AT REID PARK, AND
ALSO FOR THE SUNDAY EVENT WHICH IS BEING HELD
ON THE MOUNT STUART ROAD.
PLEASE CONTACT GAVIN ON MOBILE 0427182469 OR
TELEPHONE 47791161 IF YOU CAN HELP OUT.

NOW, AS THE NEWS DRAWS TO A CLOSE HERE IS A
REMINDER THAT THE TARC MANAGEMENT MEETING IS
HAPPENING THIS TUESDAY EVENING, JUNE FIRST, AT
THE CLUB ROOMS ON TOP OF SES HEADQUARTERS,
GREEN STREET WEST END FROM SEVEN THIRTY P.M.
ALL ARE WELCOME TO ATTEND AND PLEASE BRING
SOMETHING FOR THE SHOW AND TELL SESSION.

SO, THAT IS THE NEWS THAT IS QNEWS FOR THIS
SUNDAY THIRTIETH OF MAY....

THIS HAS BEEN DON VK4FNQA IN TROPICAL
PARADISE FOR THE TOWNSVILLE AMATEUR RADIO
CLUB INC, AND YOU HAVE BEEN LISTENING TO,
AND ENJOYING QNEWS FROM VK4WIA..

SPECIAL INTEREST GROUP NEWS

VK4 AREA SPECIAL INTEREST GROUPS --- VHF

Microwave amateur radio in the greater Brisbane area.

Sunday the 6th of June, just a week away, the Brisbane VHF Group is
arranging the day to show off the excellent aspects and fun of amateur
radio at microwave frequencies.

To optimise accessibility, this event will be run from several public
locations in the greater Brisbane area (weather permitting). From these
sites, individual amateurs will be making contact with other portable
and/or home stations. Frequencies in use will be 1296 MHz, 2403 MHz,
3400 MHz 10.3 GHz, 24 GHz and 47 GHz (but not all these at all locations!)

This will be on Sunday the 6th of June through a nominal time period of

10:00 a.m. to 2:00 p.m. One central location on the southside is Mount

Gravatt. Locations to the North and West of Brisbane will be used but
the exact locations have not yet been decided. Listen to next week's
News or contact club president Doug, VK4OE, on 3391 5526 or at
uwaves@bigpond.com

All other amateurs and interested folk are invited to come along and see
microwave amateur radio in action!

==> + FCC NEWS: BILL CROSS, W3TN, PRESENTS FCC FORUM AT 2010 DAYTON HAMVENTION®

Bill Cross, W3TN, a staff member in the FCC's Mobility Division -- part of the Wireless Telecommunications Bureau <http://wireless.fcc.gov/> -- spoke at the FCC Forum on Saturday morning at the 2010 Dayton Hamvention <http://www.hamvention.org/>®. Billed by the Hamvention's Forum Committee as more of an emergency communications discussion, Cross discussed this and other matters -- such as FCC proceedings regarding vanity and club call signs, 60 meters and power limits for spread-spectrum users, -- as well as the FCC's National Broadband Plan (NBP <http://download.broadband.gov/plan/national-broadband-plan.pdf>). The

FCC's Mobility Division handles the day-to-day administration of the Amateur Service, along with some of the rulemaking activities that affect Amateur Radio. The Division has staff members in Washington, DC and Gettysburg, Pennsylvania. The Gettysburg staff deals with most of the Amateur Radio applications and licensing matters, as well as the Universal Licensing System (ULS <http://wireless.fcc.gov/uls/index.htm?job=home>). Read more here <http://www.arrl.org/news/bill-cross-w3tn-presents-fcc-forum-at-2010-dayton-hamvention>.

==> + FCC NEWS: FCC UPHOLDS DECISION TO REVOKE AMATEUR LICENSE OF CONVICTED INDIANA HAM

Lonnie L. Keeney, KB9RFO, of Greencastle, Indiana, filed a Petition for Reconsideration <http://fjallfoss.fcc.gov/ecfs/document/view?id=7020382453> in March 2010, asking that the FCC re-evaluate the revocation of his Amateur Radio license <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-456A1.pdf>. Keeney -- who in 2002 was convicted of child molestation, a Class C felony -- was found by the FCC in February 2010 to be "lack[ing] the requisite character qualifications to be and remain a Commission licensee." Keeney appealed the decision, and on May 24, the FCC denied his Petition via an Order on Reconsideration <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-916A1.pdf>, affirming the revocation of his Amateur Radio license. Read more here <http://www.arrl.org/news/fcc-upholds-decision-to-revoke-amateur-license-of-convicted-indiana-ham>.

==> + ARRL AUDIO NEWS RETURNS THIS WEEK

After a hiatus of nearly four months, the ARRL Audio News is scheduled to return this week on Thursday, May 27. With the advent of the new ARRL Web site, we have had to make some changes in the way the Audio News is presented. For the time being, it will only be available as one mp3 file. Beginning this week, you can find the ARRL Audio News here <http://www.arrl.org/arrl-audio-news> most Thursdays on the ARRL Web site.

==> + NCVEC QUESTION POOL COMMITTEE WITHDRAWS FOUR QUESTIONS

The Question Pool Committee (QPC) of the National Conference of Volunteer Examiner Coordinators (NCVEC) announced the withdrawal of two questions from the Technician class pool and two questions from the Extra class pool. Volunteer Examiner Coordinators (VECs) and Volunteer Examiners (VEs) must take action to remove these questions from use by July 1, 2010. Due to a rules change and pending action by the FCC, questions T2C02 and T2C03 from the July 2010 Technician Pool and questions E1C04 and E1C05 from the July 2008 Extra Pool may not be used in examinations after June 30. Read more here <http://www.arrl.org/news/ncvec-question-pool-committee-withdraws-four-questions>.

==> + REGULATORY: NEW ZEALAND'S RADIO SPECTRUM MANAGEMENT CITES HAM FOR TRANSMITTING 3100 W

Last month, New Zealand's Radio Spectrum Management (RSM) -- that country's equivalent of the FCC -- charged and fined Alan Potter, ZL3II, of Christchurch, for transmitting outside the terms and conditions of the General User Radio License for Amateur Radio Operators. Potter was charged in the Christchurch District Court on April 14 and found guilty of breaching Section 113 of the Radiocommunications Act 1989. Section 113 deals with those who "commit an offence under this Act who transmit radio waves."

Potter was found in possession of radio transmitting equipment that was capable of operating at a significantly higher power than the Amateur Radio Operators General License allows. He was fined $1750 ($1164 USD) and $130 ($86 USD) for costs. Potter was also required to forfeit his radio equipment. Section 114 of the Radiocommunications Act of 1989 references Section 113 and presumes that "any person who erects, constructs, establishes, maintains, or is in possession of any radio transmitter is presumed to have used the radio transmitter." According to news reports, RSM was alerted to a video that Potter posted on YouTube (the video has since been removed), showing showed his transmitter operating at 3100 W. Operating at such high transmitting power is likely to cause interference to, and disruption of, a range of other licensed radio services in the local area. New Zealand amateurs are restricted to no more than 500 W PEP. Read more here <http://www.arrl.org/news/new-zealand-s-radio-spectrum-management-cites-ham-for-transmitting-3100-w>.

==> AMATEUR RADIO IN SPACE: AMATEUR COMMUNITY NEEDED TO ASSIST JAPANESE AMATEUR INTERPLANETARY SATELLITE

An informal network of ham radio experimenters, scientists and CW enthusiasts called FlyVenusCom -- a nonprofit, cross-cultural effort -- has been created to support communication efforts by Japanese scientists with its CubeSat Venus probe, UNITEC-1. This CubeSat was developed by 20 universities of the University Space Engineering Consortium (UNISEC), the Japanese community developing nano-satellites. The Japanese UNITEC-1 team has called for ham radio assistance worldwide in improving and testing two areas of the CubeSat's mission. What makes this mission of particular interest to amateurs is the fact that the UNITEC engineers have added a 5 GHz Amateur Radio beacon to the spacecraft and they are encouraging hams to attempt to receive it. On May 21, Japanese ground stations reported receiving the CW and FSK beacons (call sign JQ1ZUN) at a distance of about 30,000 km. They measured the beacon frequency at 5839.91 MHz. Even though the latest reports say that the signal has been lost, the UNITEC team is trying to re-establish contact with the satellite. Read more here <http://www.arrl.org/news/amateur-community-needed-to-assist-japanese-amateur-interplanetary-satellite>.

==> ARRL PUBLICATIONS: TWO NEW BOOKS AVAILABLE FROM ARRL

Just as many vendors release new products at the Dayton Hamvention, the ARRL will debut much-anticipated publications. This year was no exception. Two new books -- Remote Operating for Amateur Radio and the third edition of The ARRL RFI Book -- were introduced.

<http://www.arrl.org/shop/Remote-Operating-for-Amateur-Radio/>
Remote Operating for Amateur Radio shows amateurs how to assemble their own Internet-controlled stations. As many hams are discovering, it has become increasingly difficult to enjoy Amateur Radio at home. Some have been driven off the air altogether by antenna restrictions, local interference and other limiting factors. But the widespread availability of high-speed Internet offers a powerful solution: Amateurs can now setup a complete station at a remote location and operate via the Internet, just as though they are actually sitting in front of the radio. That radio could be just across town or 2000 miles away.

<http://www.arrl.org/shop/The-ARRL-RFI-Book-3rd-Edition/> ARRL's team of experts has compiled the best advice available on every type of radio frequency interference (RFI) in this brand new edition of The ARRL RFI Book. From automotive to television, from computers to DVD players, from audio equipment to telephones, amateurs will find a step-by-step process for eliminating problematic interference in one convenient book. The third edition of The ARRL RFI Book also includes resources for addressing new realities of digital cable TV and satellite systems, over-the-air TV signals and troubleshooting, as well as hybrid and all-electric automobiles. For more information on these two new exciting publications, including how to get your own copy, click here
<http://www.arrl.org/news/two-new-books-available-from-arrl>.

==> + INTERNATIONAL PERSPECTIVE: ORDER YOUR IRCS ONLINE AT USPS WEB SITE

Many hams have long complained about difficulties they have encountered when purchasing International Reply Coupons (IRC <http://www.upu.int/news_centre/2008/2008-08-08_irc.jpg>s) from their local post offices. Now the US Postal Service (USPS <http://www.usps.com/>) has made it easier to get those IRCs to send with your direct QSL cards -- order them online from the USPS Web site <https://shop.usps.com/webapp/wcs/stores/servlet/ProductDisplay?catalogId=10001&storeId=10052&productId=10006688&langId=-1&parent_category_rn=10000002&top_category=10000002&categoryId=10000034&top=&currentPage=0&sort=&viewAll=N&rn=CategoriesDisplay&WT.ac=10>.
The USPS ships all in-stock domestic orders for stamps and retail items within 1 business day via Priority Mail with Delivery Confirmation or First Class Mail. Shipments should arrive within 3-5 business days. All stamp orders are charged a $1 handling fee, regardless of the order amount. IRCs purchased from the USPS, whether online or in person at a post office, cost $2.10 each. Read more here
<http://www.arrl.org/news/order-your-ircs-online-at-usps-web-site>.

==> + INTERNATIONAL PERSPECTIVE: HAM VISITORS TO SOUTH AFRICA ABLE TO OPERATE, USE SPECIAL CALL SIGN PREFIX DURING WORLD CUP

Through an agreement between the South African Radio League (SARL <http://www.sarl.org.za/>) and the Independent Communications Authority of South Africa, those radio amateurs who will be attending the FIFA World Cup <http://www.fifa.com/worldcup/> in South Africa may use a special ZS call sign <http://www.amateurradio.org.za/worldcup.htm> during the event. SARL is South Africa's IARU Member-Society. After registering with SARL prior to arrival in South Africa, hams may attach ZS10 to the front of their own call sign (i.e. ZS10/K1SFA) from June 11-July 11. Hams interested in obtaining permission to use ZS10/ must complete the form and e-mail it to SARL <worldcup@sarl.org.za>, along with a copy of their passport page showing the ham's photograph and a copy of their current Amateur Radio license. Hams will need to keep a both a copy of the form and their license while in South Africa. In anticipation of the World Cup, SARL and its affiliated clubs have been using a special event call sign -- ZS10WCS -- since September 2009. SARL will provide a commemorative QSL card for those amateurs who work ZS10WCS. Direct QSLs must include a self-addressed envelope and one IRC or US $1. Amateurs may also QSL via e-mail <wcs@sarl.org.za>, but those hams sending an e-mail QSL will only receive an e-mail QSL in return, and not the commemorative printed QSL card.

==> THERE'S STILL TIME TO ENTER THE 2010 ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2011 ARRL Calendar. Hurry -- the entry deadline is June 1! For more information, including rules and requirements, click here <http://www.arrl.org/news/there-s-still-time-to-enter-the-2010-arrl-photo-contest>.

==> ARRL FIELD DAY MERCHANDISE NOW AVAILABLE

<http://www.arrl.org/shop/Field-Day-Supplies/> How can you be the best-dressed ham at your Field Day site this year? When you wear the official 2010 ARRL Field Day shirt -- accompanied by the 2010 ARRL Field Day hat -- of course! Field Day -- Amateur Radio's largest on-the-air operating event -- is just a little more than five weeks away, so be sure to get your shirts, hats and pins, as well as the new ARRL Field Day Handbook for Radio Amateurs and coffee mugs before they run out. Field Day shirts are offered in sizes Small-4XL and are royal blue with the 2010 Field Day logo on the left chest; the back of the shirt says "Amateur Radio -- Goodwill • Service • Fun!" with www.arrl.org underneath. Fulfill all your Field Day apparel needs at the Field Day Supplies section of the ARRL Web site <http://www.arrl.org/shop/Field-Day-Supplies/>.

==> + SOLAR UPDATE

Tad "So many journeys may the Sun and moon make us again count o'er,
ere love be done
<http://www.opensourceshakespeare.org/views/plays/playmenu.php?WorkID=hamlet>
"
Cook, K7RA, reports: Sunspots returned this week in the form of group
1072; the average daily sunspot number for May 20-26 was 16.3, and the
average daily solar flux rose nearly three points to 72.1. This was a
very quiet week for geomagnetic indicators, with the mid-latitude A
index at 0 on Sunday and Monday (May 23-24). The high latitude Alaska
college A index was 0; the K index was also 0 over all of both days,
actually extending from 1500 on May 22 through 0000 on May 25, a total
of 57 hours. The quiet will probably end, due to a coronal mass
ejection thrusting particles toward Earth. Australia's IPS Radio and
Space Services issued a warning of a minor geomagnetic storm at 2346 on
May 26. The prediction from NOAA/USAF calls for a planetary A index of
15, 22, 20, 22 and 12 from May 27 through the end of the month. In
addition to sunspot group 1072 -- which is currently fading and a few
days away from our Sun's western horizon -- a new spot appears to be
forming just above the center of the solar disk. You can see it on the
continuously updated (every few minutes) image from the STEREO
spacecrafts <http://stereo.gsfc.nasa.gov/>. On Wednesday evening, it
was right on the center 0 degree meridian, north of the solar equator.
By this Friday night, the STEREO image should cover about 89.5 percent
of the Sun's body. Look for more information on the ARRL Web site on
Friday, May 28. For more information concerning radio propagation,
visit the ARRL Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" brought to you by William Shakespeare's Hamlet
<http://www.opensourceshakespeare.org/views/plays/playmenu.php?WorkID=hamlet>
(Act III, Scene 2
<http://www.opensourceshakespeare.org/views/plays/play_view.php?WorkID=hamlet
&Act=3&Scene=2&Scope=scene>).

==> + SILENT KEY: ROBERT BROWN PHD, NM7M (SK)

Bob Brown, NM7M, of Anacortes, Washington, passed away
<http://www.webfh.com/fh/obituaries/obituary.cfm?o_id=309624&fh_id=10428&ck=1
>
Sunday, May 23, from cardiac arrest. He was 87. Brown, the husband of
former ARRL Northwestern Division Director Mary Lou Brown, NM7N (SK),
was known worldwide for his contributions to the propagation studies on
160 meters. Brown wrote 12 articles for the ARRL from 1998-2001 that
appeared in QST, QEX and NCJ, most of them -- such as this December
1999 QST article <http://p1k.arrl.org/pubs_archive/97434> -- dealing
with propagation and contesting on the low bands. He also authored an
HF propagation tutorial that is available online
<http://www.astrosurf.com/luxorion/qsl-hf-tutorial-nm7m.htm>. Brown was
retired from the University of California where he was a physics
professor at the Space Sciences Lab (SSL
<http://www.ssl.berkeley.edu/>) in Berkeley; he also served as interim

dean of UC's graduate school. A memorial service is planned in Anacortes for Wednesday, May 26. A private burial service is planned for a later date.

==> THIS WEEK ON THE RADIO

This week, the CQWW WPX Contest (CW) is May 29-30. The Michigan QRP Memorial Day CW Sprint is May 30-31. Next week, the Ten-Ten International Open Season Contest and the Alabama QSO Party are June 5-6. The CWOps Mini-CWT Test is June 9-10. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, June 20, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, July 2, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1711 - May 28 2010

Please note that due to the amount of news covered that this is an extended newscast running 34 minutes and 19 seconds and contains 3 breaks at 9:55; 18:12 and 24:25.

Amateur Radio Newsline report number 1711 with a release date of Friday, May 28, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio heads to the planet Venus aboard UNITEC One but for the moment the signal has faded away. Also, the first ever U.S. license tests are held in India, the National Conference of Volunteer Examiner Coordinators withdraws several questions and lots more on Hamvention 2010. Enjoy being there with us on Amateur Radio Newsline(tm) report number 1711 comes your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: PROBE CARRYING HAM TRANSPONDER ON ITS WAY TO VENUS

The UNITEC - 1 space probe is on its way to Venus and ham radio is along for the ride. But the ham radio transponder on board the spacecraft has not been heard from in several days. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

UNITEC-1 is a one of a kind experimental satellite that was developed by twenty educational institutions that are a part of Japan's University Space Engineering Consortium. This is the cooperative working on the development of so called nano-satellites for Japan.

What makes this mission is of particular interest to ham radio is that UNITEC-1 carries a 5 Gigahertz amateur radio beacon that signs the call JQ1ZUN and it has already been heard from space. On May 21st Japanese ground stations reported receiving both the CW and FSK beacons telemetry from the spacecraft when it was about 320,000 km from Earth. They report a measured beacon frequency of 5.839.91 Gigahertz which is very close to the previously published 5.840 Gigahertz planned frequency.

Then on Friday, May 21st at 1900 UTC, spacecraft controllers lost the signal from UNITEC-1. They could still hear the Planet-C and Ikaros telemetry transponders on 8.4 GHz but not the 5.84 GHz signal from UNITEC-1. Further attempts to re-acquire UNITEC-1 on subsequent days have

so far been unsuccessful.

UNITEC-1 controllers are encouraging hams world-wide to attempt to receive the spacecraft's amateur radio beacons and report back their observations. More information on this deep space project is available at the University Space Engineering Consortium website. Its in cyberspace at www.unisec.jp/unitec-1.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in the City of Angels.

--

The launch of UNITEC One took place on Thursday, May 20th from the Tanegashima Space Center in Japan. We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (UNITEC-1 Working Group)

**

HAM EXAMS: FIRST ARRL-VEC US LICENSE TESTS ADMINISTERED IN INDIA

The first-ever US amateur radio exams session in India were scheduled to be held May 24th in the city of Hyderabad under the auspices of an ARRL VEC team. The Technician, General and Amateur Extra were to have been administered during this session.

With growing interest by hams living outside the United States in holding a U-S license, the report from the Southgate news indicates that ARRL V-E-C test sessions are being conducted in Canada, Brazil, Germany, Japan, Mexico, Panama, Philippines, Italy, Trinidad and Tobago and other locations around the globe.

More information concerning US ham radio exams in India is on line at tinyurl.com/2g9njpa. (Southgate)

**

RADIO TESTING: NCVEC WITHDRAWS FOUR QUESTIONS FROM HAM TESTS

The Question Pool Committee of the National Conference of Volunteer Examiner Coordinators or NCVEC has announced the withdrawal of four questions. Two from the Technician class pool and two from the Extra class pool. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details on this action:

--

According to a May 25th bulletin released by the American Radio Relay League, the two Technician questions dealt with emergency communications and Section 97.113 of the FCC's rules governing amateur radio participation in emergency training drills. As most listeners already know, back in March the FCC released a Notice of Proposed Rule Making in W P Docket No 10-72, that proposes to amend Section 97.113 to provide that, under certain limited conditions, Amateur Radio operators may transmit messages during

emergency and disaster preparedness practice sessions. This, regardless of whether the operators are employees of entities participating in the drill.

The bulletin notes that the National Conference of Volunteer Examiner Coordinators believes that adoption of the NPRM appears more likely than not. This the NCVEC says will make the two questions dealing with the subject invalid. Therefore group feels it is best to withdraw the questions now to avoid the possible inclusion of invalid information in training material now being prepared

As to the two deleted Extra class exam questions. They dealt with third party restrictions as defined in 97.109(e) of the rules. The FCC has since deleted this rule, so the information is no longer applicable to the Amateur Service.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The four questions not to be used after June 30th are T2C02 and T2C03 from the July 2010 Technician Pool and questions E1C04 and E1C05 from the July 2008 Extra Pool. The ARRL Bulletin notes that Volunteer Examiner Coordinators and Volunteer Examiners must take action to remove these questions from use in exams given after July 1st. (ARRL, NCVEC)

**

RADIO RULES: FCC DENIES PETITION FOR RECONSIDERATION ON CALLSIGN ID TIMES

The FCC has denied a Petition for Reconsideration filed by Glen Zook, K9STH, that asked for changes in Part 97. This in regard to how often United States hams must identify themselves on the air.

The May 18th action follows the Commission's denial of Zook's April 2009 Petition for Rulemaking. At that time K9STH asked the Commission amend Section 97.119(a) to change how often amateur stations must identify themselves. Zook specifically asked that the FCC require that an amateur station transmit its call sign during the first transmission of any communication or series of transmissions, and to allow an amateur station to not transmit its call sign at the end of a communication when the communication or series of transmissions lasts less than three minutes.

In denying his reconsideration request the FCC stated that Zook's petition did not demonstrate that the current station identification rule is inadequate. Nor did he prove that revising the station identification requirement as requested would address the concern that many amateur radio operators do not identify their station in a timely manner or at all.

The FCC also noted that in response to Zook's 2006 petition, that many who commented believed that the current station identification rule properly balances the burden of requiring the station to transmit its call sign with the convenience of those receiving the transmissions to determine the identity of the station making the transmission. (FCC)

**

RADIO LAW: TWO LEGISLATORS TO LEAD REVIEW OF COMMUNICATIONS ACT

Two legislators have said that they would begin a process to modernize telecommunications laws that were last overhauled in 1996 with more of an emphasis on the Internet. In a joint statement on Monday, May 24th, Senator John D. Rockefeller of West Virginia and Representative Henry A. Waxman of California said that they will hold meetings in June to examine how the Communications Act meets the current needs of consumers, the telecommunications industry and the Federal Communications Commission.

The issue came into focus in April after a federal appeals court ruled that the FCC. had overstepped its authority in applying a portion of the Communications Act to an Internet service provider in a case dealing with so called Net Neutrality. Net Neutrality is the concept that Internet Service Providers must afford consumers with equal access to all types of content and applications.

In response, the FCC announced a plan to reclassify broadband Internet service, which is now lightly regulated as an information service. Under the change, it would become a telecommunications service and would come under tighter scrutiny by the agency. This reclassification would give the FCC the authority to implement portions of its recently released National Broadband Plan, as well as to enforce Net Neutrality,

No matter what the outcome of the Rockefeller and Waxman hearings, do not look for any changes to the Communications Act to happen ant time soon. It took more than five years to produce the 1996 rewrite. Thin in itself was the first major change of overall United States telecommunications law since the Communications Act became law way back in 1934.

For those not aware, Senator John D. Rockefeller IV is the Chairman of the Senate Commerce, Science and Transportation Committee. Representative Henry A. Waxman is the Chairman of the House Committee on Energy and Commerce. (Published News Reports)

ENFORCEMENT: FCC DENIES REQUEST FOR RECONSIDERATION OF LICENSE REVOCATION

The FCC has denied a request from Lonnie Keeney, the ex- KB9RFO in which he asked the regulatory agency for reconsideration of the Order of Revocation issued to him on February 25, 2009. The FCC says that Revocation Order was based on a determination by the FCC that Keeney lacks the requisite

character qualifications to be and remain a Commission licensee based on a prior felony conviction for child molestation.

In his Reconsideration Request Keeney asked that he be permitted to keep his amateur radio license. In support of his position he stated that he has no money to defend himself at a hearing, that his license is important to him and that he previously used his amateur station to provide services to his community. He also stated that he participates as a volunteer in a jail ministry and that he is trying to rebuild his reputation in the face of a lifelong requirement to register as a sex offender.

But in its denial, the FCC says that Keeney has provided no newly discovered facts or information that would, in the public interest, warrant reconsideration of the Order of Revocation. It says that the information Keeney presents in his Petition for Reconsideration is of the kind that was already presented to the Administrative Law Judge and described in the Revocation Order. The FCC also notes that even assuming, that Keeney did present a basis for reversing the Order of Revocation, that the relief to which he would be entitled would be a new hearing proceeding on his qualifications, not, as he seeks, authority to keep his amateur radio license.

Finally, the FCC concludes that based on the information before it that Keeney has failed to establish a basis for reconsideration of the Order of Revocation. Furthermore, the relief he seeks under the circumstances presented is inconsistent with the Commission's procedural rules. As such the FCC says that the Petition for Reconsideration filed by Lonnie Keeney on March 17, 2009, is denied.

You can read the entire decision in this matter on line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-916A1.doc or http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-916A1.pdf (FCC)

RESCUE RADIO: NZ ARES ASSISTS IN SEARCH FOR MISSING HUNTERS

Members of the New Zealand Amateur Radio Emergency Corps provided communications during a search for two hunters lost in the bush. The New Zealand Stuff website reports that the two hunters went missing in a rugged mountain range, triggering an all out search to find them.

Involved in the hunt were local police along with search and rescue volunteers from area hiking and hunting clubs. Members of the New Zealand Amateur Radio Emergency Corps provided communications.

Senior Sergeant Luke Shadbolt, of Hastings, said the men were found on a near-by road after what the hunters suffered an uncomfortable night in the bush. The full story is on-line at tinyurl.com/25exrz6.

D-STAR NEWS: D-STAR AUDIO STREAM NOW ON THE WWW

KF4ZW says that anyone can now listen to D-Star ham radio contacts without purchasing any equipment for the mode. This, as a D-Star audio feed is now available via the radioreference.com website. Here's a sample of just how good it sounds:

--

D-Star Audio: Hear it in the MP3 version of this weeks newscast downloadable at www.arnewslineorg.

--

The audio usually originates from Reflector 1c which is generally the busiest feed. A direct link is in this weeks printed Newsline report. After you find the correct radioreference page just scroll to the bottom, look for the D-Star link and click on the "speaker" icon to start listening.

KF4ZW adds that you can also listen to any of these feeds via your iphone or blackberry as long as you have the unlimited data plan. The direct link is: www.radioreference.com/apps/audio/?ctid21 (KF4ZW, D-Star Reflector)

**

NAMES IN THE NEWS: G6UIM JOINS PARIS NEAR SPACE PROJECT

Some names in the news. From the U-K comes word that Steve Daniels, G6UIM, has joined the Paper Aircraft Released Into Space or PARIS project. The PARIS Project plan is for a paper aircraft named Vulture 1 to be released this summer from a weather balloon that will carry it to over 30 km in altitude.

G6UIM, who built his first computer in 1979, has been working on the main payload radio beacon as well as the Vulture 1 GPS board. Plans call for Yaesu FT-817 to be used to receive the signal. (Southgate)

**

NAMES IN THE NEWS: SWODXA NAMES DXPEDITION HONOREES

The Southwest Ohio DX Association has announced this years "DXpedition of the Year" and a "Special or DXpeditioner of the Year" awards. The 2010 DXpedition of the Year award went to the K4M Midway Atoll operation while this years Special Award was presented to the TX3A Chesterfield Island team. The presentations were made at the recent 2010 DX Banquet held in conjunction with the Hamvention in Dayton, Ohio. (SWODXA)

**

HAMVENTION 2010: THE FUTURE OF DIGITAL RADIO

Software Defined Radio was one of the big highlights at the recently concluded Dayton Hamvention, and we are not just talking about gear on the exhibit floor. The fact is that SDR as it has come to be called was a high priority with a good number of those attending the technical sessions as we hear from Amateur Radio Newsline's Mark Abramowicz, NT3V:

--

When it comes to being on the ground floor of digital communications, few do it better than the Tuscon Amateur Packet Radio group.

Scotty Cowling ,WA2DFI, is TAPR's vice president, and working to promote the next best thing in amateur radio high performance software defined radio.

Cowling says while many people still think of TAPR as a packet organization because of the name, it has come a long way from where it once stood in the 1980s. Now, Cowling says, the group's aim is to promote research and development to advance the state of the art of digital communications.

"Packet, I mean, it's still there obviously but I've seen it evolve from a novelty like keyboard clicking back and forth to backbones across the country, to it basically as a foundation for APRS, which is another thing that I really got into," explains Cowling.

"It's useful for that. But I see the future of digital radio as moving on."

"I mean digital radio is the future rather than packet radio. And, not to belittle packet radio but I mean we're for advancing the state of the art and software defined radio is a big part of that."

What is software defined radio? Cowling says it's where the actual mode selection-demodulation is done in software, not in hardware. He points out that it's different from a software controlled radio which is a conventional radio that might have some digital signal processing in it but is sent commands to do various operations switch bands switch modes, and switch filters. Essentially, Cowling says, the operation of the radio and capability of adapting to new modes is tremendous because the new modes are defined in software.

"So you can take the same old hardware you paid your good money five years ago and now, when they come out with PSK-32 it's just a software update," says Cowling. And then you don't have to worry about, well, where am I going to get the next $2,000 to buy a new radio."

And, Cowling acknowledges, the next generation of HPSDR may not be for everyone.

"Some people just can't deal with no knobs," says Cowlings. "But I think if you use it you will find that it will grow on you and it will grow on you and you will adapt to it just like you adapted to using your FT1000 over your, you know, 940."

But, he says, a lot of people are out there playing around with Software-Defined Radios and they're excited about the future.

"Some of the people are contesters who want absolute high performance," Cowling says.

"Most of the people that TAPR deals with are experimenter-types. Software guys, hardware guys, guys that are excited about something new in ham radio

that maybe they haven't seen anything new for years."

"Its kind of where I'm coming from, it's something that's exciting now where there hasn't been a lot other than the same old, same old for a long time."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, reporting from the Dayton Hamvention.

--

Mark will be back next week with another look at a specialty interest that was big at Hamvention 2010. A facet of the hobby that uses small radios and low power to communicate world wide. (ARNewsline(tm), NT3V)

HAMVENTION 2010: THE HAM RADIO TOWN MEETING

Still with Hamvention 2010, this year Amateur Radio Newsline devoted its two hour Ham Radio Town Meeting to something that might best be described as only peripheral to the hobby but important to everyone's day to day existence. With the economy only barely showing any signs of recovery and unemployment at near record levels, we thought it might be a good idea to try to help those hams in need of employment to do so by using their experience as licensed radio amateurs. The session title was " Amateur Radio As A Way To Find Or Keep A Job In Todays Shrinking Job Market" and while our speakers could not provide all the answers, but some like Bob Sherman, K2SJP, were able to share stories of the way in which being a ham as a teen did lead to a lifelong career:

--

K2SJP: "It helped me to pick up my trade in aircraft electronics. I went for an interview with Pan American World Airways at Kennedy Airport and I was a graduate of RCA Institute in New York City and had gone to George Westinghouse Radio and Television High School in Brooklyn, but they didn't seem to care about that to much.

"But when I listed my ham radio license, the girl that was interviewing me peaked up and said: '..you're a ham radio operator?'

"I said yes, I've been a ham radio operator for several years now.

"And she says: 'we need you.'

"And I spent 25 years with Pan American World Airways right to the day of its demise. And, I was actually in the top 7% of seniority in Avionics and stayed on with them after their demise for several months where we collected the aircraft from all over the world, brought them back to Miami and JFK (in New York City) and I performed final Avionics service on them before they were put up for sale."

--

After Pan Am folded Bob's ham license got him a position at Tower Air and later at Federal Express from which he recently retired.

Another speaker tackled the emerging interest by teens and early adults in electronic careers. Her name is Diana Eng, her call is KC2UHB, and she has a multi faceted professional life as a Fashion Designer of Electronic Integrated Clothing. In addition, Eng is a former Project Runway contestant. She also produces and hosts on-line videos explaining the various aspects of electronics and communications and is a writer for Make Magazine. Diana talked about the emerging interest in ham radio and how it might lead to niche careers:

--

KC2UHB: "The way that I got into all of this was because right now there is a huge revival in hobbyist electronics. A lot of young people are really getting into this as well as people in their teens, 20's and 30's and they are forming things called Hacker Groups. These are not evil hackers who do mean things to your computer. This is a different type of hacker. These are people who like to play with electronics and try to see if they can do something new with it.

"So this is my hacker group over here (pointing to photo on screen). Its called NYC Resistor and I am one of the co-founders of it. Right now we have about 30 members and are based in Brooklyn (New York).

--

Other speakers included Steve Mendelsohn, W2ML, of the ABC Television Network, Rich Moseson, W2VU who is the editor of CQ Magazine, Martin Jue, K5FLU the founder of MFJ Enterprizes, Allen Pitts, W1AGP who is Public Relations Director for the ARRL and ham radio's own "Mr. Audio" Bob Heil, K9EID, of Heil Sound Limited. Each had his or her own ham radio business success story to tell and you can hear the entire session by downloading the MP3 file at our website at www.arnewsline.org. Just scroll down until you see the words "Click here to download the entire 120 Minute 2010 Hamvention Town Meeting," settle back and we hope that what you hear is of some help to those who are seeking a job or trying to keep the one that they now have.

And less we forget, our thanks to Hap Holly, KC9RP, and the Radio Amateur Information Network for recording this years Town Meeting, to our on-site Producer Don Wilbanks, AE5DW, and our Prize Coordinator Cathy Anno,

KB0FDU. And a special thank you to Heil Sound and CQ Magazine who generously provided this years major door prizes. (ARNewsline(tm))

WITH NEWSLINE: PROBLEMS ON THE 296-2407 DIAL UP LINE

If you tried to access Newsline by telephone last week you likely found that the machine supplying the audio dropped out after only a few minutes. This made it impossible to get the entire newscast by telephone until late Tuesday the 25th. That's when we were finally able to get the unit feeding the phone line back up to speed. At least for the time being.

Well what happened is that the machine used to feed the telephone line is more than 20 years old and is frankly on its last legs. A quick call to Panasonic has confirmed that there are no longer any parts available.

Luckily we had one that we have been cannibalizing for parts. That said, once the unit now on line finally fails for good, there will be nothing that we can afford to buy to replace it.

Therefore we urge anyone who still uses the 661-296-2407 dial in line to begin thinking about switching to downloading the MP3 audio file from our website at www.arnewsline.org. Once the Panasonic machine goes to the electronic dumping ground, the 2407 line will be disconnected and all telephone feed service will end. We cannot tell you when that will be, but from the looks of the machine it could happen at anytime in the not to distant future. (ARNewsline(tm))

RADIO HONORS: WIRELESS INSTITUTE OF AUSTRALIA TURNS 100 IN YEAR LONG CELEBRATION

The Worlds oldest national ham radio society has turned 100 and there is a big celebration going on down-under. Of coarse we are talking about the Wireless Institute of Australia. Graham Kemp, VK4BB, is the voice of the WIA News and is here to tell us about the year long festivities that are taking place:

--

For the full year being January through December 2010 and with the help of it's members, the WIA is celebrating the Centenary of organized Amateur

Radio in Australia. The year long celebration, with the center point this weekends 100th WIA Annual General Meeting in the nations capital is in recognition of the foundation of the WIA and the very start of organized amateur radio in Australia during 1910.

11 March, 1910 a meeting of like-minded people in the Hotel Australia, Martin Place, Sydney, formed the Institute of Wireless Telegraphy of Australia, and soon after dropped the word 'telegraphy' from its name. Chairman of the founding meeting, George Taylor, proposed "the formation of an institution amongst experimenters and enthusiasts in wireless for their mutual benefit."

A range of initiatives and activities happening in 2010 provide an opportunity for every VK/AX radio amateur to be involved in what is already a memorable celebration.

Special event callsign VK100WIA is very popular.

The WIA annual general meeting and activities program in Canberra this weekend is in full swing!

Astronaut Tracy Caldwell-Dyson, KF5DBF, will be talking from space to this WIA Centenary Dinner in Canberra. As the ISS Expedition 23 Flight Engineer, Tracy is set to give a brief speech to the WIA Centenary Dinner on Saturday May the 29th before answering questions from up to ten students from Canberra's Trinity Christian School.

The weekly Sunday morning VK1WIA broadcast hosted by yours truly Graham, VK4BB, will be transmitted live from an outside broadcast studio set up in a Canberra park. The broadcast will be aired live at 8:00am and simultaneously recorded, with the mp3 recording uploaded to the WIA website at the conclusion of the broadcast for re-broadcasters around the world to download.

Public displays of amateur radio are being mounted in local Canberra venues with the assistance of the Canberra Region Amateur Radio Club. A chance to demonstrate the hobby of amateur radio to the people of Canberra, show how the skills learnt can be valuable for education, public service and communication
in times of emergency. An exercise in amateur radio public relations where the community can see and experience the fun and public service capability that their "radio amateur" neighbors bring to the community.

All in all a great weekend, a great year, 2010 the year the Wireless Institute of Australia turns 100.

I'm Graham Kemp, VK4BB, and you are listening to the Amateur Radio Newsline.

--

You can learn more about the 100th anniversary celebration of the Wireless Institute of Australia on line at www.wia.org.au. (WIA News, VK4BB)

**

RADIO HONORS: SARL CELEBRATES 85th YEAR AS SOUTH AFRICAN NATIONAL SOCIETY

The South African Radio League has celebrated its 85th anniversary. The society was founded on Wednesday 20 May 1925, a group of radio amateurs got together in the city of Cape Town to form a national organization .

Dennis Green, ZS4BS, is the current President of the South African Radio League. In his celebratory message, Green said -- and we quote -- "As we look to the future, we are faced with some challenges to the organization and to the hobby. I think the recruitment of members is important, not only the young people, but also those more settled." -- end quote.

Green went on to say that even though technologies change very rapidly and we as radio amateurs must stay abreast of development, we must be part of that development, we must take the lead. Green adds that ham radio has so many facets and that there are some many things radio amateurs can get involved in, that only the sky is the limit. (SARL)

RADIO FROM SPACE: COMET CRASH INTO SUN OBSERVED BY STEREO

Solar physicists at the University of California at Berkeley have captured for the first time the collision of a comet with the sun.

Using data radioed back to Earth from instruments aboard NASA's twin STEREO spacecraft, the four researchers at UC Berkeley's Space Sciences Laboratory were able to track the comet as it approached the sun and estimate an approximate time and place of impact. They then looked at data from the terrestrial Mauna Loa Solar Observatory in Hawaii, and found images in the predicted spot of what appears to be a comet approaching the edge of the sun from behind the solar disk. While the comet apparently survived the heat of the corona and disappeared in the chromosphere, evaporating in the 100,000-degree Kelvin heat.

The Solar Terrestrial Relations Observatory or STEREO was launched in 2006 and consists of identical spacecraft orbiting the sun. One is in orbit ahead of Earth and one behind. This provides a human eye-like stereo view of the sun. You can read more at tinyurl.com/28er687 (Science Daily)

**

THE CONTEST CORNER: CQWW WPX CW CONTESR MAY 29 - 30

In contesting news, a reminder that the CQWW WPX CW Contest takes place between May 29 and 30 between 0000 and 2359UTC. This is an HF contest only that uses the 160 through 10 meter bands and requires an exchange of signal report and serial number. More information on it is on line at www.cq-amateur-radio.com. (CQ)

**

DX

In DX, we start this week on the VHF bands. This with word that on Friday May 14th the 50MHz band was open from Great Britain to Bahrain. This

resulted in a 5270 kilometer contact being made between RSGB VHF Manager David Butler, G4ASR and A92IO. But it did not end there. On Monday May 17th G4ASR contacted stations in Greece on the 2 meter band. SSB contacts were made via Sporadic-E propagation to SV2JL at 2300 kilometers and SW6KRV at 2286 kilometers. A few minutes earlier G4ASR had SSB contacts on 4 meter with SV1DH at 2590 kilometers and SV2DCD at 2253 kilometers.

Turning to the High Frequency bands, news that a multi-national team of up to 30 operators from nine countries is in advanced preparation operate from Spratly Island group in the South China Sea. Following 12 months of discussions with military and civilian authorities permission has been received to operate on Thitu Island. The DXpedition, organized by the South Pacific Contest Club, will run from January 6th to the 24th 2011. More on this operation is on-line at www.dx0dx.net.

ZL4DB is going to Macquarie Island on a 3 month job assignment. He hopes to operate portable VK0 on SSB only when time permits from late May until mid-August. He is not an experienced DXer and, according to his QSL manager, ham radio activity will be minimal. QSL via ZL4PW, direct or via the bureau.

W6NWS will be in Vietnam until June 9th and expects to be active as XV2W when time permits. QSL via home call, direct or bureau and Logbook of The World.

Members of the Tifariti Gang are heading to the middle-East area of Palestine. Look for E4X to be active through June 6th. At airtime no QSL route is available for this one.

Lastly, the Ukrainian DX'peditioners Team has a new project called Pacific Odyssey 2010. They plan to be active as T31X from Central Kiribati through June 1st and Tokelau as ZK3X from June 2nd to 6th. T31 is ranked most needed number 7 in Europe, number 19 worldwide. Tokelau is number 29 in Europe and number 35 worldwide. QSL as directed on the air.

(Above from various DX news sources)

**

THAT FINAL ITEM: AMATEUR RADIO ASTRONOMERS FIND SUPER SECRET SPACE PLANE

And finally this week, a group of amateur radio-astronomers have accomplished what the military was likely hoping would not happen. They have spotted the super-secret U.S. Air Force X-37B mini space plane on-orbit. Amateur Radio Newsline's Frank Haas, KB4T, has the rest of the story:

--

The un-piloted X-37B Orbital Test Vehicle 1 was lofted on April 22 atop an Atlas launcher. It is being flown under the auspices of the U.S. Air Force Rapid Capabilities Office. From there it entered a proverbial cone of silence regarding its on-orbit duties. But thanks to a worldwide network of amateurs sky watchers, the spacecraft is reportedly in a 39.99 degrees

inclination, circling the Earth in an orbit 401 kilometers by 422 kilometers.

Greg Roberts of Cape Town, South Africa, a pioneer in using telescopic video cameras to track spacecraft, chalking up exceptional results over the years. He says that this data may change slightly as the spaceships orbit is better refined. Roberts adds that those sighting the craft have absolute confidence in their observations, claiming no chance of error or of it being any other type of orbital item such as a satellite.

Roberts says that the next phase in the amateur astronomers tracking of the X-37B will be an attempt to see if the space plane is emitting any radio signals on the frequency bands that he is able to monitor. He says that will be an even bigger challenge than that of locating the space plane itself because without any data as to emission type or frequencies on which it may be operating it will be like looking for a proverbial needle in a haystack.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

The Air Force has not said what the robotic ship is for, but analysts say the X-37B is but most guess that it is likely a high altitude spy craft. (Science OnLine, Yahoo News)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot)org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita
California, 91350

A quick reminder that the nominating period for the 2010 Young Ham of the Year Award closes at midnight on Sunday, May 30th. Any nomination form postmarked after that date or received electronically after the midnight hour on May 30th will not be considered in this years judging. Full instructions and a nominating form are on our website at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, and I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 21st-May, through Friday, 28th-May there were 208 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5Z, 6W, 6Y, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J5, J6, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V5, V8, VE, VK, VK9L, VP2E, VP2V, VP5, VP8, VP8/o, VP9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3C9B AND 3C0C DXPEDITION. As of press time, no word on these operations has been reported on their Web page. We would have thought that the 3C9B

operation to Bioko Island (AF-010), Equatorial Guinea, would have started by now. For more details and updates on the 3C0C and 3C9B DXpeditions, visit the Web page at: http://www.3c0c-annobon.com

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW WPX CW Contest (May 29-30th) as a Single-Op/All-Band/Low-Power entry. QSL via IZ8CCW. Read about Ashraf on the following Web page at: http://www.qsl.net/3v4-002

A2, BOTSWANA. Charles "Frosty" Frost, K5LBU, will lead another DXpedition to Africa. This time to Botswana between October 20th and November 4th. Operators mentioned are: Scasciafratti/I0ZY (A25ZY), Lor/IK1MDF (A25DF), Giannarelli/IZ5MMB (A25MB), Frosty/K5LBU (A25CF), Irish/K5ZOL and Lehman/KD5TAN (A25AN). They plan to have three stations on the air operating 160-6 meters, depending on conditions. The group will also be in the CQWW DX SSB Contest (October 30-31st) using the callsign A25HQ. Each operator, using their own callsign, will handle their own QSL cards by the Bureau or direct (QRZ.com address). QSL for A25HQ go via K5LBU. The logs will be uploaded via CLUBLOG daily (depending on the InterNet connection). The group is looking for sponsors. For more details and update, visit their Web page at: http://www.qsl.net/a25-2010/index.html

AT10, ANTARCTICA. Bhagwati, AT10BP, is looking for contacts with the USA and JA stations. He writes: "Propagation on HF is still very poor; I can just make good contacts on 20 meters with South Africa and when conditions are better I can work some EUs. Very few US and JA in my log, and I'm wondering what is the best opening from JA and USA through Antarctica. Feel free to send me an E-mail to schedule skeds, I'll be pleased to do so. My E-mail adress is: bplovemaitri@rediffmail.com
....73 Bhagwati Prasad Semwal VU3BPZ/AT10BP, Communication Officer MAITRI, ANTARCTICA."

BORDER LINE DX (KL7-VY1)! Members of the North Country DX Association (WP2JR) will be active on HF from the Alaska-Yukon border between June 27th and July 2nd, or maybe even earlier in June. Yukon John, KL7JR, informs OPDX that the operating position will be from the KL7JR motor home on the international border, with antenna legs in each country and the transceiver "on the line"! Suggested frequencies are: 14250 kHz +/- QRM (main), and 7240 kHz plus 30/17/12m (secondary). Imagine, both Alaska and the Yukon on together. One contact counts for both countries! Lon/Lat: 140.97W and 62.51N (BP92MM... John thinks!). QSL KL7JR CBA.

DXCC NEWS (2009 DXCC Yearbooks are in!) Bill Moore, NC1L, ARRL Awards Manager, reports: "The 2009 DXCC Yearbooks have arrived from the printer. There are close to 4,500 to be mailed so after a brief preparation period they should start appearing in mailboxes in the next 2-3 weeks."

E4, PALESTINE (Update). The E4X operation is now on the air until June 6th. The operators mentioned (as of print time) are: Antonio/EA5RM (Team Leader), Roberto/EA2RY, Fernando/EA5FX, Manuel/EA7AJR, Jose/EA7KW, Florent/F5CWU, Alain/F6ENO, Bernard/F9IE and Fabrizio/IN3ZNR. Pilot stations are:

William/K6GNX and Richard/W6ENZ. Operations will be on 160-6 meters including 30/17/12 meters using CW, SSB and RTTY with at least 3 stations on the air at the same time on different bands and modes. QSL via EA5RM: Antonio Gonzalez, P.O. Box 930, E-03200 Elche, SPAIN. For updates visit the E4X Web page at: http://www.dxfriends.com/e4x/index.php

IOTA NEWS.....
AS-067. Members of the Tokyo Dental College ARC (Kanichi/JE1SCF, JF1QQR, JG4IQC and possibly others) will be active as JA1YUC/6 from Uji Island for the RSGB IOTA Contest (July 24-25th). QSL via JA1YUC, by the Bureau is preferred.

EU-010. Operators Ray/M1REK and Andy/M1LOL, members of the South Cheshire Amateur Radio Society, will be active as GM6TW/p from some of the Outer Hebrides Islands between June 12-17th.
Their tentative schedule is as follows:
June 12-13th - Lewis and Harris Islands (IOSA OH01, SCOTIA HI21).
June 14-15th - North (IOSA OH02, SCOTIA HI13, WLOTA LH-3287) and South (IOSA OH03, SCOTIA HI06, WLOTA LH-2972)
Uist, Benbecula (IOSA OH04, SCOTIA HI08) and Eriskay Islands.
June 16-17th - Barra (IOSA OH11, SCOTIA HI02, WLOTA LH-3126) and Vatersay Islands.
Bands and modes of activity were not provided. To find out the latest information go to Twitter at:
http://twitter.com/#search?q=6TW

EU-128. Holger, DL5XAT, will once again be active as homecall/p from Fehmarn Island (O-01 for the German Islands Award) during the RSGB IOTA Contest (July 24-25th) as a Single-Op/24H/CW entry. QSL via his home callsign.

NA-014. Members of the Halifax Amateur Radio Club (VE1FO) will be active as VE1FO/9 from Campobello Island (CISA NB001) between May 28-31st. Operators mentioned are: Beckie/KB1IRZ, Cory/N1URA, Dick/VE1AI, Howard/VE1DHD, Ella/VE1PEI, Scott/VE1QD, Gary/VE1RGB and Ken/VY2RU. QSL via VE1FO, direct (w/SAE or SASE + sufficient postage [1 IRC or 2 USDs]) or by the Bureau. No U.S. stamps on SASEs please (They are no good in Canada).

NA-141. (Special Event) Just a reminder! Members of the Jupiter Tequesta Repeater Group will be active as W4K to celebrate John F. Kennedy's birthday from Peanut Island (USI FL-479, Palm Beach County, FL), May 29-30th. Operations will be from "JFK's old Cuban missile crisis bunker". Activity will be focused on HF (mainly 40/20m), 6 and 2 meters using CW and SSB. This will be the first time Peanut Island will be activated. The QSL cards have been designed for the event and can be viewed on their Web page at: http://jtrg.org/DXpedition.shtml

SA-041. (Update/Callsign Change) Members of the Araucaria DX Group will activate the 2nd most wanted IOTA group (Maranhao State West Group) in South America as PX8J (not PW8J as first announced) between June 9-15th. This IOTA group consists of 23 islands, one of these islands is called "Ilha dos Lencois" and it is the location for this DXpedition. According to the group's Web page, 4 experienced DX operators will be on the air around the clock. Operators mentioned are: Ciro/PY7ZY (Team Leader), Fred/PY2XB, Jim/PY7XC and Andre/PY0FF. Lencois Island will be activated for the first time. Likewise, a new DIB and a new Grid Square will be activated (GI78nq). Activity will be on 80-10 meters using CW and SSB. QSL via PY7ZY, by the Bureau or direct. For more details, visit their Web page at: http://www.pw8j.com --or-- http://www.px8j.com
ADDED NOTE: After returning from SA-041, the group will activate Sao Luis Island (SA-016) between June 16-18th. The callsign will be PX8L (not PW8L as first announced).

IS0, SARDINIA. Operators Sergio/IS0SSY, Daniele/IK2SND, Sauro/IK5EKB, Salvatore/IK8UND, Mauro/IN3QBR, Walter/IN3XUG and Gabriele/IZ3GOM will be active as IS0B from Sardinia Island (EU-024) during the RSGB IOTA Contest (July 24-25th) as a Multi-Mix/Resident entry. QSL via IK2SND.

K0, UNITED STATES (Special Event). The Tri-City ARC is sponsoring a special event operation commemorating the 150th anniversary of the Pony Express. Activity will take place between June 6-26th, using the callsign K0BLT. These dates are the same as the annual Pony Express reride. Operations will be on the HF bands (in both the General and Extra portions of the band), using both CW and SSB. A special QSL card (see image on QRZ.com) has already been printed. To receive this QSL, send your QSL with QSO details to K0BLT (via QRZ.com address) with an SASE (REQUIRED). Any DX cards received by the Bureau will also be answered 100%. For more info, Google Pony Express.

MJ0, JERSEY. Mat, MJ0ASP (aka-F5SHQ), will be active during the CQWW WPX CW Contest (May 29-30th) as a Single-Op/All-Band entry. QSL via MJ0ASP.

ON44, BELGIUM (Special Event). Members of the "Radio Club de Binche" will activate the special event callsign ON44WAR from La Gleize between June 19-20th. The timetable of transmissions will be as follows: at the hour up to the hour and a half, transmissions on CW on 7.025 or 3.560 MHz (Paraser MK VII); at the hour and a half up to the next hour, transmissions on SSB on 7 and 14 MHz. QSL via ON7RY.

P4, ARUBA. Jim, PG4DX, will be active P4/PG4DX from Aruba (SA-036, WLOTA LH-0033) between July 18th and August 6th. Activity will be on all HF bands, mainly around the usual island and IOTA frequencies. QSL via his home callsign, by the Bureau or direct.

PACIFIC ODYSSEY 2010 TOUR (Update/Operation Cancelled). On May 27th, members of the Ukrainian DXpeditioners Team (UDXT) announced the following:
"We apologize to the world radioamateur community [illegible] for the reasons independent of us, we are not able to carry out the expedition.

On the 25th of May at 10 p.m. local time the engine of our ship
"Southern Cross" fell out when we were 120 nm from Kanton island.
The captain Paul Green decided to turn the ship and go back to the port
of Apia, Samoa, under sails. Such decision was determined by the fact
that the entry to the Kanton's cove without engines would be impossible,
and the repair of engine in the ocean is impossible too.
The way to Apia, Samoa, will take approximately 8-10 days with favorable
wind under sails. The food and water must suffice. Our main task at the
moment is to come back safe to Apia."
For more information and updates, please visit the DXpedition's Web
site at: http://www.uz1hz.com/pacificodyssey.html

QSL INFO AND NEWS.....
UA4WHX QSLS RECEIVED. Les, WF5E, of the WF5E DX QSL SERVICE, reports:
"I just received my second shipment of 865 QSLs from UA4WHX. They will
be distributed ASAP..... Thanks Vlad."

YI9PSE QSL STATUS. According to their Twitter page (dated May 17th):
"The YI9PSE DXpedition QSL cards have arrived from the printer and
will be in the mail over the next 4-6 weeks."

QSLS VIA LoTW: 5C5W, CN8KD, F4FFH, I5RFD, IZ5JMZ, IZ5NRF, JA6LCJ,
MI0SAI, OH2BCK, RU3EJ, SP7HOV, TN5SN, UN1L, V31MU, VA3MJR and YI1RZ

QSLS RECEIVED VIA MAIL: 3B8CF, 4B2ANT, 5W0YA, 6W2SC, 9Y4/DF8AN, CK8G,
IF9ZWA, IK8TWV, J5UAP, LZ1ND, ST2AR, TM7CC, TM7F, V63DQ, Z33A and
ZK3YA

QSLS RECEIVED VIA THE BUREAU: LX7I, OC1I and OC6I

S7, SEYCHELLES. Juan Carlos, EA2RC, will be active as S79SAL from Mahe
between July 17&#65533;31st. Activity will be on the HF bands. QSL via his
home callsign, by the Bureau or direct. ADDED NOTE: Look for S79SAL to
join Marq, CT1BWW/S79BWW, during his first official WFF (World Flora
Fauna) DXpedition on Seychelles -- reference number WFF004. For more
details, see OPDX.957 or the Web site at: http://www.ct1bww.com/s79bww

SV5, DODECANESE. Max, IZ4JMA, will be active as SV5/IZ4JMA from the
Island of Karpathos (EU-001) between June 6-20th. Max states, "As far
as I know, the island rarely appeared "on the air" (last spot on cluster
is dated 12 June 2001)." The island holds a reference for the Greek
Islands Award (GIOTA) as DKS-016. Activity will be holiday style on
80-10 meters using CW, SSB and the Digital modes. QSL via IZ4JMA direct.

SV5, DODECANESE. Darren, G0TSM, will be active as SV5/G0TSM from Kos
Island (IOTA EU-001) between now and June 2nd. Activity will be on the
HF bands and 6 meters. QSL via his home callsign.

TC2010, TURKEY (Special Event). Members of the Turkish group called TCSWAT
(TC Special Wireless Activity Team) will once again activate the special
callsigns TC2010CCE (European side), TC2010CCA (Asian Side) and TC2010CCI
(Island side) between May 28-30th. For more detailed information on these
special events and their relevant awards, please see the following Web

pages: http://www.ta0u.com
http://www.ta0u.com/2010/eng/pdf/2010AWARDCatalogue.pdf
http://www.ta0u.com/2010/Eng/Calendar.html

TI, COSTA RICA. Olli, OH0XX, will be active as TI5N during the CQWW WPX CW Contest (May 29-30th) as a Single-Op/All-Band/Low-Power entry. QSL via W3HNK .

TP60, FRANCE (Special Event). Francis, F6FQK, reports that members of the "Council of Europe Radio Amateur Club" (CERAC) will be active as TP60CE between June 4-6th. Activity will be on CW, SSB, PSK and the Satellites to celebrate the 60th anniversary of the "Convention of Human Rights". QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

UDCF-2010. Andrew, RN1CW, wants to remind everyone that June 26th and 27th, is the 2010 "United activity Days of Castles and Fortresses" (UDCF). This will be the first time for the international days of activities. The purpose of the event is to visit, work and air the many historical places, monuments and architectural constructions. For more detailed information on UDCF, as well as info on an international award program "WCA - World Fortresses", visit the Web page: http://www.wcagroup.org

VK9C, LORD HOWE ISLAND. Tomas, VK2CCC (aka LY1F), is now active as VK9LL until May 31st. Activity will be limited to his spare time on 160/80 meters, and he plans to participate in CQWW WPX CW Contest (May 29-30th). Tomas has indicated that he has concentrated on 160m at the moment but may be working on 80m two nights during the contest. He is only running 100w. His antenna system is:
TX ant. • inverted L with 51 ground radial
RX ant. • K9AY, beverage 220m to EU/JA, and semi vertical loop (50m long).
He also reports that conditions at the moment are very difficult in VK9L-land with heavy wind of up to 80 km/h and heavy rains every day and every night. It's not very easy to work on antennas. The QRM is very bad for the low bands. QSL cards will be available via an "Online QSL Request System" at the following Web page. QSL by other methods such as LoTW and by the Bureau or direct are via VK2CCC. For updates and possibly more details, visit: http://www.qrz.lt/ly1df/vk9ll.htm

WFF ACTIVITES.....
GREENDAY 2010. Radio amateurs of the whole world are invited to help protect nature and environment, and to participate in the GreenDay 2010 event by working from the territories of the national natural parks and reserves of the world • Especially Protected Nature Territories (EPNT) • included into the WFF Directory. See the WFF Directory at: http://www.wff44.com/en/list
The event takes place between 1200z June 12th, and 1159z June 13th. Modes are CW and SSB, using the 160/80/40/30/20/17/15/12/10 meters. The recommended CQing are: •CQ GreenDay• on SSB and •CQ GD• on CW.

Exchange Numbers: The stations working from territories of the national parks and reserves are sending RST (RS) and WFF directory number. All other participants will send RST (RS). For more details and the rules, see: http://www.wff44.com/en/contest

GMFF-024 - For the first time GM4FFF will be working from Flanders Moss National Nature Reserve (GMFF-024) between May 29-30th. Flanders Moss National Nature Reserve (NNR) is one of the largest areas of relatively undisturbed lowland raised bog in the European Community. Because of its natural heritage importance, it has been designated a European Special Area of Conservation (SAC) and a Site of Special Scientific Interest (SSSI). Quite simply, it is probably the biggest and best remaining raised bog in Western Europe. It is one of the last remaining natural landscapes in Scotland and is home to many plants, insects and birds. It also tells a fascinating story of the social and cultural history of people living in this part of Scotland. There is much to interest people. The team consists of MM0DFV, GM0WRR, and GM0EZP. They are going to contact the reserve's manager to make sure that they can have a place to stay overnight. The most important location references are - WAB Square: NS69; Grid Locator: IO76VD; Latitude: 56°09'12"N; Longitude: 04°10'39"W; IOTA: EU-005; EU Area: SC30 (Stirling). QSL Manager is MM0DFV.

YE1, INDONESIA. Operators YD1JZ, YD1DCF, YD1GCL, YD1ORZ, YC1KAF, YB1ALL, YB1CCF, YB1KAR and YB1NWP will be active as YE1C during the CQWW WPX CW Contest (May 29-30th) as a Multi-Single entry. QSL via YE1C.

ZL8, ZERMADEC ISLANDS (Update). Announced on May 10th, the Zermadec team finally signed the charter contract to sail with the "MV Claymore II" to Raoul Island in November 2010. Nigel Jolly, owner of the well-known Braveheart, purchased this ship in 2009. Originally built in 1966 in Wilhelmshaven, Germany, she now mainly serves the route between Mangareva and Pitcairn Island to deliver cargo supplies to Pitcairn Island and to carry passengers between the islands. While the Braveheart will carry out another DXpedition at nearly the same time, the team is proud to be the first DXpedition to use the "MV Claymore II". Though the ship isn't used to the special needs and habits of amateur radio expeditions, the crew definitely knows what they are doing. Nigel and his son Matt have access to several experienced seamen who all took part in demanding expeditions (of course also DXpeditions like ZL8R, ZL9CI, FT5XO, VP8GEO/THU or VP6DX).

ZS8M, MARION ISLAND (Update). Pierre, ZS1HF, on Marion Island (AF-021), was mainly active on 20 meters this past week. Best times to watch are between 0630-0730z and after 1230z. Frequencies he has been on are: 14245-14250 kHz. QSL Manager is Dirk, ZS1X. See QRZ.com for details.

The following stations are expected to be active in the
CQWW WPX CW Contest (May 29-30th, 2010)

Thanks to Bill, NG3K, for providing OPDX readers with the following

consolidated listing of the participants in the 2010 CQWW WPX CW Contest.
For a more detailed listing (and up-to-date changes/corrections) in HTML
format, please visit Bill's Web page at:

Special Event Station VE7TUB

The Nanaimo Amateur Radio Association, VE7NA,(www.ve7na.ca)
will host a 24 hour special events station VE7TUB beginning on
July 24, 2010 to commemorate the annual running of the
World Championship Bathtub Race to be held on 25 July 2010 in
Nanaimo, British Columbia. For more information on the
World Championship Bathtub Race visit www.bathtubbing.com. For
more information on special event station VE7TUB visit
www.ve7tub.ca.

Thank you very much,
Jean-Michel Hanssens, VA7CIP

. . . . . THE GREAT LIBERTY NET!

Yes! Tonight's the night for the greatest net in the history of amateur radio!

It occurs every Saturday at 22:00 Eastern (02:00 UT) near (usually above) 3950 khz LSB. It is a current events discussion net with heavy emphasis on politics and social issues, often from a conservative/ libertarian viewpoint .... which drives the goofball liberal/marxist Obama-sucking hams so crazy that they often try to jam the net.

Need an excuse to get away from all those leeching relatives that invaded your home for Memorial Day weekend? Then what are you waiting for? Grab all the hot dogs, hamburgers, chips and beer you can carry into your radio room, lock the door, and fire up the old National HRO-60 for a night of radio fun!

399. Re: HEAR YE, HEAR YE. IT'S ALMOST TIME FOR . . . . .

SARL NEWS - SUNDAY 30 MAY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

HAS YOU CLUB, OR HAVE YOU MADE ARRANGEMENTS TO PROMOTE AMATEUR RADIO TO THE YOUTH ON 16 JUNE 2010

FRENCH QSL MYSTERY RESOLVED

LISTEN TO AMATEUR RADIO FROM DEEP SPACE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

HAS YOU CLUB, OR HAVE YOU MADE ARRANGEMENTS TO PROMOTE AMATEUR RADIO TO THE YOUTH ON 16 JUNE 2010

Clubs and individual radio amateurs are encouraged to set up stations in public areas like shopping malls to celebrate Youth Day 2010. It is a great opportunity to demonstrate amateur radio as the greatest of all scientific hobbies and a great primer to encourage young people to take up careers in electronics and communications.

In last week's SARL News Gerhard Coetzee, ZS3TG, said that with the World Cup in full swing and schools on holiday, Radio Amateurs have an unique opportunity to celebrate youth day on 16 June with the SARL Sprint and give South Africa's young people a taste of Amateur Radio and hands-on experience.

There are many prizes to be won during the sprint as well as lucky draw prizes for all who submit a log with a minimum of 10 entries.

Clubs setting up stations are requested to send details to armi@sarl.org.za for inclusion in media releases to be handled by the SARL PIO Network.

Full details of the event are available on www.sarl.org.za from the home page click on youth activity.

Individual radio amateurs are invited to adopt young people for the day and invite them into the shack to operate under your supervision.

FRENCH QSL MYSTERY RESOLVED

Earlier this year, a consignment of QSL parcels destined for overseas Bureau's - including one for France - were dispatched. Shortly after that South African Radio Amateurs started receiving cards destined for France back in the mail. The mystery has now been resolved and the Post office taken to task.

After dispatch, the Post Office went on strike and during this strike period it appeared that one of the QSL parcels was "broken open" by one or more strikers possibly looking for valuables. Now the French Bureau took the trouble to return the empty parcel to us which proved that the SARL QSL Bureau's suspicion was correct.

We sincerely apologize for the negligence displayed by the Postal authorities. We are awaiting a response from the Post Office.

The QSL bureau has already made changes in the packaging material which will make it more difficult for parcels to be opened without some major effort. The QSL bureau has unfortunately no control over employees of the Post Office breaking parcels to check for valuables - which appears to be a common complaint!

LISTEN TO AMATEUR RADIO FROM DEEP SPACE

An informal network of amateur radio experimenters, scientists and CW enthusiasts called FlyVenusCom - a nonprofit, cross-cultural effort - has been created to support communication efforts by Japanese scientists with its CubeSat Venus probe, UNITEC-1.

UNITEC-1 was developed by 20 universities of the University Space Engineering Consortium (UNISEC), the Japanese community developing nano-satellites. Specifically, the Japanese UNITEC-1 team has called for amateur radio assistance worldwide in improving and testing two areas of the CubeSat's mission: Technologies to receive and decode very weak and low bit rate signal coming from deep space, and, technologies to estimate orbit and signal Doppler shift of the satellite based on the received RF signal, essential for tracking and receiving signals from a satellite in deep space.

Bill Vartorella, KJ4ORX, is spearheading the informal FlyVenusCom effort: "The wave of the future is increasingly small, inexpensive, private and non-profit enterprise satellites. The trade-off is many of these satellites will not have sufficient power for robust communications. What should spur amateur interest is that UNITEC-1 will

transmit an Amateur Radio telemetry beacon at 5,840 GHz.

Vartorella said that the signal from UNITEC-1 is mainly a CW beacon of about 1 bps speed. At the core is the Japanese consortium's emphasis that this is the first university-developed interplanetary satellite that will provide a unique and exciting opportunity for the radio amateurs to experiment with receiving signals from deep space. More as the project develops.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 072 is slowly decaying with no sign of a successor yet. The effective sunspot number is expected to be less than 10 for the coming week.

15 m will provide the best opportunities for DX followed by 17 and 20 m. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings it will be good towards Europa. Contacts with the USA are once again becoming challenging. Contacts with Australia and New Zealand will be challenging. During the afternoons and evenings 15 m contacts may also be possible with Brazil although conditions are becoming slightly challenging.

Local conditions are going to be good during the day time on 40 m. 20 m is still useful over the longer distances during the middle of the day. 80 m is best for the shorter distances and also early mornings and late afternoons.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

5 June - Flea market at 10:30 at the ZERABI reception centre half-way between Klerksdorp and Potchefstroom; 16 June - Youth Day celebrations, SARL Sprint; 26 June - VHF indaba at the NARC starting at 12:00; 18 July - Intechnet at 19:30 on VHF/UHF/MICROWAVE matters; 24 July - RTA symposium in Cape Town; 21 August - RTA symposium in Port Elizabeth; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual; 18 September - RTA symposium in Gauteng; 30 September - closing date for phase 1 of the Innovation project.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit

www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.
/EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 30th May 2010

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 7th July at 2pm in the ComReg Offices in Dublin and The Limerick Institute of Technology.

Information on examination fees and other details please see 'Theory Examination' in the 'Information' section of the IRTS website at www.irts.ie

Intending candidates are also referred to 'Studying for the Amateur Radio Examination' in the 'Downloads' section of the website.

The latest date for receipt of applications to sit the examination is Wednesday, 23 June next but it is important to note that places at the exam are allocated on a first come first served basis.

CASHOTA activation in Co Louth.

The organizers of the Carlingford Oyster Festival have invited the Dundalk ARS to demonstrate Amateur Radio to the public, and there will also be some Tall Ships in Carlingford Lough over the weekend. A good outdoor activity is expected for all the family.

Dundalk Amateur Radio Society, is currently activating St. Johns Castle, Carlingford, Co Louth.

WAI squares, EI Counties, and CASHOTA, conditions will be available to stations who call in, operation will be on all HF bands, and on most of the VHF / UHF bands as well. All QSL routes will be catered for.

Call sign of the station will be EI7DAR/P, CASHOTA No :- EI 006/C WAI Sq J11 Louth & MH Locator :- IO64VB

Full details of the event will be available on : www.ei7dar.com and www.cashota-ireland.org/

AREN

AREN members will provide assistance for the Galtee Walking Festival next weekend 5 & 6 June. Anyone that would like to offer their time to help, if even for a few hours, are asked to contact John Ronan EI7IG.

Limerick Radio Club

The Chairman & committee of Limerick Radio Club would like to offer their congratulations to Ger McNamara EI4GXB on his appointment as Secretary of the IRTS, and wish him well in his new role.

Last weekend members of Limerick Radio Club met up with James Dunbar K8JBD from Michigan , who was on holiday in Ireland. Jim & his family were based in Adare Co. Limerick, and travelled around the mid west area. Lots of ideas were exchanged at the informal meeting and it is hoped that further relations between Limerick and Jim can be built up in the future.

Region 4 IRTS

Candidates who have attended classes for the Theory Examination since early January, have now finished formal lecture sessions, and are now doing some more practical work in the coming weeks before the examination on 7th July.

This week they each constructed a 2M J pole antenna, approx cost was 5 for all materials and hopefully they will use it when they pass the exam and get their license. Next week they are building the The GQRP "Limerick Sudden" 40m Receiver Kit.

All kits have been ordered and we expect delivery on Monday/Tuesday. Costing 50 per kit including membership of the GQRP club, goes to show that amateur radio need not be an expensive hobby if you are willing to do some homebrewing.

We are delighted that the Theory Examination will take place at the Limerick Institute of Technology as a 2nd centre to the Comreg offices in Dublin. Anyone intending to sit the exam in Limerick is welcome to attend our last couple of classes, please contact Ger McNamara EI4GXB QTHR.

Vintage Radio Museum

Since the beginning of May and until the end of October, the Vintage Radio Museum in Howth is open everyday from 11am till 4pm. A trawl through the visitors' book reveals that the majority of visitors are from outside Ireland who have heard of the museum by word of mouth or through the internet.

Sadly, many Irish people do not seem to appreciate what is on their own doorstep. The museum is run on a voluntary non-commercial basis by Pat Herbert, an enthusiastic collector of radio memorabilia for the last 50

years.

A trip to Howth including a visit to the museum is highly recommended, especially during the summer months. Visits by small groups or clubs are particularly welcome. Recently, the museum was rated second in the "Odd Museums" category of the Dubliner magazine.

The Howth Martello Radio Group operates an amateur radio station, EI0MAR on most weekends and other amateurs would be more than welcome to visit and operate the station by prior arrangement. The antennas are on the roof of the Martello Tower. A Cobwebb antenna, kindly donated by Jack EI7HX, and a 40-metre dipole with each half in the shape of the letter W cater for HF while a home-brew Slim Jim caters for 2 metres and 70 centimetres.

Contact details and more information are on the website www.ei0mar.org. You can also email to info /at/ ei0mar.org or telephone to 086-8154189.

Assistance for Mini Marathon

Anyone interested in taking part with Communications for the Women's Mini Marathon please contact George EI2CPB on 0862586103 or email adjayeg /at/ dcu.ie. A 2m Radio or Mobile Phone is required for participation. This is an AREN event and will evolve being available from approx 13.30-17.30 on the day.

A get together and lunch for all who participated will be happening the following week on Saturday 13th John 16.30 in the Step Inn.

DAR AGM

All DAR Members are requested to attend the AGM at 8.30pm Wednesday 2nd June at the clubhouse in Dundalk.

CARA Field Day

Crossakiel Amateur Radio Association will be holding their annual field day in Crossakiel on the 12th/13th of June.

They plan to use a range of radios and antennas covering most bands and will be operating through the night. The EI 4 CARA will be used for this event.

All visitors are welcome.

SEARG Meeting

The next general meeting of South Eastern Amateur Radio Group will take place on Monday 31 May 2010 at 8.30 p.m. in the Roanmore Centre, Cleaboy Road, Waterford.

The meeting will be preceded by a meeting of the committee at 8.00 p.m. on the same night.

Tipperary Amateur Radio Group

The next meeting of the Tipperary Amateur Radio Group will take place on Thursday next the 3rd of June in Raheen House Hotel Raheen Road Clonmel at 8.00 pm ,Allare welcome

---

Geo Park Weekend

For the third year running, South Eastern Amateur Radio Group ran the special event station EI2GEO from Tankardstown, Co. Waterford on the Copper Coast Geopark for the Geopark communications weekend over the 22nd and 23rd of May. The annual Geopark communications weekend is co-ordinated from GB6GEO at Kents Cavern in Torquay, in the heart of the English Riviera Global Geopark and numerous stations operated from various Geoparks throughout the world.

The Copper Coast European Geopark is located on the South East coast of Ireland. It extends from Fenor in the east to Stradbally in the west and as far north as Dunhill. The Copper Coast gets its name from the 19th Century copper mines that was once predominant in the area. The Copper Coast consists of 25 kilometers of spectacular coastline. Oceans, volcanoes, deserts and ice sheets all combined to create the rocks, which provide the physical foundation of the natural and cultural landscapes of the Copper Coast. The Copper Coast is an outdoor geology museum with geological heritage that reflects a variety of environments under which the area has evolved over the last 460 million years. Sedimentary and volcanic rocks illustrate the closure of the Iapetus Ocean, the resulting volcanic activity, evidence of the collision of two continents leading to the creation of Ireland and finally the effects of glaciation from the Ice Age. Cross-sections of these are exposed on the many spectacular cliffs along the Co. Waterford coastline.

In addition to the excellent weather conditions, the band conditions were favourable throughout the weekend with many QSOs worked on various HF bands. Those on site were; Francis EI5GOB, Declan EI5GRB, Jim EI8IG, John EI7IG, John EI8JA and Mark EI7IS.

Saturday, saw a number of visitiors to the station, most notable were a group of scouts some of whom had particular interest in radio. Martin EI8FFB also called along on the Saturday night for some late night 40 and 20 metre operation.

South Eastern Amateur Radio Group would like to thanks all those who helped out, provided equipment, operated or visited over the weekend. Special thanks to the Coppercoast management who as always are very supportive and helpful to us in setting up the special event station and special thanks also to Jim EI8IG for providing the camper van and for providing a full Irish breakfast on the Sunday morning.

Rallies

Saturday 29th May 2010 Mid Ulster Amateur Radio Club Rally, Drumgor Youth Centre, Drumgor Heights, Craigavon Information: www.muarc.com

For further Rally info and contact details please check out the IRTS Website.

http://www.irts.ie/cgi/rallies.cgi

History this Week

1844 Morse sends his first telegraph message, "What hath God wrought!" to his associate 40 miles away.

1953 Sir Edmund Hillary and Tensing Norkay climb Mount Everest.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Ohio/Penn DX Special Bulletin No. 961.1
The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 961.1
BID: $OPDX.961.1
June 1, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, NC1L, KH6BZF, A35A and various sources for the following DX information.

3C9B AND 3C0C DXPEDITION (Update). Dates have been announced for the upcoming Bioko Island (AF-010), Equatorial Guinea, and Annobon Island (AF-039) DXpedition. Both operations will only be manned by two Spanish operators. Operators mentioned are: Elmo/EA5BYP (SSB and RTTY) and Javi/EA5KM (CW and SSB). The team is expected to leave Thursday, June 3rd, for Bioko Island, and be on the air the very next day as 3C9B. Activity will last until June 7th. They state, "We will spend as much time as possible on the radio. There we will pick up our supplies to live on the island of Annobon for 14 days." The operators also mention that (edited) "they have undertaken a great effort, both physical and financial, in preparing this DXpedition, but unfortunately, for reasons beyond our control, we have been unable to go in April." Look for activity to be on 160-6 meters using CW, SSB and RTTY. The team states (edited), "We know the importance of an activation on 160m from the island of Annobon." Suggested frequencies are:
CW - 1830 (Asia/Oceania RX 1820-1825), 1832 (Europe RX 1835-1840 and North/South America 1833-1835), 3524, 7024, 10115, 14024, 18071, 21024, 24892, 28024 and 50104 kHz
SSB - 1850, 3790, 7065/7165, 14195, 18140, 21275, 24940, 28475 and 50140 kHz
RTTY - 3582, 7038, 10140, 14082, 18102, 21082, 24922 and 28082 kHz

The team will have three HF stations, but will only have two stations on the air. Antennas to be used are: Spiderbeam (20/17/15/12/10m), 80 meter vertical, 160 meter Inverted L, Cushcraft 5 element yagi on 6m and SteppIR (80-6m). They will also use beverages and K9AY for RX on the lower bands. During their operation from Annobon Island, they will not have an InterNet connection, so the logs will be published after their DXpedition. QSL via EA7FTR. For more details and updates on the 3C0C and 3C9B DXpeditions, visit the Web page at: http://www.3c0c-annobon.com

KH6BZF PROPAGATION FORECAST/REPORT (For June 1-7th)....
Jun 1 AN SOLAR REFERENCE KEYS
Jun 2 AN-LN --------------------
Jun 3 AN-LN BN - Below Normal
Jun 4 AN AN - Above Normal/Geomagnetic Level is QUIET
Jun 5 AN LN - Low Normal
Jun 6 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jun 7 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

A3, TONGA. Paul, A35A (A35RK), informs OPDX that David Lee, W6ZL, arrived on Tonga last week. He reportedly skippered the "SV Summer Sky" from New Zealand to Nuku'alofa. He brought his K3 and a Buddipole antenna. He renewed his A35KL license. He is on Tongatapu (OC-049) right now. No QSNs have been reported yet, but Paul hopes to see him on Ha'apai (OC-169) in a week or so. He's bringing Paul repair parts, so he hopes to be active again soon.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
The following operation are approved for DXCC credit:

3B8EME - Mauritius Island; 2010 Operation
9UPVI/9U1P Burundi 2010 Operation
9U2T - Burundi; 2010 Operation
9X0CW - Rwanda; 2010 Operation
9X0LX - Rwanda; 2010 Operation
YI9HOC - Iraq; 2009 Operation

If you had QSOs rejected for any of these operations send an E-mail to dxcc@arrl.org to be placed on the list to update your DXCC record.

FS - ST MARTIN, NA-105
John,FS/K9EL, will stay on St. Martin (NA-105, DIFO FS-001, WLOTA 0383)
from Jun 8-17. He will be active in CW, SSB and RTTY on 80m-6m as much
as possible with his IC-7000 and verticals.
QSL via homecall, direct or via bureau.

HB0 - LIECHTENSTEIN
David,OK1FJD/OK6DJ, will sign HB0/OK6DJ/p from Jun 3-6 (including the
IARU Region 1 Fieldday). He will use a Kenwood TS480 and a G5RV aerial.
QSL via OK1DRQ, bureau, direct or LoTW.

SV5 - DODECANESE, EU-001
Max,SV5/IZ4JMA, will be QRV in "holiday style" on 10m-80m (including
digital modes) from Karpathos (EU-001, GIOTA DKS-016) from Jun 6-20.

T30 - WEST KIRIBATI, OC-017
Haru,JA1XGI/W8XGI, will show up as T30XG from Tarawa (OC-017) working
in CW, SSB and digital modes on 40-6m from Jun 3-9. His QRGs will be:
CW: 7.020, 10.115, 14.030, 18.085, 21.030, 28.030, 50.110 MHz,
SSB: 14.185, 21.260, 28.450, 50.130 MHz,
RTTY: 10.140, 14.090, 18.105, 21.090, 28.090 asd 50.115 MHz.
Haru will manage his QSLs himself via bureau or direct after his return
home. More information can be found at http://island.geocities.jp/t30xg

TP - COUNCIL OF EUROPE
The "Council of Europe Radio Amateur Club" will activate the special
callsign TP60CE from Jun 4-6. This call celebrates the 60th anniversary
of the European Convention of Human Rights. QSL via bureau to F5LGF.
Online logs will be available at: http://ewwa.free.fr

ZD8 - ASCENSION ISLAND, AF-003
Takao,JE1WVQ, will be active as ZD8J from Georgetown/Ascension (AF-003)
working on 80m-10m and in digital modes from Jun 2-8. QSL via homecall.

3C0 - ANNOBON ISLAND, AF-039
The updated 3C0C homepage states that Elmo,EA5BYP, and Javier,EA5KM,
plan to activate Bioko Island (AF-010) as 3C9B from Jun 4-6 and then
Annobon Island (AF-039) as 3C0C from Jun 8-20. They will work in CW,
SSB and RTTY on 160m-10m with emphasis put on the lowbands and CW.
An online log will be available only after the DXpedition because they
have no internet connections on the islands. For more information and
their online log visit their website: http://www.3c0c-annobon.com
Their QSL manager is EA7FTR: Francisco Lianez Suero, Asturias #23,
21110 Aljaraque, Huelva, Spain. Please allow a runtime of about one
year for bureau QSLs. Following frequencies were announced (in MHz):
BAND CW SSB RTTY
6m 50.104 50.140 ---
10m 28.024 28.475 28.082
12m 24.892 24.940 24.922
15m 21.024 21.275 21.082
17m 18.071 18.140 18.102
20m 14.024 14.195 14.082
30m 10.115 --- 10.140
40m 7.004 7.065/ 7.038
7.165
80m 3.524 3.780 3.582
160m 1.832 1.850 --- CW: TX QRG for EU/NA (split up).
CW: For AS/OC their TX QRG is 1.830 MHz
with split down.

8Q - MALEDIVES, AS-013
Tom,PF4T, will spend his holidays on Embudu Island (AS-013) from
Jun 5-25. He will be QRV as 8Q7TB working with 100 watts from his
Yaesu FT-897d, a FD4 and a G5RV antenna in SSB and RTTY on 80m-10m.
QSL via bureau or direct to PF4T. See also: http://8q7tb.pf4t.nl

9M6 - EAST MALAYSIA, OC-295
John,9M6XRO/p (CW), and Steve,9M6DXX/p (SSB), will be active from
Sebatik Island (OC-295) from Jun 3-5. Sebatik Island ist a most wanted
IOTA spot. QSLs for both callsigns are handled by M0URX, via bureau,
direct or LoTW.

9V - SINGAPORE
Loren,AD6ZJ, is visiting Singapore on a business trip from Jun 6-28.
He will be QRV in RTTY, SSB and CW mostly on the WARC bands signing
9V1/AD6ZJ during his free time especially in the nights or weekends.
QSL via bureau, direct or LoTW to AD6ZJ.

CARIBBEAN TOUR
Andrea,IK1PMR, and Claudia,PA3LEO, are travelling to the Caribbean
from Jun 8-21 and will work in holiday style as follows:
Jun 8-12: Sint Maarten, PJ7/IK1PMR and PJ7/PA3LEO
Jun 12-21: Anguilla, VP2EMR and VP2ECF
Activities will take place with 100 watts in CW and RTTY mostly on the
WARC bands. QSLs via PA3LEO.

PACIFIC ODYSSEY 2010 TOUR
The Pacific odyssey 2010 has been cancelled! On May 27 the members of the "Ukrainian DXpeditioners Team" (UDXT) announced that their planned T31/ZK3 DXpedition had to be cancelled due to a machine failure of their ship "Southern Cross". More details can be found on their website http://www.uz1hz.com/pacificodyssey.html

CHILE, SPECIAL EVENT STATION
The Chilean war of independence started 200 years ago. The special event station XR200R is marking this event until the end of the year. QSL direct or via bureau to CE1KR.

FRANCE, SPECIAL EVENT STATIONS
Arnault,F4GAJ, will be on the air from Jun 5-19 using the special call TM6OVE. He reminds of the "Operation Overlord" which was an operation of the Western Allies in the Second World War, which had the goal of pushing back the German occupiers in Northern France. The Operation Overlord lasted from Jun 6, 1944 (the D-Day), until Aug 25, 1944, when the Allies freed France's capital Paris.
QSL manager for TM6OVE is F4GAJ, he sends QSLs direct or via bureau.

Michel,F6IPS, will be QRV as TM66SME during the anniversary of D-Day from Jun 4-13. QSLs direct or via bureau to F6IPS.

ITALY, SPECIAL EVENT STATIONS
The members of the ARI section Treviglio are celebrating the 30th anniversary of their ARI section by using the special callsign II2TRE in all modes on all bands until Jul 31. QSL via IQ2DN.

II3JD will be QRV from the submarine "Dandolo" in Venice during the "Museum Ships Weekend" on Jun 5/6. QSL direct or via bureau to IW3IE.

THE NETHERLANDS, SPECIAL EVENT STATIONS
PA08DWN will be QRV from the radio shack of the tug boat "Elbe" on Jun 5, Jun 27, Jul 25, Aug 29 and Oct 2. The "Elbe" is a museum ship near Rotterdam. QSL via PA3ALM.

Piet,PA3CCQ, is signing PI65SRA in CW on 10m, 20m, 40m and 80m until Jun 20. This is one of many calls celebrating the 65th anniversary of the Dutch amateur radio society VERON. QSLs via bureau.

LINKS: Current SOTA activities (mountain summits) are announced at: http://www.sotawatch.org
---
Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The special event station 8S8RBB will be QRV from onboard the ship "R-142 YSTAD" during the "Museum Ships Weekend" on Jun 5/6. More information about this activity can be found at http://www.navyradio.se

UPCOMING CONTESTS

Jun 5/6: IARU Region 1 CW Fieldday

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-050, Puglia (Foggia) Region Group: Franco,IL7/IK4YCQ, will be QRV from
San Domino Island/Tremiti Islands from Jun 5-10. QSL via homecall.

EU-062, LA, Nordland/Nord-Trondelag County Group: Waldi,LA/SP7IDX, is active
from Engeloya Island from Jun 2-17. QSL via homecall.

EU-127, DL, Schleswig-Holstein State SW Group: Markus,DJ4EL/p, is working
from Helgoland-Duene (EU-127, GIA N-15, WLOTA LH 2130) from Jun 3-7.
QSLs are available direct or via bureau.

NA-092, W5, TX State West Group: Max,NN5L, is planning an activity as NN5L/p
from North Padre Island from Jun 5-8. QSL via homecall (direct/bureau).

SA-025, PS8, Piaui State Group: Orlando,PY2OP, wants to activate the island
Grande de Santa Isabel as ZV8S and PS8/PY2TJ from Jun 2-7.
QSL via PT2OP (direct/bureau).

Lighthouse activities (WLOTA/ARLHS/ILLW)

HIGHLIGHTS FROM WIA AGM WEEKEND BROADCAST.

ACMA Cancels Amateur Licence

KEEP ON TRUCKIN'

VK Shires second running is on next weekend.

70 centimetre repeater of City Of Brisbane Radio Society QRT

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING JUN 06 2010

Michael Owen VK3KI President of our Wireless Institute of Australia
has executed a contract to purchase the premises it is presently renting
at Unit 20, 11 - 13 Havelock Road, Bayswater.

Use of the premises for 18 months has satisfied the Directors that they meet
the WIA's needs.

The Directors are considering calling the premises Andersson House, in honour of Henry Andersson VK8HA.

Henry was an Honorary Life Member of the WIA, the first national WIA Intruder Watch Coordinator, and ran the VK8 QSL Bureau for 38 years. Henry Andersson passed away on 6 October 2004. His will left his house and land at Humpty Doo, near Darwin to the WIA. That generous bequest provided much of the funds necessary to acquire the premises at Bayswater.

WIA Centenary Update

For the full year being January through December 2010 and with the help of it's members, the WIA is celebrating the Centenary of organised Amateur Radio in Australia.

The year long celebration, with the centre point this weekends 100th WIA AGM in the nations capital is in recognition of the foundation of the WIA and the very start of organised amateur radio in Australia during 1910.

11 March, 1910 a meeting of like-minded people in the Hotel Australia, Martin Place, Sydney, formed the Institute of Wireless Telegraphy of Australia, and soon after dropped the word 'telegraphy' from its name. Chairman of the founding meeting, George Taylor, proposed "the formation of an institution amongst experimenters and enthusiasts in wireless for their mutual benefit."

A range of initiatives and activities happening in 2010 provide an opportunity for every VK/AX radio amateur to be involved in what is already a memorable celebration.

Special event callsign VK100WIA is very popular.

Want to know more? Full details are available on wia.org.au under the 'WIA Centenary Celebrations' section. It contains a lot of information including activities.

The first activity this year was the VK9NA 2010 - VHF/UHF/Microwave DXpedition to Norfolk Island in January. A team of experienced VK amateurs operated bands from 6 metres to 10GHz. This was the first time such an expedition has been mounted on these bands from VK9 Norfolk Island.

For more info, log on to: www.vk9na.com

Valentines Day saw the Centre Victoria RadioFest at Kyneton VK3.

A Radio, Astronomy and Electronics Expo was held in April organised by the Midland Amateur Radio Club and held in the Old Bendigo Fire Station. This drew lots of non amateurs and showed of our hobby as well as that of Astronomy.

A Re-enactment of the first wireless press message received from Britain in Australia is set to occur June 16-18. The Gippsland Gate Radio and Electronics Club will re-enact this historical wireless milestone that occurred in 1921 at Koo-wee-rup south-east of Melbourne.

More information about activities to be held by WIA affiliated clubs will appear as they are announced again when you visit wia.org.au

The WIA annual general meeting and activities program in Canberra last weekend was a real eye opener!

Astronaut Tracy Caldwell-Dyson KF5DBF talked to the WIA Centenary Dinner in Canberra.

The weekly Sunday morning VK1WIA broadcast hosted by your's truly Graham VK4BB was transmitted live from the venue.

A highlight was the trip to Dick Smiths old time flying school, and giant Toy shed!!

D-STAR CANBERRA
Icom Australia kindly donated a new D-Star repeater to the WIA for installation in the Canberra area. This is a donation to the WIA from Icom to celebrate 100 Years of the WIA.

The announcement of this donation was made by Takashi Aoki, Manager of Icom Australia at the official WIA Centenary dinner on Saturday night.

The Canberra Region Amateur Radio Club will be the WIA D-Star Club responsible for the installation and operations of repeater on behalf of the WIA.

The repeater will be operational on 2mtrs (Port C) and have the callsign of VK1RWN. The timeframe for the installation and operations of the VK1RWN repeater is yet to be determined.

Thank you to Icom Australia for this generous donation

PUBLIC TRANSPORT CANBERRA STYLE
Thank you to Gil VK1GH, Brendan VK1HAX and Alan VK1WX for assisting the WIA transport the international guests to and from the airport.

VK100WIA LIVE IN CANBERRA

Although only had only simple antennas and band conditions were not with us we achieved a credible result, close to 300 contact over three days. Most of the contacts on HF were on 40M however there were some on 80m and 20M, as well as contacts via our repeaters we had numerous contacts on DSTAR including the Netherlands and the USA

The equipment used was loaned by ICOM Australia, the HF Transceiver an IC7600 was popular with the users and all who used it wanted to take it home, however we could not work out a method to smuggle it out with out it being missed.

As the station manager I would like to say a big thank you to the following volunteers who manned the station

Peter VK1NPW, Peter VK1PE ,John VK1CJ, Deane VK1DW, Dale VK1DSH, Ian VK1PE, Bill VK1WPR, VK1IAN, Brendan VK1HAX, Nick VK1NK, ED VK1EJ and Michael. VK1XYZ.

VK1MA Matt and VK2NSS Steve also volunteered. Because of the cancellation of the outdoor event the station was used for the live broadcast

unfortunately they were unable to operate the station for their time slots.

(Alan VK1WX)

All in all a great weekend, a great year, 2010 the year the Wireless Institute of Australia turns 100.

Lets do a quick whip around VK with Justin VK7TW then a few highlights again from last weekends 100th AGM broadcast presented by WIA Directors.

HAMS ACROSS AUSTRALIA.

VK1
vk1 local news email broadcast@vk1.wia.ampr.org and ask for subscription.

At the WIA Centenary dinner C.R.A.R.C. was presented with a 2m Digital Voice repeater and Controller. President of CRARC, Peter VK1NPW would like to thank ICOM and the WIA for this generous gift.

VKC Roundup http://www.police

"Celebrating 100 years of the WIA on Sunday 30th May ARK's Academy students sat upgrade exams, all students decided they wanted to go straight to Advanced with the results that five passed , two missed out by a single question and one by two questions (these three will be having another try in

the next few days)

Arks courses are an intensive self help system that run over five weeks and are proven to work, all courses are free of charge

Expressions of interest are now open for those who would like to attend Ark's academy's next upgrade course to be held in Nunawading (Melbourne) a little later in the year. The courses are limited to ten candidates so booking is required.

Please e-mail vk3ark@wia.org.au to reserve your place in the next course"

(John Fisher VK3DQ / VK3ARK)

VK4 - QNEWS

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I'm applauding 100 yrs of growth.

Last weekend, as we have heard, marks the centenary of organised amateur radio in the land down under. With technology tours, ARISS contact and formal recognition of the history by the WIA at its Canberra meeting, we all have been privileged to participate in something both historic and ceremonial.

Live broadcasts are taken for granted these days, in a news hungry world, but we don't often have the pleasure of such an activity on the amateur bands.

The fact that the radio amateur participates in a practice which incorporates so much in the wide, wide world from radio astronomy and space communications to the comfort of the musical and broadcast programs we have in our homes and with which we travel, seems to take us from vicarious pleasure to the sense of participation and immediacy that few other hobbies can.

To all those people who have made the effort to promote this first 100 years of the hobby, I say thank you. As the year goes on and the voices of VK100WIA move around the country, let us all reflect and enjoy this year; this is the year for amateur radio in VKland, for all amateurs.

In remembering the past we must now ask "where to in the future?"

Yes last week the cold of the national capital was offset in shacks around the country by the live broadcast of WIA National News. Good work and thanks to all involved from the crew on the ground, in Canberra, to the re-broadcasters who got the audio to air.

Recently I was lucky enough to be given some old magazines by a fellow amateur who is having a shack clean-up. One which caught the eye was the December, 1985 Amateur Radio. Jumping out of the pages was a 2 page photo spread of the WIA 75th Anniversary Dinner, in Melbourne. Many of the faces and call signs were familiar but the last time I saw these same people they had redecorated themselves and lighter coloured thatch on the roof seems more popular now.

After the news broadcast it was off to a local radio club meeting. In the anniversary year there seems to be a cluster of activities over the next few months, not the least will be the operation of VK100WIA. Plans are afoot to get the message out about these activities so I expect to hear more on QNews. I hope you and your club can continue with scripts and audio and we all can share your activities on the "Q".

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING -

GOLD COAST AMATEUR RADIO SOCIETY
http://www.goldcoastamateurradio.com
IRLP Node 6702

There will be a Annual General Meeting at the Club Rooms 85 Harper St., Nerang at 10.am on Saturday 19th June. Look for as many members as possible to attend this meeting.

(Kaye VK4VKS)

Ipswich and District Radio Club

Allan VK4FABR on behalf of Ipswich and District Radio Club president Mike VK4QS, members and friends.

We invite you to come and join some interclub radio fellowship at the "interclub BBQ & boot sale" Today Sunday June 6 from 10.30am.

We'll have a BBQ sausage sizzle, BYO steak if you like. The venue is our clubhouse 10 Deebing Street, Ipswich

Come and enjoy a great day on June 6th. Bring whatever radio gear you have for sale. The car boot sale will be in the car park next door to the club.

We are also hoping to have a fox hunt on the day. For more information visit the club website www.ipswichdistrictradioclub.webnode.com

RSVP by May 30 to
empire1915@optusnet.com.au

or phone Mike VK4QS - 07 3282 9539

Redcliffe and District Radio Club

I'm Ray VK4CF with news from the Redcliffe AR Club.

At last Monday night's meeting, Peter VK4EA presented a slide presentation on the new repeaters cavities & set-up of the equipment at the repeater site. Despite local cleaning around the site for the elimination of weeds and grass, all the work on the upgrade of the club's repeater is now been completed.

Club Secretary, Peter, VK4TAA, advised the meeting of the club's AGM to be held at the club rooms on Monday 21st June. Nominations forms for elected positions can be obtained directly from Peter via the club's website.

Next Monday will be the visit to the Brisbane airport traffic control tower. Those going are asked to meet at the club car park at 6pm - 6.15pm and a car pool will operate to take members to the venue. There are still several spots open for the air traffic control visit so contact Scotty, VK4FLAE or Charlie VK4YZ know if you will be going.

The 3rd Monday of each month is a technical talk held at the club rooms. In June the tech talk night will be the 2nd Monday 14/6/10, due to AGM and James, VK4TJF will present Amateur DXing, DXpeditions and QSL cards. Later in the year in August, Kevin VK4UH will discuss the DX Expedition to Norfolk Island and in September, Peter VK4TGV will discuss the Codan NGT radio and modems.

VK100WIA - 100 years of amateur radio. Kev VK4UH will be leading the club's hosting of the event on 30 August to 1 September 2010.

Peter VK4HOY, will hold a BBQ for the Club Monday 7th June starting 6pm at the club, followed by the usual club meeting. There will be rissoles, salad, buns Tea, coffee & soft drinks etc. This is a fund raising exercise for the club & proceeds will go direct to the club for equipment purchases.
A suggested $5 for food plus usual club drink prices will apply. Please let Peter, VK4TAA, know by email if you are attending for the catering.

A working bee will be held at the club on Monday 14th June starting at 9am at the club. It is planned to relocate the mast, re-install the triband antenna & a series of new roof mounted antennas. The club will also conduct its yearly spring clean. This a large commitment so many hands are needed on deck to help. There will be the usual free sausage sizzle for the workers.

So until next week, for Redcliffe club, I'm Ray VK4CF.

TOWNSVILLE

GREETINGS ! THIS IS DON VK4FNQA IN CARDWELL MODE,
WITH NEWS FROM WONDERFUL WINTER WEATHER NORTH QUEENSLAND !

THE TARC INC WILL BE HOLDING THE PROJECT NIGHT THIS
TUESDAY EVENING FROM 7-30PM AT THE CLUB STATION.
EVERYBODY WELCOME TO COME ALONG AND HELP BUILD,
FIX OR DISMANTLE SOMETHING !

THE TWENTY SEVENTH FAR NORTH AND NORTH
QUEENSLAND AMATEUR RADIO GATHERING IS HAPPENING
THIS COMING WEEKEND AT CARDWELL.
APART FROM LOTS OF SERIOUS LOAFING AND SOCIALISING
THAT WILL BE HAPPENING AT THE CARDWELL VILLAGE
BEACHCOMBER MOTEL AND TOURIST PARK A FEW
SCHEDULED EVENTS WILL ALSO TAKE PLACE.

BE PART OF A GUIDED TOUR OF THE CARDWELL
TELEGRAPHIC MUSEUM FROM 10AM SATURDAY.
VOLUNTEERS WILL SHOW YOU INTRICATE DETAIL OF THE
DISPLAYS AND WILL ALSO BE PROVIDING TEA AND BIKKIES.

YOU WILL BE ABLE TO TRY AND WIN YOUR FORTUNE - OR
GET RID OF ALL THAT PESKY SMALL CHANGE WITH THE 25
AND 50 CLUBS THAT WENDY AND RAY VK4NET WILL BE
RUNNING FROM COMFY CHAIRS.

YOU WILL HAVE A TONNE OF FUNNE AND EXERCISE
THE BRAIN CELLS AT THE FAMOUS TREC TRIVIA
CHALLENGE AS QUIZ MASTER DALE VK4DMC CONDUCTS
A SATURDAY EVENING OF MIRTH AND FACTS

YOU WILL HAVE THE CHANCE TO OBTAIN VK100WIA
COMMEMORATIVE PLATES AND MUGS THAT CHERYL
VK4FRYL WILL HAVE ON DISPLAY AND WILL BE
SELLING FOR A SHORT WHILE DURING THE WEEKEND

EVERYBODY LOVES A "CAR BOOT" SALE.......
THE CAR BOOT SALE WILL BE HAPPENING DURING
THE WEEKEND WITH ITEMS FOR SALE NOT ONLY
RADIO IN ORIGIN. THATS RIGHT YLS AND XYLS, ITS
A CHANCE TO DECLUTTER THE ENTIRE QTH, NOT
JUST THE RADIO SHACK. FILL YOUR CARD BOOT
WITH AS MUCH STUFF AS YOU CAN, AS DEMAND
IS SURE TO BE SUBSTANTIALLY VORACIOUS !

YOU WILL GET TO DEFEND THE HONOUR OF YOUR
REGION, OR HAVE HEAPS OF GIGGLES AT SOME OF
THE ANTICS THAT HAPPEN AT THE TRADITIONAL NORTH
QUEENSLAND VERSUS FAR NORTH QUEENSLAND
SUNDAY CRICKET MATCH - THEN TEAM UP WITH
EVERYONE FOR THE CLASSIC GROUP PHOTO SESSION.

THERE WILL BE SOME AMATEUR RADIO DIRECTION
FINDING HAPPENING WITH TARCS WORLD GRADE
RADIOSPORT FOXES HIDDEN IN CUNNING PLACES.
BRING YOUR ARDF GEAR ALONG AND HAVE SOME
FUN IN THE RESORT FINDING THOSE WILY FOXES !

PUT UP AN AERIAL AND ACTIVATE THE CASSOWARY
COAST REGION FOR THE VK SHIRES CONTEST.

IF YOU HAVENT ALREADY DONE SO, AND YOU ARE
LEAVING IT EXTREMELY LATE,
GET CRACKING AND ARRANGE YOUR
ACCOMMODATION AS IT IS ALL RUNNING OUT FAST.
REMEMBER IT IS ALL HAPPENING FROM FRIDAY 11TH
TO MONDAY 14TH JUNE.
RING RECEPTION AT THE PARK RIGHT NOW ON
1800 005633

SO, WHILE YOU ARE ON THE PHONE TRYING TO
MAKE THAT BOOKING I WILL BRING THIS EDITION
OF QNEWS FOR THIS SUNDAY SIXTH OF JUNE TO A CLOSE.

THIS HAS BEEN DON VK4FNQA IN A RATHER
COOLISH TROPICAL PARADISE FOR THE
TOWNSVILLE AMATEUR RADIO CLUB INC, AND
YOU HAVE BEEN LISTENING TO, AND ENJOYING QNEWS FROM VK4WIA..

VK5

The south east radio group are having their annual convention on Saturday
the 12 and Sunday the 13 of June at the Margret street scout hall behind
the mount Gambier police station.

This year, a few changes. The scout hall will now open at 12 noon
on the Saturday and the first fox hunting event starts at 11am on Saturday.

Canteen is open with hot food and drinks, commercial displays, the
popular home brew contest, preloved equipment and lucky door prizes from Icom
and Yaesu.

Go along and see serg celebrate the wia centenary with the call sign
VK100WIA.

For more information or to book a table look at the web site.

To get there just Google serg that's s.e.r.g. and follow the links to the
convention pages.

HIGHLIGHTS FROM WIA AGM WEEKEND BROADCAST.

WIA Club Grants Scheme

Ewan: Hello GraHam and greetings to our listeners on this special day in the history of the WIA and Amateur Radio in Australia.

GraHam: Ewan, I understand you have something to say about the WIA Club Grants Scheme?

Ewan: Once again the WIA is requesting Amateur Radio Clubs and Groups submit applications for the ever popular Club Grants Scheme.

Friday 30th July is the closing date for applications for the WIA Club Grants Scheme for 2010. Full details of the 2010 rules for the scheme can be obtained from the WIA Web site, together with a template setting out the suggested application headings for an executive summary, identifying how the club seeks to meet the objectives of the scheme and guidance regarding supporting documentation.

GraHam: What is the objective of the scheme?

Ewan: The objective of the scheme is to promote and advance amateur radio, the WIA and its Affiliated Clubs by supporting useful and/or innovative projects undertaken or to be undertaken by Affiliated Clubs.

GraHam: So how are the applications received by the cut-off on 30th July this year assessed?

Ewan: The Club Grants Committee, comprising well known and respected amateurs, will recommend to the Board the projects that should be supported and the amount to be allocated to each supported project. However, the final decisions rest with the WIA Board.

Affiliated clubs are encouraged to participate in this opportunity and not be discouraged by past unsuccessful proposals. However, GraHam, it is most important that clubs read the rules very carefully.

WIA SECRETRARY GEOFF ATKINSON VK3AFA

This is Geoff Atkinson VK3AFA WIA Secretary with news from the WIA Bookshop.

The bookshop operates from the WIA offices in Bayswater, providing direct sales to members who attend the office as well as servicing on line and mail order requests. We carry a broad range of ARRL and RSGB publications, along with the Foundation Licence Manual, Radio Theory Handbook by Fred Swainston, Drew Diamonds Technical Projects and the annual Callbook.

We also have a range of merchandise featuring both WIA regular and WIA centenary logos. Polos, Vests, shirts, Jackets, caps and bucket hats. All of which can be viewed on the WIA website.

Now let me introduce Mal Brooks, VK3FDSL, our new WIA Manager who looks after the bookshop along with the volunteers.

Welcome Mal.

Good Morning, this is Mal Brooks VK3FDSL. The bookshop is a valuable service to members and we endeavour to provide competitively priced products whilst being mindful of exchange rates and freight costs, both of which contribute to fluctuating prices and impact the profitability of the bookshop.

We will be adding new books from ARRL and RSGB in the near future and we encourage you to look out for them on the bookshop web page.

Thanks Mal

Now I also have some news on the National Inwards QSL bureau.

Following the introduction of changes to the inwards QSL Bureau operation, I am pleased to provide a brief update.

We have received positive feedback from a number of overseas bureaux now that they only have to send cards to one address in Australia, and consequently we have received parcels from a variety of these overseas bureaux, the largest arriving last week, with 9Kgs of cards from Spain.

The cards are usually sorted within 24 hours of receipt and sent on to the State QSL Managers for further distribution to members.

We have noted that some cards have QSO's dating back into the 1990's and many are for special event callsigns activated within Australia over past years as well as more recent events.

We believe the changes made are helping members receive their cards more quickly.

National Field Day.

This is Philip VK3JNI on behalf of the National Field Day committee.

On Saturday 23rd October 2010, Amateur radio enthusiasts from all over Australia will be showcasing amateur radio in prominent locations throughout their local area.

The recommended hours of operation for the National Field Day are between 09:00 to 21:00 Hrs Eastern Daylight time.

This activity, new to Australia, will be a good opportunity to break out your field day equipment, demonstrate emergency preparedness, show your favourite modes of operation, and add a little colour and movement to engage the public.

Cubs are encouraged to start identifying possible locations for your station. You should start discussing the possibility of running a National Field Day station with the property managers. In some cases, approvals may take some time so an early start is recommended.

The National Field Day committee consisting of Paul VK5PH, Fred VK3DAC and Gerard VK5ZQ are interested in your views on items such as National Field Day clothing. Would you like a Cheap and Cheerful tee-shirt or something more substantial such as a knitted shirt with collar, long sleeve shirt with a pocket, or even a fleecy vest?

Would you like to see an on-line logging program, so you can see what modes and frequencies other filed day stations are working?

Have you an idea for a Logo or Slogan for the National Field Day?

For more information please keep an eye on the contest pages of the WIA Website or to contact the committee, email nfd@wia.org.au.

ACMA Flags UHF Spectrum Changes - Peter Young

On Friday 30th April, the Australian Communications and Media Authority (ACMA) released its third discussion paper on the replanning arrangements for the 400 MHz spectrum. A copy of the paper can be found on the ACMA website.

The WIA provided detailed submissions to the two previous papers in respect to the 70cm amateur UHF band allocations in the 400 to 520 MHz spectrum. The WIA is also a member of the Radiocommunications Consultative Committee 400 MHz working group.

The 400 to 520 MHz spectrum is one of the most congested pieces of spectrum in Australia and to provide for ever expanding needs, this spectrum will be divided into 12.5 kHz channel segments. The rearrangements will now allow harmonised spectrum for government users across Australia.

The latest ACMA has confirmed that the segment between 430 to 440 MHz is out of scope for the purposes of the replanning exercise. Within this band the amateur service is a secondary user to Defence and these arrangements will continue into the future.

To accommodate government user requirements, the existing amateur secondary allocation in the 420 to 430 MHz will be withdrawn. This has already occurred in a number of states already.

To assist in the transitional arrangements, which may take many years to complete, the ACMA has suggested that the amateur secondary allocation in 440 to 450 MHz may be used on a temporary basis from time to time. This arrangement has occurred in the past and is only an option.

In response to the paper, the WIA will be seeking further information on these arrangements. The closing date for comments is 6th June.

ACMA Cancels Amateur Licence

The Australian Communications and Media Authority has cancelled an amateur station licence following an investigation that uncovered continuing breaches by the licensee. Under the Radiocommunications Act 1992, the ACMA can suspend or cancel an amateur licence if the licensee contravenes a condition of the licence. In the case of the recent cancellation, crucial information was provided by other radio amateurs that alerted the ACMA to the ongoing non-compliance and assisted the investigation.

In this case, the breaches included causing interference to other stations, failing to use a call sign and transmitting an unmodulated carrier.

The ACMA made the decision to cancel the amateur licence when other compliance and enforcement measures had failed. The ACMA say in their reporting that every effort had been made to assist, encourage and educate the licensee to understand the importance of compliance with licence conditions. Despite repeated warnings to the licensee, the ACMA found that non-compliance continued over an extended period of time.

The WIA has welcomed the action taken by the ACMA. "While it is extremely unusual for amateurs to ignore their obligation to comply with the law, the fact is that there have been instances of extreme behaviour that requires enforcement action. This action by the ACMA should remind us all that it will act when necessary" said WIA President, Michael Owen VK3KI.

Bob VK6POP
Jamboree On The Air

Jamboree On The Air, also known by its initials JOTA, is the largest international event conducted by Scouts, and occurs annually on the third weekend of October. This year it's on 15th to 17th of October.

Scout groups everywhere rely on the generous support of Amateur operators and others in order to provide an interesting JOTA programme to the young people they lead.

This year, I've been able to put together a small team to collect and collate programme ideas and resources to make JOTA and JOTI weekends more interesting and rewarding for young people. I am soliciting these resources from around the country and beyond. We will be seeking these until early July, when they will be sorted and compiled for use as programme material. You can contribute materials to the team by email. To avoid giving out complicated email addresses on air, simply email me at vk6pop@wia.org.au to establish contact, and we can take it form there.

I'm looking forward to JOTA being a great success in 2010, and this will only happen with your support, so please seriously consider supporting hams of the future by supporting JOTA.

RadioActive

RadioActive is an Amateur Radio Award for Scouts and Scout Leaders who hold an Amateur Radio License. The Award operates over the entire month of July, and Scouts who earn sufficient points will receive an award certificate at Bronze, Silver or Gold levels.

The award is designed to encourage young people to get on air more frequently, and to contact as many other Scout stations as possible.

A QSO-athon will be held on the weekend 9-10-11 July, providing an opportunity to earn more points.

Throughout the period of the award, special stations will be designated "Scout Headquarters" stations, or "Bonus Points" stations.

Contacts made with these will earn extra points.

I encourage all Scouts of all ages to participate, and to encourage others to join in. Let's get RadioActive.

Canberra students enjoy ARISS contact
Jim Linton VK3PC

Ten students from the Trinity Christian School at Wanniassa in the Australian Capital Territory made history at the weekend with the first Amateur Radio on the International Space Station (ARISS) program contact to be held in Canberra. The event was part of the Wireless Institute of Australia (WIA) centenary dinner attended by 200 people including international guests, Australian Communications and Media Authority Chairman Chris Chapman, and WIA Centenary Patron Dick Smith VK2DIK.

After the ARISS contact Elizabeth Shen and William Shaw said they were both extremely impressed by the efforts made by astronauts to qualify and fly in space, giving them encouragement to strive in their chosen careers. Elizabeth, aged 17 added: 'The opportunity to speak to someone above the space station was one of the best experiences in her life.' While William, aged 18, said 'It was really cool to be able to talk to someone who is in a completely different situation - with the zero gravity and what not.'

Trinity Christian School Principal, Carl Palmer VK2TP/VK1TP was justifiable very proud of his students.

WIA President Michael Owen VK3KI presented each with a participation certificate. WIA Centenary Patron Dick Smith VK2DIK - aviator, adventurer and entrepreneur - shook their hands, spoke to them about their experience and had his photograph taken with them.

News of the ARISS contact made the news bulletins on three Canberra radio stations and a detailed story with photograph has appeared in the Sunday Canberra Times newspaper.

Emergency Communications - EmComms - Phil Wait, VK2ASD

Several years ago the WIA board formed an opinion that a training package should be developed to enable all radio amateurs to improve their emergency communications skills.

At the last AGM Open Forum we announced that the board had requested Fred Swainston (VK3DAC) to identify suitable competencies for radio amateurs in emergency communications, initially at a basic level.

Fred's advice was that existing competencies within the Australian Vocational Education and Training system could be applied to amateur radio emergency communications, with minor modification.

In the July 2009 the scheme was announced.

Following a significant amount of work, particularly by Fred Swainston and Peter Young, we now have 16 Trainers and over 230 people have registered for

training, far more than expected.

We are hopeful that training will commence shortly and will be progressively rolled out over the remainder of this year.

The board has also been considering what role the WIA should adopt in relation to WICEN.

We wish to identify a truly meaningful role for the WIA in WICEN, each different 'WICEN' responds to its own local needs, and therefore any future role for the WIA is likely to be limited to what can be done at a National level.

On behalf of the board I would like to thank all those who have contributed to the implementation of the EmComms training scheme, whether by encouragement or comment, your input has been most valuable. In particular we would like to thank Fred Swainston for his effort far beyond what could be reasonably expected, and also Ewan McLeod and especially Peter Young for driving the implementation forward.

BPL and Standards Activities

Wide-area Access-BPL appears to have all but vanished from the Australian telecommunications landscape. Also, Smart Metering trials in Australia appear to have bypassed Access-BPL in favour of other technologies.

However, my guess is that in-house BPL is likely to become a major issue in Australia.

Now, in-house BPL modems are being supplied by a number of retailers and in-house BPL may possibly find application as part of the mix for in-home distribution of entertainment services supplied via the NBN.

For instance, in the UK more than 1 million pairs of in-home BPL modems have been installed by British Telecom, with large numbers of interference complaints to their regulator, OFCOM.

The WIA continues to be a very active participant in Standards Australia. The international CISPR BPL working group, in which Standards Australia has been an active participant, has not been able to reach consensus within the time allowed. So its work has now ceased.
This is not good news, because without a CISPR standard BPL manufacturers are likely to adopt other industry developed standards which are likely to be less favourable to amateur radio.

I would again like to thank the WIA's BPL working group members, Justin Giles-Clark , Fred Johnston, Keith Malcolm, Gilbert Hughes, David Wardlaw, Barry White, and Peter Young, for their efforts over the last, thankfully quieter, year.

Phil Wait, VK2ASD

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

SARL SPRINT TO CELEBRATE YOUTH DAY 16 JUNE 2010

"With the World Cup in full swing and schools on holiday Radio Amateurs have a unique opportunity to celebrate youth day on 16 June with the SARL Sprint and give South Africa's young people a taste of Amateur Radio and hands-on experience", says Gerhard Coetzee, ZS3TG, SARL Councillor for Youth Activity.

Clubs are encouraged to set up stations in public areas like shopping malls to demonstrate amateur radio as the greatest of all scientific hobbies and a great primer to encourage young people to take up careers in electronics and communications.

Full details of the event are available on www.sarl.org.za

Individual radio amateurs are invited to adopt young people for the day and invite them into the shack to operate under your supervision.

Data Transfer via Lighting System

The Engadget website ran a story on a lighting system that has been developed in China that uses the lighting to transfer data.

LED data transmission used to be all the rage. Then we got omni-directional Bluetooth and building-penetrating WiFi, and put all that caveman stuff behind us.

But now, scientists the world over are looking to bring back line-of-sight networking, and the latest demonstration has Chinese researchers streaming video to a laptop with naught but ceiling-mounted blue LEDs.

The Chinese Academy of Sciences claims to have realized a 2Mbit per second internet connection that transmits data simply by modulating the flicker of the little diodes, and imperceptibly enough to have them serve as room lighting as well.

Like Boston University before them, the Chinese scholars see short-range LED networks controlling smart appliances.

engadget.com/2010/05/17/chinese-scientists-demonstrate-2mbps-internet-connection-over-le/

Radio amateur joins PARIS project

The Paper Aircraft Released Into Space (PARIS) project has announced that Radio Amateur Steve Daniels G6UIM has joined the team.

The plan is for the paper aircraft Vulture 1 to be released from a weather balloon that will carry it to over 30 km.

Steve G6UIM, who built his first Compukit UK101 computer in 1979, has been working on the main payload radio beacon and Vulture 1 GPS board. A Yaesu FT-817 will be used to receive the signal.

Vulture-1

KEEP ON TRUCKIN'

An Essex-based radio ham is transmitting live images from his truck as he travels around the UK.

From a dashboard mounted webcam in his delivery truck, Paul Young, G0HWC transmits an image of the road ahead once every 30 seconds.

And, just in case you can't figure out exactly where he is at the moment, Paul has a live APRS map on his website too.

Paul has a impressive and comprehensive SSTV website which is full of useful information.

You'll find it at: http://www.g0hwc.com/

The Truckcam has its own URL http://www.truckcam.tv

IT'S THE LAW

While the laws of physics weren't made to be broken, sometimes they need revision as work with the Transistor Laser has shown.

ScienceDaily reports:

A major current law has been rewritten thanks to the three-port transistor laser, developed by Milton Feng and Nick Holonyak Jr. at the University of Illinois.

With the transistor laser, researchers can explore the behaviour of photons, electrons and semiconductors. The device could shape the future of high-speed signal processing, integrated circuits, optical communications, supercomputing and other applications. However, harnessing these capabilities hinges on a clear understanding of the physics of the device, and data the transistor laser generated did not fit neatly within established circuit laws governing electrical currents.

"We were puzzled," said Feng, the Holonyak Chair Professor of Electrical and Computer Engineering. "How did that work? Is it violating Kirchhoff's law? How can the law accommodate a further output signal, a photon or optical signal?"

AMATEUR RADIO ASTRONOMERS FIND SUPER SECRET SPACE PLANE

A group of amateur radio-astronomers have accomplished what the military was likely hoping would not happen.

They have spotted the super-secret U.S. Air Force X-37B mini space plane on-orbit.

Amateur Radio Newsline's Frank Haas, KB4T, says the un-piloted X-37B Orbital Test Vehicle 1 was lofted on April 22 atop an Atlas launcher.

It is being flown under the auspices of the U.S. Air Force Rapid Capabilities Office. From there it entered a proverbial cone of silence regarding its on-orbit duties. But thanks to a worldwide network of amateur sky watchers, the spacecraft is reportedly in a 39.99 degree inclination, circling the Earth in an orbit 401 kilometres by 422 kilometres.

The next phase in the amateur astronomers tracking of the X-37B will be an attempt to see if the space plane is emitting any radio signals!

The US Air Force has not said what the robotic ship is for, but analysts say the X-37B is but most guess that it is likely a high altitude spy craft.

==========

WEIRD AND WONDERFUL

Amateur Radio & Hollywood

The sale of KE6PZH's Amateur Radio equipment has been re listed on eBay after not selling in a recent auction. Although listed on the FCC Data base as Martin Brandeaux he would be known more Internationally as Marlon Brando!

Also the holder of Callsign FO?GJ , he was QRV occasionally from his from his private French Polynesian Island.

or W3KM

Both SSB and CW is worth contact points and expect a lot of JA's on the bands.

International Lighthouse and Lightship Weekend

Registrations for this fun event in August are steadily being made and so far there are 175 from 26 countries. A flood of registrations traditionally

occur closer to the weekend.

Leading the progressive tally is Germany on 35 with Australia on 28, but about 40% more registrations are anticipated from those two countries alone.

The International Lighthouse and Lightship Weekend has its origins in Scotland through the efforts of Mike Dalrymple GM4SUC, now a silent key, and other members of Ayr Amateur Radio Group GM0AYR (GMzeroAYR).

It has steadily grown in popularity over the years. Its website ILLW.NET has registration guidelines.

There's now also ILLW on Facebook with more than 200 followers where those activating lighthouses can show 'n tell and share information.

The International Lighthouse and Lightship Weekend ILLW.NET will be held on the 21st and 22nd of August.

Spratly Island DXpedition 2011 DX0DX
IOTA AS-051, CQ Zone 26 and ITU Zone 50 (Report #1 210510)

A multi-national team of up to 30 radio amateurs from nine countries is in advanced preparation operate from Spratly Island group in the South China Sea.

Following 12 months of discussions with military and civilian authorities permission has been received to operate on Thitu Island (Pagasa in Filipino, the second largest island in the Spratly Islands with a population of about 100.

The DXpedition, organised by the South Pacific Contest Club, will run from 6 to 24 January with the final 420km travel leg for three groups of operators, equipment and supplies is by cargo boat.

All supplies including food, water and fuel to sustain the DXpedition needs to be transported to the island.

The team includes five doctors which is not only reassuring other DXpeditioners, but will provide a welcome humanitarian effort through free medical checks for those permanently on the remote island.

The plan is to have four CW stations, four Phone, a RTTY/Digital Modes plus VHF/UHF.

Sponsors include ICOM (America), Ham Radio Outlet, SpiderBeam, Heil Sound and DX Engineering. Further corporate sponsorship and funding is expected, and individual donations will be acknowledged.

The DXpedition is supported by the IARU national radio society, Philippine Amateur Radio Association (PARA).

The team leader is Chris VK3FY. The rest of the team to date includes: Keith VK3FT, Roger VK3FZ, Peter VK3FGRC, Jim VK3PC, Nik VK3FNIK, Allan VK2GR, Josette VK2FXGR, Wally VK6YS, Dindo DV1DIN, Ed DU1EV, Edward 4F1OZ, Cholo 4F8BOF, Kaye DV9XO, Toshi JA8BMK, San K5YY, Oscar EA1DR, Christian EA3NT, George EA2TA, Vincent F4BKV, Bjorn SMOMDG, Charles W6KK, Arnold N6HC, Robert N6OX, John N7CQQ, David AH6HY, Simon IZ7ATN, and Bill N6WB.

Chris VK3FY is due to visit The Philippines soon to check out the logistics arrangements and ensure all other requirements are finalised.

A website is now up and running: http://www.dx0dx.net/

ZL3 ham prosecuted for QRO transmitter

A New Zealand radio amateur has been convicted for being in possession of a radio transmitter capable of operating at a significantly higher power than permitted by his Amateur Radio Operators General Licence.

The New Zealand Ministry of Economic Development's (MED) Radio Spectrum Management division was alerted to a You Tube video showing a transmitter allegedly operated at 3100 watts, far in excess of that maximum permitted limit of 500W PEP.

He was found guilty in Christchurch District Court of breaching section 113 of the Radiocommunications Act 1989. The magistrate found the charge proven, imposed a fine of $1,750 and ordered $130 be paid for costs, plus radio equipment forfeiture.

In a media statement the MED explained that it had taken the action because excessive power has the potential to cause interference to, and disrupt to other radio services in the local area.

(VK3PC)

BPL to rise like the phoenix in Egypt

Just when commentators had written off Broadband over Powerlines (BPL) comes news that Egypt-based SABA Electric is getting into the act.

It has formed a partnership with ISP LINKdotNET and has plans for easy access to the internet through BPL.

In a media statement SABA Electric said BPL is the technology it will use to provide to provide broadband data speed up to 8 Mbps that include a number of Voice over Internet Protocol and video options.

On complete build out the network could reach over 300,000 residents.

(Jim Linton VK3PC)

UNITEC-1 signal received!

Signals have been received from the Amateur Radio satellite UNITEC-1 which is on its way to Venus.

CW and FSK signals was received from UNITEC-1 at a distance of 300,000 km, no other Amateur Radio satellite has travelled this far before. It has some 50 million km to go before it reaches its destination.

Japanese ground stations worked together to receive the UNITEC-1 signal on the first pass over Japan on May 21 and they report:

Measured Frequency 5839.91 MHz

The latest news on UNITEC-1 is available at the Operation Centre website along with free software and a Ham Radio forum, see
http://sites.google.com/site/unitec1ops/

A fully detailed description of the UNITEC-1 satellite and its capabilities and data structure appeared in Oscar News No 188

COMET CRASH INTO SUN OBSERVED BY STEREO

Solar physicists at the University of California at Berkeley have captured for the first time the collision of a comet with the sun.

Using data radioed back to Earth from instruments aboard NASA's twin STEREO spacecraft, the four researchers at UC Berkeley's Space Sciences

Laboratory were able to track the comet as it approached the sun and estimate an approximate time and place of impact. They then looked at data from the terrestrial Mauna Loa Solar Observatory in Hawaii, and found images in the predicted spot of what appears to be a comet approaching the edge of the sun from behind the solar disk. While the comet apparently survived the heat of the corona and disappeared in the chromosphere, evaporating in the 100,000-degree Kelvin heat.

The Solar Terrestrial Relations Observatory or STEREO was launched in 2006 and consists of identical spacecraft orbiting the sun. One is in orbit ahead of Earth and one behind. This provides a human eye-like stereo view of the sun.

You can read more at tinyurl.com/28er687

(ARNEWSLINE)

WW SPECIAL INTEREST GROUPS --- QRP

Using QRP via DFCW

Bob, VK7ZL, has been continuing with his low power experiments on the 30M band using Dual Frequency CW. With DFCW each morse element is the same length but the dashes are 5Hz higher in frequency than the dots thus producing a regular step pattern which is much more visible than regular 6 second dot morse.

Bob's current set-up is a transmitter running 5 watts with the output fed into a home brew step attenuator of 7dB and 10dB.

With 10dB switched in an output of 500mW is obtained and that signal is regularly seen on the grabbers of both ON5EX and PA1GS at about 0500 GMT. On Thursday, 20 May, ON5SL received the signal via long path, about 22,900Km, and in his words "using a 1/4 wave vertical with almost no radials on dry soil".

The receiver was a Kenwood R5000.

Bob's antenna is a resonant inverted V dipole at about 9 metres at the apex fed with 50 metres of RG213 coax so the actual radiated power would be somewhat less than the measured power at the transmitter end.

Radio Amateurs assist search

Press reports say the New Zealand Amateur Radio Emergency Corps provided communications during a search for two hunters lost in the New Zealand bush.

The New Zealand Stuff website reports that the two hunters went missing in the Ranges off the Napier-Taupo road. A search ensued involving Police, Land Search and Rescue volunteers from tramping and hunting clubs, and members of the Amateur Radio Emergency Corps who provided communications.

Senior Sergeant Luke Shadbolt, of Hastings, said the men were found on the Napier-Taupo Road after "an uncomfortable night in the bush".

They apparently told police they were "geographically challenged".

(SouthGate)

REWIND

Rewind a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others, that is being published in the WIA journal Amateur Radio magazine.

Conflicts between private transmitting, receiver listening and wireless commercial interests

While the WIA has been continually recognised as the representative body both nationally and internationally, there was a deal of instability within the ranks of Australian experimenters between 1927 and 1937.

An alternative society initially known as the Queensland Radio Transmitters League began in 1927 and renamed the Australian Radio Transmitters League, was primarily concerned about the undue influence of commercial interests at the expense of private experimenters.

The majority of experimenters in Tasmania, South Australia and Victoria stood by the WIA though the ARTL had also been established in those states.

With good will and expressions of common purpose during six months of negotiations in 1929, most state ARTLs merged with the WIA, the last merger was in Western Australia in 1932.

In NSW, a further organisation, the Amateur Radio Association was established and became affiliated with the WIA. It was in effect a de facto Division of the WIA in that state.

This was brought about because New South Wales had been under the dominance of the Institution of Radio Engineers (IRE), the group representing those engaged professionally in wireless.

This situation remained until the IRE allowed the legal re-forming of the Wireless Institute (in NSW) during 1937.

Much of the instability during the decade 1927-37 was related to conflicting interests of amateur transmitting experimenters and the substantial growth in receiving only members often coupled with the commercial interests of individuals.

As a living organisation, the WIA has undergone many changes to reflect the issues of the times and interests of its members.?

Representing all amateur experimenters, now known as radio amateurs to the authorities was one of the initial aims 100 years ago and continues today in an ever changing world.

WIA Centenary Update

D-STAR CANBERRA

VK4 - QNEWS

HIGHLIGHTS FROM WIA AGM WEEKEND BROADCAST.

ACMA Cancels Amateur Licence

KEEP ON TRUCKIN'

VK Shires second running is on next weekend.

70 centimeter repeater of City Of Brisbane Radio Society QRT

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING JUN 06 2010

Michael Owen VK3KI President of our Wireless Institute of Australia
has executed a contract to purchase the premises it is presently renting
at Unit 20, 11 &#65533;" 13 Havelock Road, Bayswater.

Use of the premises for 18 months has satisfied the Directors that they meet the WIA's needs.

The Directors are considering calling the premises Andersson House, in honour of Henry Andersson VK8HA.

Henry was an Honorary Life Member of the WIA, the first national WIA Intruder Watch Coordinator, and ran the VK8 QSL Bureau for 38 years. Henry Andersson passed away on 6 October 2004. His will left his house and land at Humpty Doo, near Darwin to the WIA. That generous bequest provided much of the funds necessary to acquire the premises at Bayswater.

WIA Centenary Update

For the full year being January through December 2010 and with the help of it's members, the WIA is celebrating the Centenary of organised Amateur Radio in Australia.

The year long celebration, with the centre point this weekends 100th WIA AGM in the nations capital is in recognition of the foundation of the WIA and the very start of organised amateur radio in Australia during 1910.

11 March, 1910 a meeting of like-minded people in the Hotel Australia, Martin Place, Sydney, formed the Institute of Wireless Telegraphy of Australia, and soon after dropped the word 'telegraphy' from its name. Chairman of the founding meeting, George Taylor, proposed "the formation of an institution amongst experimenters and enthusiasts in wireless for their mutual benefit."

A range of initiatives and activities happening in 2010 provide an opportunity for every VK/AX radio amateur to be involved in what is already a memorable celebration.

Special event callsign VK100WIA is very popular.

Want to know more? Full details are available on wia.org.au under the 'WIA Centenary Celebrations' section. It contains a lot of information including activities.

The first activity this year was the VK9NA 2010 - VHF/UHF/Microwave DXpedition to Norfolk Island in January. A team of experienced VK amateurs operated bands from 6 metres to 10GHz. This was the first time such an expedition has been mounted on these bands from VK9 Norfolk Island.

For more info, log on to: www.vk9na.com

Valentines Day saw the Centre Victoria RadioFest at Kyneton VK3.

A Radio, Astronomy and Electronics Expo was held in April organised by the Midland Amateur Radio Club and held in the Old Bendigo Fire Station. This drew lots of non amateurs and showed of our hobby as well as that of Astronomy.

A Re-enactment of the first wireless press message received from Britain in Australia is set to occur June 16-18. The Gippsland Gate Radio and Electronics Club will re-enact this historical wireless milestone that occurred in 1921 at Koo-wee-rup south-east of Melbourne.

More information about activities to be held by WIA affiliated clubs will appear as they are announced again when you visit wia.org.au

The WIA annual general meeting and activities program in Canberra last weekend was a real eye opener!

Astronaut Tracy Caldwell-Dyson KF5DBF talked to the WIA Centenary Dinner in Canberra.

The weekly Sunday morning VK1WIA broadcast hosted by your(tm)s truly Graham VK4BB was transmitted live from the venue.

A highlight was the trip to Dick Smiths oldtime flying school, and giant Toy shed!!

D-STAR CANBERRA
Icom Australia kindly donated a new D-Star repeater to the WIA for installation in the Canberra area. This is a donation to the WIA from Icom to celebrate 100 Years of the WIA.

The announcement of this donation was made by Takashi Aoki, Manager of Icom Australia at the official WIA Centenary dinner on Saturday night.

The Canberra Region Amateur Radio Club will be the WIA D-Star Club responsible for the installation and operations of repeater on behalf of the WIA.

The repeater will be operational on 2mtrs (Port C) and have the callsign of VK1RWN. The timeframe for the installation and operations of the VK1RWN repeater is yet to be determined.

Thank you to Icom Australia for this generous donation

PUBLIC TRANSPORT CANBERRA STYLE
Thank you to Gil VK1GH, Brendan VK1HAX and Alan VK1WX for assisting the

WIA transport the international guests to and from the airport.

VK100WIA LIVE IN CANBERRA

Although only had only simple antennas and band conditions were not with us we achieved a credible result, close to 300 contact over three days. Most of the contacts on HF were on 40M however there were some on 80m and 20M, as well as contacts via our repeaters we had numerous contacts

on DSTAR including the Netherlands and the USA

The equipment used was loaned by ICOM Australia, the HF Transceiver an IC7600 was popular with the users and all who used it wanted to take it

home, however we could not work out a method to smuggle it out with out

it being missed.

As the station manager I would like to say a big thank you to the following volunteers who manned the station

Peter VK1NPW, Peter VK1PE ,John VK1CJ, Deane VK1DW, Dale VK1DSH, Ian VK1PE, Bill VK1WPR, VK1IAN, Brendan VK1HAX, Nick VK1NK, ED VK1EJ and Michael. VK1XYZ.

VK1MA Matt and VK2NSS Steve also volunteered. Because of the cancellation of the outdoor event the station was used for the live broadcast unfortunately they were unable to operate the station for their time slots.

(Alan VK1WX)

All in all a great weekend, a great year, 2010 the year the Wireless Institute of Australia turns 100.

Lets do a quick whip around VK with Justin VK7TW then a few highlights again from last weekends 100th AGM broadcast presented by WIA Directors.

HAMS ACROSS AUSTRALIA.

VK1
vk1 local news email broadcast@vk1.wia.ampr.org and ask for subscription.

At the WIA Centenary dinner C.R.A.R.C. was presented with a 2m Digital Voice repeater and Controller. President of CRARC, Peter VK1NPW would like to thank ICOM and the WIA for this generous gift.

"Celebrating 100 years of the WIA on Sunday 30th May ARK's Academy students sat upgrade exams, all students decided they wanted to go straight to Advanced with the results that five passed , two missed out by a single

question and one by two questions (these three will be having another try in the next few days)

Arks courses are an intensive self help system that run over five weeks and are proven to work, all courses are free of charge

Expressions of interest are now open for those who would like to attend Ark's academys next upgrade course to be held in Nunawading (Melbourne) a little later in the year. The courses are limited to ten candidates so booking is required.

Please e-mail vk3ark@wia.org.au to reserve your place in the next course"

(John Fisher VK3DQ / VK3ARK)

VK4 - QNEWS

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I'm applauding 100 yrs of growth.

Last weekend, as we have heard, marks the centenary of organised amateur radio in the land down under. With technology tours, ARISS contact and formal recognition of the history by the WIA at its Canberra meeting, we all have been privileged to participate in something both historic and ceremonial.

Live broadcasts are taken for granted these days, in a news hungry world, but we don't often have the pleasure of such an activity on the amateur bands.

The fact that the radio amateur participates in a practice which incorporates so much in the wide, wide world from radio astronomy and space communications to the comfort of the musical and broadcast programs we have in our homes and with which we travel, seems to take us from vicarious pleasure to the sense of participation and immediacy that few other hobbies can.

To all those people who have made the effort to promote this first 100 years of the hobby, I say thank you. As the year goes on and the voices of VK100WIA move around the country, let us all reflect and enjoy this year; this is the year for amateur radio in VKland, for all amateurs.

In remembering the past we must now ask "where to in the future?"

Yes last week the cold of the national capital was offset in shacks around the country by the live broadcast of WIA National News. Good work and thanks to all involved from the crew on the ground, in Canberra, to the re-broadcasters who got the audio to air.

Recently I was lucky enough to be given some old magazines by a fellow amateur who is having a shack clean-up. One which caught the eye was the December, 1985 Amateur Radio. Jumping out of the pages was a 2 page photo spread of the WIA 75th Anniversary Dinner, in Melbourne. Many of the faces and call signs were familiar but the the last time I saw these same people they had redecorated themselves and lighter coloured thatch on the roof seems more popular now.

After the news broadcast it was off to a local radio club meeting. In the anniversary year there seems to be a cluster of activities over the next few months, not the least will be the operation of VK100WIA. Plans are afoot to get the message out about these activities so I expect to hear more on QNews. I hope you and your club can continue with scripts and audio and we all can share your activities on the "Q".

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING -

GOLD COAST AMATEUR RADIO SOCIETY
http://www.goldcoastamateurradio.com
IRLP Node 6702

There will be a Annual General Meeting at the Club Rooms 85 Harper St., Nerang at 10.am on Saturday 19th June. Look for as many members as possible to attend this meeting.

(Kaye VK4VKS)

Ipswich and District Radio Club

Allan VK4FABR on behalf of Ipswich and District Radio Club president Mike VK4QS, members and friends.

We invite you to come and join some interclub radio fellowship at the “interclub BBQ & boot sale” Today Sunday June 6 from 10.30am.

We&#65533;(tm)ll have a BBQ sausage sizzle, BYO steak if you like. The venue is our clubhouse 10 Deebing Street, Ipswich

Come and enjoy a great day on June 6th. Bring whatever radio gear you have for sale. The car boot sale will be in the car park next door to the club.

We are also hoping to have a fox hunt on the day. For more information visit the club website www.ipswichdistrictradioclub.webnode.com

RSVP by May 30 to
empire1915@optusnet.com.au

or phone Mike VK4QS - 07 3282 9539

Redcliffe and District Radio Club

I'm Ray VK4CF with news from the Redcliffe AR Club.

At last Monday night&#65533;(tm)s meeting, Peter VK4EA presented a slide presentation on the new repeaters cavities & setup of the equipment at the repeater site. Despite local cleaning around the site for the elimination of weeds and grass, all the work on the upgrade of the club&#65533;(tm)s repeater is now been completed.

Club Secretary, Peter, VK4TAA, advised the meeting of the club&#65533;(tm)s AGM to be held at the club rooms on Monday 21st June. Nominations forms for elected positions can be obtained directly from Peter via the club&#65533;(tm)s website.

Next Monday will be the visit to the Brisbane airport traffic control tower. Those going are asked to meet at the club car park at 6pm &#65533;" 6.15pm and a car pool will operate to take members to the venue. There are still several spots open for the air traffic control visit so contact Scotty, VK4FLAE or Charlie VK4YZ know if you will be going.

The 3rd Monday of each month is a technical talk held at the club rooms. In June the tech talk night will be the 2nd Monday 14/6/10, due to AGM and James, VK4TJF will present Amateur DXing, DXpeditions and QSL cards. Later in the year in August, Kevin VK4UH will discuss the DX Expedition to Norfolk Island and in September, Peter VK4TGV will discuss the Codan NGT radio and modems.

VK100WIA &#65533;" 100 years of amateur radio. Kev VK4UH will be leading the club&#65533;(tm)s hosting of the event on 30 August to 1 September 2010.

Peter VK4HOY, will hold a BBQ for the Club Monday 7th June starting 6pm at the club, followed by the usual club meeting. There will be rissoles, salad, buns Tea, coffee & soft drinks etc. This is a fund raising exercise for the club & proceeds will go direct to the club for equipment purchases.
A suggested $5 for food plus usual club drink prices will apply. Please let Peter, VK4TAA, know by email if you are attending for the catering.

A working bee will be held at the club on Monday 14th June starting at 9am at the club. It is planned to relocate the mast, re-install the triband antenna & a series of new roof mounted antennas. The club will also conduct its yearly spring clean. This a large commitment so many hands are needed on deck to help. There will be the usual free sausage sizzle for the workers.

So until next week, for Redcliffe club, I'm Ray VK4CF.

GREETINGS ! THIS IS DON VK4FNQA IN CARDWELL MODE,
WITH NEWS FROM WONDERFUL WINTER WEATHER NORTH QUEENSLAND !

THE TARC INC WILL BE HOLDING THE PROJECT NIGHT THIS
TUESDAY EVENING FROM 7-30PM AT THE CLUB STATION.
EVERYBODY WELCOME TO COME ALONG AND HELP BUILD,
FIX OR DISMANTLE SOMETHING !

THE TWENTY SEVENTH FAR NORTH AND NORTH
QUEENSLAND AMATEUR RADIO GATHERING IS HAPPENING
THIS COMING WEEKEND AT CARDWELL.
APART FROM LOTS OF SERIOUS LOAFING AND SOCIALISING
THAT WILL BE HAPPENING AT THE CARDWELL VILLAGE
BEACHCOMBER MOTEL AND TOURIST PARK A FEW
SCHEDULED EVENTS WILL ALSO TAKE PLACE.

BE PART OF A GUIDED TOUR OF THE CARDWELL
TELEGRAPHIC MUSEUM FROM 10AM SATURDAY.
VOLUNTEERS WILL SHOW YOU INTRICATE DETAIL OF THE
DISPLAYS AND WILL ALSO BE PROVIDING TEA AND BIKKIES.

YOU WILL BE ABLE TO TRY AND WIN YOUR FORTUNE - OR
GET RID OF ALL THAT PESKY SMALL CHANGE WITH THE 25
AND 50 CLUBS THAT WENDY AND RAY VK4NET WILL BE
RUNNING FROM COMFY CHAIRS.

YOU WILL HAVE A TONNE OF FUNNE AND EXERCISE
THE BRAIN CELLS AT THE FAMOUS TREC TRIVIA
CHALLENGE AS QUIZ MASTER DALE VK4DMC CONDUCTS
A SATURDAY EVENING OF MIRTH AND FACTS

YOU WILL HAVE THE CHANCE TO OBTAIN VK100WIA
COMMEMORATIVE PLATES AND MUGS THAT CHERYL
VK4FRYL WILL HAVE ON DISPLAY AND WILL BE
SELLING FOR A SHORT WHILE DURING THE WEEKEND

EVERYBODY LOVES A "CAR BOOT" SALE.......
THE CAR BOOT SALE WILL BE HAPPENING DURING
THE WEEKEND WITH ITEMS FOR SALE NOT ONLY
RADIO IN ORIGIN. THATS RIGHT YLS AND XYLS, ITS
A CHANCE TO DECLUTTER THE ENTIRE QTH, NOT
JUST THE RADIO SHACK. FILL YOUR CARD BOOT
WITH AS MUCH STUFF AS YOU CAN, AS DEMAND
IS SURE TO BE SUBSTANTIALLY VORACIOUS !

YOU WILL GET TO DEFEND THE HONOUR OF YOUR
REGION, OR HAVE HEAPS OF GIGGLES AT SOME OF
THE ANTICS THAT HAPPEN AT THE TRADITIONAL NORTH
QUEENSLAND VERSUS FAR NORTH QUEENSLAND
SUNDAY CRICKET MATCH - THEN TEAM UP WITH
EVERYONE FOR THE CLASSIC GROUP PHOTO SESSION.

THERE WILL BE SOME AMATEUR RADIO DIRECTION
FINDING HAPPENING WITH TARCS WORLD GRADE
RADIOSPORT FOXES HIDDEN IN CUNNING PLACES.
BRING YOUR ARDF GEAR ALONG AND HAVE SOME
FUN IN THE RESORT FINDING THOSE WILY FOXES !

PUT UP AN AERIAL AND ACTIVATE THE CASSOWARY
COAST REGION FOR THE VK SHIRES CONTEST.

IF YOU HAVENT ALREADY DONE SO, AND YOU ARE
LEAVING IT EXTREMELY LATE,
GET CRACKING AND ARRANGE YOUR
ACCOMMODATION AS IT IS ALL RUNNING OUT FAST.
REMEMBER IT IS ALL HAPPENING FROM FRIDAY 11TH
TO MONDAY 14TH JUNE.
RING RECEPTION AT THE PARK RIGHT NOW ON
1800 005633

SO, WHILE YOU ARE ON THE PHONE TRYING TO
MAKE THAT BOOKING I WILL BRING THIS EDITION
OF QNEWS FOR THIS SUNDAY SIXTH OF JUNE TO A CLOSE.

THIS HAS BEEN DON VK4FNQA IN A RATHER
COOLISH TROPICAL PARADISE FOR THE
TOWNSVILLE AMATEUR RADIO CLUB INC, AND
YOU HAVE BEEN LISTENING TO, AND ENJOYING QNEWS FROM VK4WIA..

VK5

The south east radio group are having their annual convention on Saturday
the 12 and Sunday the 13 of June at the Margret street scout hall behind
the mount Gambier police station.

This year, a few changes. The scout hall will now open at 12 noon
on the Saturday and the first fox hunting event starts at 11am on Saturday.

Canteen is open with hot food and drinks, commercial displays, the
popular home brew contest, preloved equipment and lucky door prizes from icom
and yaesu.

Go along and see serg celebrate the wia centenary with the call sign
VK100WIA.

For more information or to book a table look at the web site.

To get there just Google serg that's s.e.r.g. and follow the links to the
convention pages.

HIGHLIGHTS FROM WIA AGM WEEKEND BROADCAST.

WIA Club Grants Scheme

Ewan: Hello GraHam and greetings to our listeners on this special day in the history of the WIA and Amateur Radio in Australia.

GraHam: Ewan, I understand you have something to say about the WIA Club Grants Scheme?

Ewan: Once again the WIA is requesting Amateur Radio Clubs and Groups submit applications for the ever popular Club Grants Scheme.

Friday 30th July is the closing date for applications for the WIA Club Grants Scheme for 2010. Full details of the 2010 rules for the scheme can be obtained from the WIA Web site, together with a template setting out the suggested application headings for an executive summary, identifying how the club seeks to meet the objectives of the scheme and guidance regarding supporting documentation.

GraHam: What is the objective of the scheme?

Ewan: The objective of the scheme is to promote and advance amateur radio, the WIA and its Affiliated Clubs by supporting useful and/or innovative projects undertaken or to be undertaken by Affiliated Clubs.

GraHam: So how are the applications received by the cut-off on 30th July this year assessed?

Ewan: The Club Grants Committee, comprising well known and respected amateurs, will recommend to the Board the projects that should be supported and the amount to be allocated to each supported project. However, the final decisions rest with the WIA Board.

Affiliated clubs are encouraged to participate in this opportunity and not be discouraged by past unsuccessful proposals. However, GraHam, it is most important that clubs read the rules very carefully.

WIA SECRETRARY GEOFF ATKINSON VK3AFA

This is Geoff Atkinson VK3AFA WIA Secretary with news from the WIA Bookshop.

The bookshop operates from the WIA offices in Bayswater, providing direct sales to members who attend the office as well as servicing on line and mail order requests. We carry a broad range of ARRL and RSGB publications, along

with the Foundation Licence Manual, Radio Theory Handbook by Fred Swainston, Drew Diamonds Technical Projects and the annual Callbook.

We also have a range of merchandise featuring both WIA regular and WIA centenary logos. Polos, Vests, shirts, Jackets, caps and bucket hats. All of which can be viewed on the WIA website.

Now let me introduce Mal Brooks, VK3FDSL, our new WIA Manager who looks after the bookshop along with the volunteers.

Welcome Mal.

Good Morning, this is Mal Brooks VK3FDSL. The bookshop is a valuable service to members and we endeavour to provide competitively priced products whilst being mindful of exchange rates and freight costs, both of which contribute to fluctuating prices and impact the profitability of the bookshop.

We will be adding new books from ARRL and RSGB in the near future and we encourage you to look out for them on the bookshop web page.

Thanks Mal

Now I also have some news on the National Inwards QSL bureau.

Following the introduction of changes to the inwards QSL Bureau operation, I am pleased to provide a brief update.

We have received positive feedback from a number of overseas bureaux now that they only have to send cards to one address in Australia, and consequently we have received parcels from a variety of these overseas bureaux, the largest arriving last week, with 9Kgs of cards from Spain.

The cards are usually sorted within 24 hours of receipt and sent on to the State QSL Managers for further distribution to members.

We have noted that some cards have QSO&#65533;(tm)s dating back into the 1990&#65533;(tm)s and many are for special event callsigns activated within Australia over past years as well as more recent events.

We believe the changes made are helping members receive their cards more quickly.

National Field Day.

This is Philip VK3JNI on behalf of the National Field Day committee.

On Saturday 23rd October 2010, Amateur radio enthusiasts from all over Australia will be showcasing amateur radio in prominent locations throughout their local area.

The recommended hours of operation for the National Field Day are between 09:00 to 21:00 Hrs Eastern Daylight time.

This activity, new to Australia, will be a good opportunity to break out your field day equipment, demonstrate emergency preparedness, show your

favourite modes of operation, and add a little colour and movement to engage the public.

Cubs are encouraged to start identifying possible locations for your station. You should start discussing the possibility of running a National Field Day station with the property managers. In some cases, approvals may take some time so an early start is recommended.

The National Field Day committee consisting of Paul VK5PH, Fred VK3DAC and Gerard VK5ZQ are interested in your views on items such as National Field Day clothing. Would you like a Cheap and Cheerful tee-shirt or something more substantial such as a knitted shirt with collar, long sleeve shirt with a pocket, or even a fleecy vest?

Would you like to see an on-line logging program, so you can see what modes and frequencies other filed day stations are working?

Have you an idea for a Logo or Slogan for the National Field Day?

For more information please keep an eye on the contest pages of the WIA Website or to contact the committee, email nfd@wia.org.au.

ACMA Flags UHF Spectrum Changes - Peter Young

On Friday 30th April, the Australian Communications and Media Authority (ACMA) released its third discussion paper on the replanning arrangements for the 400 MHz spectrum. A copy of the paper can be found on the ACMA website.

The WIA provided detailed submissions to the two previous papers in respect to the 70cm amateur UHF band allocations in the 400 to 520 MHz spectrum. The WIA is also a member of the Radiocommunications Consultative Committee 400 MHz working group.

The 400 to 520 MHz spectrum is one of the most congested pieces of spectrum in Australia and to provide for ever expanding needs, this spectrum will be divided into 12.5 kHz channel segments. The rearrangements will now allow harmonised spectrum for government users across Australia.

The latest ACMA has confirmed that the segment between 430 to 440 MHz is out of scope for the purposes of the replanning exercise. Within this band the amateur service is a secondary user to Defence and these arrangements will continue into the future.

To accommodate government user requirements, the existing amateur secondary allocation in the 420 to 430 MHz will be withdrawn. This has already occurred in a number of states already.

To assist in the transitional arrangements, which may take many years to complete, the ACMA has suggested that the amateur secondary allocation in 440 to 450 MHz may be used on a temporary basis from time to time. This arrangement has occurred in the past and is only an option.

In response to the paper, the WIA will be seeking further information on these arrangements. The closing date for comments is 6th June.

ACMA Cancels Amateur Licence

The Australian Communications and Media Authority has canceled an amateur station licence following an investigation that uncovered continuing breaches by the licensee. Under the Radiocommunications Act 1992, the ACMA can suspend or cancel an amateur licence if the licensee contravenes a condition of the licence. In the case of the recent cancellation, crucial information was provided by other radio amateurs that alerted the ACMA to the ongoing non-compliance and assisted the investigation.

In this case, the breaches included causing interference to other stations, failing to use a call sign and transmitting an unmodulated carrier.

The ACMA made the decision to cancel the amateur licence when other compliance and enforcement measures had failed. The ACMA say in their reporting that every effort had been made to assist, encourage and educate the licensee to understand the importance of compliance with licence conditions. Despite repeated warnings to the licensee, the ACMA found that non-compliance continued over an extended period of time.

The WIA has welcomed the action taken by the ACMA. "While it is extremely unusual for amateurs to ignore their obligation to comply with the law, the fact is that there have been instances of extreme behaviour that requires enforcement action. This action by the ACMA should remind us all that it will act when necessary" said WIA President, Michael Owen VK3KI.

For WIA News broadcast 30 May 2010
Bob VK6POP
Jamboree On The Air

Jamboree On The Air, also known by its intitials JOTA, is the largest international event conducted by Scouts, and occurs annually on the third weekend of October. This year it&#65533;(tm)s on 15th to 17th of October.

Scout groups everywhere rely on the generous support of Amateur operators and others in order to provide an interesting JOTA programme to the young people they lead.

This year, I&#65533;(tm)ve been able to put together a small team to collect and collate programme ideas and resources to make JOTA and JOTI weekends more interesting and rewarding for young people. I am soliciting these resources from around the country and beyond. We will be seeking these until early July, when they will be sorted and compiled for use as programme material. You can contribute materials to the team by email. To avoid giving out complicated email addresses on air, simply email me at vk6pop@wia.org.au to establish contact, and we can take it form there.

I&#65533;(tm)m looking forward to JOTA being a great success in 2010, and this will only happen with your support, so please seriously consider supporting hams of the

future by supporting JOTA.

RadioActive

RadioActive is an Amateur Radio Award for Scouts and Scout Leaders who hold an Amateur Radio License. The Award operates over the entire month of July, and Scouts who earn sufficient points will receive an award certificate at Bronze, Silver or Gold levels.

The award is designed to encourage young people to get on air more frequently, and to contact as many other Scout stations as possible.

A QSO-athon will be held on the weekend 9-10-11 July, providing an opportunity to earn more points.

Throughout the period of the award, special stations will be designated “Scout Headquarters” stations, or “Bonus Points” stations. Contacts made with these will earn extra points.

I encourage all Scouts of all ages to participate, and to encourage others to join in. Let�(tm)s get RadioActive.

Canberran students enjoy ARISS contact
Jim Linton VK3PC

Ten students from the Trinity Christian School at Wanniassa in the Australian Capital Territory made history at the weekend with the first Amateur Radio on the International Space Station (ARISS) program contact to be held in Canberra. The event was part of the Wireless Institute of Australia (WIA) centenary dinner attended by 200 people including international guests, Australian Communications and Media Authority Chairman Chris Chapman, and WIA Centenary Patron Dick Smith VK2DIK.

After the ARISS contact Elizabeth Shen and William Shaw said they were both extremely impressed by the efforts made by astronauts to qualify and fly in space, giving them encouragement to strive in their chosen careers. Elizabeth, aged 17 added: 'The opportunity to speak to someone above the space station was one of the best experiences in her life.' While William, aged 18, said 'It was really cool to be able to talk to someone who is in a completely different situation �" with the zero gravity and what not.'

Trinity Christian School Principal, Carl Palmer VK2TP/VK1TP was justifiable very proud of his students.

WIA President Michael Owen VK3KI presented each with a participation certificate. WIA Centenary Patron Dick Smith VK2DIK - aviator, adventurer and entrepreneur - shook their hands, spoke to them about their experience and had his photograph taken with them.

News of the ARISS contact made the news bulletins on three Canberra radio stations and a detailed story with photograph has appeared in the Sunday Canberra Times newspaper.

Emergency Communications - EmComms - Phil Wait, VK2ASD

Several years ago the WIA board formed an opinion that a training package should be developed to enable all radio amateurs to improve their emergency communications skills.

At the last AGM Open Forum we announced that the board had requested Fred Swainston (VK3DAC) to identify suitable competencies for radio amateurs in emergency communications, initially at a basic level.

Fred&#65533;(tm)s advice was that existing competencies within the Australian Vocational Education and Training system could be applied to amateur radio emergency communications, with minor modification.

In the July 2009 the scheme was announced.

Following a significant amount of work, particularly by Fred Swainston and Peter Young, we now have 16 Trainers and over 230 people have registered for training, far more than expected.

We are hopeful that training will commence shortly and will be progressively rolled out over the remainder of this year.

The board has also been considering what role the WIA should adopt in relation to WICEN.

We wish to identify a truly meaningful role for the WIA in WICEN, each different 'WICEN&#65533;(tm) responds to its own local needs, and therefore any future role for the WIA is likely to be limited to what can be done at a National level.

On behalf of the board I would like to thank all those who have contributed to the implementation of the EmComms training scheme, whether by encouragement or comment, your input has been most valuable. In particular we would like to thank Fred Swainston for his effort far beyond what could be reasonably expected, and also Ewan McLeod and especially Peter Young for driving the implementation forward.

BPL and Standards Activities

Wide-area Access-BPL appears to have all but vanished from the Australian telecommunications landscape. Also, Smart Metering trials in Australia appear to have bypassed Access-BPL in favor of other technologies.

However, my guess is that in-house BPL is likely to become a major issue in Australia.

Now, in-house BPL modems are being supplied by a number of retailers and in-house BPL may possibly find application as part of the mix for in-home distribution of entertainment services supplied via the NBN.

For instance, in the UK more than 1 million pairs of in-home BPL modems have been installed by British Telecom, with large numbers of interference complaints to their regulator, OFCOM.

The WIA continues to be a very active participant in Standards Australia. The international CISPR BPL working group, in which Standards Australia

has been an active participant, has not been able to reach consensus within the time allowed. So its work has now ceased.
This is not good news, because without a CISPR standard BPL manufacturers are likely to adopt other industry developed standards which are likely to be less favorable to amateur radio.

I would again like to thank the WIAs BPL working group members, Justin Giles-Clark , Fred Johnston, Keith Malcolm, Gilbert Hughes, David Wardlaw, Barry White, and Peter Young, for their efforts over the last, thankfully quieter, year.

Phil Wait, VK2ASD

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

SARL SPRINT TO CELEBRATE YOUTH DAY 16 JUNE 2010

"With the World Cup in full swing and schools on holiday Radio Amateurs have a unique opportunity to celebrate youth day on 16 June with the SARL Sprint and give South Africa's young people a taste of Amateur Radio and hands-on experience", says Gerhard Coetzee, ZS3TG, SARL Councillor for Youth Activity.

Clubs are encouraged to set up stations in public areas like shopping malls to demonstrate amateur radio as the greatest of all scientific hobbies and a great primer to encourage young people to take up careers in electronics and communications.

Full details of the event are available on www.sarl.org.za

Individual radio amateurs are invited to adopt young people for the day and invite them into the shack to operate under your supervision.

Data Transfer via Lighting System

The Engadget website ran a story on a lighting system that has been developed in China that uses the lighting to transfer data.

LED data transmission used to be all the rage. Then we got omni-directional Bluetooth and building-penetrating WiFi, and put all that caveman stuff behind us.

But now, scientists the world over are looking to bring back line-of-sight networking, and the latest demonstration has Chinese researchers streaming video to a laptop with naught but ceiling-mounted blue LEDs.

The Chinese Academy of Sciences claims to have realized a 2Mbit per second internet connection that transmits data simply by modulating the flicker of the little diodes, and imperceptibly enough to have them serve as room lighting as well.

Like Boston University before them, the Chinese scholars see short-range LED networks controlling smart appliances.

engadget.com/2010/05/17/chinese-scientists-demonstrate-2mbps-internet-connection-over-le/

Radio amateur joins PARIS project

The Paper Aircraft Released Into Space (PARIS) project has announced that Radio Amateur Steve Daniels G6UIM has joined the team.

The plan is for the paper aircraft Vulture 1 to be released from a weather balloon that will carry it to over 30 km.

Steve G6UIM, who built his first Compukit UK101 computer in 1979, has been working on the main payload radio beacon and Vulture 1 GPS board. A Yaesu FT-817 will be used to receive the signal.

Vulture-1

KEEP ON TRUCKIN'

An Essex-based radio ham is transmitting live images from his truck as he travels around the UK.

>From a dashboard mounted webcam in his delivery truck, Paul Young, G0HWC transmits an image of the road ahead once every 30 seconds.

And, just in case you can't figure out exactly where he is at the moment, Paul has a live APRS map on his website too.

Paul has a impressive and comprehensive SSTV website which is full of useful information.

You'll find it at: http://www.g0hwc.com/

The Truckcam has its own URL http://www.truckcam.tv

IT'S THE LAW

While the laws of physics weren't made to be broken, sometimes they need revision as work with the Transistor Laser has shown.

ScienceDaily reports:

A major current law has been rewritten thanks to the three-port transistor laser, developed by Milton Feng and Nick Holonyak Jr. at the University of Illinois.

With the transistor laser, researchers can explore the behavior of photons, electrons and semiconductors. The device could shape the future of high-speed signal processing, integrated circuits, optical communications, supercomputing and other applications. However, harnessing these capabilities hinges on a clear understanding of the physics of the device, and data the transistor laser generated did not fit neatly within established circuit laws governing electrica currents.

"We were puzzled," said Feng, the Holonyak Chair Professor of Electrical and Computer Engineering. "How did that work? Is it violating Kirchhoff's law? How can the law accommodate a further output signal, a photon or optical

signal?"

AMATEUR RADIO ASTRONOMERS FIND SUPER SECRET SPACE PLANE

A group of amateur radio-astronomers have accomplished what the military was likely hoping would not happen.

They have spotted the super-secret U.S. Air Force X-37B mini space plane on-orbit.

Amateur Radio Newsline's Frank Haas, KB4T, says the un-piloted X-37B Orbital Test Vehicle 1 was lofted on April 22 atop an Atlas launcher.

It is being flown under the auspices of the U.S. Air Force Rapid Capabilities Office. From there it entered a proverbial cone of silence regarding its on-orbit duties. But thanks to a worldwide network of amateur sky watchers, the spacecraft is reportedly in a 39.99 degree inclination, circling the Earth in an orbit 401 kilometers by 422 kilometers.

The next phase in the amateur astronomers tracking of the X-37B will be an attempt to see if the space plane is emitting any radio signals!

The US Air Force has not said what the robotic ship is for, but analysts say the X-37B is but most guess that it is likely a high altitude spy craft.

****

WEIRD AND WONDERFUL

Amateur Radio & Hollywood

The sale of KE6PZH(tm)s Amateur Radio equipment has been re listed on eBay after not selling in a recent auction. Although listed on the FCC Data base as Martin Brandeaux he would be known more Internationally as Marlon Brando!

Also the holder of Callsign FO?GJ , he was QRV occasionally from his from his private French Polynesian Island.

CQ Contest CQ VK Shires -

The VK Shires second running is on next weekend.

WOW !

We have had an announcement from Eddy JI1AQY that
his Japanese language contest logger CTESTWIN now
supports the VK Shires and that the japanese website
cqcqcq.org has promotions for the vkshires.
Eddy also translated the rules into Japanese for us.

This is great news as CTESTWIN is as popular in Japan as VKCL is in Australia.

To have fun in the VK Shires get active ANYWHERE - every different Shire is a
multiplier even in active shires you may find no one else is on for the

contest.

Download any of the free Software to help run the contest -

VKCL

CTESTWIN (if you are Jappanese)

SD Logger

or W3KM

Both SSB and CW is worth contact points and expect a lot of JA's on the bands.

International Lighthouse and Lightship Weekend

Registrations for this fun event in August are steadily being made and so far there are 175 from 26 countries. A flood of registrations traditionally occur closer to the weekend.

Leading the progressive tally is Germany on 35 with Australia on 28, but about 40% more registrations are anticipated from those two countries alone.

The International Lighthouse and Lightship Weekend has its origins in Scotland through the efforts of Mike Dalrymple GM4SUC, now a silent key, and other members of Ayr Amateur Radio Group GM0AYR (GMzeroAYR).

It has steadily grown in popularity over the years. Its website ILLW.NET has registration guidelines.

There's now also ILLW on Facebook with more than 200 followers where those activating lighthouses can show 'n tell and share information.

The International Lighthouse and Lightship Weekend ILLW.NET will be held on the 21st and 22nd of August.

Spratly Island DXpedition 2011 DX0DX
IOTA AS-051, CQ Zone 26 and ITU Zone 50 (Report #1 210510)

A multi-national team of up to 30 radio amateurs from nine countries is in advanced preparation operate from Spratly Island group in the South China Sea.

Following 12 months of discussions with military and civilian authorities permission has been received to operate on Thitu Island (Pagasa in Filipino,

the second largest island in the Spratly Islands with a population of about 100.

The DXpedition, organised by the South Pacific Contest Club, will run from 6 to 24 January with the final 420km travel leg for three groups of operators, equipment and supplies is by cargo boat.

All supplies including food, water and fuel to sustain the DXpedition needs to be transported to the island.

The team includes five doctors which is not only reassuring other DXpeditioners, but will provide a welcome humanitarian effort through free medical checks for those permanently on the remote island.

The plan is to have four CW stations, four Phone, a RTTY/Digital Modes plus VHF/UHF.

Sponsors include ICOM (America), Ham Radio Outlet, SpiderBeam, Heil Sound and DX Engineering. Further corporate sponsorship and funding is expected, and individual donations will be acknowledged.

The DXpedition is supported by the IARU national radio society, Philippine Amateur Radio Association (PARA).

The team leader is Chris VK3FY. The rest of the team to date includes: Keith VK3FT, Roger VK3FZ, Peter VK3FGRC, Jim VK3PC, Nik VK3FNIK, Allan VK2GR, Josette VK2FXGR, Wally VK6YS, Dindo DV1DIN, Ed DU1EV, Edward 4F1OZ, Cholo 4F8BOF, Kaye DV9XO, Toshi JA8BMK, San K5YY, Oscar EA1DR, Christian EA3NT, George EA2TA, Vincent F4BKV, Bjorn SMOMDG, Charles W6KK, Arnold N6HC, Robert N6OX, John N7CQQ, David AH6HY, Simon IZ7ATN, and Bill N6WB.

Chris VK3FY is due to visit The Philippines soon to check out the logistics arrangements and ensure all other requirements are finalised.

A website is now up and running: http://www.dx0dx.net/

ZL3 ham prosecuted for QRO transmitter

A New Zealand radio amateur has been convicted for being in possession of a radio transmitter capable of operating at a significantly higher power than permitted by his Amateur Radio Operators General Licence.

The New Zealand Ministry of Economic Development's (MED) Radio Spectrum Management division was alerted to a You Tube video showing a transmitter allegedly operated at 3100 watts, far in excess of that maximum permitted limit of 500W PEP.

He was found guilty in Christchurch District Court of breaching section 113 of the Radiocommunications Act 1989. The magistrate found the charge proven, imposed a fine of $1,750 and ordered $130 be paid for costs, plus radio equipment forfeiture.

In a media statement the MED explained that it had taken the action because excessive power has the potential to cause interference to, and disrupt to other radio services in the local area.

(VK3PC)

BPL to rise like the phoenix in Egypt

Just when commentators had written off Broadband over Powerlines (BPL) comes news that Egypt-based SABA Electric is getting into the act.

It has formed a partnership with ISP LINKdotNET and has plans for easy access to the internet through BPL.

In a media statement SABA Electric said BPL is the technology it will use to provide to provide broadband data speed up to 8 Mbps that include a number of Voice over Internet Protocol and video options.

On complete build out the network could reach over 300,000 residents.

UNITEC-1 signal received!

Signals have been received from the Amateur Radio satellite UNITEC-1 which is on its way to Venus.

CW and FSK signals was received from UNITEC-1 at a distance of 300,000 km, no other Amateur Radio satellite has traveled this far before. It has some 50 million km to go before it reaches its destination.

Japanese ground stations worked together to receive the UNITEC-1 signal on the first pass over Japan on May 21 and they report:

Measured Frequency 5839.91 MHz

The latest news on UNITEC-1 is available at the Operation Center website along with free software and a Ham Radio forum, see http://sites.google.com/site/unitec1ops/

A fully detailed description of the UNITEC-1 satellite and its capabilities and data structure appeared in Oscar News No 188

COMET CRASH INTO SUN OBSERVED BY STEREO

Solar physicists at the University of California at Berkeley have captured for the first time the collision of a comet with the sun.

Using data radioed back to Earth from instruments aboard NASA's twin STEREO spacecraft, the four researchers at UC Berkeley's Space Sciences

Laboratory were able to track the comet as it approached the sun and estimate an approximate time and place of impact. They then looked at data from the terrestrial Mauna Loa Solar Observatory in Hawaii, and found images in the predicted spot of what appears to be a comet approaching the edge of the sun from behind the solar disk. While the comet apparently survived the heat of the corona and disappeared in the

chromosphere, evaporating in the 100,000-degree Kelvin heat.

The Solar Terrestrial Relations Observatory or STEREO was launched in 2006 and consists of identical spacecraft orbiting the sun. One is in orbit ahead of Earth and one behind. This provides a human eye-like stereo view of the sun.

You can read more at tinyurl.com/28er687

(ARNEWSLINE)

WW SPECIAL INTEREST GROUPS --- QRP

Using QRP via DFCW

Bob, VK7ZL, has been continuing with his low power experiments on the 30M band using Dual Frequency CW. With DFCW each morse element is the same length but the dashes are 5Hz higher in frequency than the dots thus producing a regular step pattern which is much more visible than regular 6 second dot morse.

Bob's current setup is a transmitter running 5 watts with the output fed into a home brew step attenuator of 7dB and 10dB.

With 10dB switched in an output of 500mW is obtained and that signal is regularly seen on the grabbers of both ON5EX and PA1GS at about 0500 GMT. On Thursday, 20 May, ON5SL received the signal via long path, about 22,900Km, and in his words "using a 1/4 wave vertical with almost no radials on dry soil".

The receiver was a Kenwood R5000.

Bob's antenna is a resonant inverted V dipole at about 9 metres at the apex fed with 50 metres of RG213 coax so the actual radiated power would be somewhat less than the measured power at the transmitter end.

Radio Amateurs assist search

Press reports say the New Zealand Amateur Radio Emergency Corps provided communications during a search for two hunters lost in the New Zealand bush.

The New Zealand Stuff website reports that the two hunters went missing in the Ranges off the Napier-Taupo road. A search ensued involving Police, Land Search and Rescue volunteers from tramping and hunting clubs, and members of the Amateur Radio Emergency Corps who provided communications.

Senior Sergeant Luke Shadbolt, of Hastings, said the men were found on the Napier-Taupo Road after "an uncomfortable night in the bush".

They apparently told police they were "geographically challenged".

(SouthGate)

REWIND

Rewind a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others, that is being published in the WIA journal Amateur Radio magazine.

Conflicts between private transmitting, receiver listening and wireless commercial interests

While the WIA has been continually recognised as the representative body both nationally and internationally, there was a deal of instability within the ranks of Australian experimenters between 1927 and 1937.

An alternative society initially known as the Queensland Radio Transmitters League began in 1927 and renamed the Australian Radio Transmitters League, was primarily concerned about the undue influence of commercial interests at the expense of private experimenters.

The majority of experimenters in Tasmania, South Australia and Victoria stood by the WIA though the ARTL had also been established in those states.

With good will and expressions of common purpose during six months of negotiations in 1929, most state ARTLs merged with the WIA, the last merger was in Western Australia in 1932.

In NSW, a further organisation, the Amateur Radio Association was established and became affiliated with the WIA. It was in effect a de facto Division of the WIA in that state.

This was brought about because New South Wales had been under the dominance of the Institution of Radio Engineers (IRE), the group representing those engaged professionally in wireless.

This situation remained until the IRE allowed the legal re-forming of the Wireless Institute (in NSW) during 1937.

Much of the instability during the decade 1927-37 was related to conflicting interests of amateur transmitting experimenters and the substantial growth in receiving only members often coupled with the commercial interests of individuals.

As a living organisation, the WIA has undergone many changes to reflect the issues of the times and interests of its members.?

Representing all amateur experimenters, now known as radio amateurs to the authorities was one of the initial aims 100 years ago and continues today in an ever changing world.

VK4 SILENT KEYS @ 2009 - 2010 QAC YEAR

Bernie Leech (ex vk4bel) 13/05/2010 Advised by Vk4jdf John.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I'm applauding 100 yrs of growth.

Last weekend, as we have heard, marks the centenary of organised amateur radio in the land down under. With technology tours, ARISS contact and formal recognition of the history by the WIA at its Canberra meeting, we all have been privileged to participate in something both historic and ceremonial.

Live broadcasts are taken for granted these days, in a news hungry world, but we don't often have the pleasure of such an activity on the amateur bands.

The fact that the radio amateur participates in a practice which incorporates so much in the wide, wide world from radio astronomy and space communications to the comfort of the musical and broadcast programs we have in our homes and with which we travel, seems to take us from vicarious pleasure to the sense of participation and immediacy that few other hobbies can.

To all those people who have made the effort to promote this first 100 years of the hobby, I say thank you. As the year goes on and the voices of VK100WIA move around the country, let us all reflect and enjoy this year; this is the year for amateur radio in VKland, for all amateurs.

In remembering the past we must now ask "where to in the future?"

Yes last week the cold of the national capital was offset in shacks around the country by the live broadcast of WIA National News. Good work and thanks to all involved from the crew on the ground, in Canberra, to the re-broadcasters who got the audio to air.

Recently I was lucky enough to be given some old magazines by a fellow amateur who is having a shack clean-up. One which caught the eye was the December, 1985 Amateur Radio. Jumping out of the pages was a 2 page photo spread of the WIA 75th Anniversary Dinner, in Melbourne. Many of the faces and call signs were familiar but the the last time I saw these same people they had redecorated themselves and lighter coloured thatch on the roof seems more popular now.

After the news broadcast it was off to a local radio club meeting. In the anniversary year there seems to be a cluster of activities over the next few months, not the least will be the operation of VK100WIA. Plans are afoot to get the message out about these activities so I expect to hear more on QNews. I hope you and your club can continue with scripts and audio and we all can share your activities on the "Q".

I'm Geoff Emery and that's what I think.....how about you?

There will be a Annual General Meeting at the Club Rooms 85 Harper St., Nerang at 10.am on Saturday 19th June. Look for as many members as possible to attend this meeting.

(Kaye VK4VKS)

Ipswich and District Radio Club

Allan VK4FABR on behalf of Ipswich and District Radio Club president Mike VK4QS, members and friends.

We invite you to come and join some interclub radio fellowship at the "interclub BBQ & boot sale" Today, Sunday June 6 from 10.30am.

We'll have a BBQ sausage sizzle, BYO steak if you like. The venue is our clubhouse 10 Deebing Street, Ipswich

Come and enjoy a great day on June 6th. Bring whatever radio gear you have for sale. The car boot sale will be in the car park next door to the club.

We are also hoping to have a fox hunt on the day. For more information visit the club website www.ipswichdistrictradioclub.webnode.com

Redcliffe and District Radio Club

I'm Ray VK4CF with news from the Redcliffe AR Club.

At last Monday night's meeting, Peter VK4EA presented a slide presentation on the new repeaters cavities & setup of the equipment at the repeater site. Despite local cleaning around the site for the elimination of weeds and grass, all the work on the upgrade of the club's repeater is now been completed.

Club Secretary, Peter, VK4TAA, advised the meeting of the club's AGM to be held at the club rooms on Monday 21st June. Nominations forms for elected positions can be obtained directly from Peter via the club's website.

Next Monday will be the visit to the Brisbane airport traffic control tower. Those going are asked to meet at the club car park at 6pm - 6.15pm and a car pool will operate to take members to the venue. There are still several spots open for the air traffic control visit so contact Scotty, VK4FLAE or Charlie VK4YZ know if you will be going.

The 3rd Monday of each month is a technical talk held at the club rooms. In June the tech talk night will be the 2nd Monday 14/6/10, due to AGM and James, VK4TJF will present Amateur DXing, DXpeditions and QSL cards. Later in the year in August, Kevin VK4UH will discuss the DX Expedition to Norfolk Island and in September, Peter VK4TGV will discuss the Codan NGT radio and modems.

VK100WIA - 100 years of amateur radio. Kev VK4UH will be leading the club's hosting of the event on 30 August to 1 September 2010.

Peter VK4HOY, will hold a BBQ for the Club Monday 7th June starting 6pm at the club, followed by the usual club meeting. There will be rissoles, salad, buns Tea, coffee & soft drinks etc. This is a fund raising exercise for the club & proceeds will go direct to the club for equipment purchases.
A suggested $5 for food plus usual club drink prices will apply. Please let Peter, VK4TAA, know by email if you are attending for the catering.

A working bee will be held at the club on Monday 14th June starting at 9am at the club. It is planned to relocate the mast, re-install the triband antenna & a series of new roof mounted antennas. The club will also conduct its yearly spring clean. This a large commitment so many hands are needed on deck to help. There will be the usual free sausage sizzle for the workers.

So until next week, for Redcliffe club, I'm Ray VK4CF.

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-06-03
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page:
http://www.mmmonvhf.de/latest.php - welcome and enjoy...

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF NEWS PAGE with better overview now... **

We did re-edit the NEWS PAGES of MMMonVHF in that way, that from
now we start to have the LATEST NEWS of an information on the top
(so direct under the headline) - that means that you are able to
read as well the LATEST NEWS (if there are any ;-)) you will be
able also to read it on the front page - as well we changed now to
have more than the 5 updated NEWS available from our front page...
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** METEORSCATTER in June 2010 **

June is known for the return of three remarkable daytime showers.
Major showers Arietids and Zeta-Perseids, peaking respectively on
June 7th and June 9th in 2010, are both characterized by a broad
maximum (with possible submaxima) and high ZHR value, thus making
first half of June one of the best periods of the year for MS-Dxing
Even Beta-Taurids, peaking June 28, is characterized by fairly good
ZHR. Have a look to shower predictions for June 2010 at our MMM MS
Propagationpage: http://www.mmmonvhf.de/ms.php
SOURCE: Massimo, IV3NDC, on behalf of the MMMonVHF Team

** HAM RADIO 2010 in Friedrichshafen/Bodensee, June 25-27 **

The three-day event at the Friedrichshafen convention centre
attracted 17,400 amateur radio enthusiasts from around the world.
The 60th Lake Constance meeting of the German Amateur Radio Club
(Deutsche Amateur-Radio-Clubs e. V. DARC) was also held during the
event. Read all details as well abt the 2010 Meeting at:
http://www.hamradio-friedrichshafen.de/ham-en/index.php
International Exhibition for Radio Amateurs: Amateur radio is a
pastime that brings people together, as this years 34th annual
HAM RADIO show clearly demonstrated.

LATEST NEWS from the MMMonVHF Team abt the HAM RADIO 2010:
As well some members of the MMMonVHF Team are available at the HAM RADIO! Until now its sure that Erwin, DK5EW, will be there around friday afternoon. Dick, PA2DW and Guy, DL8EBW will try to show up on sat. (26th) but will stay only for some hours (plan 10-15 MEZ)
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** June SHF Contest 2010 (5/6th June) **

As well as in past years, Matej, OK1TEH, did setup a list of stations participating at the June SHF Contest 2010 (5/6th June)
For details please do refer the following homepage:
http://www.darkside.cz/qrv.php

VE3WCC June 12-14 2010 ARRL VHF QSO Party Operation FN04xa
Members of the West Carleton Amateur Radio Club of Ottawa will
operate VE3WCC "Field Day" style in a multi-op effort from FN04xa
for the June ARRL VHF QSO Party. Located at 730 feet ASL over-
looking Lake Ontario, the location will have a clear shot to the
major population centers of Ontario, Northern New York State and
beyond. This will be out third year of operating from this site.

W4NH will again be operating in the June contest from our usual
location in EM85jm. We will be operating limited multi on the 50,
144, 222 and 432 MHz bands running 1 KW+ and stacked beams on all
4 bands. We will have WSJT capability on 6 and 2 meters and would
like to make schedules using that mode Sunday morning from around
midnight to 8 AM. We would also like to hear from any rovers that
will be in our area of the country. 73, Jim, W4KXY

Plan to activate LICHTENSTEIN (HB0 - WW: JN47TC) in the July
DARC VHF/UHF Contest ... A team around Andy, DG3XA, plan to
activate LICHTENSTEIN (HB0 - WW: JN47TC) during the July DARC
VHF/UHF Contest... They plan to be qrv from the 4th highest
mountain in HB0 (2359 m. asl) on 144 and 432 MHz. Planned
Equipment will be QRO on 2m and 70cm. The transportation shall
be done by helicopter. So the activity will only take place if
wx condx permit it! Andy and his team is as well looking for an
VHF operator (maybe an VHF DXer with CW experience) - please
contact him if you be interesting in: by mail: dg3xa(at)darc.de
or at Skype "funkiand" - LATEST UPDATES as a new PDF at:

** KL7 / ALASKA on 50 MHz **

KL7/KB7Q Gene will take the 6 meter gear and try some EME from
BP40da during his stay at ALASKA, May 15th to August 15th
LATEST NEWS from Gene, KB7Q, dated 2010-05-27: I ran into Gene
on our beloved ON4KST Region 2 6M chatroom, and asked for more
specifics on what Antennas he is using...
3EL - converted Cushcraft 10 meter beam
5EL - is an M2
7EL - M2 7JHV w/ elevation mount (for EME)
Gene also said "I can conjure up to 800 watts if I need it, old
converted Dentron MLA-2500B amp." But can he conjure up some prop
also??? :) PeAcE... SOURCE: Andy N8OFS GOT6??? direct to MMMonVHF

SOURCE: OPDX Bulletin

** UT/IZ3GWJ qrv 50 MHz from KN29 **

Crisna, IZ3GWJ says he will be active again as UT/IZ3GWJ from Ternopil (KN29), Ukraine on 7-19 June. He plans to concentrate , on 6 metres SSB. SOURCE: 425 DX News #995

** SOTA Plans from 2E0FSR **

Hi All, Hope it's ok to post this here as due to differences of opinion I am unable to post on the reflector. On Saturday 31st July my son and I are heading for G/LD land. We are staying a week near Coniston and plan to activate a few mountains (wx permitting) whilst there using 2M SSB then 2M FM. I will be using my trusty Yaesu FT817ND and Diamond 5 element yagi as usual. Calls as always much appreciated from regular chasers and new ones too. I am well aware that on a trip like this forward planning is vital so I have drawn up an itineray of what I think is viable and I have already done a reconaissance mission finding parking spots and the like. Looking forward to the adventure. 73 SOURCE: Chris 2E0FSR on SOTA-Reflector

** PJ7 - 8-12 june & VP2E - 12-21 june in the air on 50 MHz **

IK1PMR & PA3LEO will be on DXpedition to VP2E 12-21 june (and a few days PJ7 8-12 june). I have talked to Andrea and he is willing to try 6m as well. He has a K3, so 100W, and I will provide him with an optimized 4 ele yagi (modified 5 ele Tonna). As they are going right in the peak of the season they should be able to contact Europe despite the limited hardware used.
SOURCE: Enno, PF5X via UKSMG Announce

** 3C9B AND 3C0C DXPEDITION (Update) **

Dates have been announced for the upcoming Bioko Island (AF-010), Equatorial Guinea, and Annobon Island (AF-039) DXpedition. Both operations will only be manned by two Spanish operators. Operators mentioned are: Elmo/EA5BYP (SSB and RTTY) and Javi/EA5KM (CW and SSB). The team is expected to leave Thursday, June 3rd, for Bioko Island, and be on the air the very next day as 3C9B. Activity will last until June 7th. They state, "We will spend as much time as possible on the radio. There we will pick up our supplies to live on the island of Annobon for 14 days." The operators also mention that (edited) "they have undertaken a great effort, both physical and financial, in preparing this DXpedition, but unfortunately, for reasons beyond our control, we have been unable to go in April." Look for activity to be on 160-6 meters using CW, SSB and RTTY. ...

** VE7XF 50MHz cross country trip **

VE7XF/mobile will be leaving on June 2 for a west-to-east coast-to-coast road trip, CQing all the way from CN89 (Vancouver) through 53 grids, arriving in FN76 (PEI) approximately June 10. The route will be via the Trans-Canada highway all the way. Some of the grids will be rare due to lack of activity in the wilderness, but only a few will be good for the FF challenge. Once in PEI, the call will be VY2AKX (best I could do since my '95 -'96 operation as VY2KX) until about July 13, then back on the road for a return trip to CN89 through the same grids. I'm going to try to get on for the CQ VHF contest from somewhere in Manitoba as VE4KX. I'll be calling on 50.125 when the band is quiet, moving to 50.140 when the band opens IC-706 to a KB6KQ halo on the road, and an IC-756 Pro3 to a 4el yagi when in a fixed mode in PEI. QSL all above to VE7XF (see QRZ.COM) with the usual SASE (US postage OK). May the Es gods be with us! SOURCE: Ralph, VE7XF, VE4KX, VY2AKX via Reflector

==> + 2010 ATLANTIC HURRICANE SEASON BEGINS THIS WEEK

The Atlantic hurricane season could be the busiest since 2005, when
Katrina and Rita caused massive destruction along the same part of the
Gulf Coast now struggling with the largest offshore oil spill in US
history, government scientists with the National Oceanic and
Atmospheric Administration (NOAA) said last week. According to NOAA's
predictions, the 2010 season may spawn as many as 23 named tropical
storms, including up to seven major hurricanes. The Atlantic hurricane
season began Tuesday, June 1 and runs through November 30.

"This year's hurricane season is forecasted to be a busy one, with a
strong chance of a major hurricane making landfall in the US," said
ARRL Emergency Preparedness and Response Manager Mike Corey, W5MPC. "I
would encourage all amateurs in hurricane-prone areas to take part in
```

any planning, drills or exercises, have your go-kits in order, review your local plans, make sure your home and family are safe and be ready if called upon. We here at ARRL Headquarters are already making plans to assist amateurs in the field if and when needed this season." Read more here <http://www.arrl.org/news/2010-atlantic-hurricane-season-begins-today>.

==> + ON THE AIR: JOIN THE FUN ON VHF IN THE ARRL VHF QSO PARTY

Lots of RF will be generated on 6 meters and up the weekend of June 12-13 during the 2010 ARRL VHF QSO Party <http://www.arrl.org/june-vhf-qso-party>. While many amateurs think of the VHF+ bands as a "local" band for public service, emergency communications or even a bit of fun on FM repeaters, weak-signal VHF+ enthusiasts know better. Even with a modest station, it's possible to work hundreds, or even thousands of miles, on the VHF bands during a good opening.

ARRL Contest Branch Manager Sean Kutzko, KX9X, is a big VHF enthusiast himself. "In more than 25 years of Amateur Radio, weak-signal work on 6 and 2 meters remains the most fun and intriguing activity I do. There is nothing like a good VHF opening; with interesting propagation characteristics like Sporadic-E, tropospheric ducting, aurora and even meteor scatter and moonbounce, VHF offers QSO opportunities that HF can never satisfy." The ARRL June VHF QSO Party <http://www.arrl.org/june-vhf-qso-party> runs from 1800 UTC Saturday, June 12 through 0300 UTC Monday, June 14 (Saturday afternoon to Sunday evening for most of the US and Canada). Complete rules and entry forms may be found on the ARRL Web site. Read more here <http://www.arrl.org/news/join-the-fun-on-vhf-in-the-arrl-vhf-qso-party>.

==> + AMATEUR RADIO IN SPACE: AUSTRALIA STUDENTS CELEBRATE WIA CENTENARY WITH ARISS QSO

Students from the Trinity Christian School at Wanniassa in the Australian Capital Territory made history on May 29 with the first Amateur Radio on the International Space Station (ARISS) contact to be held in Canberra. The event was part of the Wireless Institute of Australia (WIA) Centenary Dinner on May 29. More than 200 people attended the event, including international guests IARU President Tim Ellam, VE6SH/G4HUA, and ARRL International Vice President Jay Bellows, K0QB, as well as prominent Australians such as IARU Region 3 Chairman Michael Owen, VK3KI, Australian Communications and Media Authority Chairman Chris Chapman and WIA Centenary Patron Dick Smith, VK2DIK. The principal of Trinity Christian School is Carl Palmer, VK2TP/VK1TP. Read more here <http://www.arrl.org/news/australia-students-celebrate-wia-centenary-with-ariss-qso>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including bringing the ever-popular ARRL EXPO to the 2010 Dayton Hamvention®, awarding college scholarships, releasing new books, holding Section Manager elections and more. This installment covers the month of May. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-22>.

==> + TEXAS GROUP TO HOST INTERNATIONAL EARTH-MOON-EARTH CONFERENCE IN AUGUST

The North Texas Microwave Society (NTMS <http://www.ntms.org/>) will host the 14th International EME Conference <http://www.ntms.org/eme/> in Dallas, Texas on August 12-14. This is the first time the conference has been held in the US since 2004. Whether you are an experienced EMEer or new to EME, the conference will offer a wide range of technical, social and sight-seeing activities. Gerald Youngblood, K5SDR, President and Chief Executive Officer of FlexRadio, will be the lunchtime speaker on Friday, August 13; Nobel laureate Joe Taylor, K1JT, will speak about April's 432 MHz EME event at Arecibo <http://www.arrl.org/news/moonbounce-for-everyone-courtesy-of-the-arecibo-radio-telescope>
on Saturday, August 14. Presentations will include a noise figure workshop hosted by Al Ward, W5LUA, Tommy Henderson, WD5AGO, and Tony Emanuele, WA8RJF, as well as an EME demonstration by Paul Perryman, WA5WCP, and exhibits featuring a number of dealers. The event will also feature tours for both attendees and their spouses to various historic sites around the Dallas/Fort Worth area. Organizers are still soliciting people to speak or submit articles for the conference's Technical Proceedings. If interested, please contact Barry Malowanchuk, VE4MA, via e-mail <ve4ma@shaw.ca>. A block of rooms has been reserved <http://www.ntms.org/eme/hotel.php> at the Westin Hotel, a short shuttle ride from DFW Airport; rooms must be reserved by July 12 to take advantage of special rates.

==> + INTERNATIONAL PERSPECTIVE: 2010 IARU EYEBALL QSO CONTEST RESULTS

At the 2010 Dayton Hamvention®, the International Amateur Radio Union (IARU) and the ARRL sponsored a game that involved searching for hams visiting from outside the USA. According to ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, the idea was to obtain calls and names from as many different DXCC entities (from outside the USA) as possible by making "eyeball QSOs" during the Hamvention.

"No one knew exactly what to expect," Patton said, "as there hadn't been a formal list of attendees from outside the USA in the recent past. But amazingly, there were at least 138 hams from 48 DXCC entities -- not including all the DXpeditioners who signed with their DXpedition calls -- appearing on the eyeball QSO cards that were turned in to IARU officials at the end of the event to the IARU staff." As for the winners, Patton said that "everyone was a winner through the interaction with all the international guests, and the Top 10 will

receive gift certificates from the ARRL."

The Top 10 winners -- including a tie for first place --were (with number of international "eyeball QSOs" following their call sign): Margreet Blondeel Timmerman, K2XYL (24); Frank Butler, W4RH (24); Lewis Ankerbrand, W3GHU (19); Steve Gocala, KB8VAO (18); Allen Olender, WA8IWK (14); Stan Arnett, AC8W (14); Judy Attaya-Harris, KB1SRO (12); Coy Day, N5OK (12); Preben Mailand Christensen, OZ1HHH (10); Ed Moyer, AB3AH (9), and Ken Lowry, W8ND (6). For a list of the 138 call signs representing almost 50 DXCC entities, click here <http://www.arrl.org/news/2010-iaru-eyeball-qso-contest-results>.

==> + ARRL RECOGNIZES: MERT NELLIS, W0UFO, WINS MAY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for May is Mert Nellis, W0UFO, for his article "Build an Ampere-Hour Meter for Portable Operations." Congratulations Mert! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web Page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the June issue by Wednesday, June 30.

==> + SOLAR UPDATE

Tad "Fear no more the heat o' the Sun <http://www.absoluteshakespeare.com/plays/cymbeline/a4s2.htm>," Cook, K7RA, reports: Sunspot group 1072 -- reported in last week's bulletin -- was visible for nine days, until May 28. When it disappeared on May 29, three new groups appeared: 1073, 1074 and 1075. On May 29-31, the sunspot number was 43, 40 and 39, but geomagnetic indices were high as well, with the planetary A index at 33 on May 29 and the planetary K index up to 5. On the same day, the college A index (Alaska) was 53, with the college K index as high as 7. So we have had some increased sunspot activity, but the downside for HF operators has been geomagnetic storms. Look for more information, including a rare 2 meter sporadic-E opening, on the ARRL Web site on Friday, June 4. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by William Shakespeare's Cymbeline <http://www.absoluteshakespeare.com/plays/cymbeline/cymbeline.htm> (Act IV, Scene 2).

==> THIS WEEK ON THE RADIO

This week, the Ten-Ten International Open Season Contest and the Alabama QSO Party are June 5-6. The CWOps Mini-CWT Test is June 9-10. Next week, the ARRL June VHF QSO Party <http://www.arrl.org/news/join-the-fun-on-vhf-in-the-arrl-vhf-qso-party> is June 12-14. Another running of the NCCC Sprint Ladder takes place

June 11. On June 12, look for the BARTG Sprint, the Portugal Day Contest and the Bill Windle QSO Party. TheDRCG Long Distance Contest (RTTY) is June 12-13 and the SKCC Weekend Sprint is June 13. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, June 20, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, July 2, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1712 - June 4 2010

Amateur Radio Newsline report number 1712 with a release date of
Friday, June 4, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. NOAA says to be prepared for an active
hurricane season. Will ham radio be ready? Also, an abandoned
Emergency Locator Transmitter triggers a search down-under, a request
to increase broadcast radio power levels in the United States is
denied, Germany makes ready to again host Europes largest amateur
radio convention and some fun with QRP operation. Find out the
details on Amateur Radio Newsline(tm) report number 1712 coming your
way right now.

RESCUE RADIO: NOAA PREDICTS AN ACTIVE HURRICANE SEASON

Be ready for an unusually high number of Tropical Storms that reach
hurricane level. So say the experts at the National Weather Service.
Amateur Radio Newsline Frank Haas, KB4T, is in hurricane country in
Florida with more:

--

An "active to extremely active" hurricane season is expected for the
Atlantic Basin this year according to the seasonal outlook issued by NOAA's
Climate Prediction Center. Across the entire region for the
six-month season, which began on June 1, NOAA is projecting a 70 percent
probability of 14 to 23 named storms with top winds of 39 mph or
higher. NOAA believes that 8 to 14 of these will be hurricanes with top
winds of 74 mph or higher while 3 to 7 could be major Category 3, 4 or 5
hurricanes with winds of at least 111 mph.

Dr. Jane Lubchenco, Ph.D. is the Under Secretary of Commerce for Oceans and
Atmosphere and NOAA Administrator. She says that if this outlook holds
true, this hurricane season could be one of the more
active on record.

This year's prediction exceeds the seasonal average of 11 named storms,
six
hurricanes and two major hurricanes. As with every hurricane season, this
outlook underscores the importance of having a
hurricane preparedness plan in place.

For hams involved in emergency response communications it means honing their message-handling skills through regular on-the-air practice sessions. Storm season reminds us how important it is to harden repeater and digital-relay installations to improve survivability in a Category 4 or 5 storm. Continued operation, without reliance on mains power, any form of telephone interconnect or any form of human intervention can be critical during or after a storm.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

The NOAA's Climate Prediction Center is a division of the National Weather Service. For more on this story please take your web browser to tinyurl.com/28plonh (NOAA, Science Daily)

RADIO LAW: POSSIBLE CHANGES IN EU DIRECTIVE ON INTERFERENCE COULD IMPACT HAM RADIO

DL9KCE reports via the IARU Region One website that a review of a possible revision of a European Union Directive on interference to and from telecommunications devices might impact on Amateur Radio.

In Article 3 the Directive contains a number of essential requirements to protect health and safety, ensure electromagnetic compatibility and to avoid harmful interference. The way in which these essential requirements are defined in the Directive is generally considered appropriate by stakeholders. However, the concept of 'intended use' of the equipment seems to create some confusion between the essential requirements of the Directive and other public interests, such as public security or freedom of communication, which are beyond its scope but which might affect the Amateur Radio Service in the future.

There has also been some evidence suggesting that harmonized standards may sometimes be too stringent. Market surveillance campaigns have shown that a proportion of unlicensed low power devices appear to be non conformant with the harmonized standards. However, the recorded level of harmful interference does not seem to have been affected by this.

In the end, the report on the Directive says that the scope of the Directive needs to be reviewed. For instance, the radio and TV receivers which are not able to transmit by radio or cable do not fall within the scope of the Directive, while those which are able to transmit signals do. And for ham radio, it means that any changes to the Directive will have to be carefully watched. (Southgate)

**

ENFORCEMENT: NEW ZEALAND HAM HIT WITH FINE FOR ILLEAL HIGH POWER OPERATION

A New Zealand ham is in trouble for running his station at power levels in excess of that nations maximum for radio amateurs. Jim Meachen, ZL2BHF, is

in Auckland with the details:

--

Alan Potter, ZL3II, of Christchurch, has been fined the equivalent of $1164 U.S. Dollars, ordered to pay $86 in court costs and had had his station confiscated by the government. This, after being found guilty of breaching Section 113 of the Radiocommunications Act 1989 by running power in excess of 3100 watts out of his station in a nation where 500 watts is the absolute limit.

Specifically, Potter was charged in the Christchurch District Court on April 14th after being found in possession of radio transmitting equipment that was capable of operating at a significantly higher power than the Amateur Radio Operators General License allows. He was found guilty of transmitting outside the terms and conditions of the General User Radio License for Amateur Radio Operators.

Potter might have gotten away with his illegal high power activities a bit longer if not for one little mistake. Instead of just keeping quiet and operating, news reports say that the New Zealand's Radio Spectrum Management agency became aware of Portter after he reportedly posted on YouTube. One showing showed his transmitter operating at the 3100 watt level. That video has since been removed.

I'm Jim Meachen, ZL2BHJF, in Auckland reporting for the Amateur Radio Newsline.

--

This was definitely one time when it definitely did not pay to advertise that one was violating a nations telecommunications law. (Southgate)

**

RESCUE RADIO: ABANDONED ELT TRIGGERS SEARCH DOWN-UNDER

Still with news from down-under, word that an old Emergency Locator Transmitter distress beacon that was deposited in a New Zealand rubbish dump was believed responsible for a costly search and rescue deployment that proved to be a false alarm.

The Tauranga Search and Rescue was called out after aircraft flying into local airports reported receiving a signal from an emergency beacon within the greater Tauranga area. The Coastguard spent more than two hours sweeping the harbor trying to locate the source without success. Finally, the Rescue Coordination Center brought in specialist radio direction finding equipment which tracked the signal down to a refuse center. While a T- hunter was at the refuse site the signal suddenly stopped. It is presumed the beacon was disabled as garbage was being crushed at the time.

According to news reports the beacon was likely an old 121 MHz model. This is because it was only heard by planes overhead and but picked up by satellite. (The NZ Sun)

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WD9GOE repeater serving Marissa Illinois.

(5 sec pause here)

**

RADIO LAW: FCC SAYS NO TO AM BROADCAST POWER INCREASE REQUEST

The FCC has acted quickly to dismiss a petition from Richard F. Arsenault dated April 13th of this year. The Arsenault petition had asked that the regulatory agency initiate a rulemaking to permit AM broadcast band stations to voluntarily implement an increase in authorized daytime operating power.

In it, Arsenault said that he believed that such rules changes would mitigate degradation of daytime AM signal reception resulting from the interference effects of digital computers and other computing devices, Broadband over Power Lines, energy efficient fluorescent lighting with solid state switching circuitry and other electronic devices.

Arsenault specifically proposed that the Commission allow a five-year period in which AM broadcast band stations may increase daytime operating power up to ten times their currently authorized power without formal application to the Commission. But the FCC says that's not going to happen
now or anytime in the foreseeable future.

In its denial letter to Arsenault the FCC says that in MM Docket No. 87-267,1 the Commission took many actions, both major and minor, to transform and revitalize the AM broadcast band. That it adopted revised AM technical standards, which were designed, over time, to reduce interference in a station's primary coverage area. It also allowed migration of many of
the highest AM interferers to an expanded AM band, which reduced existing interference and station congestion.

The FCC ends its May 28th denial by stating that Arsenault's proposal is not in the public interest because it would greatly increase the potential for interference between AM stations. Also that it would undermine the Commission's efforts to improve the AM broadcast radio service. (FCC)

**

HAM RADIO IN PRINT: GETTING READY FOR FIELD DAY

Two articles well worth reading in the June issue of Popular Communications magazine. The first is titled Getting Ready For Amateur Radio Field Day and was written by none other than noted DX'er, contester and all around nice guy Chip Margelli, K7JA.

With an emphasis on introducing the fun of Field Day to all hams, Margelli tackles such things as assembling a team to put on a local Field Day event, choosing a venue from where to operate, deciding on what gear and antennas to use and more. In fact Chip covers just about every aspect of setting up and operating a Field Day station you can think of and many items that might not ever cross your mind.

Getting Ready For Amateur Radio Field Day is a worthwhile read for any individual or group planning a Field Day operation this year or in the future. Its loaded with photos and begins on page 10 of the magazine. (PopComm)

**

HAM RADIO IN PRINT: CALLING FOR BACKUP

Once you finish reading Chip Margelli's Field Day item keep going because on the next item up is an article by Police Chief Mike Burg, N8QQN. It's the story on how he introduced ham radio as a back-up to an Ohio towns emergency communications system.

Titled "Calling For Backup: Ham Radio Enhances A Police Department's Preparedness," it's the true story of how Burg fulfilled a promise he had made to himself years ago. That being, if he ever found himself in a position to improve communications within the Rittman, Ohio Police Department, that he would do it. The story he tells is how this was accomplished by adding a ham radio station to the overall emergency communications system in the area while keeping amateur radio separate and distinct from the rest of the emcomm mix.

In his story, Burg takes the reader from his conceiving the idea of the station through its planning, installation and first operation last March 24th. That's when the Silvercreek Amateur Radio Association came in to use
it for a local tornado safety drill in conjunction with the National Weather Service and Skywarn out of Cleveland. You will find this one beginning on page 18. (PopComm)

**

RADIO HONORS: SUSSEX COUNTY DELAWARE HONORS HAM RADIO RESPONDERS

Following a year of unusual weather events, cold water rescues and county, state and nationwide drills, the Sussex County Delaware Council has honored the county's ham radio community by proclaiming June 2010 as Amateur Radio Month.

Council President Vance Phillips declared during a presentation in Council Chambers that the city owes a debt of gratitude to its amateurs. This, for providing thousands of volunteer hours protecting our citizens and providing valuable information to various county and state agencies

Councilman Sam Wilson presented the proclamation recognizing members of the Lewes Amateur Radio Society, the Nanticoke Amateur Radio Club, the Sussex Amateur Radio Association, along with the local the Amateur Radio Emergency

Service and Radio Amateur Civil Emergency Service for their service. (SussexCountian.com)

**

THE SOCIAL SCENE: HAM RADIO 2010 IN GERMANY JUNE 25 - 27

With Dayton 2010 now history, the next truly big social event will be the 61st Lake Constance Convention and Ham Radio 2010 gathering. Both of these events are organized by DARC which is Germany's national ham radio society, and will take place from June 25th to the 27th in the city of Friedrichshafen. They are the largest on the European continent.

Mitch Wolfson DJ0QN is a member of the DARC Executive Board. He tells us that Ham Radio 2010 is different than conventions and hamfests in the United States:

--

DJ0QN: "We have a section where clubs from all over the world -- mainly from Europe but also from other parts of the world like the U.S. have booths to basically meet other people from those clubs and countries and perhaps (get them to) join a club. So there's a lot of international good will with a whole lot of people getting together and meeting.

"Its basically a very easygoing show and does not have a high stress level. You can sit between the halls in this beer garden area and talk to people all day if you choose to do that. Or you can hang around the flea market or go to the main booths or go to talks most of which are in German but there are some in the English language as well."

--

More about this exciting European ham radio gathering in English is on line at http://www.hamradio-friedrichshafen.de/ham-en/index.php (Ham Radio 2010)

**

NEW GEAR: FRENCH COMPANY TO MARKET NEW SDR TRANSCEIVER

France is the latest nation to enter the ham radio marketplace. This with the announcement of the new TransFox is Software Definable Radio transceiver designed and built in that nation.

According to a press release from the manufacturer RFPA-RFham, the new radio is available in receiver only or receiver/transmitter configuration. Its stock coverage is 1 MHz to 1100 MHz. but it can be extended beyond existing frequency range upon request. Because of this the TransFox brings what RFPA calls unique Software Definable Radio to the VHF, UHF and SHF bands.

Other features include Software Definable Radio demodulation and modulation over a 50, 100 or 200 KHz baseband, compatiblity with existing Windows or Linux software in addition to specific SigFox software, spectrum analysis and 1 Hz tuning resolution.

First delivery of this new radio is slated for mid July. More information on the TransFox transceiver in the French language is on line at www.rfham.com. (Southgate)

**

HAM CELEBRATIONS: THE WIA AT 100 - THE CELEBRATION

As reported last week, the Wireless Institute of Australia has been celebrating its 100 years of existance since the beginning of the year. With a review of what's taken place so far, here WIA News anchor Graham Kemp, VK4BB:

--

The first activity this year was the VK9NA 2010 - VHF/UHF/Microwave DXpedition to Norfolk Island in January. A team of experienced VK amateurs operated bands from 6 meters to 10GHz. This was the first time such an expedition has been mounted on these bands from VK9 Norfolk Island.

Valentines Day saw the Center Victoria RadioFest at Kyneton VK3.

A Radio, Astronomy and Electronics Expo was held in April organized by the Midland Amateur Radio Club and held in the Old Bendigo Fire Station. This drew lots of non amateurs and showed of our hobby as well as that of astronomy.

A Re-enactment of the first wireless press message received from Britain in Australia is set to occur June 16-18. The Gippsland Gate Radio and Electronics Club will re-enact this historical wireless milestone that occurred in 1921 at Koo-wee-rup south-east of Melbourne.

More information about activities to be held by WIA affiliated clubs will appear as they are announced again when you visit wia.org.au.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Brisbane, Australia..

--

This 100th anniversary of the WIA continues through years end. (WIA News)

**

WORLDBEAT: VIDEO CELEBRATES 60 YEARS OF HAM RADIO IN ISRAEL

A video celebrating 60 years of Amateur Radio in Israel is now available on YouTube. Posted by 4Z1PF, the show combines historic still photos with music as a way of tracing the history of the hobby and those Israeli hams integral to it success over the past six decades. You can watch it on-line at tinyurl.com/2675nkp (IARC)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: INVENTOR AND CHAMPION CAT BREEDER LARRY LEVY, WA2INM - S.K.

The ham who invented automated sound to light synchronization at the start of the 1960's Disco era and who was in part responsible for the creation of the IBM PC computer has died. Larry Levy, WA2INM, passed away late on Sunday night, May 30th after suffering what was believed to have been a massive heart attack.

From the time he was an early teen, Levy had developed a fascination in radio and electronics. He received his Technician class license at age 15 and like many kid hams of the day he proceeded to built most of his own station. He loved DX'ing on 6 meters an soon became known as the ham to go to if assistance was needed in modifying a piece of ham radio gear.

It was while attending Marlborough College in Vermont that he became fascinated with sound controlled lighting. Using his skill developed from ham radio, WA2INM invented the first control circuitry that converted sound to pulses of electricity that could control lights to the beat of music. He then refined his circuits so that different frequencies could trigger various light colors and patterns. It was not long before he was building and selling these control units under the name of "The Mind Garden."

After graduation from college, Levy went into business with our producer Bill Pasternak, then WA2HVK. The pair formed MG Electronics. Headquartered in the Sheepshead Bay area of Brooklyn, New York, MG Electronics provided full service audio synchronized lighting and high power sound reinforcement services to the burgeoning disco entertainment industry. They also built and installed the first ever 15 kHz split-split two meter repeater in the United States. It was located in Brooklyn's Williamsburg Bank Building and operated under the call WA2ZWP.

When Disco began to die in the early 1970's, WA2INM and WA2HVK closed MG Electronics and went their separate ways. Larry Levy found new interest in early microcomputers and was eventually a contributor to the development of the I-B-M personal computer. Along the way he obtained his Advanced Class license and eventually moved to the New York suburb of Yorktown heights.

Always a lover of show cats, Levy eventually dropped away from electronics to a begin a new career as a show cat breeder. In addition to his home and office in New York, he also maintained a flat in Paris and supplied many award winning cats at European shows.

According to his friend Victor Miller, Levy took ill at his home and was taken to Westchester Hospital in Mt. Kisco. From there he was transferred to the Westchester Medical center where doctors planned to do either an angioplasty or a coronary bypass surgery. However, it appears that Larry passed away before either could be done.

Larry Levy, WA2INM, is survived by his wife Nicole. As we go to air, memorial services for WA2INM have not yet been announced. (ARNresline(tm))

HAM RADIO IN SPACE: UNITEC-1 STILL NOT HEARD

Turning to ham radio space related news, the magazine New Scientist reports the latest on the interplanetary amateur radio probe UNITEC-1 which fell silent soon after launch. New Scientist quotes member Naomi Kurahara who says that the growing length of the silence has the mission team worried that the spacecraft has broken down. But says Kurahara they are still working to receive the signal from UNITEC-1. (New Scientist, Southgate)

ON THE NET: VHF+ CONTESTING WEBINAR AUDIO NOW ON LINE

For those who missed the recent on line webinar titled "VHF Contesting" the audio is now available on the Potomac Valley Radio Club Website. Writing on the VHF Reflector, Les Rayburn, N1LF, says that the session was lead by QST VHF columnist Gene Zimmerman, W3ZZ, lasted over an hour, and was a great introduction to the VHF+ contesting. It also included some great dialogue regarding station design that would be of interest to even the most serious operators.

Rayburn says that there were some on-line 60 attendees, including a couple of VHF operators from Europe who got up early for the webcast. You can hear it yourself at http://www.pvrc.org/webinar/webinars.htm) (N1LF via the VHF Reflector)

HAM HAPPENINGS: ITS ALL IN THE BATHTUB

Canada's Nanaimo Amateur Radio Association will host a 24 hour special events station VE7TUB beginning on July 24th. This to commemorate the annual running of the World Championship Bathtub Race slated for July 25th in Nanaimo, British Columbia, Canada.

Nanaimo harbor was the scene of the first bathtub race in 1967 and has been its home ever since as a part of the Nanaimo Marine Festival. This years festival theme will salute is to the "CANADIAN NAVAL CENTENNIAL 1910 - 2010".

The website for the World Championship Bathtub Race is www dot bathtubbing dot com. More information on special event station VE7TUB is on line at www dot ve7tub dot ca. (VA7CIP)

**

DX

In DX, W6NWS will be in Vietnam until the 9th of June. He expects to be active as XV2W when time permits. QSL via home call, direct, via the bureau, or Logbook of The World.

IZ4JMA will be QRV portable SV5 from Dodecanese operating holiday style from June 6th to the 20th. He will use all modes on 80 through 10 including some digital. Olease QSL as directed on the air.

W6ZL, arrived on Tonga last week. He reportedly skippered the "SV Summer Sky" from New Zealand and brought his K3 and a Buddipole antenna. He has also renewed his A35KL license. No QSN's have been reported yet.

Lastly, JE1WVQ, will be active as ZD8J from Ascension Island working on 80 through 10 meters including the digital modes therough June 8th. QSL via his home callsign.

Above from various DX sources.

THAT FINAL ITEM: DAYTON - QRP - FOUR DAYS IN MAY

And finally this week, we take a look a a gathering held in conjunction with the annual Dayton Hamvention. Its called Four Days In May and it's a gathering of hams who find operating with low power and simple antennas as being the most fun one can have in amateur radio. Amateur Radio's Mark Abramovich, N-T-3-V, spent some time with one of the events organizers:

--

Ken Evans, WD4U, president of the QRP Amateur Radio Club International, says more than 250 gathered for Thursday's day-long seminar on the state of QRP and the future. Why such a surge in interest?

"Its not about turning down your power, it's about having fun," says Evans.

Evans says the event drew people from around the world.

"We have a contingent from the United Kingdom right now or about 10 amateurs, says Evans. "We have a guy from Barbados. We have two or three people from Australia. We have Bruno Begali who makes keys him and daughter and son-in-law from Italy. Last year there was a guy who came over from the JAL, the Japan Amateur League."

Evans says the growing number of people doing QRP comes from the challenge of building your own radio and using it.

"I think what people are finding is it's a lot of fun to take a $200 or $300 part for a kit radio or a home brew radio that you build yourself and play with it as opposed to just going out and laying down your charge card and picking up an $1,800 commercial set," Evans says.

George Dobbs G0RJV, founder of the G QRP Club in 1972, was among the attendees at this year's "Four Days in May." His philosophy on being a

part of QRP is, well, elementary.

"One of the gifts that a hobby can do is ensure you at least do one pointless thing each day,s" Dobbs says. "And, QRP there's no point to it whatsoever except to have a good time. Thats all it's about."

Ron Doyle, N8VAR, is a QRPer and a Scout leader here in Ohio. He says he frequently combines the two for some fun experiences like a DX contact on just a few watts.

"It has to be Scotland, on five watts on a campout with battery power," Doyle recalls. And, that was single-sideband. So, that was the best. And, some of my Boy Scouts could talk to him with the dipole up about 20 feet. That was a lot of fun."

Yes, that fun word keeps cropping up among the many who like QRP. It's just one part of Amateur Radio that makes this a community of unique and diverse interests.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, reporting from the "Four Days in May" gathering in Fairborn, just outside Dayton.

--

The annual Four Days in May gathering is conducted by the QRP Amateur Radio Club International. It was held this year at the Holiday Inn in the Dayton suburb of Fairborn, Ohio. With interest growing in QRP operations, it's no surprise this years Four Days in May event drew a record crowd. (ARNewsline(tm))

GB2RS NEWS

Sunday 6th June 2010

The news headlines

Space scientist and Sky at Night Presenter at the RSGB Convention

5MHz logging program amended

European Parliament report published

It has been announced that space scientist and Sky at Night presenter, Dr Lucie Green will be lecturing at the RSGB Convention later this year. As part of the VHF & Up stream, Dr Green will be talking on her work in understanding how immense magnetic fields in the Sun's atmosphere evolve to the point where they erupt as a coronal mass ejection. Last year, Dr Lucie Green was the recipient of the 2009 Royal Society Kohn Award for Excellence in Engaging the Public with Science. You can book your tickets for the RSGB Convention, which will take place from 8 to 10 October near Milton Keynes, via www.rsgbevents.org.

Following the extension of UK amateur's experimental access to 5MHz channels, Alan, G0TLK has kindly written a software `patch' to allow his 5MHz logging program, 5MHzLog, to work until 30 June 2015. It will otherwise stop working at the end of June 2010. The patch can be downloaded from his website, where you will also find installation instructions. This page is linked from the 5MHz Station Logging web page at www.rsgb.org/spectrumforum/hf/log.php.

The European Parliament published the Second Progress Report On The Operation Of Directive 1999/5/EC on radio equipment and telecommunications terminal equipment and the mutual recognition of their conformity, which might affect amateur radio in the future. Thilo, DL9KCE asks that amateurs read this document and possibly intervene through your national MEPs if you think it necessary. You can see the report via the IARU Region 1 website, www.iaru-r1.org.

The open day at Hull & District Amateur Radio Club scheduled for 17 July has been cancelled and put back a couple of months. Instead the club will be attending the regatta at Hull marina.

>From now until the end of October, the Vintage Radio Museum in Howth, County Dublin in Southern Ireland is open every day from 11am until 4pm. The museum is run on a voluntary basis by Pat Herbert, an enthusiastic collector of radio memorabilia for the last 50 years. The Howth Martello

Radio Group operates an amateur radio station, EI0MAR, most weekends. Amateurs are more than welcome to visit and operate the station by prior arrangement. Contact details and more information are on the website, www.ei0mar.org.

The UK regulator, Ofcom, has announced its decision on 24GHz automotive Short Range Radar (SRR) and thanked the RSGB for their response on the subject. You can read the full statement by putting 24GHZ into the search box on the Ofcom website www.ofcom.org.uk.

And now for the details of rallies and events for the coming week

The 14th Red Rose QRP Festival takes place today, Sunday 6 June, from 11am to 3pm in Formby Hall, Alder Street, which is off the High Street in Atherton, Manchester. The postcode for satnav users is

M46 9EY. There will be trade and individual stands as well as club stands including RSGB and G QRP. The Festival also runs a low cost Bring & Buy. Admission is ?2 with children under 14 free. More details from Les Jackson, G4HZJ on 01942 870634.

British Amateur TV Club Biennial General Meeting will be held today, 6 June, at the Hellidon Lakes Hotel, near Daventry NN11 6GG. Doors open at 9am for the exhibition and lectures run from 10am to 2pm, entry is ?4 for non BATC members. The BGM starts at 2.30pm. The event will be streamed live at www.batc.tv.

Also today, 6 June, the Spalding & DARS Annual Rally will take place at The Sir John Gleed Technology School, Halmer Gardens, Spalding, Lincolnshire, PE11 2EF. Talk in will be provided on S22. Doors open at 10am and there is free car parking. More details from John, G4NBR on 0794 630 2815.

Newhaven Fort Amateur Radio Group Rally and Fort Open Day takes place today, 6 June, at Newhaven Fort, East Sussex. The doors open at 10.30am and admission is ?2. Sellers tables are ?7 each and set up is from 9am. More details from Eddie, G0ECW on 01273 300772.

The 9th Junction 28 QRP Rally will take place on 13 June at Alfreton Leisure Centre, Church Street, Alfreton, Derbyshire DE55 7AH. The venue is just 10 minutes from junction 18 of the M1 and the A38. Doors open at 10am and there will be trade stands, a Bring & Buy and special interest groups. More details from Russell Bradley, G0OKD on 01773 783658.

Now for the news of special events

Today, 6 June, GB70BRS will be on the air from the Manor building at Bawdsey.

On 7 June, GB2HC will be on the air from Harrogate College and GB4FF will be on the air for the Flag Fen from Peterborough.

11 June sees GB0NOP on the air. It stands for Nil Obstare Potest, the motto of 514 Squadron.

The Abridge Village Fete has GB2VAF on the air on 12 June. The same day, GB2CWM is on the air from Suffolk for the Cold War Museum.

On 13 June, Friskney & East Linconshire Communications Club will be running a working station at the Friskney Show. The event will be held at The Friskney Hall & Playing Fields, Church Road, Friskney near Boston PE22 8RD. MX0LFC will be on the air from 9am to 4pm and visitors are welcome. The show is a real family event and has been very popular the last couple of years and generally finishes with a fly over by the Lancaster, Spitfire or Dakota aircraft.

Special event station ZS10WCS will be on the air until 12 July to celebrate the 2010 Football World Cup being held in South Africa. The call will be used by members of various South African Radio League affiliated clubs. QSL with a Self Addressed Envelope and one International Reply Coupon to PO Box 1721, Strubensvallei, 1735, South Africa. (SARL)

And now the HF DX news compiled from 425 DX News and other sources.

>From 19 June to 15 August YO/M0GQU will be on air as part of an `off road' expedition to Transylvania with the 4x4 Vampire Tour. This is an annual event that involves 900km of forest road, meadows and mountain peaks. The idea is to activate a mobile work station YO/M0GQU/M and base YO/M0GQU. During the day the station will be heard primarily on 80m and 20m. If the propagation conditions allow, you may also find them on 10m and 6m. All information about this event can be found at www.transylvania.4x4zone.co.uk.

G5XW will be active from Malta as 9H3XW between 12 and 19 June. His operation will be on the HF bands using SSB with no set times or frequencies. QSL via his home callsign, direct only.

Dennis Motschenbacher, K7BV will be active as 5J0BV from San Andreas Providencia from 9 to 20 June. While not as rare in the USA, there still appears to be a large demand for this location world-wide even after Dennis's two previous operations devoted to 6 meters. More on this operation including QSL routing is online at www.tinyurl.com/2unguet.

Franco, IL7/IK4YCQ, will be on the air from San Domino Island and Tremiti Islands until 10 June. QSL via his home call.

Waldi, LA/SP7IDX is active from Engeloya Island until 17 June. QSL via home call.

Now the contest news

The RSGB UHF UK Affiliated Clubs results are now available on the RSGB Contest Committee website. There were 118 stations active for the contest and there was a record turnout on 23cm with 43 entries. See the results at www.rsgbcc.org/vhf/results/10/uhfukac.html.

Today, 6 June, the Practical Wireless magazine 4m low power contest takes place between 1200 and 1700UTC. The maximum power allowed is 10 watts. Using all modes the exchange is signal report, serial number and

locator.

The data leg of the 80m Club Championships take place on 7 June from 1900 to 2030UTC. The exchange is signal report and serial number.

The 432MHz UK Activity Contest takes place between 1900 and 2030OUT on 8 June. The exchange is signal report, serial number and locator.

On Saturday 12 June, the BARTG 75 Baud Sprint is a new contest taking place between 2000 and 2359UTC. This is a try-out event, to test if there is sufficient support and interest to make it worthwhile for BARTG to add it to their calendar annually. There are only two classes of entry, each for single operators. The bands are 14 and 28MHz and the exchange is serial number only.

Sunday 13 June is another busy day for contest. The WAB 6m phone contest takes place between 0900 and 1500UTC. The exchange is signal report, serial number and WAB square. Please note that this is not a `points per km' event. Multipliers are WAB squares and DXCC countries. On the same day there's the PW 2m QRP contest from 0900 to 1600UTC. The power limit is 3 watts and multipliers are locator squares. The exchange is signal report, serial number and locator. Finally the second 144MHz backpackers contest takes place between 1100 and 1500UTC. The exchange is signal report, serial number and locator.

Now the solar factual data for the period from the 24th to the 30th of May, compiled by Neil Clarke, G0CAS on the 31st of May.

Sunspots were visible every day and from the 29th three groups were visible. All were small and magnetically simple and no group produced any solar flares worthy of any note. Solar activity was very low. Solar flux levels showed a slight increase of only two units during the period. The average was 73 units. The 90 day solar flux average on the 30th remained the same level as last week at 78 units. X-ray flux levels varied little and averaged A2.9 units. Geomagnetic activity started at quiet levels with an Ap index of only 2 units on the 24th. Activity started to increase late on the 28th which was too late to increase the Ap index to more that 10 units for that day. With a prolonged period of negative Bz down to minus 14 nanoTeslas on the 29th lasting almost 20 hours the Ap on the 29th was 33 units. This disturbance was in response to a coronal mass ejection that took place on the 23rd and 24th. The average was Ap 11 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 280 kilometres per second on the 25th to 530 by the end of the period. Particle densities were low except for the brief increases to 11 and 14 particles per cubic centimetre on the 28th and the 30th respectively. Bz varied between minus 2 and plus 3 nanoTeslas on the quietest day and between minus 14 and plus 11 nanoTeslas during the disturbance.

HF MUFs were depressed by several megahertz on the 29th, with high-latitude paths particularly degraded. VHF aurora was reported at 50, 70 and 144MHz across the whole of northern Europe, including most of

the UK. Sporadic-E took place just about every day with openings up to 70MHz from the UK and 144MHz in some parts of Europe.

And now the solar forecast. Without the emergence of any large sunspot groups solar activity is expected to be very low. Some days the solar disc could be spotless this week. Solar flux levels should be in the low 70's for most of the week. Geomagnetic activity is expected to be at quiet levels everyday. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz for the north. Darkness hour lows should be about 11MHz. Paths this week to the Middle East via the F layer should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. With the peak of the sporadic-E season almost upon us, openings to this area should take place via `double-hop' sporadic-E on some days. Single-hop openings will also take place more readily on most days with openings up to 144MHz during any large scale openings.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Sunday 6 June Spalding & District Amateur Radio Society is running its rally at Gleed School. For more information contact Graham Boor, G8NWC, on 07947 76448.

On Monday 7 June Gloucester Amateur Radio & Electronics Society is having an informal meeting. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 7 June South Birmingham Radio Society is having a contest planning meeting and ragchew. Contact Don, on 0121 458 1603.

On Monday 7 June Wythall Radio Club continues its Intermediate course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 8 June Derby & District Amateur Radio Society is having a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 8 June Eagle Radio Group is having a talk on ham radio in New Zealand by Tony, G3RKL / ZL2RKL. Details from Terry, G0SWS, on 01507 478590.

On Tuesday 8 June Loughborough & District Amateur Radio Club is holding a DF competition on 160m under the new rules. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 8 June Mid-Warwickshire Amateur Radio Society is having a talk on antenna measurements by G8UKT. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 8 June Wythall Radio Club is having a committee meeting. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 9 June Bolsover Amateur Radio Society is having a talk on 2m antennas by David, M3VKS. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 9 June Hinckley Amateur Radio Society is holding an antenna workshop, looking at the magnetic loop for HF with John Rogers, M0JAV. Details from John, M0JAV, on 07836 731544.

On Wednesday 9 June Lincoln Short-Wave Club is having a talk on AWACS. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 9 June Midland Amateur Radio Society is having training, Morse classes and a committee meeting. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 9 June South Notts Amateur Radio Club is preparing for its rally. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 9 June Telford & District Amateur Radio Society is preparing for the 6m Trophy and having a social event with sandwiches. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 10 June RAF Waddington Amateur Radio Club is having a talk on antennas by Bob, G3VCA, including different ways of making them, the do's and don'ts and so on. Details from Judy Rowlands, on 07544 456422.

On Friday 11 June Coventry Amateur Radio Society is taking part in Bunkers on the Air from Harbury, Bulkington & Napton. Contact John, G8SEQ, on 07958 777363.

On Friday 11 June South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 12 June Lincoln Short-Wave Club is putting G5FZ on the air from the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 12 June Nunsfield House Amateur Radio Group is having a shack night and committee meeting. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Saturday 12 June Welland Valley Amateur Radio Society commences its weekend special event station GB0BON for Battle of Naesby at Ruperts

Viewpoint on Naesby Battlefield, NGR SP716842. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Sunday 13 June Friskney and East Lincolnshire Communications Club is running a station at the Friskney Show. Contact Chris, M0MFP, on 01507 442240.

On Sunday 13 June South Notts Amateur Radio Club is running the Junction 28 Rally. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

NEWS FOR THE NORTH OF ENGLAND

One of our long serving GB2RS news readers, John Wresdell, G3XYF, who reads the news on 3640kHz LSB at 11am is now having to stand down. Although G0LYZ and M0VEY are able to continue, another team member is required. If you are an RSGB member and you would consider becoming a GB2RS reader on 80m, please contact GB2RS News Manager, Gordon Adams, G3LEQ, on 01 565 652 652 for more details.

On Sunday 6 June Wakefield & District Radio Society is holding a fox hunt. Contact Ken, 2E0SSQ, on 07900 563117.

On Monday 7 June Angel of the North Amateur Radio Club takes to the air and is having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 7 June Hornsea Amateur Radio Club is taking part in the 80m Club Contest, Data, Home Stations. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Monday 7 June Sheffield Amateur Radio Club is having a social night and taking part in the RSGB 80m Club Contest. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 7 June Thornton Cleveleys Amateur Radio Society is on the air. Details from John Foster, 2E0EZY, on 01253 399377.

On Monday 7 June Workington & District Amateur Radio & IT Group is having a presentation. Details from Barry, G0RZI, on 01946 812092.

On Tuesday 8 June Morecambe Bay Amateur Radio Society is having a film night on DF. For more information contact Martin Hazel, M0ZIF, on 01524 848193.

On Tuesday 8 June Otley Amateur Radio Society is having a general shack night and experimenting with antennas. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 9 June Hornsea Amateur Radio Club is having a talk on the Industrial Trust by Paul Booker. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 9 June Mid-Cheshire Amateur Radio Society is planning for NFD and on the air, testing the new 6m antenna. Contact Peter Paul Fox,

G8HAV, on 01606 553401.

On Thursday 10 June Preston Amateur Radio Society Junk Sale. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 10 June South Manchester Radio and Computer Club is having a technical ideas evening. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 10 June Wakefield & District Radio Society is running a mock Advanced exam. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 11 June East Cleveland Amateur Radio Club is holding a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 12 June Denby Dale Radio Club is operating special event station GB2HS from Honley Agricultural Show. Contact Gerald, G3SDY, on 01484 602905.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 8 June Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 8 June Livingston & District Amateur Radio Society is having an operating evening. For more information contact Norman, on 07740 946192.

On Wednesday 9 June Ayr Amateur Radio Group is holding its AGM. Contact Charlie, MM0GNS, on 01563 551704.

On Wednesday 9 June Lothians Radio Society is holding its AGM. Contact Andy Sinclair, by email to lrs_secretary@moosedata.com.

On Wednesday 9 June West of Scotland Amateur Radio Society is having a homebrew, construction and training evening. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 10 June Aberdeen Amateur Radio Society is having a construction evening, is on the air and holding a beginners CW class. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 11 June West of Scotland Amateur Radio Society is having a main club meeting. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Sunday 13 June Cockenzie & Port Seton Amateur Radio Club is taking part in the Practical Wireless 144MHz QRP Contest. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Sunday 6 June Norfolk Amateur Radio Club commences 1.8-28MHz operations for National Field Day weekend. Details from Chris Danby, G0DWV, on 01603 419204.

On Monday 7 June Basingstoke Amateur Radio Club is having a talk on satellite access by Frank, M0AEU. Details from Clive, G4ODM, on 01256 326050.

On Monday 7 June Burnham Beeches Radio Club is having a fox hunt. Contact Dave, G4XDU, on 01628 625 720.

On Monday 7 June Southdown Amateur Radio Society is having a talk by John, G3DQY, on the Saxon Wetlands, followed by a bring and buy sale.. Details from John, G3DQY, on 01424 424 319.

On Monday 7 June Surrey Radio Contact Club is holding its construction contest. More information from Ray, G4FFY, on 01732 357474.

On Tuesday 8 June Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 8 June Chelmsford Amateur Radio Society is running a club net. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 9 June Aylesbury Vale Radio Society is planning for the PW 144MHz contest with Les, G0DFC. Details from Roger, G3MEH, on 01442 826 651.

On Wednesday 9 June Chelmsford Amateur Radio Society is holding a committee meeting at Danbury. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 9 June Chesham & District Amateur Radio Society is planning for the PW 144MHz low power contest. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 9 June Darenth Valley Radio Society is having a natter night and purring the club station on the air. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 9 June Farnborough & District Radio Society is having a talk on keeping it simple by John, G3KND. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 9 June Harwich Amateur Radio Interest Group is having a talk on radio from the past by Monty, 2E0MGD. More information from Kevan, 2E0WMG, on 07766 543784.

On Wednesday 9 June Havering & District Amateur Radio Club is having an informal club evening. Contact John, M0UKD, on 07817 365354.

On Wednesday 9 June Norfolk Amateur Radio Club is holding a friendly fox hunt. Details from Chris Danby, G0DWV, on 01603 419204.

On Wednesday 9 June South Essex Amateur Radio Society is having a talk on monitoring the air bands by Bob, M3OBO. Contact Norman, M0FZW, on 01268 692776.

On Wednesday 9 June Southgate Amateur Radio Club is having a talk on propagation by Leslie Butterfield, G0CIB. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 9 June Worthing & District Amateur Radio Club PW 2m QRP Contest Planning. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 10 June Bittern DX Group is holding its AGM. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 10 June Edgware & District Radio Society is having a surplus equipment sale. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 10 June Lowestoft & District PYE Amateur Radio Club is at shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 10 June Reading & District Amateur Radio Club is having a talk on cinema sounds by Dr Graham Creasey. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 10 June Shefford & District Amateur Radio Society is having a mobile Top Band DF hunt with Andy, G8ATD. Details from David, G8UOD, on 01234 742 757.

On Thursday 10 June Sutton & Cheam Radio Society Visit by RSGB Regional Manager, Alison Johnston - G8ROG. (Note: This meeting is on the 2nd Thursday of the month for this month only). More information from John, G0BWV, on 020 8644 9945.

On Friday 11 June Mid-Sussex Amateur Radio Society is holding a fox hunt. Contact Peter, G4AKG, on 01444 239371.

On Friday 11 June Whitton Amateur Radio Group is preparing for the CQ WPX CW contest. Details on the web at www.warg.info.

On Saturday 12 June Chelmsford Amateur Radio Society is operating GB90MZX from Oaklands Museum. Contact Martyn, G1EFL, on 01245 469 008.

On Saturday 12 June Loughton & Epping Forest Amateur Radio Society commences its weekend event, operating GB2AVF for Abridge Village Fete. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Sunday 13 June Aylesbury Vale Radio Society is taking part in the PW 144MHz contest from 0900 to 1600 UTC. Details from Roger, G3MEH, on 01442 826 651.

On Sunday 13 June Felixtowe & District Amateur Radio Society is attending the ESWR Rally. More information from Paul, G4YQC, by email to pjw@btinternet.com.

NEWS FOR THE SOUTH WEST

A volunteer RSGB member is required on the island of Jersey to assist with the GB2RS news reading at 09.00 on 145.525MHz FM. GJ4CBQ has had to give up as an assistant reader, leaving GJ0PDJ as sole reader at present. If you would consider offering your services, please contact GB2RS News Manager, Gordon Adams, G3LEQ on 01 565 652 652 for further information.

On Wednesday 9 June Callington Amateur Radio Society is having a talk on the secret life of Violette Szabo by Tony Helm, G4BCX. More information from Chris Harris, G7UDX, on 07973 418 371.

On Wednesday 9 June Taunton & District Amateur Radio Club is having a debrief after NFD. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 9 June Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 10 June South Bristol Amateur Radio Club is having a QSL card evening. Contact Len, G4RZY, on 01275 834 282.

On Thursday 10 June Swindon & District Amateur Radio Club is holding a barbecue. Contact Den, M0ACM, on 07810 317750.

On Thursday 10 June Yeovil Amateur Radio Club is having a talk on 4m by G7AHP. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 11 June North Bristol Amateur Radio Club is having a committee meeting. Details from Dick on 01454 218362.

NEWS FOR WALES

On Monday 7 June Dragon Amateur Radio Club is having a visit by RSGB Regional Manager Mark Harper, MW1MDH. Contact Stewart Rolfe, GW0ETF, on 07833 620733.

On Tuesday 8 June Marches Amateur Radio Society is having a fox hunt. For more information contact Dave, MW0AYM, on 01691 777242.

On Tuesday 8 June Marches Amateur Radio Society is holding a fox hunt utilising the DF loop antennas constructed by members at the previous meeting. Marches ARS meets on the second and fourth Tuesday of each month at The Black Park Community Centre, close to MacDonalds. Follow signs for Halton and then Black Park off the A483 near Chirk. Further details from Dave on 01691 777242.

SARL NEWS - SUNDAY 6 JUNE 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

SILENT KEY

It is with deep regret that we announce the passing away of Peter Jackson, ZS1MWH, on 1 June.

We extend our sincere condolences to his wife Ruth, family and friends.

PAUSE

In the news today:

URGENT HAMNET MEETING TO DISCUSS SOCCER WORLD CUP ARRANGEMENTS

MAY 2010 RAE RESULTS

RADIO TECHNOLOGY-IN-ACTION 2010 TO HEAD FOR THE WESTERN CAPE

INTERNATIONAL EME CONFERENCE IN DALLAS, TEXAS

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

URGENT HAMNET MEETING TO DISCUSS SOCCER WORLD CUP

Hamnet Gauteng South has scheduled an urgent meeting on Wednesday the 9th of June at 18:00 at the National Amateur Radio Centre at Radiokop to finalise the arrangements and protocol regarding the Soccer World Cup.

The meeting is scheduled for 18:00 and all those who are willing to participate and assist are welcome. All non-Hamnet members who are capable of 2 m mobile communication are also welcome to attend.

We look forward to a good turnout.

MAY 2010 RAE RESULTS

The SARL is pleased to announce the May 2010 RAE results are now on the SARL website. You can locate it by accessing the Licensing RAE registration page and then click on RAE results.

Please note: Although we have released the RAE results, we withheld all call signs until confirmation for the reservation of the call signs have been finalised.

There are a number of candidates that have not yet completed their HF assessment. To assist those in the Johannesburg area, a special HF assessment will be held on 19 June at 08:00 at the NARC. Please make an effort to attend this if yours is still outstanding.

Congratulations to all candidates that have passed. To those that did not make it, do not give up; you'll have a chance to re-write your exam in October.

YOUNG PEOPLE ON THE AIR

Two Voortrekker camps are planned for the coming school holidays, one at Sedgefield and another at Hartenbos in the Southern Cape. The Voortrekkers will operate an amateur radio station with the call sign ZS1VTS from 12 to 26 June under the supervision of Johan, ZS6JPL.The station will be active on HF as well as on VHF and UHF.

RADIO TECHNOLOGY-IN-ACTION 2010 HEADED FOR THE WESTERN CAPE

Following the successful RTA symposium in Durban, the next event will be held in the Western Cape at the Bellville Campus of the Cape Peninsula University of Technology. Diarise Saturday 24 July. It is an event not to be missed.

INTERNATIONAL EME CONFERENCE IN DALLAS TEXAS

The North Texas Microwave Society will host the 14th International EME Conference in Dallas, Texas, on 12 - 14 August. This is the first time the conference is to be held in the US since 2004. Whether you are an experienced EME enthusiast or new to EME, the conference will offer a wide range of technical, social and sight-seeing activities.

Gerald Youngblood, K5SDR, President and Chief Executive Officer of FlexRadio, will be the lunchtime speaker on Friday, 13 August, and Nobel laureate Joe Taylor, K1JT, will speak about the 432 MHz EME event at Arecibo on Saturday, 14 August.

Presentations will include a noise figure workshop hosted by Al Ward, W5LUA, Tommy Henderson, WD5AGO, and Tony Emmanuel, WA8RJF. An EME demonstration by Paul Perryman, WA5WCP, and exhibits featuring a number of dealers are also on the programme.

ARE YOU INNOVATIVE?

Radio amateurs and technologists are invited to submit projects that will invigorate amateur radio - whether it is software development, amateur radio and the Internet, the development of compact HF antennas for flat- or complex dwellers, or innovation in Emergency Communication.

"Innovation in Amateur Radio" is an 18-month project by the South African Amateur Radio Development Trust (SAARDT) aimed at promoting innovation in Amateur Radio. "While Amateur Radio is one of the oldest, and still the most rewarding of all scientific hobbies, there comes a time when one has to look at innovation, fresh ideas and new technologies to keep activities relevant and exciting." This is the view of Hannes Coetzee, ZS6BZP, a technologist and a member of the Board of Trustees of SAARDT. Hannes was one of the principal architects of the Amateur Radio payload on SumbandilaSat, which is attracting wide interest amongst radio amateurs world-wide.

Visit www.amateurradio.org.za to find out how you can win an Icom IC7200.

SUBSCRIPTION TIME

It only happens once a year, and that time has come. Subscriptions for 2010/2011 membership of the SARL are now due and invoices have been mailed. Please check the details on the invoice and correct it if necessary. When making your payment please include your name and call sign. Renewing your membership of the SARL signifies the importance of amateur radio to you. If you are not a member yet, now a good time to join. Get all the details at www.sarl.org.za.

ACTIVITIES TO PROMOTE AMATEUR RADIO ON 16 JUNE 2010

Clubs and individual radio amateurs are encouraged to set up stations in public areas such as shopping malls to celebrate Youth Day 2010. It is a great opportunity to demonstrate amateur radio as the greatest of all scientific hobbies and a great opportunity to encourage the youth to take up careers in electronics and communication.

In last week's SARL News, Gerhard Coetzee, ZS3TG, said that with the Soccer World Cup in full swing and the schools on holiday, Radio Amateurs have a unique opportunity to celebrate Youth Day on 16 June with the SARL Sprint and give South Africa's young a taste of Amateur Radio by means of hands-on experience.

There are many prizes to be won during the sprint, as well as lucky-draw prizes for all who submit a log with a minimum of 10 entries. Clubs setting up stations are requested to send details to armi@sarl.org.za for inclusion in media releases to be handled by the SARL PIO Network.

Full details of the event are available at www.sarl.org.za - on the home page click on 'youth activity'. Individual radio amateurs are invited to 'adopt' young people for the day and invite them into the shack to operate under your supervision.

ZS3 SPRINT RESULTS

The ZS3 Sprint was fortunate to receive 21 contest logs and seven check logs. The results are as follows: 1st - ZS3SVD, Sian van Deventer with 144 points; 2nd - ZS3JLR, Jaco le Roux - 119, and 3rd - ZS4JAN, Jan Botha with 114 points.

The winners' certificates will be mailed soon and the detailed results will be available in 'HF Happenings'. Thank you to everybody that participated in the ZS3 Sprint.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 076 is growing well. The effective sunspot number is expected to be less than 10 for the coming week.

20 m will provide the best opportunities for DX, followed by 15 and 17 m. Conditions to India will be good from the afternoon onwards. During the late afternoons and early evenings conditions will be good towards Europe. Contacts with the USA are still challenging. Contacts with Australia and New Zealand will also be challenging. During the afternoons and evenings 20 m contacts may also be possible with Brazil, although conditions are becoming somewhat challenging.

Local conditions will be excellent during the daytime on 40 m. With the change of seasons, 30 m has taken over from 20 m for contacts over the longer distances during the middle of the day. The decrease in static levels on 80 m makes it the best frequency for the shorter distances and also during the early mornings and late afternoons. 80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

9 June - Urgent Hamnet World Cup Soccer meeting; 12 - 26 June - ZS1VTS from Voortrekker camps on the air; 16 June - Youth Day celebrations and the SARL Sprint; 19 June - HF assessing at 08:00 at the NARC; 26 June - VHF indaba at the NARC commencing at 12:00; 18 July - Intechnet at 19:30 on VHF/UHF/MICROWAVE matters; 24 July - RTA symposium in Cape Town; 12-14 August - International EME Conference, Dallas, Texas; 21 August - RTA symposium in Port Elizabeth; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual; 18 September - RTA symposium in Gauteng; 30 September - closing date for phase 1 of the Innovation Project.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the

Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Leon, ZS4V, and edited by Jannie, ZR6PHD.

Thank you for listening.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 6th June 2010

Funeral of Paddy EI3AV

Due to a misunderstanding the information we carried on last week's bulletin about the funeral arrangements for Paddy EI3AV were incorrect. As a result, Pierce EI4CI and his XYL Rhona and Gerry EI8CC and his XYL Anna travelled to Cloghjordan for the removal on Sunday evening. Unfortunately the removal was not until Monday. However, they did attend the wake which was taking place in the home of Paddy's sister in law Mary.

We apologise to anyone else who may have been inconvenienced by the misinformation in the radio news. There was a large attendance at the removal on Monday evening which included Terry EI4BK, Tony Ei2AW and Declan EI2GE. The Church was packed for the funeral Mass on Tuesday. The Priest obviously knew Paddy very well for he spoke of his gentleness and kindness, his wide ranging and in depth knowledge of many and varied subjects, his engineering skills and his technicalcompetence.

The attendance included Eddie EI3FFB, Declan EI2GE, Pat EI4DC, Clifford EI5FQB and Se&#65533;n EI7CD.

Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 7th July at 2pm in the ComReg Offices in Dublin and The Limerick Institute of Technology.

Information on examination fees and other details please see 'Theory Examination' in the 'Information' section of the IRTS website at www.irts.ie Intending candidates are also referred to 'Studying for the Amateur Radio Examination' in the 'Downloads' section of the website.

The latest date for receipt of applications to sit the examination is Wednesday, 23 June next but it is important to note that places at the exam are allocated on a first come first served basis.

IRTS HF CW Field Day

The Annual IRTS HF Field day is being held this Weekend, more information is available in the contest section on the IRTS Website.

Logs to be received by Contest Manager Thos EI2JD, no later than 30 days after the event. Entries can be received by post to Contest Manager at QTHR or preferably via email to contestmanager /at/ irts.ie

---

War on the Line - GB8WOL

Dave Oliver G8YFH will be operating GB8WOL from the Watercress Line, Ropley Station, Hampshire, UK on the 5th and 6th of June 2010,

Dave will be running a WS19 set on 80m 3.615Mhz AM and 7.143Mhz AM +/- qrm Watch for spots on the clusters!

QSL Info via the QRZ website.

Discontinued Ham Mag free download.

Launched in January 2009 Ham Mag was an electronic download that at first was free and then required a subscription. Uptakes for subscriptions ware very poor and with no commercial sponsors onboard the organizers have decided to discontinue production.

All issues are now available as free individual pdf downloads and are available from the following URL www.ham-mag.com

Please adhere to best practice when downloading files from any source.

CARA Field Day

Crossakiel Amateur Radio Association will be holding their annual field day in Crossakiel on the 12th/13th of June.

They plan to use a range of radios and antennas covering most bands and will be operating through the night. The EI 4 CARA Club callsign will be used forthis event.

All visitors are welcome.

DAR Committee Elections

The following 2010 Committee ware elected at the recent DAR AGM. President Jim EI4BX, Chairman Thos EI2JD, Secretary Aiden EI7JC, P.R.O - Anthony EI2KC & Treasurer Jim 2I0SBI.

CQ CQ calling news items

As is common through the year we have occasional lulls in news. If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

History this Week

1896 Marconi files British patent for his radioapparatus.

1896 Henry Ford trials his Ford automobile around streets of Detroit, MI. USA.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th-May, through Sunday, 6th-June there were 213 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V8, VE, VK, VK9L, VP2E, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3C9B AND 3C0C DXPEDITION. By the time you read this, the Bioko Island (AF-010) operation should be over or coming to an end. Operators Elmo/EA5BYP (SSB and RTTY) and Javi/EA5KM (CW and SSB) are expected to be active as 3C0C from Annobon Island (AF-039) between June 8-20th). Activity will be on 160-6 meters using CW, SSB and RTTY, with an emphasis on the

lower bands and CW. They will try to have two stations on the air, but remember that they are only two operators, so please be patient. For more details and updates on the 3C0C DXpedition, visit their Web page at: http://www.3c0c-annobon.com

4J0, AZERBAIJAN (WFF Op). A team of operators from Azerbaijan will be active as 4J0WFF from Absheron Reserve (WFF 4JFF-018) and/or "Gala" Reserve (WFF 4JFF-022), depending on local conditions. Both are for a first time new one between June 11-14th. The group plans to participate in the WFF Green Day event (June 12-13th), as well. Activity will be on 40-10 meters, including the 30/17/12 meter bands, using CW, SSB and PSK. Their equipment and antennas are mainly homemade:
Diamond CP-6 • WFF Fund donated, tnx! Rig • UW3DI • homemade
Triangle 40m - homemade PA-200 W - homemade
Inverted-V, WARC - homemade PS-1000 W - homemade
Members of the team are: Natig/4J5T (Team Leader), Boris/4K4K (CW), Serge/4J5A (CW), Igor/4K6OF (Digi) and Alex/4J6WMF (SSB and E-Logger). QSL direct via 4J5T (the printing promised by WFF Fund).

5J0, SAN ANDRES ISLAND (Update/6m Op). Just a reminder that Dennis, K7BV, will once again activate San Andres Island (NA-033, ARLHS SAP-002, WLOTA 2990, WW Loc. EK92DM) between June 9-23rd, as 5J0BV. This will be his third time in activating HK0-land on 6 meters. He was there during the "Es seasons" in 2008 and 2009, but he has mixed feelings about the operations and propagation. He hopes that "third time is a charm", and plans to use his new M2 6M8GJ 8 element 42' boom yagi and KW amplifier. Dennis is sure that he will be able to add many more of the deserving in the log for this DXCC entity. Visit his Web page at: http://www.qth.com/k7bv/caribe2010

7Q, MALAWI. Barrie, G4AHK, is now active as 7Q7BJ from Nkhotakota until June 22nd. Announced activity will be on 160/80/40 meters. He was spotted this past week on 17 meters. QSL via his home callsign.

A3, TONGA (Update). Paul, A35A/A35RK, informs OPDX that David Lee, W6ZL/A35KL, has cancelled his current A35KL operation. David has decided to leave Tonga tonight (June 2nd), and return to California. His guesthouse room was burglarized last weekend, and he says that he can't solve "logistical problems" in Nuku'alofa. Dave said that he may be back in Tonga for the CQWW, later this year.

C5, GAMBIA. Operators Arliss/W7XU, his XYL Holly/N0QJM, Ed/W0SD and his XYL Edith/W0OE are headed to The Gambia between June 26th and July 5th, for the 6 meter sporadic E DXpedition season. The callsign requested for is C5E, which they will pick up when they arrive. Their primary focus will be 6 meters on 50.103 MHz. They will have a beacon on during all sporadic E hours listening for stations calling. When there is an opening, please call as directed. Their location will be at Cape Point and they are right on the ocean. There will be some HF SSB/CW operations planned for late night non-Sporadic E hours. There is also RTTY operations planned concurrently with the six meter operations on 17 and 20 meters. The Grid

Square will be IK13ql. Ed states, "We do not need your grid square. We have lost many contacts in the past on six meters as signals have faded out before we get a report, so it is very wise to concentrate on sending 'JUST' our signal report rather than grid square!" QSL via W7XU.

CT3, MADEIRA ISLANDS. Members of the Portuguese DX Group (CS1GDX) will be active as CT3/CS1GDX (AF-014, DIP MA-001, WLOTA LH-0053, DPRN FF-101) between July 10-13th. Activity will be on all HF bands and modes. QSL via GPDX (CS1GDX), by eQSL, by the Bureau or direct.

E4, PALESTINE (Update). By the time you read this, the E4X operation will be starting to tear down and will go QRT. On their Web page it states, "Tomorrow, Monday June 7th, E4X will go QRT at 05:00 UTC. E4X team hopes that you enjoyed our operation as much as we did from here. From Bethlehem, THANK YOU TO EVERYBODY !!!" Just before print time, the E4X log shows the following statistics (on June 6th @ 16:14z):
75,567 QSO in E4X Database 38,994 CW QSOs
21,991 Unique Callsigns 27,028 SSB QSOs
164 DXCC Entities 9,545 RTTY QSOs
38 CQ Zones K, I & DL Top Three Countries
QSL via EA5RM: Antonio Gonzalez, P.O. Box 930, E-03200 Elche, SPAIN.
For more info, visit the E4X Web page at:
http://www.dxfriends.com/e4x/index.php

FJ, ST. BARTHELEMY. Kurt, DL1DA, will be active as FJ/DL1DA from Saint Barthelemy Island (NA-146, DIFO FJ-001. It also counts for WLOTA LH-0377) between June 8-20th. Activity will mostly be on 40-6 meters using CW and RTTY. QSL via his home callsign.

II2, ITALY (Special Event). Look for special event station II2MAL to be on the air until June 30th. Activity is to celebrate the 1st centenary of the first flight at Malpensa Airport in Italy. A WAP reference number (WAP-194) has been issued for this event. QSL via IW2MNO.

IOTA NEWS.....
AF-019. Flavio, IW2NEF, will be active as IW2NEF/IG9 from Lampedusa Island (African Italy) between July 18-31st. Activity will be holiday style on 40-6 meters using 100w max power. He plans to participate in the RSGB IOTA Contest (July 24-25th). QSL via his home callsign, by the Bureau or direct.

AS-043. Ichy, JH7IPR, will be active as JH7IPR/1 from Hachijo-Island beginning on June 26th. Watch 7021 kHz at 1100z on that date. His length of stay is not known. This is a fairly rare JCG. Activity will be on HF and 6 meters.

EU-020. Eric, SM1TDE, will be active as SA1A from Gotland Island (WLOTA LH-2969) during the RSGB IOTA Contest (July 24-25th) as a Single-Op/Island Fixed/All-Bands/24hr entry. QSL via SM1TDE, by the Bureau or direct. Visit his Web site at:
http://www.sm1tde.bloggspace.se

EU-040. Members of Algarve STAR DX Team (CT1EHX, CT1GFK, CT1GPQ, and CT1IUA) and Oeste DX Gang (CT1APE, CT1FMX, CT2JMW and CU3HY) will be active from Berlenga Island between June 10-13th. Activity will be on all bands and modes using 4 stations on the air, if possible. Callsign will be CQ7OA. QSL via CT1FMX. For more info and updates, see: http://algarvedx.com

EU-043. Bernd, DL8AAV, will be active as SD1B/6 from Orust Island between June 12-25th. Activity will be on the HF bands. QSL via his home callsign.

NA-110. Operators Dragan/K0AP and Vlado/N3CZ will be active from Fripp Island, South Carolina, as homecall/4 between July 3-10th. Activity will be holiday style on 80-6 meters using mainly CW and SSB, with a possibility of RTTY and PSK. QSL via their homecalls, by the Bureau or direct.

NA-136. Members of the Stamford Amateur Radio Association will activate Sheffield Island as W1EE/P on Sunday, June 13th. Team leader and QSL Manager is Adam, W1ASB. Look for more info on QRZ.com.

OC-295. Operators John/9M6XRO and Steve/9M6DXX visited Sebatik Island this past week and hoped to operate but were unable to operate this time. Actually, their visit was in preparation for a possible DXpedition later in the year (in September) to activate this rare IOTA. IOTA OC-295 has only been activated once before, (9M4SEB) in July 2006, and remains high up on the IOTA's "Most Wanted" list. Look for more details to be forthcoming.

SA-041. (Update) Ciro (Xavier), PY7ZY, informs OPDX that Andre, PY0FF, had to drop out of the upcoming SA-041 and SA-016 operation (see OPDX.961) due to surgery (to drain his right lung) and he is now in the middle of the recovery. The team members will miss him. They are currently looking for a possible substitute operator. LAST MINUTE UPDATE: For the SA-016 operation, Luke, PT7WA, has joined the team in Sao Luis on June 15th.

JW, SVALBARD. Roar, LA1EOA, will be active as JW1EOA from Longyearbyen, Spitsbergen Island (EU-026, WLOTA 0125), between June 10-15th. Activity will be on the HF bands using SSB. QSL via his home callsign.

JW, SVALBARD. Toshi, JA8BMK, will be active as JW/JA8BMK from Svalbard Island (EU-026) between July 1-11th. Activity will be on 20-6 meters using CW, SSB and RTTY. QSL via his home callsign, direct or by the Bureau. ADDED NOTE: Toshi will be attending the Friedrichshafen Hamfest before going to JW-land between June 25-27th.

K8CX's 2010 DAYTON HAMVENTION PHOTO GALLERY. Tom's, K8CX, 2010 Dayton Photo Gallery is now up at: http://hamgallery.com/dayton2010/ This is Tom's 14th consecutive year for the gallery, and it contains 317 photos taken at Crowne Plaza at various events and hospitality suites.

KH2/NH2, GUAM. Dave, N2NL, will be returning to Guam (OC-026) on June 17th, for three years. He will be active (outside of contests) as KH2/N2NL and during contests as NH2T. Look for him in the RSGB IOTA Contest (July 24-25th) as NH2T and CW only. QSL via LoTW or via W2YC.

KH6BZF PROPAGATION FORECAST/REPORT (For June 7-13th)....
Jun 7 AN SOLAR REFERENCE KEYS
Jun 8 AN --------------------
Jun 9 AN BN - Below Normal
Jun 10 AN AN - Above Normal/Geomagnetic Level is QUIET
Jun 11 AN LN - Low Normal
Jun 12 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jun 13 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP2, U.S. VIRGIN ISLANDS. Icko, JA1BPA, will be active as KP2/JA1BPA between June 12-13th. Activity will take place for the WFF Green Day (WFF KFF-066, IOTA NA-106) and will be on all HF bands including the WARC bands. QSLs will be sent automatically via the Bureau (GlobalQSL) and LoTW.

OFFICERS ELECTED FOR 2010-2011. Members of the Southwest Ohio DX Association (SWODXA) are proud to announce their recently elected officers for 2010-2011: Don DuBon, N6JRL - President
Dave Kalter, KB8OCP - Vice President
Joe Pater, W8GEX - Secretary
Kirk Swallow, W8QID - Treasurer
ADDED NOTE: Don wants to thank everyone who attended the DX Dinner during Hamvention. It was their 25th dinner and another sold out event. It was a great opportunity to meet and talk with DXers from around the world. They especially want to thank all of their door prize sponsors. They are looking forward to seeing all of you again next year.

QSL 3V8CB via YT3W. This is for activity during the CQWW WPX CW Contest last weekend.

Effective immediately, Buzz, NI5DX, is the QSL Manager for Khalid, A41OO. QSL cards will need to be designed and printed and logs transferred. It will be 6-8 weeks before the new cards are at NI5DX's QTH. It is hoped that A41OO may be able to ship some of his current cards for Buzz to use until the new cards arrive, but this is not certain.

John, W2YR/HS0ZDJ, spent 6 months this past year in Thailand and operated during the CW WPX SSB Contest from a location near Bangkok and an IOTA DXpedition to Chang Island (AS-125) with a group of other Thai licensed operators. While on their short four day island stay, they made about 5300 contacts. Winit, HS1CKC, is the QSL Manager for

all E20AS operations. QSL cards should be directed to him with sufficient return postage. John states that he has set up an "inter-active" log book with minimal information at the following Web site at: http://mysite.verizon.net/w2yr/E20AS.htm

K4M OQSL System GOING QRT. Due to the lack of use, the K4M Midway 2009 team will discontinue the Online QSL Service (OQSL) on June 15th, 2010. All requests received through that date will be processed. The usual traditional mail and Bureau requests will continue. Direct cards may be sent to: Midway 2009, Box 333, Bethlehem, Georgia 30620-9989.

TM0B via F6ANA, direct or by the Bureau. Activity (May 21-27th) was from Brehat Island (IOTA EU-074, DIFM MA-012, EPC 11091 and FR21). Over 10300 QSOs are in the log. The log is available online at: http://users.belgacom.net/cdxg QSL

QSL MANAGER Bill Horner, VK4FW, has announced that he now has a new E-mail address. It is: vk4fw@bigpond.com

NEW QSL MANAGER. As of January 2010, the new QSL Manager for Raoul, ZS1REC is Robert, W2ARP.

QSLS VIA LoTW: 5C5W, 5W0OU, 5W0YA, 6W1RY, 6Y9V, B4TB, BD1BYV, BD1ISI, CE3DNP, CN8KD, CW5W, CW6V, CX5UR, DL3EA, EA1BXX, EA1CS, EU7SA, F6HKM, FO8RZ, HK1N, HK1NK, HK3O, HR2/NP3D, IO3N, IT9HLR, IW6DGJ, J7Y, KH0N, LA5HE, LT2F, MD0CCE, ON7GB, RA4UF, SM3DMP, SP9FKQ, SQ2BNM, SV3AQR, T77C, V31CW, V31MU, VP2MDG, VP5H, XE1GK, XR3A, YN2EA, YO3APJ, YV200D, ZK3OU, ZK3YA and ZP6CW

QSLS RECEIVED VIA MAIL: 4N1DXXE, 4L8A, 4U64UN, 5K4T, 5W0OU, 6V7L, 6Y7J, 7P8BA, 8R1RPN, BX5AA, EH6SA, EN80AL, EU3AR, EY8MM, FG/F5IRO, FG/F6AUS, FG5LA, GW3YDX, HK3W, HR9/WQ7R, OL9HQ, P29VEK, SN3A, SU9HP, T40C, T77C, V21ZG, V88/DL7JAN, VP5JM, XU7AFU, YN2DD, YN2Z, YS1G, YS4/K3WT, ZK3OU and ZL7J

QSLS RECEIVED VIA THE BUREAU: VP6DX

R1MV, MALYJ VYSOTSKIJ ISLAND (NEW AGREEMENT SIGNED!). A press release from Jarmo, OH2BN, dated June 5th, states: On May 27, 2010, an agreement on the lease of the Russian part of the Saimaa Canal zone to Finland was signed in Lappeenranta, Finland, by the Prime Ministers of the Republic of Finland and the Russian Federation. The new 50 year agreement supersedes the initial lease of 1963 which is due to expire in 2013. The new lease no longer includes Malyj Vysotskij Island, the present R1MV DXCC entity. The coming into effect of the agreement is subject to ratification by the parliament of Finland and the Russian duma later this year.

SPECIAL EVENT (6m Op). Andy, N8OFS, will once again be active as N8OFS/p "portable caboose" from Jefferson, Ohio, during the ARRL June VHF Contest (June 12-14th). Activity counts for "Railroad Depots On The Air" (RRDOTA) for the Ashtabula Carson & Jefferson Railway (AC&J) reference number OH-0001. Grid Locator is EN91OR. This operation also is celebrating AC&J Railroads 26th anniversary. Andy will use a Kenwood TS-60 with 90W

and a PAR OA-50 Loop antenna at around 30 ft. He will use only one frequency, 50.225 MHz USB, between 1800-2200z on both days. QSL via eQSL (preferred) or direct to Andy's address listed on QRZ.com. ADDED NOTES: Andy will also be active during the CQWW VHF Contest (July 17-18th). Frequencies mentioned during this activity are 52.525 MHz FM locked, or 52.490 MHz FM if the band goes nuts. For more details about the railroad, visit the Web page at: http://www.acjrscenic.net/history.htm

T30, WESTERN KIRIBATI (Update). Haru, JA1XGI/W8XGI, is now active as T30XG until June 9th. His activity has been mainly on 30/20/17 meters, using CW and the Digital modes. QSL via JA1XGI, direct or by the Bureau. His Web page is available at: http://island.geocities.jp/t30xg
He also is on Twitter at: https://twitter.com/T30XG

V6, MICRONESIA. Miki, JJ2CJB, will be active as V63CJB from the Blue Lagoon Resort on Chuuk Island (OC-011) in the Federated States of Micronesia between October 29th and November 2nd. His operations will be mainly during the CQWW DX SSB Contest (October 30-31st). However, Miki informed OPDX that activity outside of the contest will be holiday style on 75/40/20/15/10 meters using CW and SSB. QSL via LoTW or to his home callsign, direct or by the Bureau.

VE7, CANADA (Special Event). Members of the Nanaimo Amateur Radio Association (VE7NA) <http://www.ve7na.ca> will host a 24 hour special events station, VE7TUB, beginning on July 24th. Activity is to commemorate the annual running of the "World Championship Bathtub Race" to be held on July 25th, in Nanaimo, British Columbia. A special commemorative sized QSL certificate is available (see Web page). For more information on the "World Championship Bathtub Race", visit the Web page at:
http://www.bathtubbing.com
For more information on special event station VE7TUB, visit the Web page at: http://www.ve7tub.ca

VK100, AUSTRALIA (Special Event). Luke, VK3HJ, will be activating special event station VK100WIA on behalf of his club, the Midland Amateur Radio Club, between June 7-9th. Activity is to celebrate the Centenary of the Wireless Institute of Australia. Activity will be on CW, as well as SSB and RTTY/PSK. Expected operating times are between 0200-1400z, or later if propagation offers. Please refer to QRZ.com for further details. The special callsign will be activated in three day blocks by participating radio clubs until the end of October. There is a Centenary Award offered; see details on the Web site.

VP2M, MONTSERRAT. Just a reminder that John, KB4CRT, will once again be active as VP2MRT from Gingerbread Hill, St. Peters Parish, Montserrat (NA-103, WLOTA 1475, WW Loc. FK86VS) between June 9-19th. Activity will be on 40-2 meters using CW, SSB, possibly PSK, and the June VHF Contest. He states that he will be running 100w, QRP 5w, HFpack 5w or 10w. QSL via KB4CRT, direct (w/SASE or DX 2GS). LoTW is "OK". His E-mail address for skeds operations via: vp2mrt2010@windstream.net

ZA, ALBANIA (Update). Chris, HG5XA, will be active as ZA/HA5X from the town of Orikum and a beach on the Bay of Vlora between June 10-24th. Activity will be holiday style, but he plans to activate some lighthouses and/or WFF locations. Please listen to the operator's comments for possible Lighthouse and WFF references, if any. Chris will also focus on some 6 meters and portable battery operations. Also, please remember that this is not a DXpedition, but a family holiday with his XYL Marta, ZA/HA9WM, and twin 5 year old daughters. Operating times will be limited and of lower priority. Chris has now also secured the necessary military and PTT permission to visit and operate from Sazan Island (IOTA EU-169) during this timeframe and will be using the callsign ZA0/HA5X. Exact date(s) for activating Sazan Island is dependent upon several factors, including weather and family program. Therefore, Chris will try to announce plans of activity on the air or possibly via his Web page. During this mini DXpedition, he will attempt to find electricity or a generator, but if that fails, he will reduce his power and be active as long as he can on battery power. QSL via LoTW and eQSL. If possible, please DO NOT send QSL cards. Paper QSLs will be available both direct and by the Bureau using the OQRS (Online QSL Request System) to be launched and announced later. Bureau cards will be sent out using GlobalQSL. The Web site for the ZA/HA5X DXpedition is at: http://za.ha5x.hu

ZS8M, MARION ISLAND (Update). Pierre, ZS8M, on Marion Island (AF-021), was mainly active on 20 and 17 meters this past week. Best times to watch are between 0630-0930z and 1230-1530z. Frequencies he has been on are: 14240, 14245, 18132 and 18140 kHz. QSL Manager is Dirk, ZS1X. See QRZ.com for details.

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

421. Useful Kenwood TS-440 anomoly...

Newsgroup: rec.radio.amateur.misc
Date: 2010-06-07 22:37:22 UTC
From: wboas@nyx.net
Message-ID: <Pine.SUN.3.96.1100607163258.26074A-100000@nyx>
Source record: 5790

I have a TS-440 that has been broadbanded by snipping the D-80 diode.

Now, on receive, it goes down to 30 kilocycles.

So tuning it to 60 kilocycles allows one to HEAR the WWVB
atomic clock-setting time signal's one minute sequence in CW mode.

Enjoy!

422. [DXNL] DXNL 1679 (Jun 9, 2010)

DXNL 1679 - Jun 9, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CT - PORTUGAL
Members of the "Association of Radioamadores of the District of Leiria"
will activate the castle in Leiria as CT6ARL on Jun 12.
QSL cards should be sent via CT bureau or via the address on QRZ.com.

FJ - ST BARTHELEMY, NA-146
Conny,FJ/DL1DA, will show up from St. Barthelemy (NA-146, DIFO FJ-001,
WLOTA LH-0377) mostly in CW or RTTY on 6m-40m from Jun 8-20.
QSLs should be sent via bureau, direct or via eQSL to his homecall.

GU - GUERNSEY, EU-114
Kevan,2E0WMG, will be QRV as 2U0WMG/p working in SSB on 80m, 40m, 20m
and 17m from Herm Island (EU-114) from Jun 11-17.
QSLs via homecall, direct or via bureau.

HK0/SA - SAN ANDRES ISLAND, NA-033
Once again Dennis,K7BV, is going to hit the airwaves as 5J0BV from
San Andres (NA-033, ARLHS SAP-002,WLOTA 2990) from Jun 9-23. You can
find him on the usual DX frequencies but mostly on 6m. He will put up
a beacon on 50.106 MHz.
Dennis wants the QSL "direct only" via his address on QRZ.com.
More information can be found on: http://www.qth.com/k7bv/caribe2010

JW - SVALBARD, EU-026
Longyearbyen on Svalbard (EU-026/WLOTA 0125) is the QTH of Roar,LA1EOA,
from Jun 10-15. He will sign JW1EOA in SSB. Unfortunately we have no
further informaton about used frequenzies, etc.
QSLs direct or via bureau to LA1EOA.

KP2 - AMERICAN VIRGIN ISLANDS, NA-106
OM Icko,KP2/JA1BPA, is active from KFF-066 during the "WFF Green Day"
on Jun 12/13. He will work at the station of KP2M on all HF bands incl.
the WARC bands. QSLs will be sent automatically via bureau or LoTW.

VK0/M - MACQUARIE ISLAND, AN-005
Dennis,ZL4DB, will not be able to show up as VK0/ZL4DB as planned. The necessary equipment which was expected to be at the "Macca Base" cannot be found there. He has only a radio for 2m available.

VP2M - MONTSERRAT, NA-103
JohnJohn,KB4CRT, will be QRV as VP2MRT in CW, SSB and maybe also in PSK on 40m-2m from Gingerbread Hill/St. Peters Parish (NA-103, WLOTA 1475) from Jun 9-19. He works with 100 watts but will also try to work QRP with 5 watts. QSL via KB4CRT, direct or via LoTW.

Graham,M0AEP, chose Montserrat as travel destination as well and will spent four weeks on the island from Jun 14 until Jul 12. He will sign VP2MDD on 80m-6m (incl. 60m) and will spend most of the time on 6m. He is using a TS480HX, a Carolina Windom and a 5ele Eagle for 50 MHz. QSL via bureau or direct to M0AEP.

VP5 - TURKS AND CAICOS ISLANDS, NA-002
Jim,WB2REM, and Glenn,KD2JA, will stay on Providenciales (NA-002) from Jun 10-17. They will be QRV as VP5/WB2REM and VP5/KD2JA in CW/SSB on 160m-6m from Jun 10-17. They are working also as VQ5M in CW and SSB in the ARRL VHF Contest on 6m from Jun 11-13. All QSLs via KD2JA.

ZA - ALBANIA
Chris,ZA/HA5X, is spending his holidays in the Albanian city Orikum from Jun 10-24. Chris will try to hand out also some points for the lighthouse and WFF awards, so please listen for detailed information on the air. Chris want to focus on 6m. For one day he will be QRV also as ZA0/HA5X from Sazan Island (EU-169). He is accompanied by his wife Marta,ZA/HA9WM, and their 5 year old twins. QSL via LoTW or eQSL. Chris explicitly asks for not sending a paper QSL but nevertheless will also answer direct mail and bureau QSLs.
More information and bureau QSLs may be requested at: http://za.ha5x.hu

4J - AZERBAIJAN
Natig,4J5T (team leader), Serge,4J5A (CW), Igor,4K6OF (digital modes), Boris,4K4K (CW), and Alex,4J6WMF (SSB), will be QRV as 4J0WFF from the natur reserves Absheron (WFF 4JFF-018) and/or Gala (WFF 4JFF-022) from Jun 11-14. They will work in CW, SSB and PSK on 40m-10m.
QSLs direct via 4J5T.

7Q - MALAWI
Barrie,G4AHK, can be found on the bands working as 7Q7BJ from Nkhotakota until Jun 22. He concentrates on 160m, 80m and 40m.
QSL cards should be sent via his homecall.

9H - MALTA, EU-023
Russell,G5XW, announced to be active as 9H3XW in SSB on all bands from the island of Malta (EU-023, MIA MM-001, WLOTA LH-1113) from Jun 12-19.
QSLs only direct via his homecall.

Steve,G0SGB, is working as 9H3BS from Malta and Gozo (EU-023) from Jun 12-25. Steve tries to activate as many lighthouses as possible

during his stay on the islands. QSLs only direct via his homecall.

FRANCE, SPECIAL EVENT STATION
During June and July 1944 the BBC war correspondents set up a studio
in the tower of Creully Castle to record and broadcast their coverages
to England. The station TM5BBC is working from this historic site
until Jun 10. QSL via F2UW, internet: http://radio.creully.free.fr

RUSSIA, SPECIAL EVENT STATION
R90K is very active on the bands until the end of the month June to
celebrate the 90th anniversary of the Republic of Karelia (UA1N).
QSLs direct or via bureau to RN1NU. Check also: http://www.cqkarelia.ru

DXCC: Following operations are accepted for DXCC credit now:
3B8EME Mauritius, operation from 2010
9U2T Burundi, operation from 2010
9UPVI/9U1P Burundi, operation from 2010
9X0CW Rwanda, operation from 2010
9X0LX Rwanda, operation from 2010
YI9HOC Irak, operation from 2009
LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jun 12/13: DRCG Long Distance Contest
Jun 12: BARTG RTTY Spring Contest
Jun 12: Portugal Day Contest (http://www.portugaldaycontest.rep.pt)
Jun 12/13: WFF Greenday 2010 Contest (http://www.wff44.com/en/list)

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-010, GM/MM, Outer Hebrides: Ray,M1REK, and Andy,M1LOL, are working as
GM6TW/p from Jun 12-17 from following islands:
Jun 12-13 Lewis and Harris
Jun 14-15 North and South Uist, Benbecula and Eriskay
Jun 16-17 Barra and Vatersay
QSLs direct via G0UZP or via the GM bureau.

EU-040, CT, Estremadura Province Group: A group of Portuguese HAMs will be
QRV as CQ7OA Berlenga Grande Island (DIP-ES-001) from Jun 10-13.
QSL via CT1FMX (direct/bureau).

EU-043, SM6, Goteborg Och Bohus Group: Bernd,DL8AAV, will be active as
SD1B/6 fom Orust Island from Jun 12-25. QSL via homecall.

EU-065, F, Finistere North West: Andre,F4ELK/p, and Christophe,F4ELI/p, are
QRV from Quemenes Island (DIFM AT-039) from Jun 10-12. QSL via F4ELI.

Lighthouse activities (WLOTA/ARLHS/ILLW)

CQ7OA LH 1054 Gr.Berlenga Jun 10-13
CT3/CS1GDX LH 0053 Madeira Jun 10-13

Dawn to Dusk - 24 Hour Scottish Islands Amateur Radio Challenge
---
Bob Alexander,GM0DEQ, plans to activate up to 15 Scottish IOTA islands in
24 hours signing GB4DTD on Jun 14. The first HAM who contacts him on all
islands is awarded the "Orkney Crystal Glass Trophy".
More information can be found online at: http://www.gdram.com

Kids Day on June 19

The next Kids Day takes place on June 19. During this event organized by
the American Boring Amateur Radio Club kids are working on the bands under
supervision of another HAM. Preferred frequencies are 3.685, 7.085,
14.270-14.300, 21.380-21.400, 28.350-28.400 MHz and local 2m repeaters.

DRCG continues RTTY Contest with a new name

The DL-DX RTTY Contest Group (DRCG) decided to continue the former ANARTS
RTTY Contest with some rule changes and a new name. It's new name is
DRCG Long Distance Contest (short: DLDC). The points table of the ANARTS
and the multiplier rules still apply, VK bonus points have been cancelled
and the contest is split up into three parts of 8 hours each to be held on
the second full weekend of June. In 2010 these three parts will be on
Jun 12, 0800-1559 UTC, on Jun 13 from 0000-0759 UTC and from 1600-2359 UTC.
A new six hour category for single operators is added as well. Existing
contest modules of the former contest may still be used.
All rules and further information can be found at: http://www.drcg.de

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, CT1EWA, DF6EX (WINQSL),
DH4PSG, DJ5AV, DJ5MN, DK8JB, DL1SBF, DL3IE, DO3ME, F6AJA & Les Nouvelles DX,
DL7VOA, LU5FF, NG3K, SWL Norbert Maibaum and others.

The German PDF version can be found on the DARC homepage at:
http://www.darc.de/referate/dx/bulls/dxmb/2010

Subscribe or unsubscribe to the DXNL mailing list yourself at:

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

June 9, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Run and Rove - ARRL June VHF QSO Party
- Kids Day 2010
- 2009 IARU HF HQ Resolution
- AO-51 Satellite Field Day Schedule
- Nine-Year-Old CW Whiz Kid
- 2009 ARRL 10 Meter Contest Results
- Coaxial Cable References
- It's All In Your Head

NEW VHF+ OPERATORS - THINGS TO DO

Let's turn the tables and encourage HF operators to try out those funny
"50" and "144" and other buttons that send their all-band, all-mode
rigs above 30 MHz. This weekend is the ARRL June VHF QSO Party and
there will be lots of folks to work. Start near the weak-signal calling
frequencies and be prepared to change bands!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

A golden issue managed to be put out last time!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

June 12-13

- ARRL June VHF QSO Party
- Asia-Pacific Sprint--Phone
- GACW WWSA CW DX Contest
- REF DDSM Six Meter Contest
- BARTG Sprint 75--Digital
```

- World Wide QRP Contest
- WAB 50 MHz Phone

June 19-20

- Kid's Day--Phone
- SARL Youth Day Sprint--Phone (June 16)
- All-Asian DX Contest--CW
- SMIRK QSO Party
- West Virginia QSO Party
- Spanish Islands Contest

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The recent brouhaha over 2009 IARU HF Championship logs from DA0HQ has been addressed by the ARRL as the administrator of the contest. The full statement is online at the ARRL Contest Branch blog <http://kx9x.wordpress.com/>. In a nutshell, while individual German amateurs may have violated the rule of one-call-per-transmitter in making many questionable QSOs, there is no evidence that the DA0HQ team solicited that behavior. As a result, no overall winner's certificate will be awarded for the 2009 contest - only continental leaders certificates. More importantly, effective with the 2010 contest, HQ logs will not be adjudicated, nor will scores for HQ stations be published. All logs may be made public at the discretion of the contest administrator, i.e. the ARRL. HQ stations will continue to be multipliers in the contest.

Thanks to Dean N6BV's Propagation Predictions software <http://www.radio-ware.com/>, there is a new set of customized propagation forecasts <http://bit.ly/WRTCProp> for WRTC-2010 participants. Inside the ZIP file there are four PDFs for Very Low SSN and Low SSN conditions at 100 and 1500 watts. This will help you find the WRTC stations (R30A-R39Z) just as well as it helps them find you! With the event just a month in the future, this is good information to help everyone prepare to participate effectively. (Thanks, Bob N6TV)

Doug K1DG found some links to "official" ITU Zone maps <http://www.itu.int/ITU-R/terrestrial/broadcast/hf/refdata/maps/index.html> and corner coordinates <http://www.itu.int/ITU-R/terrestrial/broadcast/hf/refdata/reftables/ciraf.txt>. While individual contest sponsors may redefine these zones to some degree, this is a good place to start. Note that the zones do not always follow state boundaries in the US!

The PVRC <http://www.pvrc.org/> and NCCC <http://nccc.cc/> are pleased to post another joint webinar with Dean N6BV on "Tactical Use of Propagation Predictions for HF Contesting". Held on June 7, Dean illustrated some "how-tos" with numerous area coverage maps. The video will be on-line <http://www.pvrc.org/webinar/webinars.htm> soon, so be patient until it is posted. (Thanks, Dean N6DE)

Dave W9ZRX announces the availability of an update to his VHF_USA Databases <http://www.k3lr.com/w9zrx> has been made available for download, just in time for this weekend's ARRL June VHF QSO Party. This version of the database contains 13,816 calls - mostly Canadian, Mexican, and US. It's available in a variety of formats, too.

Silva LU1DZ notes that the rules for the World Wide South American CW Contest <http://gacw.no-ip.org/> (it runs this weekend!) are now available in six languages; - Castilian (Spanish), English, German, Romanian, Portuguese, and French. All-in-one software <http://www.ghafler.com/wd8knc.html> by WD8KNC that includes WWSA is also available. If your band-country totals for South America are low, here's a chance to log our neighbors to the south!

The BARTG "Sprint 75" contest throws a bit of a monkey wrench into your RTTY works as it requires operation at 75 baud instead of the standard 45.45 baud. You can find the steps for getting WriteLog <http://www.writelog.com/> running at on Don AA5AU's Web site <http://rttycontesting.com/75baudrtty/75baudrtty.html>. For N1MM Logger <http://www.n1mm.com/> users, MMTTY can be used in AFSK mode at higher speeds. Also, the MMVARI and FLDIGI engines are options within N1MM Logger that you can use. A standalone version of MMTTY <http://mmhamsoft.amateur-radio.ca/> can be used in AFSK mode. It can also be used when it is directly driving a COM port in FSK mode. The COM/FSK solution is typically limited to older computers running Windows 98 or older. (Thanks, Bob K0RC)

Field Day's a-comin' and how are you going to pick up those satellite bonus points? The Radio Amateur Satellite Corporation (AMSAT <http://amsat.org/>) promotes its own version of Field Day <http://www.amsat.org/amsat-new/awards/amsatfd.php> for operation via the amateur satellites, held concurrently with the ARRL event, and the AO-51 Command Team and Operations Group has announced the AO-51 configuration for Field Day:

June 24 09:35Z - June 27 06:40Z FM Repeater, V/U
Uplink: 145.920 MHz FM, PL 67Hz
Downlink: 435.300 MHz FM

June 27 06:40 - June 27 22:00Z FM Repeater, V/S
Uplink: 145.880 MHz FM
Downlink: 2401.200 MHz FM

Please observe the 1 QSO per repeater Field Day rule! The latest AO-51 Command Team and Operations Group News <http://www.amsat.org/amsat-new/echo/CTNews.php> is a good Web site to visit to keep tabs on AO-51 operation. (From AMSAT News Bulletin ANS-157)

Will the next solar cycle turn out to be bust or boom? We don't know, for sure, but we do know that it will be the most closely-watched cycle ever. This story from NASA <http://science.nasa.gov/science-news/science-at-nasa/2010/04jun_swef/>

discusses all the new observing capabilities that will be reporting on
our stellar parent. Today's NASA Earth Observatory also features an
article on solar variability
<http://earthobservatory.nasa.gov/Features/Interviews/lean_20100525.php?src=eoa-features>.
(Thanks, Donald WB5VNI)

Web Site of the Week - In the hills of New Hampshire lurks a "giant
golf ball" and like all inquisitive souls, we wonder what could be
inside the giant golf ball. It turns out to be MIT's Haystack radio
observatory <http://www.haystack.mit.edu/>! Recent upgrades cracked
open the golf-ish globe, exposing the observatory as documented in this
online collection of photos
<http://www.haystack.mit.edu/cgi-bin/millstone_documentation.cgi/HaystackDishLiftPhotos>.
(Thanks, Rich KL7RA)

WORD TO THE WISE

EDZ - short for Extended Double Zepp, this wire antenna is a Field Day
secret weapon. On its design band, the antenna 1.28-wavelengths long
and has about 3 dBd free-space gain. If fed with low-loss feed line,
such as ladder line, it can be used on multiple bands, too!

==> SIGHTS AND SOUNDS

Get out of that chair, slowpoke! Katia RZ9UMA is one fast nine-year-old
CW operator! She is blazing in video 1
<http://www.youtube.com/watch?v=WCWcBTSG8AY> and video 2
<http://www.youtube.com/watch?v=eiSplkBX6NU> from the recent CQ WW WPX
CW contest. Show this to your kids and then stand back! (Thanks, Steve
N2IC/5 and Brian OZ2BRN)

What did those exquisite conditions during WPX CW sound like from
latitude 63 North? Phil KL8DX shows you in the video linked to his blog
<http://kl8dx.blogspot.com/>! (Thanks, Rich KL7RA)

Tom K8CX has posted his massive collection of photos from the 2010
Dayton Hamvention <http://hamgallery.com/dayton2010/>. Enjoy!

RESULTS AND RECORDS

The expanded Web version of the 2009 ARRL 10 Meter Contest results are
now online. You can download the PDF file and other items from the ARRL
Contest Results Web page.
<http://www.arrl.org/contest-results-articles> The complete results
package includes the Line Scores and the Searchable Database, too!
(Thanks, ARRL Contest Branch Manager, Sean Kutzko, KX9X)

Dink N7WA has started a Soapbox <http://www.eskimo.com/%7Emwdink/3830/>
page for the recent WPX CW. Browse on over and find out if conditions
were really as exceptional as they seemed!

OPERATING TIP

Spare headphones are a good item to have around, particularly if your
regular pair starts aggravating your auriculae or pressing on your
pinnae! When you need some relief, just change headphones!

==> TECHNICAL TOPICS AND INFORMATION

While "tuning across the 'net" for some technical information, these
two Belden documents caught my eye: one on coaxial cable applications
<http://www.belden.com/pdfs/Techpprs/CoaxialCablesandApplications.pdf>
and a coaxial cable technical reference
<http://www.belden.com/pdfs/03Belden_Master_Catalog/22Technical%20Information_Glossary/22Technical_Information.pdf>.
Handy thing, this Internet - think it will catch on?

To make your own ladder line, you'll need "rungs" that can stay out in
the weather for as long as it takes. Charles W2SH recommends the large,
exterior cable staples found in your local home improvement emporium.
"Among their wire accessory supplies, you will find some gray plastic
staples. Each one carries two 1-1/2-inch nails in to secure the staple
to the outside of your house. The manufacturer is Gardner Bender Co."
Remove the nails and enlarge the holes to pass #12 or #14 AWG copper
wires, creating a feed line with 1-1/4-inch conductor spacing and an
impedance of somewhat higher than 450 ohms.

For static dissipation in any antenna, placing a λ-wavelength
shorted stub across the feed line provides a dc path to ground,
assuming one side of the feed line is grounded. (Thanks, Dave WX7G)

For a computer's serial data port to drive relays, you need a small
microprocessor to interpret the data stream, drivers for the relays,
and the relays themselves. All this is available in the Velleman K8056
kit <http://www.vellemanusa.com/us/enu/product/view/?id=500375> that
has eight relays and drivers on it. It interfaces to parallel, serial
RS-232 or TTL-level signals, and there are other options. The kit has a
very simple schematic and an open circuit board that lends itself to
all sorts of modifications. (Thanks, Jim W6RMK)

Getting the solidified gunk off antennas that have been "out there" for
a few years can be quite a chore. Steel wool pads are not recommended
because of their tendency to leave iron whiskers embedded in the
aluminum (and your hands), causing spot rust and binding problems in
nested tubing. Dave WA3GIN suggests a combination of NAPA engine parts
cleaner and a 3M medium foam sanding pad. The result is similar to wet
sanding with an agent that dissolves or loosens the oxidized stuff so
that the pad can break it loose and polish the aluminum. This minimizes
the required amount of elbow grease to facilitate the operation.

Technical Web Site of the Week - Dick N6AA sends word of a new on-line
question-answering Web site, Wolfram Alpha
<http://www.wolframalpha.com/>. Start by viewing the introduction
<http://www.wolframalpha.com/screencast/introducingwolframalpha.html>
so you can begin to learn how to use the service.

==> CONVERSATION

It's All In Your Head

Opinions abound on the various email reflectors and no topic seems to draw out more of them more reliably than whether or not using a CW decoder of some sort "counts as real CW". Like lots of things, I also have an opinion, but this nice post by Dick K6KR on the cq-contest reflector <http://lists.contesting.com/mailman/listinfo/CQ-Contest>, beat me through the pileup.

73, Ward N0AX

I recall visiting the Samuel F. B. Morse house in Poughkeepsie, NY and saw (perhaps a replica of) Mr. Morse's telegraph machine. Morse's telegraph receiver drew inked marks on a strip of moving paper - the first CW "code reader". The operator had to know (or be able to look up) the dot and dash encoding of each character, but that activity didn't have to occur at any particular speed. Only later was it discovered that humans could listen to the clicking of the telegraph sounder as a substitute for reading the paper strip.

I would argue that Samuel F. B. Morse's invention shows that code readers aren't "new technology" at all. Decoding Morse characters from their sound is the newer technology. Few debate the propriety of semiautomatic and automatic keying equipment (CW encoders). As a contest participant that has to listen to some really "creative" bug adjustments, I'm glad most of us do!

Why is it such a big leap to a CW decoder? If you have the skills and inclination to decode CW in your head with other CW signals in the audio passband, good for you. You'll be more efficient at decoding than today's electronic code readers. I can't reliably manually encode CW as fast as I can decode bursts. But when I send faster by turning a knob, I'm still operating CW, thank you very much. So is my colleague at the other end with his CW decoder.

What we call CW is the transmitted signal encoding, not the means of generating or deciphering it. If it's a straight key, bug, electronic keyer, or a code practice tape machine, it's CW. If someone decodes it in their head or with a machine, it's still CW.

If you choose to operate without a CW decoder, or with only a straight key, or only on alternate Saturday mornings, or with only one radio, or enter contests with less than the full arsenal of the permitted technology, you should feel free to do so. Most contest organizers seek ways to draw more participants, not look for reasons to push people away.

I really enjoy CW. I almost always use an electronic CW encoder. The CW encoder I use, and the logging computer, and the comfortable chair, and the other equipment I have around me all "assist" me in improving my contesting experience. I want your CW QSO! Use a CW decoder if you wish. I'm glad you'll be on the radio this weekend. If you hear (or read) me calling CQ, I'd like you to call me.

I'm still working to improve my CW decoding skills. Pulling one complete call accurately out of a group of callers and keeping the rate up is something that I'm trying to improve in every contest. When you're in that "zone" and the rate is high... It just feels great! But my contesting sophistication had to evolve to be able to get to this point, and I remain in awe of the skills of many of my colleagues. And I'll keep trying to improve.

73, Dick K6KR

==> CONTESTS

9 June through 22 June 2010

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Asia-Pacific Sprint--Phone, from Jun 12, 1100Z to Jun 12, 1300Z. Bands (MHz): 14-21. Exchange: RST, serial. Logs due: 7 days. Rules <http://jsfc.org/apsprint/aprule.txt>

GACW WWSA CW DX Contest--CW, from Jun 12, 1500Z to Jun 13, 1500Z. Bands (MHz): 3.5-28. Exchange: RST, CQ zone. Logs due: Jul 30. Rules <http://gacw.no-ip.org/>

BARTG Sprint 75--Digital, from Jun 12, 2000Z to Jun 12, 2359Z. Bands (MHz): 14-28. Exchange: Serial number. Logs due: Jun 30. Rules <http://www.bartg.org.uk/>

World Wide QRP Contest--Phone,CW, from Jun 12, 0000Z to Jun 20, 2400Z. Bands (MHz): 1.8-28, 50-432. Exchange: RS(T). Logs due: Jul 11. Rules <http://en.jaqrp.org/>

SARL Youth Day Sprint--Phone, from Jun 16, 0900Z to Jun 16, 1000Z. Bands (MHz): 7. Exchange: RS and age. Logs due: 15 days. Rules <http://www.sarl.org.za/>

All-Asian DX Contest--CW, from Jun 19, 0000Z to Jun 20, 2400Z. Bands (MHz): 1.8-28. Exchange: RST, operator age (YL may send 00). Logs due: Jul 31. Rules <http://www.jarl.or.jp/English>

West Virginia QSO Party--Phone,CW,Digital, from Jun 19, 1600Z to Jun 20, 0200Z. Bands (MHz): 3.5-28. Frequencies (MHz): CW--35 kHz from band edge, Phone--35 kHz from General/Nov/Tech segments. Exchange: RS(T), WV county or S/P/C. Logs due: Jul 20. Rules <http://www.qsl.net/wvsarc>

Kid's Day--Phone, from Jun 19, 1800Z to Jun 19, 2400Z. Bands (MHz): 3.5-28. Exchange: Name, age, location, favorite color. Rules <http://www.arrl.org/FandES/ead/kd-rules.html>

Spanish Islands Contest--Phone,CW,Digital, from Jun 20, 0600Z to Jun 20, 1200Z. Bands (MHz): 3.5-28. Exchange: RS(T), DIE number or serial.

Logs due: 60 days. Rules <http://www.ea5ol.net/die>

VHF+ CONTESTS

ARRL June VHF QSO Party--Phone,CW, from Jun 12, 1800Z to Jun 14, 0300Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Jul 14. Rules <http://www.arrl.org/contests>

REF DDSM Six Meter Contest--Phone,CW, from Jun 12, 1600Z to Jun 13, 1600Z. Bands (MHz): 50. Exchange: RST, serial number, grid square. Logs due: 15 days. Rules <http://concours.ref-union.org/>

World Wide QRP Contest--Phone,CW, from Jun 12, 0000Z to Jun 20, 2400Z. Bands (MHz): 1.8-28, 50-432. Exchange: RS(T). Logs due: Jul 11. Rules <http://en.jaqrp.org/>

WAB 50 MHz Phone--Phone, from Jun 13, 0900Z to Jun 13, 1500Z. Bands (MHz): 50. Exchange: RS, serial, WAB square or DXCC entity. Logs due: 21 days. Rules <http://www.worked-all-britain.co.uk/>

SMIRK QSO Party--Phone,CW, from Jun 19, 0000Z to Jun 20, 2359Z. Bands (MHz): 50. Exchange: Call sign, SMIRK number, grid square. Logs due: Aug 1. Rules <http://www.smirk.org/>

==> LOG DUE DATES

9 June through 22 June 2010

June 9 - CQ-M International DX Contest, email logs to: CQM@SRR.RU, paper logs and diskettes to: CQ-M CONTEST COMMITTEE, P.O. BOX 25464, KRASNOYARSK 660049, RUSSIA. Rules <http://www.srr.ru/CONTEST/cq_m_10_eng.php>

June 10 - ARS Spartan Sprint, email logs to: spartansprint@yahoo.com, paper logs and diskettes to: (none). Rules <http://adventure-radio.org/wiki/index.php?title=Spartan_Sprint_Rules>

June 10 - His Maj. King of Spain Contest, CW, email logs to: smreycw@ure.es, paper logs and diskettes to: URE HF Contests, P.O. Box 220, 28080 Madrid, Spain. Rules <http://www.ure.es/contest/431-sm-el-rey-contest-english-version.html>

June 12 - Nevada Mustang Roundup, email logs to: w7gk_1@yahoo.com, paper logs and diskettes to: Nevada Mustang Roundup 2010, Elko Amateur Radio Club, P.O. Box 5607, Elko, Nevada 89802, USA. Rules <http://nv.arrl.org/NQP/>

June 12 - Wake-Up! QRP Sprint, email logs to: ru-qrp-club@mail.ru, paper logs and diskettes to: (none). Rules <http://qrp.ru/modules/sections/index.php?op=viewarticle&artid=7&page=1>

June 13 - DigiFest, email logs to: digifest_robot@mixw.net, Upload log <http://mixw.net/misc/DigiFest/digifest_log.php>, paper logs and diskettes to: (none). Rules <http://www.mixw.net/misc/DigiFest/rulese2010.html>

June 14 - RSGB 80m Club Championship, Data, Upload log <http://www.vhfcc.org/cgi-bin/hfenter.pl>, paper logs and diskettes to: (none). Rules <http://www.rsgbcc.org/hf/rules/2010/r80mcc.shtml>

June 15 - Indiana QSO Party, email logs to: inqp@hdxcc.org, paper logs and diskettes to: HDXCC, c/o Mike Goode, N9NS, 10340 Broadway, Indianapolis, IN 46280-1344, USA. Rules <http://www.hdxcc.org/inqp/rules.html>

June 21 - RSGB National Field Day, Upload log <http://www.vhfcc.org/cgi-bin/hfenter.pl>, paper logs and diskettes to: RSGB G3UFY, 77 Bensham Manor Road, Thornton Heath, Surrey CR7 7AF, England. Rules <http://www.rsgbcc.org/hf/rules/2010/rnfd.shtml>

==> ACKNOWLEDGEMENTS

ARRL Contest Update wishes to acknowledge information from WA7BNM's Contest Calendar <http://www.hornucopia.com/contestcal> and SM3CER's Contest Calendar <http://www.sk3bg.se/contest>.

The ARRL Contest Update is published every other Wednesday (26 times each year). ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/contests/update/.

424. Webinar on How to Use the New ARRL Web Site

Newsgroup: rec.radio.amateur.misc
Date: 2010-06-09 13:56:46 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20100609011056.BFE082081F@bmail.arrl.org>
Source record: 5793
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

Midwest Division ARRL Members have been invited to attend an online Webinar on How to Use the New ARRL Web Site. The Webinar will be on June 15, 2010 from 8:00 PM to 9:30 PM CDT, and is sponsored by Atlantic Division Director Bill Edgar N3LLR. See the topics and list of presenters below. To reserve a seat for the Webinar, click on the link below or copy and paste the link into your browser.

73, Cliff K0CA

How to Use the New ARRL Web Site

Join us for a Webinar on June 15

Space is limited.

Reserve your Webinar seat now at:
https://www1.gotomeeting.com/register/704588721

We will be discussing the thought behind and the capabilities of the new ARRL Website that debuted two months ago. Topics will include registration, setting up your profile, navigation, how to save Favorites and use of other new and advanced features. We will also be taking questions from participants. Presenters will include Harold Kramer, ARRL COO; Katie Glass, ARRL Digital Content Manager; and Brent Robertson, KB1PYY, President of Fathom, the firm that designed the site.

Title: How to Use the New ARRL Web Site

Date: Tuesday, June 15, 2010

Time: 9:00 PM - 10:30 PM EDT

After registering you will receive a confirmation email containing information about joining the Webinar.

System Requirements
PC-based attendees
Required: Windows® 7, Vista, XP, 2003 Server or 2000

Macintosh®-based attendees
Required: Mac OS® X 10.4.11 (Tiger®) or newer

ARRL Midwest Division
Director: Cliff H Ahrens, K0CA

** M-V ISLAND - NEW AGREEMENT SIGNED **

On May 27, 2010 an agreement on the lease of the Russian part of
the Saimaa Canal zone to Finland was signed in Lappeenranta,
Finland by the Prime Ministers of the Republic of Finland and the
Russian Federation. The new 50 year agreement supersedes the
initial lease of 1963 which is due to expire in 2013. The new lease
no longer includes Malyj Vysotskij Island, the present R1MV DXCC
entity. The coming into effect of the agreement is subject to
ratification by the parliament of Finland and the Russian duma
later this year. 73 SOURCE: Jarmo J. Jaakola via GOTO List

KB7ME CN71 qrv in VHF Contest
I will be activating Grid CN71, Del Norte County, California, for the June VHF contest, same as last year. Actually plan to be there about a week, should be QRV sometime this Friday and leave the following Thur or Fri. Will have 5 bands, 50,144,222,432 and 1296. Emphasis on 6m for the FFMA program and those needing this grid on 6, a M2 6m5x and kw amp. Lets hope for some prop. In addition to SSB and CW, will run WSJT when the bands are slow, especially early morning and late evenings. On the other bands, will have yagi's and TE bricks, 1296, 2x 45 ele loopers and 120w. If I have cell service like last year, will have internet for outside contest time. Hope to work you. Mike KB7ME, Vancouver, Washington CN85qq

AA4ZZ June VHF QSO Party EME fm EM96
Hi All, The contest team of AA4ZZ will be on again this year from EM96 with 2 XP20s and a KW with full Azimuth and Elevation. Dates are June 12th and 13th. We have made some real improvements to the station and hope it shows in our QSO count. We will try and be CQ'ing as much as we can on 144.146 Starting at Moon rise and working as often as we can until Moonset Please check the N0UK logger and Livecq144.com for updates and frequency changes. Also if you see us please make it known on the logger. We are only allowed one station transmitting at a time so we are coordinating closely with the SSB/CW guys. to get as much time in as we can. We are not allowed to use the loggers once contest has begun. We will run short sequences with no 73s. Please continue to call during our QSOs and spread out as much as you can. 144.1455 to 144.1465 is fine. All QSLs go to AA4ZZ QRZ address. Thanks and we sincerely appreciate every QSO. Vy 73, AA4ZZ Team

The VA7ISL contest group will once again head up to the "Perch" in CN88bv on Southern Vancouver Island. We'll be QRV on 6m through 2304 and on 10GHz. We'll have 100W and long Yagis on the low bands and a few Watts on microwaves. The primary goal of the operation is to outscore VE3WCC and get first place multiop in Canada. We are always looking for more operators, if you're interested, come and join us! We'll have VE7DAY, DXG, JOX, SLZ and VA7AJK on the hill. Bunch of really cool guyz. You don't have to bring anything, we

have it all. This time we will actually turn on the903+ gear on
Sunday, so if you're in the Puget Sound area and want to go out
somewhere we'll be looking for you. The access road is still
snowed in, but the torrential rains predicted should wash it away
by contest time. 73, Gabor, VE7DXG

K9AKS qrv DN80 for the VHF Contest
I will operate the June Contest from NE Colorado in DN80.
I have secured a site near Holyoke, out on the HIgh Plains. QRP
portable with 10 watts on 6, 2, 222, 432, and 1296. CW and SSB
only. I hope to be set up by Friday evening to work some 6 meters
with 100 watts; but the power goes back down when the contest
begins. Hope I can give out the grid to some people who need it.
Good luck in the contest to everybody. 73, Curt Roseman k9aks

** LA7VHF 70 MHz BEACON in JP99 qrv **

Hi all, since today the first Norwegian 4m beacon is QRV - LA7VHF
in JP99LQ (Callsign: LA7VHF, Locator: JP99LQ (Tromsoe), Frequency:
70,081 MHz, Antenna: 4-ele yagi beaming 190 deg, Power: 10 W output
(ca. 40 W ERP), Beacon responsible: Aasmund Birger Jakobsen, LA5TFA
Many thanks to Ralf LA5QEA for supplying a commercial TX and PA,
and to Dithmar DF7KF for supplying the beacon keyer. The units were
integrated and re-tuned to 70 MHz by LA0BY. The beacon is presently
operated from the QTH of the beacon keeper LA5TFA. It is planned to
collocate the 4m beacon with the 2m beacon LA7VHF and the 6m beacon
LA7SIX. Reception reports are very welcome and can be send by email
to la5tfa"at"online.no. LA5TFA and LA9AKA will also be QRV very soon
on 70 MHz from JP99. 73, Stefan (LA0BY) NRRL Beacon Manager
SOURCE: tnx to Stefan, LA0BY, direct to MMMonVHF

ps - time to check the beacons! at 7th june 2010 the 1st opening
towards SV was qrv SV3GKE/B most time alone on the 2m band! In any
case you do need infos use: http://www.mmmonvhf.de/bcn.php DL8EBW

** OZ0TX qrv HF and 50 MHz from JO46BG in June 2010 **

Hello friends, I work with 1kw into a 3 ele Yagi@ 7 m agl. QRV in
IARU Region I Contest on 50 Mhz. 80 Meter: Dipol, 1KW, 20m: 1KW
into GP. Maybe Internet and QRV in ON4KST chat... LATEST NEWS from
Andy, DG3XA, dated 2010-06-08: Now i have a OZ Call: OZ0TX in
6 Meter IARU 1 Contest...
SOURCE: tnx to Andy, DG3XA, direct to MMMonVHF

** KL7/KB7Q Gene at Alaska **

KL7/KB7Q Gene will take the 6 meter gear and try some EME from
BP40da during his stay at ALASKA, May 15th to August 15th.
LATEST NEWS from Gene, KB7Q, dated 2010-06-05: All is going well
here. Six EME contacts on 6m so far, and three 6m opening on Es.
The big news is that I worked DU7/PA0HIP on June 3 @ 440 utc, two
JA stations were logged just before that. I also worked AC4TO in
Florida May 31. More info on my web site: www.geneshea.com
I'll be QRV EME, and scanning for Es opening too.
Best - SOURCE: Gene, KL7/KB7Q, direct to MMMonVHF

** UPDATE: 5J0BV on 6m again **

In case you missed this, Dennis is taking his portable 6m EME
system again to San Andres Island (HK0/A) again this week. I think
he will be most busy with Es, but if you are interested in an EME
sked, contact W1JJ. GL and VY 73, Lance San Andres Isl., HK0.
[Update]. I will be on the air from San Andres Island EK92 as 5J0BV
during the June VHF Contest running a KW to a 42' boom 8 element
6M8GJ yagi. My primary operating frequency will be 50.106.2 where
I will run a constant breakable CQ CW beacon when not hearing any
callers. The vast majority of the United States requires a double-
hop but with the first hop occurring in open Caribbean water,
signals tend to be good when the band opens. WSJT meteor scatter
skeds, unfortunately, are out of the question due to the distance
to the United States except for Florida. EME skeds are possible,
though. Please contact Mick W1JJ at w1jj@aol.com if you have stn
capability for EME and want to sneak a grid in during the night
when things are slow. Good luck to all and May The Es Be With Us!
Source: Dennis, K7BV, via Lance, W7GJ via MAGIC BAND EME

** CT6ARL qrv from Castelo de Leira (IN60) **

Hello All! Operators of Radioamadores do Distrito de Leira (ARAL),
will be active on 12 June 2010 from Castelo de Leira, WCA:
CT-00061, DCFP: C-061, DMHP: LR-001, DMP: 1009. Be plans work as
CT6ARL on all bands CW/SSB and VHF. QSL via QRZ.COM. 73 & 11!
de Andrew RN1CW Co-ordinator of WCA (World Castles Award)
SOURCE: Andrew RN1CW via GOLIST

** CanSats are active Friday June 11st on 432 MHz **

On Friday, June 11th, a number of 'CanSats' (satellite in a can,
Google "CanSat") will be launched to an altitude of 1000 m (3300 ft)

on a military firing area near 't Harde, Netherlands. This is a competition of Delft technical University for pre-university school teams. On board is a 10 mW telemetry transmitter operating on 433.200 MHz. My team has designed a foldable ground plane antenna which should give more range than the antennas used by other teams and we would very much like to prove our max. achievable range calculations. We kindly request the cooperation of as many radio amateurs as possible in a circle of 130 km around 't Harde (JO22) (52.23.36N-05.55.18E) to send reception reports. As the emissions will only last 90 seconds, a procedure to announce the launching has been set up. Please announce your participation beforehand by e-mail to PA0HPV(at)veron.nl for further details. Thanks!
SOURCE: tnx to Henk Vrolijk, PA0HPV, direct to MMMonVHF

** VA2NU qrv 50 MHz from FO60-FO70-FO80-FO90 **

Between June 13th and 20th Vittorio VA2NU will be active as VA2NU from St. Laurence Gulf in FO60-70-80-90 grid squares. He will be qrv with 100 Watt in a Moxon antenna on a Caravan-car.
SOURCE: Mail from Vittorio VA2NU via SixItalia

** Flavio, IW2NEF/IG9, qrv HF & 50 MHz from Lampedusa **

Lampedusa Island ï¿½ AF-019 IW2NEF/IG9 dal 18 al 31 ï¿½ 7 - 2010 , operating holiday style from 6 m to 40 m bands 100w max power I will participate to RSGB IOTA contest SOURCE: GOLIST 2010-06-06

** FS/K9EL Activity at French St Martin **

John, K9EL will be in French St. Martin (NA-105, DIFO FS-001, WLOTA 0383, Grid Loc. FK88) from 8-17 June 2010 on a family vacation and will be operating whenever possible as FS/homecall. He will be using an IC7000 and verticals for 80-6 metres plus he will try to bring a yagi for 6m. QRV using CW, SSB and RTTY. QSL via home call, bureau cards OK.
SOURCE: K9EL via ICPO Bulletin (03-11 June 2010)

** FJ, ST. BARTHELEMY / FK87 **

Kurt, DL1DA, will be active as FJ/DL1DA from Saint Barthelemy Island (NA-146, DIFO FJ-001. It also counts for WLOTA LH-0377) between June 8-20th. Activity will mostly be on 40-6 meters using CW and RTTY. QSL via his home callsign.

WIA ON PARADE

This weekend 2 events on the VK Social Calender will be attended by WIA Officers.

Oxley Region Amateur Radio Club 35th Annual Field Day
New South Wales

This will be the 35th Field Day ORARC. Ha run on the June long Weekend and is expected to attract a large gathering of Hams from around the area and interstate travellers. The club will also be highlighting the 100 year celebrations of the WIA. As usual there will be trade stalls, second-hand items and items of interest.

South East Radio Group Convention and Australian Fox Hunting Championships South Australia

Radio Convention, Home Brew Contest, Fox Hunting.
Give aways. All at the Margaret Street scout hall
(behind the Mount Gambier Police Station)

WIA President Michael will attend Oxley region and WIA Secretary Geoff the South Australian event.

Two-way contact achieved on 8.97 kHz

What is believed to be the first Amateur Radio two-way contact on 8.97 kHz using truly radiated fields took place on Friday, June 4, 2010 between DJ2LF and DF6NM.

Markus DF6NM has written this report on the historic contact:

This morning, June 4th between 6 and 8 UT, Walter (DJ2LF) and myself (DF6NM) were able to successfully conduct a two-way contact (aka "QSO") on 8.97 kHz. The distance between us is 20.2 km, well outside the reactive near field zone (lamda / 2pi = 5.3 km).

Both of us were using our small backyard Marconi antennas at home, for transmit and receive. Walter's antenna has 260 pF at an estimated effective height of about 5 m. He achieved about 370 mA current, resulting in a radiated power of about 5 uW (EMRP). I also got 5 uW from 270 mA into 240 pF at about 7 m.

DF6NM started by transmitting a carrier on his lower frequency, from 4:00 to 4:30 UT. This was indeed seen by DJ2LF, who replied on his upper frequency from 4:45 to 5:15, reporting positive reception.

Then DF6NM confirmed reception on the upper frequency from 5:30 to 6:00. The whole procedure took two hours.

Walter's signal can actually still be seen between my own dashes on my VLF grabber.

http://www.mydarc.de/df6nm/vlf/vlfgrabber.htm

As far as we know, this was probably the first two-way amateur QSO on VLF, using truly radiated fields. Another dream came true...

Best regards,

Markus DF6NM

(thanks to Southgate for this)

We contacted WIA Director Peter Young on how we VK's may operate on 8 kHz

"I have check the ITU allocations table and find there is no allocation for any service below 9 kHz and this is reflected in the Australian Radiocommunications Spectrum Plan.

Accordingly, any person may apply to the ACMA for a Scientific Licence Apparatus Licence.

There is no mechanism to assign a 8,97 kHz frequency to an Amateur Service Licence in Australia."

Radio ghost mystery at former RAF station

World War Two radio continues to pick up vintage broadcasts despite not having any power

A 70-year-old radio at a Scottish heritage centre has been picking up vintage broadcasts featuring Winston Churchill and the music of Glen Miller.

The Pye valve wireless at Montrose Air Station, a heritage centre that tells the story of the men and women who served there, has no power and is not connected to any source of electricity.

The aerodrome has been a source of paranormal sightings and sounds for almost a century, with reports of ghostly figures, eerie footsteps and door handles turning, but the mysterious wireless broadcasts have had even the most sceptical staff at the station searching for a rational explanation.

The vintage radio set is kept in a recreation of a 1940s room. Several people have heard Second World War era broadcasts including the big band sound of the Glenn Miller orchestra and speeches by Winston Churchill. The broadcasts come on at random and can last for up to half an hour.

Technicians who examined it removed the back, but found "nothing but cobwebs and spiders".

Bob Sutherland, a trustee of the air station heritage centre and its treasurer, said: "I have heard it playing Glenn Miller and recognised the song as At Last.

"The volume was very low but the music was quite identifiable.

"Graham Phillip, another volunteer, has heard what he was sure was Winston Churchill and others, including centre curator Dan Paton and his wife, have heard it.

"I was a wireless operator with the RAF and know a bit about them. We have also had our resident radio expert, Ewan Cameron, look at it.

"If we had a powerful transmitter in the area the radio might pick up something, but we don't.

"It is an old Pye radio which would probably explode if it was switched on."

Mr Phillip said: "We have all heard the footsteps and seen door handles turn but the wireless is something new and unexplainable.

Read the full story at:

http://news.stv.tv/scotland/tayside/181127-radio-ghost-mystery-at-former-raf-station/

WIA Centenary Update

It seems that everyone who attended the WIA Centenary Convention in Canberra, two weekends ago now, is still talking about the marvellous three day program.

Today we return, this time to the WIA Centenary Dinner and in particular the speech given by the ACMA Chairman, Chris Chapman. Here is an edited version of that important speech.

(audio ends with audience clapping and Robert Broomhead saying
"Thanks very much, Chris Chapman").

A news release which expands on that that speech, plus an audio recording and text of the full speech, can be found on
www.wia.org.au

A report will appear in the July edition of Amateur Radio magazine.

VK100WIA reaches another milestone

The Midland Amateur Radio Club in Central Victoria last Monday logged QSO number 2,000 with Laurie Davidson VK7ZE at Spalford in Northern Tasmania on the 80m band. Reports for the SSB contact exchanged were five by nine both ways.

Laurie VK7ZE has also worked the WIA Centenary callsign on at least the 40m and 160m bands.

In news from the WIA Office a test run of laser printing the QSL details on the VK100WIA QSL cards was successful. The first batch of cards will be submitted to the QSL bureau by the end of the end of this month.

If you're looking for contacts with VK100WIA then check out the online logging on the WIA website www.wia.org.au

Two Thousand calls is great going from the clubs and WIA, and the first QSO of course kicked of with our own WIA President VK3KI

(AUDIO CUT OF VK100WIA FIRST CONTACT)

As a part of the WIA Centenary celebrations, in the spirit of celebrating early radio in Australia, on June 16th to 18th 2010 the Gippsland Gate Radio and Electronics Club will re-enact the historically important reception of the very first direct press message sent from the UK to Australia, which was received at 5am on the 5th December 1921 by Mr. T. W. Bearup at an AWA experimental receiving station established at Koo Wee Rup.

The GGREC will be operating out of the rooms of the Koo Wee Rup Swamp Historical Society located at 325 Rossiter Rd Koo Wee Rup using the VK100WIA call sign.

GGREC has organised a plaque commemorating the experimental station.

The Mayor will be unveiling the plaque on Friday afternoon at 3pm.

Any amateur or any member of the public is welcome to go along to the activities.

The President of GGREC, Chris Chapman, is scheduled to be interviewed on Melbourne ABC 774 at 6.35am on Tuesday 15th June, specifically about the WIA Centenary activities in general, and the GGREC activities in particular.

DISCUSSION POINT

Danger, Beware of Ham Radio

The YouTube is a fabulous video sharing facility. There are plenty of good and informative videos about many aspects of amateur radio.

But there's one – the Truth about Ham Radio by Bert Fisher K1OIK – that interestingly gives one man's opinion about what's wrong with our hobby and some within it.

Talking from his radio shack during a ten minute pay out on the amateur radio community, he stereotypes hams in a series of over generalisations that could have many of his ill-informed viewers believe we are mostly all fat, engaging in meaningless activity, intellectual deficient, elitist and gutless when not behind a microphone.

Bert K1OIK obviously does not like contests and contesters. He claims they go nuts, abandon their families and even withdraw from important social occasions.

He likens packet clusters that list all active DX stations during a contest, to a hunter going into a zoo and killing a whole lot of caged animals.

The video ends with an industrial-style sign that states: Danger, Beware of Ham Radio.

Bert Fisher K1OIK, obviously a great character. He has other videos including "Ham Radio, a critical evaluation", and "The Real World of Ham Radio", that make interesting viewing.

He obviously has enjoyed amateur radio most of his life, and shares the hobby with his daughter Erin KB1LOQ.

(Jim Linton VK3PC)

ACROSS VK

Spud VK8ZWM will do the all state whip around in just a 'tic' but REALLY across Australia soon will be Sherbrooke Community Radio Club's, VK3KID.

In the Aussie Outback June 19 until 4 July they'll 'be on air' HF VHF and on CB.

As part of this trip, they'll be officially visiting three Aboriginal schools and will introduce amateur radio to those schools. As Sherbrooke Community School had the privilege of participating in an ARISS contact last year, They'll offer their expertise and know-how.

But here's the 'neat' bit, working HF from most camp sites, the Club will be making a QSL card of each camp site and each card will be a one and only QSL card.

Any contact which result in them receiving a QSL card with a self-addressed stamped envelope will be replied to with one of their special QSL cards.

Please refer to the running sheet on http://vk3kid.cloud.prohosting.com

Listen out on 14.180 MHz and 7.080.

Generators are NOT allowed to be used after 17:00 local area time so, as long as the batteries last they'll be on air.

HAMS ACROSS AUSTRALIA.

local news email qnews-vk-subscribe@yahoogroups.com

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP and this one is for you mate!

One of the things that brings most of us together in a recreational pastime is feeling part of the big picture, knowing what is happening and sharing our interest with others. As part of the WIA efforts to keep us abreast of happenings, Graham, VK4BakerBaker, puts together National News and QNEWS.

With QNEWS, we depend on the audio feeds that come from our clubs and listeners. The ease of anyone that has a multimedia computer to write, record and submit items for QNEWS has never been as great as it is now.

There are 30 Qld clubs affiliated with the WIA and listed in the Centenary Edition Callbook. We know that things happen to suit local needs, and a friendly voice speaking about a local event can let your club members as well as the other listeners know what is happening. When you think that about half to 2/3 of a page of typing is all you need to fill 1&1/2 to 2 minutes of recording then here is a painless way of getting the news out.

Think about this, if most clubs worked on sending about 4 news items each year, this would guarantee at least two club items each week. Our friends at Townsville keep their flag flying every week. With other regular contributors, this is not a big ask to spread the word.

We have listeners who depend on what they hear in the weekly news broadcast to keep up with their hobby. There are others who appreciate knowing that other amateurs are enjoying the hobby too. When news that can benefit us all, such as a grant scheme, a special event station or award, is announced, don't be shy....do what you do with your other friends....spread the word.

Think about some-one you would like to know about your news item, some-one you can't eyeball or 'phone and picture them in your mind's eye as you email QNEWS and say, "This one is for you mate".

I&#65533;m Geoff Emery VK4ZPP and That&#65533;s What I think... how about you.....?

BUNDABERG

The exciting news from Bundaberg is that our new club repeater site on Double Sloping Hummock, better known as Mt Watalgan is on air, having been officially opened by the Mayor on Sunday 16th of May.

The completed project has cost over $6500 and the club was very pleased that Bundaberg Regional Council saw the value in effective emergency communications and supported our project with a Community Grant.

We&#65533;ve installed an Icom FR6000 repeater and ARCOM Controller which are currently putting out tremendous signals heard way to the south of Bundy.

We’re waiting to hear from folks in the north and out west about just how far this repeater can be heard.

VK4RBW is the third unit in the clubs repeater backbone and it complements the units in Bundaberg and on Mt Goonaneman. Our WICEN group can now effectively cover the entire Bundaberg Regional Council area which doubled in size following Local Government amalgamation.

So if you’re a nearby neighbour or just passing through switch over and try out the new VK4RBW on 439.775 [four three nine decimal seven seven five].

This has been VK4UD with the Bundaberg news

GYMPIE
www.gceginc.org.au

I’m Roger, VK4BNQ with the news from the Gympie Communications & Electronics Group:

2 metre repeater update: The Club’s 2m repeater, VK4RCM, is currently running on test at Chatsworth just north of town on a new solar powered system. All is working well including the APRS reporting of battery voltage and shack temperature. Thanks to Bob, VK4MR for his construction of the new, very secure solar panel brackets and to Barry, VK4KKN for the wiring. Application has been made and is currently with the WIA and ACMA to alter the repeater site location to Mt. Boulder. As soon as approval is received, the device will be moved to the mountain top for initial testing. Recently the site was visited by a group of Club members to install the antenna to the tower. The shack was cleaned and the site made ready and secure for the repeater.

The Gympie group has a new location for regular Club meetings. They are now being held in the old church building within the grounds of the Gold Mining and Historical Museum at 215 Brisbane Road. Many thanks go to Paul, VK4YPM for allowing us to use his basement at Leading Edge Electronics for the first couple of years of our meetings.

Club meetings are held on the first Thursday of every month. Visitors are always welcome.

For Gympie Area News, I’m Roger, VK4BNQ.

ROCKHAMPTON AND DISTRICT

RADAR CLUB Monthly Meetings third Wednesday of each month,
SES Building Charles and Randwick St 7.30pm.

Another major car rally is planned for Byfield 17TH JUNE. RADAR CLUB comms will be required again so stay tuned for further info. Comms assist will also be needed in the event around the show grounds Rockhampton the following weekend. Contact Secretary Clive on vk4acc@wia.org.au

GREETINGS FROM "CALDWELL BY THE SEA" ! THIS IS DON VK4FNQA,
WITH NEWS FROM NORTH QUEENSLAND, BEAMING TO YOU TODAY FROM
THE TWENTY SEVENTH FAR NORTH AND NORTH QUEENSLAND AMATEUR RADIO GATHERING.

THIS STELLAR EVENT HAS BEEN UNDERWAY SINCE FRIDAY AT THE
CARDWELL VILLAGE BEACHCOMBER MOTEL AND TOURIST PARK
ON ONE OF THE LOVELIEST PARTS OF THE CASSOWARY COAST.

SO FAR ATTENDEES HAVE SOAKED UP SOME NICE WEATHER,
EXCELLENT CONVERSATION, BITS OF EXTREME LOAFING, DONE A
BIT OF SKYLARKING WITH RADIO BEAMS, VISITED THE LOCAL
TELEGRAPH MUSEUM FOR A GUIDED TOUR AND WRESTLED WITH
ELUSIVE QUESTIONS AT THE TREC 'TRIVIA CHALLENGE'.

THERES BEEN A BIT OF SELLING OUT OF THE BOOT, SOME HF
CONTACTS FROM CHARLIE CHARLIE FOUR AND AFTER THIS NEWS
THE GROUP ARE HEADING OVER TO THE CAREFULLY MANICURED
PARKLAND SET ASIDE FOR THE TRADITIONAL NORTH QUEENSLAND
VERSUS FAR NORTH QUEENSLAND CRICKET MATCH.
THIS WILL BE FOLLOWED BY THE GROUP PHOTOGRAPH SESSION
AND, YOU GUESSED IT, MORE SERIOUS LOAFING AND MAYBE
RENDERING ASUNDER; SOMEONE ELSE'S CAR BOOT CONTENT.

IF YOU ARE HEADING IN TO THE GATHERING AFTER THE NEWS
YOU MIGHT BE LUCKY AND STILL GET A CHANCE TO TURN YOUR
CHANGE INTO FORTUNE WITH RAY AND WENDY'S LUCKY CLUB.

THE GATHERING CONTINUES UNTIL MID MONDAY MORNING.

NOW A BIT FURTHER SOUTH FROM HERE, SOME HAMS THAT
WERE NOT ABLE TO MAKE IT TO CARDWELL HAVE BEEN
OPERATING RADIOS TO THE SOUND OF BURNING RUBBER
AT THIS WEEKENDS MOUNT STUART SPRINT, PUT TOGETHER
BY THE TOWNSVILLE CITY AUTOSPORTS CLUB.

SATURDAY SAW A HEAP OF HECTIC OPERATING WITH
COMPETING VEHICLES INVOLVED IN FAST BLASTS ALONG
PART OF THE REID PARK V8 SUPERCAR TRACK, WHILST THE
OPERATORS TRACKED, TIMED AND KEPT A SAFETY WATCH ON THEM.

TODAY THE PACE IS NOT SO HECTIC, WITH OPERATORS AT
THEIR CHECKPOINTS ALONG THE MOUNT STUART ROAD
SINCE 7AM PROVIDING TIME CONTROL, COMPETITOR
TRACKING AND SAFETY COMMUNICATIONS FOR THE EVENT.

YET AGAIN THE OPERATORS ARE LOOKING FORWARD TO
THE FREE AUTOBURGER WHICH WILL BE DELIVERED TO
THEIR DOOR AT THEIR CHECKPOINTS, AND A SAFE
CONCLUSION TO THE EVENT BY ABOUT 4PM.

FINALLY, THE TARC INC HAS THE SOCIAL EVENING
HAPPENING THIS TUESDAY JUNE 15TH FROM SEVEN

THIRTY PM AT THE CLUB ROOMS, PERCHED ON TOP OF
SES HEADQUARTERS IN GREEN STREET WEST END.
EVERYONE WELCOME TO ATTEND AND PUT THE MAGAZINE
OF RENOWN BACK-SCATTER TOGETHER AND TO MINGLE
AND SOCIALISE A BIT.

SO, I LEAVE YOU BRIMMING WITH ENVY AS I SOAK UP
SOME EXTREME LOAFING AMBIENCE WHILE THIS EDITION
OF QNEWS FOR SUNDAY THIRTEENTH OF JUNE IS BROUGHT TO A CLOSE.

THIS HAS BEEN DON VK4FNQA IN CASSOWARY COAST
TROPICAL PARADISE FOR THE TOWNSVILLE AMATEUR
RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO,
AND ENJOYING QNEWS FROM VK4WIA.

VK6

VK6 has a Top Town literally. It is a place called Tom Price and is
747 metres above sea level. Overlooking Tom Price is a mountain called
Mount Nameless. From it s top you can overlook the town, and the Tom Price
pit which is one of the earliest Iron Ore Mines in the Pilbarra.

Tom Price was a hot bed of Amateur (and CB) activity in the 70 s and the
early 80 s. Sadly it faded away. But now it is back, and now there are plans
to establish a 2 metre repeater there. It will have an antenna 1100 metres
above sea level, will identify as VK6RTP, and will be around 146.625 if
the licence is accepted. There are plans to link it via IRLP/Echolink.
Once established it will be the highest repeater in VK6. It is almost
impossible to build one at a higher elevation. Known advocates of this
repeater are VK6NDT Jono, VK6HV Steve, VK6BHY Mike, and VK6FLAM Craig.

vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

The latest meeting of the CCARC held an antenna construction session, with the
main project being a 2m end fed dipole suitable for portable or base use. These
simple, low budget antennas were constructed under the guidance of David, VK7DC.

Once the antennas were constructed, tuning was quickly and easily done outside
the rooms, thanks to Bill VK7MX with his antenna analyser.

For those that missed out, basic construction details can be found on the
project page of the club website.

The next meeting will be on the 27th of June, and will feature Vernon VK7VF
giving a talk on using the HP8924 RF test set, and afterwards, the RF tools
software package.

(David, VK7DC, Secretary, CCARC)

In Darwin club news,

The exams team are hard at it at the moment with up to thirty candidates for foundation licences being trained and examined.
throw in a couple of standard licence exams and you can see why.

the next meeting of the Darwin amateur radio club is at sports house Waratah crescent Fannie bay at 7pm on the 7th of July and of course the clubrooms are open Thursdays between 10 am and noon for the weekly cuppa morning.

relays of this broadcast are on the following frequencies from the Darwin clubrooms at 0900am cst Sundays. vhf repeater 146.900 and on hf on 3.555mhz, 7.193mhz,10.137mhz and 14.337mhz.

Broadbanding the Top End - Laying fibre optic cable through Arnhem Land

A remote Australian telecommunications project won at the Global Telecoms Business Innovation Awards in London this week.

Telstra and its partners are celebrating after winning a second international award for their Arnhem Land Fibre Project a $34m joint venture between Telstra, the Northern Territory Government and Rio Tinto Alcan and achieved with valuable support from the Northern Land Council.

This winning project has seen the laying of over 800km of fibre optic backbone through tropical savannah terrain from Jabiru to Nhulunbuy. Further works in mean a number of island communities also have broadband access.

Life-changing technology associated with high-speed broadband is now being used to deliver services across this region of Australia, significantly improving access to education, health, justice and business services and contributes to regional growth.

(Telstra Press)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Abandoned distress beacon triggers search

An old distress beacon dumped in NZ's Bay of Plenty rubbish tip wasted time and resources, police say.

Tauranga Search and Rescue were called out after aircraft flying into Tauranga and Rotorua (New Zealand) reported receiving a signal from an emergency beacon within the greater Tauranga area.

It was assumed the beacon was an old 121 MHz model, which was no longer monitored, as the signal was not being picked up by satellite.

The Tauranga Coastguard spent more than two hours sweeping the harbour, the signal stopped and it is presumed the beacon was disabled as garbage was being crushed at the time.

FRENCH COMPANY TO MARKET NEW SDR TRANSCEIVER

France is the latest nation to enter the ham radio marketplace. This with the announcement of the new TransFox is Software Definable Radio transceiver designed and built in that nation.

According to a press release from the manufacturer RFPA-RFham, the new radio is available in receiver only or receiver/transmitter configuration. Its stock coverage is 1 MHz to 1100 MHz. but it can be extended beyond existing frequency range upon request. Because of this the TransFox brings what RFPA calls unique Software Definable Radio to the VHF, UHF and SHF bands.

Other features include Software Definable Radio demodulation and modulation over a 50, 100 or 200 KHz baseband, compatibility with existing Windows or Linux software in addition to specific SigFox software, spectrum analysis and 1 Hz tuning resolution.

First delivery of this new radio is slated for mid July. More information on the TransFox transceiver in the French language is on line at www.rfham.com

HAM RADIO 2010 IN GERMANY JUNE 25 - 27

With Dayton 2010 now history, the next truly big social event will be the 61st Lake Constance Convention and Ham Radio 2010 gathering.

Both of these events are organized by DARC which is Germany's national ham radio society, and will take place from June 25th to the 27th in the city of Friedrichshafen. They are the largest on the European continent.

Mitch Wolfson DJ0QN is a member of the DARC Executive Board. He tells us that Ham Radio 2010 is different than conventions and hamfests in the United States:

DJ0QN: "We have a section where clubs from all over the world -- mainly from Europe but also from other parts of the world like the U.S. have booths to basically meet other people from those clubs and countries and perhaps (get them to) join a club. So there's a lot of international good will with a whole lot of people getting together and meeting.

"Its basically a very easygoing show and does not have a high stress level. You can sit between the halls in this beer garden area and talk to people all day if you choose to do that. Or you can hang around the flea market or go to the main booths or go to talks most of which are in German but there are some in the English language as well."

More about this exciting European ham radio gathering in English is on line at http://www.hamradio-friedrichshafen.de/ham-en/index.php

==========

WEIRD AND WONDERFUL

From the weird and wonderful file, hello I&#65533;m Jim Linton VK3PC with two tales of bees and radio.

In India there's a belief that radiation from mobile phones is harming bees, while in the US scientists are actually attaching radio transmitters to the backs of bees to track them.

Researchers at the Punjab University in Chandigarh did a controlled experiment using a real mobile phone in one hive, a placebo or fake phone in another, and no phone in a third hive.

The results found that the hive with the real phone had a bee population decline, poor yield of honey and the queen bee was far less productive.

Meantime from New York comes reports of Smithsonian Tropical Research Institute scientists attaching 300-milligram radio transmitters to the backs of male orchid bees, to track their movements.

A photo of a hapless bee with a transmitter complete with a horizontal whip antenna stuck on its back using a combination of eyelash adhesive and super glue, is simply amazing.

A fleet of 14 bees were tracked, five giving good travel itineraries over the 10-day battery life of their transmitter, four were found dead, perhaps with exhaustion and the others were lost, or dare we say, simply buzzed off.

Fox hunting minus the fox

This story originated by ABC South East SA news and picked up in the UK
by SouthGate Amateur Radio Club.

Over one hundred amateur radio enthusiasts have travelled to Mount Gambier
this weekend for the 47th Radio Convention

Every year on the June long weekend ham radio enthusiasts get together for the
Australian Fox Hunting Championships.

Competitors travel from all over Australia to claim the coveted champion's
trophy.

Wayne Kilpatrick is the South East Radio Group Convention Coordinator and said
this has nothing to do with 'eliminating foxes from the countryside'.

The game involves using direction finding radio equipment to look for people
and collect points.

Contestants usually compete in teams and all squeeze into the one vehicle.

"Most operate from four wheel drives and they might have a team of four people
in a four wheel drive, but the equipment in that car is absolutely
mind boggling," he said.

The antenna formations are an art.

"You couldn't believe that you could put this much equipment on a vehicle."

Read the full ABC South East SA news story (with pictures and audio interview with Wayne Kilpatrick) at:

==========

WIANews - we've reported...YOU decide.

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

==> + PUBLIC SERVICE: AMATEUR RADIO OPERATORS ACTIVE DURING SEVERE
TORNADO BREAKOUT IN NORTHWESTERN OHIO

During the early overnight hours of Saturday, June 5 through Sunday,
June 6, severe weather and tornadoes ripped across an area of
Northwestern Ohio, laying a large path of destruction. ARES and SKYWARN
groups in Erie, Huron, Sandusky and Wood Counties activated nets as
early as 10:30 PM Saturday, with many not standing down until 4:30 AM
the next day. According to ARRL Ohio Section Manager Frank Piper,
KI8GW, traffic on the nets was filled with reports of severe weather
damage, flooding and downed power lines. Read more here
<http://www.arrl.org/news/amateur-radio-operators-active-during-severe-tornad
o-breakout-in-northwestern-ohio>.

==> + FCC NEWS: IN FCC RULE MAKING PROCEEDING, ARRL SUPPORTS EMPLOYEE
PARTICIPATION IN DRILLS

In March 2010, the FCC released a Notice of Proposed Rule Making
(NPRM) (WT Docket No 10-72) that proposed to amend the Part 97 rules --
```

specifically 97.113(a)(3) -- governing the Amateur Radio Service. The new rules would provide that, under certain limited conditions, Amateur Radio operators may transmit communications on behalf of their employers during government-sponsored emergency and disaster preparedness drills. While current rules provide for Amateur Radio use during emergencies, the rules prohibit communications where the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer, except for government-sponsored drills for which a waiver has been granted. The NPRM asked for comments from interested parties. As such, on May 24, the ARRL filed its initial comments and on June 7, filed its reply comments. The ARRL's filings reflect the position adopted by the Board of Directors at its January 2010 meeting. Read more here <http://www.arrl.org/news/in-fcc-rule-making-proceeding-arrl-supports-employe e-participation-in-drills>.

==> + FCC NEWS: FCC DISMISSES CALIFORNIA HAM'S PETITION TO AMEND SECTION 97.1

In September 2009, Gordon Schlesinger, W6LBV, of San Diego, California, filed a Petition for Rule Making with the FCC, seeking to amend Section 97.1 of the Commission's rules to account for changes in technology and amateur practice since the rule was adopted. On June 8, 2010, the FCC dismissed Schlesinger's Petition. Schlesinger proposed new text in his Petition that he claimed "is equivalent to a total restatement of the Basis and Purpose for the Amateur Radio Service, to account for the numerous and significant changes both in wireless technology and in the practice of the Amateur Radio art over the intervening decades since the present Basis and Purpose was adopted. The current Basis and Purpose, which consists of five goals for the Amateur Radio Service, appears to have been adopted more than 50 years ago. The dramatic change in both telecommunications technology and the practice of Amateur Radio over the past five decades strongly suggests that a review and reconstitution of the Basis and Purpose is in order." Read more here <http://www.arrl.org/news/fcc-dismisses-california-ham-s-petition-to-amend-se ction-97-1>.

==> + ARRL FIELD DAY: FIELD DAY STATION LOCATOR SERVICE RETURNS FOR 2010

First introduced in 2008, the ARRL's Field Day Station Locator Service <http://www.arrl.org/field-day-locator> has proved a popular addition to the Field Day toolbox. This service -- an interactive map that helps amateurs or those interested in Amateur Radio find a Field Day <http://www.arrl.org/field-day> site near them -- is free to clubs or individuals who will be operating public Field Day stations. Stations can also be listed by state or province. So far, hams in all 50 states and Puerto Rico have listed Field Day sites on the Field Day Locator. If your group would like to be a part of the Station Locator Service, it's easy to get started -- just go to the Field Day Station

Locator Web site <http://www.arrl.org/field-day-locator> and follow the instructions (this is a different link than was printed in the Field Day packets). ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On June 26-27, join tens of thousands of Amateur Radio operators as they gather for a public demonstration of the Amateur Service.

==> + BOY SCOUTS REVIVE FOUR MERIT BADGES FOR 100TH ANNIVERSARY

In keeping with Boy Scouts of America's centennial theme -- Celebrating the Adventure, Continuing the Journey -- four retired badges have been brought back for the group's 100th anniversary. The effective date for earning these new merit badges -- Carpentry (1911-1952), Tracking (formerly Stalking, 1911-1952), Pathfinding (1911-1952) and Signaling (formerly Signaler, 1910-1992) -- is April 1, 2010; requirements must be completed no later than December 31, 2010. The contemporary merit badges closely resemble the original designs of their counterparts, but with a gold border, immediately identifying it as a 2010 historic merit badge. These four historical merit badges may be used toward a Scout's rank advancement.

"The Signaling merit badge is a great way to encourage hams who are already involved in Scouting to mentor this limited-time badge in their Troop and perhaps in other ways, such as camps," said ARRL Rocky Mountain Division Director Brian Mileshosky, N5ZGT; Mileshosky is the chairman of the ARRL's ad hoc Committee on Scouting. "Hams -- and especially clubs, that have more resources and volunteers -- who are not involved in Scouting at the present time but want to assist a Troop with earning the Signaling merit badge -- should contact their local BSA Council to inquire about Scoutmasters in their area to contact and offer their assistance." The requirements for the Signaling merit badge are the original requirements as written in 1911. Read more here <http://www.arrl.org/news/boy-scouts-of-america-revive-four-merit-badges-for-100th-anniversary-including-signaling>.

==> + ON THE AIR: ARRL USING TWITTER TO PROMOTE FIELD DAY

This year, the ARRL will be using Twitter <http://twitter.com/ARRL_FD> to promote Field Day events. According to ARRL Media and Public Relations Manager Allen Pitts, W1AGP, more and more people, both young and old, are using social networking sites -- such as Twitter and Facebook <http://www.facebook.com/story.php?id=1126126806&share_id=133156716701040&rc1a73746&r24746a04#%21/pages/ARRL-the-National-Association-for-Amateur-Radio/20069212407> -- to keep their friends up-to-date with their latest activities. The account for ARRL's Field Day actions with Twitter is ARRL_FD <http://twitter.com/ARRL_FD>. Sign up to create your own Twitter account -- it's free -- and follow ARRL_FD. If you already have a Twitter account, just follow us.

Twitter is a social networking and microblogging service that
enables its users to send and read messages known as tweets
<http://support.twitter.com/articles/15367-how-to-post-a-twitter-update-or-tw
eet>,
text-based posts of up to 140 characters displayed on the author's
profile page and delivered to the author's subscribers (who are known
as followers). You can send these short messages by computer or even
via text with your cell phone. When you receive a tweet, you can also
relay it on to your own followers (called a retweet
<http://support.twitter.com/articles/77606-what-is-retweet-rt>). Your
followers can in turn relay it even further, getting your message
spread around, growing and going.

Pitts explained that posts with #FIELDDAY (the # sign must be included)
in with the message, Twitter will keep track of it: "If there is enough
traffic with #FIELDDAY in the text, then major blogs and news outlets
take note of it. So by taking part in this experiment, tweeting and
using the #FIELDDAY insert in with your message -- called a hashtag
<http://support.twitter.com/articles/49309-what-are-hashtags-symbols>
-- will help bring all of Field Day to the media's attention. Social
networking is new to a lot of us, but I found it is really not hard at
all to learn and do. The more people we get on, the more tweeting we
do, we have the wonderful opportunity to expose Amateur Radio to a new
audience."

==> PROPAGATION: SPACE WEATHER AND SOLAR STORMS TOPICS AT FORUM IN
NATION'S CAPITAL

The National Space Weather Program Council held a forum in Washington,
DC earlier this week. On Tuesday, June 8 at the National Press Club,
the Space Weather Enterprise Forum discussed how solar storms affect
today's technological society. This is the fourth year in a row that
policymakers, researchers, legislators and reporters have gathered in
Washington to share ideas about space weather. This year, forum
organizers sharpened the focus on critical infrastructure protection,
with the ultimate goal to improve the nation's ability to prepare,
mitigate and respond to potentially devastating space weather events in
order to serve a broad and growing user community.

According to Richard Fisher, the Sun is "waking up from a deep slumber,
and in the next few years we expect to see much higher levels of solar
activity. At the same time, our technological society has developed an
unprecedented sensitivity to solar storms. The intersection of these
two issues is what we're getting together to discuss. I believe we're
on the threshold of a new era in which space weather can be as
influential in our daily lives as ordinary terrestrial weather. We take
this very seriously indeed." Fisher is the head of NASA's Heliophysics
Division. Read more here
<http://www.arrl.org/news/space-weather-and-solar-storms-to-be-topics-at-upco
ming-forum-in-nation-s-capital>.

==> + COMING UP IN QST: TAKE A LOOK AT WHAT'S IN STORE FOR JULY

The July issue of QST is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a look at how Amateur Radio fits into the Boy Scouts of America's 2010 National Scout Jamboree -- the upcoming issue of QST has something for just about everyone.

If you've ever had a hankering to try your hand at making some digital QSOs but you weren't sure if you had the right equipment, look no further. After reading an article in the January 2010 issue of QST about how to get on the air with PSK31 in one weekend, Howard "Skip" Teller, KH6TY, decided that he needed a low cost sound interface card that could be built in a single evening. Read all about it in his article "The Classic Universal Sound Interface Card." Hams know that just one lightning strike can take out their whole shack. Jim Talens, N3JT, learned that lesson the hard way -- even after he disconnected all cables and lines that led into his shack from the outside. Read about what he learned and how he recovered in "A Simple and Effective Approach to Station Grounding."

Was it just a few weeks ago that close to 20,000 hams trekked to Ohio for the 2010 Dayton Hamvention&#65533;? If you were there -- or even if you weren't -- relive the experience with "The 2010 ARRL EXPO at the Dayton Hamvention -- Everything Under the Sun (or Rain, or Snow, or...)" by ARRL News Editor S. Khrystyne Keane, K1SFA. With everything from soup (tasty clam chowder) to (hot roasted cinnamon) nuts, you can find just about anything at the Dayton Hamvention. ARRL Technical Editor Joel Hallas, W1ZR, takes a look at some of the new products that were introduced at this year's Hamvention.

<http://www.arrl.org/multimedia> ARRL Membership and Volunteer Programs Assistant Manager Norm Fusaro, W3IZ, takes a look at the Yaesu FTdx9000MP HF and 6 meter transceiver in this month's Product Review. "The full size FTdx9000MP is Yaesu's flagship transceiver, offering a 400 W transmitter and a full suite of features and functions," he reports. "Hardware and Firmware upgrades under the PEP9000 program have made the radio even better." ARRL Senior Assistant Technical Editor and QEX Editor Larry Wolfgang, WR1B, checks out the Elecraft W2 HF/VHF/UHF wattmeter. "Elecraft's easy-to-build W2 wattmeter kit results in an accurate instrument that can be used over a wide range of frequencies and power levels," recounts Wolfgang.

Of course, there are the usual columns you know and expect in the July QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more. Look for your July issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> ON THE AIR: WX4NHC REPORTS 2010 ON-THE-AIR STATION TEST RESULTS

On Saturday, May 29, WX4NHC -- the Amateur Radio station at the National Hurricane Center (NHC) In Miami, Florida -- conducted its

annual on-the-air station test to promote awareness of the 2010 hurricane season, as well as to verify station equipment performance on the many frequencies and modes that are used to communicate with stations in the affected area during hurricanes. The station was on the air for 8 hours and made 142 contacts with stations in the US, as well as the Caribbean, Central and South America.

As volunteers at the WX4NHC prepare for one of the most active hurricane seasons predicted since 2005, WX4NHC Assistant Coordinator Julio Ripoll, WD4R, said he is counting on help from amateurs to relay hurricane advisories and weather data to those affected by the storms. "The surface reports that we receive from the affected areas help the NHC Hurricane Specialists fill in gaps in their meteorological data and help with their forecasts," he said. "Relaying the hurricane advisories to those who have lost the conventional means of getting information can help save lives." Read more here <http://www.arrl.org/news/wx4nhc-reports-2010-on-the-air-station-test-results>.

==> + SOLAR UPDATE

Tad "We had the sky up there, all speckled with stars, and we used to lay on our backs and look up at them <http://www.americanliterature.com/Twain/TheAdventuresofHuckleberryFinn/19.html>"
Cook, K7RA, reports: This week, the geomagnetic conditions quieted down, due to calmer solar activity. The average daily sunspot numbers were down 7.6 points to 17.7, and the average daily solar flux dropped two points to 71. The average planetary A index declined 6.4 points to 7.9, and the mid-latitude A index dropped 2.7 points to 6.4. Three new sunspot groups emerged this week. Group 1077 made a brief appearance on June 5, with group 1078 appearing on June 8-9. The area of 1078 grew rapidly, from 80 millionths of a solar hemisphere to 180. On June 9, sunspot group 1079 appeared, at 10 millionths of a solar hemisphere. Both sunspot groups are in the far southwest of the solar disc and should disappear soon. We are only 10 days away from the summer solstice, after which the days will shorten as we progress toward more favorable HF conditions in the fall. ARRL Field Day <http://www.arrl.org/field-day> is on the sixth and seventh days of summer. Look for more information on the ARRL Web site on Friday, June 11. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Mark Twain's The Adventures of Huckleberry Finn <http://www.americanliterature.com/Twain/TheAdventuresofHuckleberryFinn/TheAdventuresofHuckleberryFinn.html> (Chapter 19).

==> THIS WEEK ON THE RADIO

This week, the ARRL June VHF QSO Party <http://www.arrl.org/news/join-the-fun-on-vhf-in-the-arrl-vhf-qso-party> is June 12-14. A running of the NCCC Sprint Ladder takes place June 11. On June 12, look for the BARTG Sprint, the Portugal Day Contest and the Bill Windle QSO Party. The DRCG Long Distance Contest (RTTY) is June 12-13 and the SKCC Weekend Sprint is June 13. Next week, look for yet another running of the NCCC Sprint Ladder on June 18. The Kids Day Contest and the Feld Hell Sprint are both June 19. The All Asian DX Contest (CW) and the West Virginia QSO Party are June 19-20. The Run for the Bacon QRP Contest is June 21 and the SKCC Sprint is June 23. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> + ARRL MEMBERSHIP NEWSLETTERS, BULLETINS AND NOTIFICATIONS

Did you know the ARRL offers more newsletters than just The ARRL Letter <http://www.arrl.org/arrlletter>? One of the many ARRL membership benefits includes other newsletters, such as the ARRL Contest Update <http://www.arrl.org/contest-update-issues> (a bi-weekly contest newsletter), the ARES E-Letter <http://www.arrl.org/ares-el> (sent monthly, containing public service and emergency communications news), the ARRL Club News, the ARRL Instructor/Teacher E-Letter and the VE Newsletter, just to name a few. You can also elect to receive news and information from your Division Director and Section Manager (keep in mind that not all Divisions/Sections send notices), as well as W1AW bulletins that relate to DX, propagation, satellites and Keplerian reports. The ARRL also offers a free notification service to members, letting them know when their membership and license are due to expire. ARRL members can sign up for these newsletters, bulletins and notifications on their profile page on the ARRL Web site <http://www.arrl.org/myarrl-account-management#%21/edit-info-email_subscriptions>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, June 20, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, July 2, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Is it just me, or does it seem wrong somehow, that you need a webinar to
teach you how to find stuff on a website? Especially since all the stuff
was easy to find in the old, lame, outdated website that just did it's jo
b?

Could someone help me to understand the philosophy here?

73,
Steve
W1KF

Steve,

I agree. It is bizarre that people would need a webinar to learn how to find stuff. The old site wasn't broken. "If it ain't broke, don't fix it." It's just like when Microsoft or some other software company comes out with a new and "improved" program or operating system. You have to learn how to use it all over again.

And many links on the site don't work.

How come only Midwest Division members get to have a webinar? What about us out West? Or New Englander? Or Southerners?

Yesterday, I tried to use the Field Day site locator to locate Field Day sites. The search function didn't work. But I was able to mouse-drag the map to the area I wanted.

Amateur Radio Newsline(tm) Report 1713 - June 11 2010

Amateur Radio Newsline report number 1713 with a release date of
Friday, June 11, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The International Telecommunications Union
will investigate interference from BPL when it meets in Geneva, the FCC
denies a petition to change the basis and purpose of amateur radio, a
massive rewrite of the Part 95 rules governing GMRS and CB radio is
proposed and a New York State ham gets ready to fight a citation he
received for operating mobile with an HT. Find out the details on
Amateur Radio Newsline(tm) report number 1713 coming your way right
now.

(Billboard Cart Here)

**

THE BPL WAR: ITU TO STUDY BPL INTERFERENCE

The International Telecommunications Union's Working Parties 1A and 1B
will meet in Geneva, Switzerland. between June 21 and 28. A major item
of discussion will be protection of radio services from interference
caused by Broadband over Powerline or BPL. Amateur Radio Newsline's
Bruce Tennant, K6PZW, has a preview of what to expect:
--
The International Amateur Radio Union or IARU has already contributed to a
report titled "The Impact of Powerline Telecommunication Systems on
Radiocommunication Systems Operating in the Low Frequency, Medium
Frequency, High Frequency and VHF Bands Below 80 MHz." In it, the
acceptable criteria for degradation of the High Frequency radio noise floor
caused by BPL is defined as being one half of one db. Now, this group will
concentrate on the protection of radio services from the effects of BPL in
range from 80 to 200MHz.
The IARU delegate to the SG1 and its working parties is Peter Chadwick
G3RZP. He says that three input contributions have been prepared for this
meeting. The first of these is a report on the effects of intermodulation
in power supplies causing the amateur band frequency notches in the BPL
spectrum to be degraded. This report has been prepared from the work by
Richard Marshall, G3SBA. It go so far as to point out the difficulty such
effects could have on the BPL system itself.
A further input establishes the protection criteria for amateur stations
operating in the 2 meter band. Ian White, GM3SEK contributed to it. It
finds that the amateur and amateur satellite services require protection
such that BPL interference does not exceed the level of 4 point 5dB per

volt per meter in the main lobe of the antenna. This, with a separation between antenna and the PLT installation being at least 10 meters.
The third input is of a more general nature. It shows that there are a number of non-amateur services that could suffer interference from BPL or its harmonics. These include alarms for the elderly, pagers, medical implant telemetry, as well as broadcasting. And when accumulation of radiation from BPL and other sources is added together, aircraft navigation and communications could be negatively impacted as well.
For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.
--
Summing it all up, the reports conclude that when the differences in range between BPL devices versus the other spectrum users are taken into account, the acceptable levels of radiation to protect the amateur service users are of the same order as those needed to protect these other services. (RSGB, Southgate, others)

THE BPL WAR: ACCESS BPL APPEARS DEAD DOWN UNDER

Meantime, wide area Access-BPL will soon likely be extinct in Australia. The latest appraisal of Broadband over Powerlines that has been cautiously described as appearing to have all but vanished from the Australian telecommunications landscape.

That's the view of Wireless Institute of Australia BPL Working Group Chairman, Phil Wait VK2DKN, who also observes that the use of Access-BPL in the United States is diminishing rapidly, with the latest BPL shut-down occurring in the City of Manassas, Virginia. And while there have been eight Access BPL trials in Australia since 2004 the last of these appears to have terminated back in 2007. (WIA)

**

THE BPL WAR: IN-HOME BPL THE EMERGING MARKET

While BPL using power lines as an internet enabling technology has apparently failed, In-House BPL using the internal wiring or a home or building is now the major market for BPL equipment manufacturers.

In the United Kingdom more than 800,000 pairs of in-home BPL modems have been installed by British Telecom. This has brought continuing interference complaints to the UK regulator Ofcom which according to VK2DKN appears to be unable, or at least very reluctant to act.

To make matters worse for U-K radio amateurs, it appears that one type of In-house BPL adaptor can emit a radio frequency signal up to 370 MHz. (VK3PC)

**
THE BPL WAR: EGYPT TO EMBRACE BPL

While BPL may be on the decline in Western nations, it seems to be gaining a new foothold in the middle East. This with news that Egypt-based SABA

Electric is getting into the Broadband over Powerline act.

Jim Linton, VK3PC, reports that SABA has formed a partnership with ISP LINKdotNET and has plans for easy access to the Internet through BPL.

In a media statement SABA Electric said BPL is the technology it will use to provide to provide broadband data speed up to 8 Mbps that include a number of Voice over Internet Protocol and video options. The completed system reach over 300,000 residents. (VK3PC)

**

RADIO LAW: FCC DENIES PETITION TO CHANGE BASIS AND PURPOSE OF AMATEUR RADIO

The FCC has turned away a rules change request from Gordon Schlesinger, W6LBV, of San Diego, California. One that sought to partially rewrite Section 97.1 of the Amateur Service Rules.

Section 97.1 deals with the very basis and purpose of ham radio. In his September 2008 filing, Schlesinger claimed that Section 97.1 is outmoded due to changes in technology and practices, and that it diverges from the practical realities of the amateur service today.

In denying Schlesinger's request the FCC stated that that the basis and purpose of the Amateur Service was not intended to reflect any particular technology or the practices of a particular time. Rather, Section 97.1 is intended to provide guidance as to the accomplishments the Commission expects of the service and to assist in international negotiations affecting the service.

In closing the FCC notes that nothing in Schlesinger's petition demonstrates that the Commission's expectations for the Amateur Service have changed or are not being met, or that the rule is in some way hampering international negotiations that affect the Amateur Service. Nor does his petition identify any reason to revisit the Commission's decision on the matter made back in 1989. At that time the FCC decided that it was in the best interest of the hobby not to change the basis and purpose of the Part 97 Amateur Service. (FCC)

**

RADIO LAW: FCC ISSUES DOCKET ON REWRITE OF PART 95 RULES

The FCC is proposing a massive rewrite of its Part 95 rules. These are the regulations that govern such public available two way radio as the General Mobile Radio Service, the Family Radio Service, and 11 meter C-B to mention only a few.

WT Docket No. 10-119 was released on June 7th and is a catch all of proposed rules changes that would affect the General Mobile Radio Service the most. This, by ending its current licensing requirements and replacing these with what the FCC calls License by Rule. That's an FCC term that kind of means doing to GMRS what it essentially did on 11 meter CB a few decades ago. It would additionally mean relaxing GMRS eligibility

requirements and at the same time implementing mandatory 12 point 5kilohertz channel spacing to the service. It also would also allow the transmission of Global Positioning System location information and user-generated text messages on certain GMRS channels.

As to the Family Radio Service, the FCC proposes to prohibit the authorization of radios that combine FRS with other safety-related services. In other words, an FRS radio would have to be a Family Radio Service only transceiver and it would become illegal to manufacture an FRS radio that could work with or in any service other than channels where FRS is allocated to operate. This would mean an end to a whole slew of transceivers that have multiple service capability especially those that cover both FRS and GMRS or some with FRS, GMRS and Marine channel capability.

Regarding 11 Meter CB, the FCC says it plans to evaluate various requirements regarding the Citizens Band Radio Service in order to determine whether they all are still needed. Of significance the FCC will be looking into CB'ers who work skip during band openings. It notes that amplifiers for CB stations are already illegal, but WT Docket No. 10-119 asks if the regulatory agency should consider prohibiting directional antennas for C-B operations in order to promote the services intended use for short range only communications. It also wants to know if it should consider power reductions for the CB Service and whether or not to permit the use of "hands-free" microphones.
.
FCC WT Docket No. 10-119 is 96 pages long including various appendices. It also carries a rather short commentary cutoff date of 30 days after publication in the Federal Register. Reply Comments will be due 45 days after publication in the Federal Register. You can download and read it yourself at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-106A1.doc (FCC)

RADIO LAW: NY HAM HANDED CELLPHONE VIOLATION FOR USING MOBILE GEAR

Amateur radio operators in upstate New York are up in arms over a traffic ticket handed to Steve Bozak, WB2IQU, while he was operating mobile in the city of Troy. And Bozak is ready to force the issue in court. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

A 34 year veteran of the hobby, Steve Bozak, WB2IQU owns an antenna company and is well known in the upstate New York areas. But recently he was pulled over at an intersection while on his way to breakfast with fellow ham radio enthusiasts. He was then issued a ticket for talking on a cell phone while driving after Officer Mark Millington dismissed Bozak's claims that the radio was not in fact a telephone.

The section of New York's vehicle and traffic law Bozak was cited for violating is designated as 1225-c. It requires a phone to be in the immediate proximity of the driver's ear. It also defines the types of communication devices it applies to as ones interconnected to a public switched telephone network provided by a commercial mobile radio service.

But Bozak was not using a cellphone. He was using a small Kenwood H-T that is in no way even remotely similar to a cellphone. And on its face value, the statute does not refer to devices like a ham radio transceivers that independently transmits a signal with no telephone interconnect.

Sgt. Terry Buchanan is the Police Department's spokesman who worked traffic
patrols for years. He says that he doesn't recall this issue coming up in the past. He said the department would have no comment on the matter because it is still pending in court.

Bozak is scheduled to appear on June 23rd but that date could be pushed back because Bozak has decided to force the issue. As a start, he has requested a supporting deposition from Officer Millington, who is typically assigned to Troy's public schools and rarely works traffic patrol. Bozak wants Millington to specifically detail what happened and explain how he was breaking the law.

And when the case does come to a hearing more than a dozen local Troy area hams plan on being there with him.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

If he looses in court, Bozak faces a $100 fine. A loss might also cause other hams in New York State to face similar citations simply for operating mobile as they have since ham radio first began. (troyrecord.com and various other published reports)

ENFORCEMENT: HAM CHARGED IN FALSE THREAT REPORT

A Connecticut ham has been arrested in connection with incident that occurred at Walmart in Norwich this past January. The May 28th issue of the Norwich Bulletin reports that Keith J. Mutch, of Norwich has been charged with second-degree Breach of Peace, first-degree reckless endangerment and falsely reporting an incident in the first degree. According to the FCC database, Mutch holds the call KB1RBI.

By way of background, back on January 26th Norwich police responded to a report of a man in front of the local Walmart who was armed with a shotgun and was threatening to shoot people. On their arrival it was determined the report was false and no one was injured.

Initial investigation by police revealed that store security personnel had heard the report of the man with the shotgun over their two way radio system, however none of the personnel had made the transmission. A police investigation concluded that Mutch had used a portable ham radio set to make the transmission. (Norwich Bulletin)

**

ENFORCEMENT: AUSTRALIA REGULATOR REVOKES HAM LICENSE

The Australian Communications and Media Authority better known as the ACMA has canceled the amateur radio station license of an unnamed ham following an investigation that uncovered continuing breaches of that nations Amateur service by the licensee. In this case, the violations included causing interference to other stations, failing to use a call sign and transmitting an un-modulated carrier.

The ACMA made the decision to cancel the amateur license when other compliance and enforcement measures had failed. The regulatory agency says in its reporting on the matter that every effort had been made to assist, encourage and educate the licensee to understand the importance of compliance with license conditions. Despite repeated warnings to the licensee, the ACMA found that non-compliance continued over an extended period of time.

Under the Australian Radiocommunications Act of 1992, the ACMA can suspend or cancel an amateur license if the holder contravenes a condition of the license. In the case of the recent cancellation, crucial information was provided by other radio amateurs that alerted the ACMA to the ongoing non-compliance and assisted the investigation. Under Australian privacy laws the name of the ham who had his license revoked was not revealed. (WIA)

HAM RADIO SAFETY: DX OPERATION CANCELLED AFTER BURGLARY

W6ZL, has cancelled his current A35KL operation from Tonga. David has decided to leave Tonga on June 2nd and return to California after his guesthouse room was burglarized last weekend. He says that he may be back in Tonga for the CQWW contest, later this year. (OPDX)

**

D-STAR NEWS: VK HAM DEVELOPING ALTRETNATIVE TO AMBE ENCODER

While the D-Star protocol developed by the Japanese Amateur Radio League is open and freely available for use by anyone. However, the AMBEvoice encoding scheme currently used by the D-Star protocol is not. Rather it is patented by DVSI, Inc. and its licensing fee is one of the factors in the

higher cost of a D-Star radio over a similar analog FM unit. But that could change if one Australian ham has his way.

Development on an open source, freely available alternative to AMBE is being spearheaded by David Rowe, VK5DGR. This open voice protocol is called Codec 2. Right now, it is in a highly experimental stage but has several advocates in open source software circles.

Rowe says that a D-Star protocol implementing Codec 2 Digital Voice would significantly drop the entrance level cost to the mode and appeal to a much wider audience. He says that once Codec2 is stable and competitive, it would offer a real, developed-by-a-ham alternative to the patented AMBE voice encoder.

You can find out more about Codec 2 at David Rowe's development site. Its in cyberspace at tinyurl.com/2362n3t (KE7HQY)

HAMVENTION 2010: ATTENDENCE CONTINUES AN UPWARD GROWTH TREND

According to its Public Relations Director Henry Ruminski, W8HJR, the official attendance for Hamvention 2010 was 19,750. This continues the upward tend begun last year when 18,877 were counted going through the gate at the Hara Arena following the 2008 record ten year low figure of 17,253.

While this is a good positive direction it's also still a long ways from the 10 year record headcount of 28,804 set back in 2000. The all time record Hamvention attendance was in set in 1993 when 33,669 radio amateurs from around the world made their way to Dayton, Ohio for this annual ham radio right of Spring. (Hamvention Remailer, W8HJR)

THE SOCIAL SCENE: AMSAT SPACE SYMPOSIUM IN CHICAGO IN OCTOBER

AMSAT has announced that its 2010 Space Symposium and Annual Meeting will be held on Friday, October 8 through Sunday, October 10. This years venue is the Chicago area Elk Grove Holiday Inn which is near O'Hare Airport for the event. This is the same hotel that recently has hosted the Central States VHF Conference and W9DXCC events.

AMSAT has also put out a call for papers to be presented at the Symposium. These can be on any topic of interest to the amateur satellite community. A final copy must be submitted by September 1st for inclusion in the printed proceedings. Abstracts and papers should be sent via e-mail to k9jkm (at) amsat (dot) org. (ANS)

**

THE SOCIAL SCENE: INTERNATIONAL EME CONFERENCE IN DALLAS IN AUGUST

The North Texas Microwave Society will host the 14th International EME Conference in Dallas, Texas, on August 12th to the 14th. Gerald Youngblood, K5SDR, President and Chief Executive Officer of FlexRadio, will

be the lunchtime speaker on Friday, August, 13 and Nobel laureate Joe Taylor, K1JT, will speak about the 432 MHz EME event at Arecibo on Saturday, August 14th. Presentations will also include a noise figure workshop hosted by Al Ward, W5LUA, Tommy Henderson, WD5AGO, and Tony Emmanuel, WA8RJF. This is the first time the conference is to be held in the US since 2004. (SARL)

FOLLOW-UP: WA2INM - SK -- FAMILY REQUEST

Nicole Ledoux Levy, the widow of the late Larry Levy, WA2INM, has asked that we pass along the following information. In lieu of flowers, that donations in Larry Levy's name can be made to the Cornell Feline Health Center, for the William Ledoux Fund, College of Veterinary Medicine, Hungerford Hill Road, Ithica, New York, 14863.

As we reported last week, WA2INM died of a massive heart attack on Sunday night, May 30th. In the world of electronics he was best known as the developer of sound controlled entertainment lighting and as a contributor to the design of the original I-B-M personal computer. He went on to become a world champion cat breeder with offices in New York and Paris. (ARNewsline(tm))

EMERGING TECHNOLOGY: NEW SMAT CELLPHONE ANTENNA FOER RUGGED TERRAIN S&R

Emergency search and rescue workers in rugged, rural areas may never lose a cell phone call again. This, thanks to a new antenna developed by Montana State University researchers in collaboration with Advanced Acoustic Concepts, Inc.

The Montana State University antenna is considered a "smart" or "adaptive array" antenna because it uses computer technology to automatically aim the message transmission beam in the right direction, chooses the most appropriate signal strength, optimize the strength of transmitted beams and adapts to the environment. The automatic control allows users to communicate in rugged terrain while on the move.

Unlike normal omnidirectional antennas, smart antennas maintain a direct signal between individuals users and cell sites. This will likely mean fewer dropped calls and the ability to move more data, such as streaming video. You can read more about this antenna on-line at tinyurl.com/2cwad9m (Science Daily)

**

EDUCATION: NASA LAUNCHES INTERACTIVE SIMULATION OF SATELLITE COMMUNICATIONS

NASA has unveiled an interactive computer simulation that allows virtual explorers of all ages to dock the space shuttle at the International Space Station, experience a virtual trip to Mars or a lunar impact. It also allows users to explore images of star formations taken by the Hubble Space Telescope.

In an effort to excite young people about space and NASA's missions, the agency has launched its online Space Communication and Navigation or SCaN simulation. The interactive simulation offers a virtual 3-D experience to visualize how data travels along various space communications paths.

The interactive Space Communication and Navigation simulation allows visitors to select spacecraft and experience a "flythrough," or a tutorial with images and descriptions of NASA's three space communication networks. The Space Network flythrough also shows how data is relayed from NASA's White Sands Test Facility to the space station via the Tracking and Data Relay Satellite System. This is a network of communication satellites and ground stations NASA uses for space communications.

Finally, in the Deep Space Network demonstration, visitors learn how NASA communicates with the Mars Exploration Rovers, Sprit and Opportunity by using the Madrid Deep Space Network antenna. This to send data to the Mars Reconnaissance Orbiter, which then relays the data to the rover.

To explore the Space Communication and Navigation network simulation, please take your web browser to the www.nasa.gov/multimedia/3d_resources/spacecomm.html (NASA)

RADIO IN SPACE: SOLAR DYNAMICS LAB ACTIVATED

The images from cameras and sensors on recently launched Solar Dynamics Observatory satellite are a dramatic reminder of the power of the star that warms our planet.

Since the spacecraft and its instruments were officially commissioned on May 14, more than 5 million images have been transmitted back to Earth. Some show clouds of magnetized gas big enough to engulf the Earth breaking away from the outermost layer of the sun. These Coronal Mass Ejections which are usually accompanied by solar flares can last for several hours and travel through space at over 1 million kilometers per hour.

Coronal Mass Ejection's usually take about three days reach Earth, but very fast ones can arrive in under a day. And as they penetrate the Earth's ionosphere the charged particles and magnetic forces emit radiation across the electromagnetic spectrum, from low-energy radio waves through to high-energy gamma rays,

NASA launched the Solar Dynamics Observatory satellite in February to gain a better understanding of how the sun behaves and why and also to keep a closer watch on space weather. About 70,000 each day will be radioed back to Earth during the expected five year life of this on-orbit bird. (Adapted from the Japan Times)

**

WORLDBEAT - UK: WWII DOCUMENTS TO BE PUT ON LINE

Millions of documents stored at the United Kiingdom's World War II code-breaking center, Bletchley Park, will soon be made available online. This after Hewlett-Packard donates a number of scanners to the center in Milton Keynes so volunteers can begin the task which is expected to take over 3 years. The entire story is available on-line at tinyurl.com/3x2cfz6 (BBC)

WORLDBEAT - AUSTRALIA: ICOM DONATES D-STAR REPEATER TOP CELEBRATE WIA AT 100

Icom Australia has donated a new D-Star repeater to the Wireless Institute of Australia for installation in the Canberra area. The Canberra Region Amateur Radio Club will be the D-Star group responsible for the installation and operations of repeater on behalf of the WIA.

The repeater will be operational on 2 meters using Port C and have the callsign of VK1RWN. The timeframe for the installation and operations of the new D-Star system is yet to be determined.

The announcement of this donation was made by Takashi Aoki, Manager of Icom Australia at the official WIA Centenary dinner on Saturday night, June

5th. This donation from Icom was made to celebrate 100 Years of the WIA. (WIA News)

THAT FINAL ITEM: US CONGRESS CALLS SOUTH AFRICA HAM WHO SPOTTED SPY PLABNE A THREAT TO SECURITY

And finally this rather bizarre follow-up to our story two weeks ago concerning a South African ham who spotted a super secret United States military spy plane as it circles the globe. Now a local newspaper is deeming him to be a thereat to the security of the United States because of his accomplishment and those of his friends who helped him. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the rest of this rather unique tale:

--

South African retiree and amateur astronomer Greg Roberts, ZS1BI, says that he and his group have been labeled a threat to US national security. This after Roberts with the aiud of other amateur astronomers world-wide seem to have successfully located and recorded images of the US Air Force secret X-37B space craft on-orbit.

The South Africa Sunday Times reports that with the help of a group of amateur astronomers from around the world, including a gasoline station attendant in Canada, that Roberts calculated that the top-secret spacecraft took about 92 minutes to orbit earth. Also that it flies over hot spots such as Afghanistan, Pakistan, Iraq and Korea.

The discovery of the craft, which is 8.9m long and travels at 8km a second, earned Roberts a mention in the New York Times, on the BBC and in several

science publications. As a result, Roberts says that he and his group had been labeled a threat to national security by the U-S Congress. He and his wife now joke that that the Men in Black will walk up our driveway some day.

But not everyone looks at Roberts work in that way. Dr. Ed Elson, is a researcher at the University of Cape Town's department of astronomy. He lauded Roberts and the group of amateur astronomers. He says that the fact that they managed to find the X-37B and are now tracking the craft is certainly quite an admirable feat, especially from an observational astronomer's perspective.

Dr. Elson added that Roberts and his team certainly have a very respectable track record, claiming to be tracking almost every classified object that has been launched in the past five years. Because of this, he sees no real reason to refute their claim of having found the X37-B.

--

For his part ZS1IBI says that his group of amateur astronomers feel that they are doing a service to the public by providing to them what they really need to know. He added that they do not consider themselves a threat to security. He notes that anyone else can do exactly the same thing. You can read the entire South Africa Sunday Times story on line at tinyurl.com/2cwv7hv (SARL)

The news headlines

Special Event Station for National Hamfest

IOTA DXpedition to rare North Atlantic island group

BBC World Service to feature radio curator Gerry Wells

Plans are progressing well for the National Hamfest on 1 and 2 October at the Newark & Notts Showground. To mark the National Hamfest and Ham Week UK, Lincoln Short Wave Club will be getting on the air. A special station is being set up at Newark Showground in the days running up to this year's National Hamfest, through the weekend and then off-site for Ham Week UK. HF bands and 2m will be used. The 2m operation will probably be suspended during the show as activity within the showground is likely to be heavy. The station will QSL with an attractive card with the National Hamfest Logo as its front.

Icom UK is to sponsor a DXpedition to the Flannan Islands as part of the IOTA Programme. The MS0INT team are trying to activate the remote North Atlantic island group of the Flannans, 20 miles north west of the Outer Hebrides. Icom UK have loaned two IC-7000 transceivers to the team for use at the station. As one of the rarest European IOTAs, EU-118, it has only been claimed by 31.9% of participants in the IOTA programme so the team will have their work cut out. The MS0INT DXpedition team will try to be on the air from Friday 18 June until Monday 21 June. There will be two 24 hour stations operating on all bands from 160-10 metres on both SSB and CW. They will be situated on the highest point of the island Eilean M�r, some 88 metres above sea level.

Gerald Wells, known as Gerry, is the curator of the British Vintage Wireless and Television Museum in Dulwich, London, which was features in the December 2008 RadCom. His museum is not open to the general public, but guided tours are available by appointment. Dan Shepherd has recently finished making a radio documentary about Gerry for the BBC World Service. The programme will be broadcast at 9am BST on 20 August, although it is worth checking the BBC World Service website nearer the date as the schedule can change.

Flight Refuelling ARS is operating a special event station at Kingston Lacy House, Wimborne in Dorset on 11 and 12 September as part of the National Trust open day. The National Trust administration has asked if

other radio clubs in the UK are likely to have a special event station at other NT sites for their open days. As this is good advertising for amateur radio, perhaps clubs in the UK could think about this and get in touch with their National Trust regional coordinator.

Castles And Stately Homes On The Air in Northern Ireland will have a major activation on 16 July. Bobby, MI0RYL has obtained permission to activate both the Stormont Parliament Buildings and Stormont Castle within the Stormont estate in Belfast. To commemorate this activation, a special QSL card will be issued to any contacts that are made. Propagation permitting, they hope to cover many bands and modes throughout the day to allow as many people as possible the opportunity to make contact. The station should be up and running by 10am with the castle activation number GI022 and WAB No J37.

There is an update on the GB3GJ repeater group website for those interested in the activities of the Jersey repeater. Check out their website at www.radioclubs.net/gb3gj.

On 27 May an agreement on the lease of the Russian part of the Saimaa Canal zone to Finland was signed by the Prime Ministers of the Republic of Finland and the Russian Federation. The new 50 year agreement supersedes the initial lease of 1963 which is due to expire in 2013. The new lease no longer includes Malyj Vysotskij Island, the present R1MV DXCC entity. The coming into effect of the agreement is subject to ratification by the parliament of Finland and the Russian duma later this year.

And now for the details of rallies and events for the coming week

The 9th Junction 28 QRP Rally will take place today, 13 June, at Alfreton Leisure Centre, Church Street, Alfreton, Derbyshire DE55 7AH. The venue is just 10 minutes from junction 18 of the M1 and the A38. Doors open at 10am and there will be trade stands, a Bring & Buy and special interest groups. More details from Russell Bradley, G0OKD on 01773-783658.

Also today is the East Suffolk Wireless Revival, also known as the Ipswich Radio Rally. It takes place from 9.30 at the Orwell Crossing lorry park on the A14 eastbound at Nacton, Ipswich, IP10 0DD. Attractions include a car boot sale, bring and buy, special interest groups and the GB4SWR HF station. Food is available, parking is easy and talk in is on S22. Contact John, G3XDY on 07710 044858 or Steve, M1ACB on 07711 329624.

Next Sunday, 20 June, sees the Newbury Radio Rally and Boot Sale at Newbury Showground, next to M4 junction 13. There will be a big display area of amateur radio stations, exhibitions, special groups, clubs and societies. Talk in is on S22, car parking is free and admission is ?2. Details from rally@nadars.org.uk.

Now for the news of special events

Today, 13 June, Friskney & East Linconshire Communications Club is running a station at Friskney Show. The event is at The Friskney Hall & Playing Fields, Church Road, Friskney, near Boston PE22 8RD. MX0LFC will be on the air from 9am to 4pm and visitors are welcome. The show is a real family event and has been very popular the last couple of years and generally finishes with a fly over by Lancaster, Spitfire or Dakota aircraft.

Special event station ZS10WCS will be on the air until 12 July to celebrate the 2010 Football World Cup being held in South Africa. The call will be used by members of various South African Radio League affiliated clubs. QSL with a self addressed envelope and one International Reply Coupon to PO Box 1721, Strubensvallei, 1735, South Africa.

One of the most iconic UK special event callsigns, GB2GP, Gilwell Park, the headquarters of the Scout Association, will be heard on Air during the weekend of 19 and 20 of June. A team of 9 UK Radio Scouters from all over the south of England will be running not only the station but also lots of different radio activities. These include Radio Orienteering for the Beaver and Cub Fundays at Gilwell Park over the weekend. Over 5,000 Beavers and Cubs aged 5 - 10? from all over the UK are expected at the event. They hope to be running on all the usual HF and VHF frequencies as well as EchoLink. They should be found at or around the Scout frequencies, the most common of which are 3.690MHz, 7.090MHz and 14.290MHz.

The British Amateur Radio and Teledata Group 50th anniversary celebrations with GB50ATG are nearing the end. For the month of June, GB50ATG will be used by Graeme Castleton, G6CSY. Graeme will be using several data modes so look out for him on all bands, 80 to 10 metres. GB50ATG finishes on 30 June, so if you need the call for the BARTG Golden Jubilee Award, you have very little time left. GB50ATG has been very active in most of the RTTY contests during the year, mostly by John Barber, GW4SKA, the BARTG Contest organiser. Special QSL cards will be available as will the Golden Jubilee Certificates and, hopefully, some plaques as well.

Chorley and District Amateur Radio Society will be putting on special event station GB0AH from Astley Hall Museum, Astley Park, Chorley on Sunday 20 June, from 9.30am to 6.30pm. This is celebrating International Museums on the Air and they will be active on HF & 2 metres.

Jack, G3PWK will be operating GB70AAF for the Anniversary Airborne Forces) on 22, 26 & 27 June.

And now the HF DX news compiled from 425 DX News and other sources.

Tom, PF4T will be active again as 8Q7TB from Embudu, Maldives, IOTA AS-013, until 25 June. He will operate SSB, RTTY and BPSK31 on 40 and 20 metres, but he will also give 10, 15 and 17 metres a try. QSL via PF4T, direct or bureau.

The Brazilian National Telecommunications Agency has authorised the use of PX8L from Sao Luis from 16 to 18 June from IOTA reference SA-016. QSLs via PY7ZY. The website for the expedition is at www.px8j.com

Max, IZ4JMA will be active as SV5/IZ4JMA from the island of Karpathos in the Dodecanese, is IOTA EU-001, until 20 June. He will operate holiday style on 80 to 6 metres using all modes.

Crisna, IZ3GWJ says he will be active again as UT/IZ3GWJ from Ternopil in the Ukraine until 19 June. He plans to concentrate on 6 metres SSB.

Now the contest news

Today, Sunday 13 June, is another busy day for contesters. The WAB 6m phone contest takes place between 0900 and 1500UTC. The exchange is signal report, serial number and WAB square. Please note that this is not a `points per km' event. Multipliers are WAB squares and DXCC countries. On the same day there's the PW 2m QRP contest from 0900 to 1600UTC. The power limit is 3 watts and multipliers are locator squares. The exchange is signal report, serial number and locator. Finally the second 144MHz backpackers contest takes place between 1100 and 1500UTC. The exchange is signal report, serial number and locator.

Today, Sunday 13 June is a busy day on 2m. The PW 2m QRP contest runs from 0900 until 1600 UTC, all modes. The RSGB 144MHz Backpackers contest also takes place today, between 1100 and 1500UTC. Operation is also all mode. The exchange for both contests is RST, serial number and locator.

On Tuesday 15 June it's the UHF UKAC, operating all modes on the 23cm and 13cm bands from 1900 to 2030UTC. The exchange is RST, serial number and locator.

Wednesday June 16 sees the RSGB 80m Club Championships CW leg from 1900 to 2030UTC. The exchange is RST and serial number.

The 50MHz Trophy contest takes place from 1400UTC on 18 June until the same time on 20 June. Operation is all mode; RST and serial number form the exchange.

Now the solar factual data for the period from the 31st of May to the 6th of June, compiled by Neil Clarke, G0CAS on the 7th of June.

The solar disc had sunspots visible every day, however, no solar flares occurred and solar activity remained at very low levels. Solar flux levels declined from 75 units on the 3rd to 68 by the 6th. The average was 72 units. The 90 day solar flux average on the 6th was 78 units, that's the same level as last week. X-ray flux levels showed little variation and averaged A4.7 units. Geomagnetic activity was mostly unsettled; this was due to the continuing effects of a large coronal hole. Only the 2nd and the 5th were quiet days with an Ap index of 6 units on both days. The average was Ap 11 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 650 kilometres per second on the 31st to 400 by the 6th. Particle densities were low every day. Bz varied around minus 7 and plus 6 nanoTeslas on most days.

Slightly less variations took place on the quieter days.

HF MUFs were depressed by several MHz due to the increase in geomagnetic activity. However, it also brought aurora at 50, 70 and 144MHz on several days. There was sporadic-E openings every day&#65533; including 50MHz openings to the Middle East and the Caribbean. Several openings were up to 144MHz form the UK.

And now the solar forecast. For now anyway, the rise from sunspot minimum seems to have slowed. The sudden surge in activity around the start of the year is over. This is to be expected as solar cycles tend to rise erratically rather than in a linear manner. Activity will increase again but with no signs of any increase in solar activity this week, solar activity will again be very low again. Solar flux levels should be in the 70's for most of the week. Geomagnetic activity is expected to be mostly quiet throughout. MUFs during daylight hours at equal latitudes should be about 19MHz for the south and 16MHz for the north. Darkness hour lows should be around 11MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of about 19MHz. The optimum working frequency with a 90 per cent success rate will be around 14MHz. The best time to try this path will be between 0600 and 1000 hours. Sporadic-E should take place most days with opening up to 144MHz during the larger events.

And that's all for this week from the propagation team.

NEWS FOR THE MIDLANDS

On Sunday 13 June Friskney and East Lincolnshire Communications Club is running a special event station at the Friskney Show. Contact Chris, M0MFP, on 01507 442240.

On Sunday 13 June Kettering & District Amateur Radio Society is having a social meeting from 10am. Details from Stephen Froggatt, G1LMN, by email to stevelornaf@aol.com.

On Sunday 13 June South Notts Amateur Radio Club is at the Junction 28 Rally. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Monday 14 June Gloucester Amateur Radio & Electronics Society is having a talk on portable working using airborne aerials by Roger Stafford, G4ROJ. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 14 June South Birmingham Radio Society is on the air. Contact Don, on 0121 458 1603.

On Monday 14 June Stratford Upon Avon District Radio Society is having an equipment check with G6MMD in advance of the 2m fox hunt. Contact G0CHO, on 01608 664488.

On Monday 14 June Wythall Radio Club continues its Intermediate course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 15 June Derby & District Amateur Radio Society is having a video show. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 15 June Kettering & District Amateur Radio Society is holding an operating night from 7 - 9pm. Details from Stephen Froggatt, G1LMN, by email to stevelornaf@aol.com.

On Tuesday 15 June Loughborough & District Amateur Radio Club is having a vintage radio evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 15 June Wythall Radio Club is homebrewing. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 16 June Bolsover Amateur Radio Society has an antiques roadshow with Fred, G7GSX. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 16 June Kettering & District Amateur Radio Society is holding a gentleman's group afternoon. Contact Stephen Froggatt, G1LMN, by email to stevelornaf@aol.com.

On Wednesday 16 June Lincoln Short-Wave Club is having a natter night and putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 16 June Midland Amateur Radio Society is on the air and running training and Morse classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 16 June South Notts Amateur Radio is on the air. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 16 June Telford & District Amateur Radio Society is operating QRP in the village field. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 17 June Kettering & District Amateur Radio Society is holding at raining night. Contact Stephen Froggatt, G1LMN, by email to stevelornaf@aol.com.

On Thursday 17 June RAF Waddington Amateur Radio Club is having a shack and chat night with radio and antenna play. Details from Judy Rowlands, on 07544 456422.

On Thursday 17 June Telford & District Amateur Radio Society is visiting RAF Shawbury. Contact Mike, G3JKX, on 01952 299 677.

On Friday 18 June Coventry Amateur Radio Society has the second round of the G4ZMC Trophy at Hatton Locks. Contact John, G8SEQ, on 07958 777363.

On Friday 18 June Melton Mowbray Amateur Radio Society is holding its annual fox hunt. For more information contact Geoff, G3STG, on 01664 480 733.

On Friday 18 June South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 19 June Kettering & District Amateur Radio Society commences International Museums on the Air weekend, operating GB2HAM for Harrington Aviation Museum. Contact Stephen Froggatt, G1LMN, by email to stevelornaf@aol.com.

On Saturday 19 June Lincoln Short-Wave Club is putting G5FZ on the air from the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 19 June Telford & District Amateur Radio Society commences its 6m Trophy weekend event at Long Mynd. Contact Mike, G3JKX, on 01952 299 677.

On Saturday 19 June Wythall Radio Club continues its Intermediate Course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

NEWS FOR THE NORTH OF ENGLAND

On Sunday 13 June North Cheshire Radio Club is watching a video about the layers of the Earth's atmosphere. Visitors are welcome. More information from the chairman on 01565 652652.

On Monday 14 June Angel of the North Amateur Radio Club is holding a Foundation examination and work on aerials. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 14 June Bolton Wireless Club is having a talk by Steve, M1DOT, on the story of U-543.. For details, send an email to boltonwireless@gmail.com.

On Monday 14 June Sheffield Amateur Radio Club is running the G4EJL Memorial Trophy home construction competition. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 14 June Thornton Cleveleys Amateur Radio Society is having a quiz with Mick, G4EZM. Details from John Foster, 2E0EZY, on 01253 399377.

On Tuesday 15 June Chester & District Amateur Radio Society is having an update on the kit construction project. Details from Barbara Green on 07957 870770.

On Tuesday 15 June Halifax & District Amateur Radio Society is having a talk on microwaves by Peter Day. Contact Anthony Vinters, on 01422 822636.

On Tuesday 15 June Otley Amateur Radio Society is having a member presentation on the DXpedition to Wasini. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 16 June Hornsea Amateur Radio Club is taking part in the 80m CW Club Contest. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 16 June Mid-Cheshire Amateur Radio Society is discussing LAN management for NFD. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 17 June Otley Amateur Radio Society is holding an Advanced exam. Contact Paul, 2E0PAK, on 07768 996370.

On Thursday 17 June Preston Amateur Radio Society is having a talk and demo of vintage Clansman radios by Martin, M0LCY. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 17 June South Manchester Radio and Computer Club is having a talk on Arduino embedded microcontrol by Mike, G8HBR. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 17 June Wakefield & District Radio Society is having a committee meeting and preparing for the table top sale preparation. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 18 June East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 19 June Otley Amateur Radio Society is taking part in the 50MHz Trophy Contest. Contact Paul, 2E0PAK, on 07768 996370.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Sunday 13 June Cockenzie & Port Seton Amateur Radio Club is taking part in the Practical Wireless 144MHz QRP Contest. More information from Bob, GM4UYZ, on 01875 811 723.

On Tuesday 15 June Livingston & District Amateur Radio Society is having a club evening. For more information contact Norman, on 07740 946192.

On Thursday 17 June Aberdeen Amateur Radio Society is having a preparation night. More information from Lewis, GM4AJR, on 01224 575 663.

On Saturday 19 June Aberdeen Amateur Radio Society commences its weekend event for International Museums Weekend at Bennachie Visitor Centre. More information from Lewis, GM4AJR, on 01224 575 663.

On Saturday 19 June Cockenzie & Port Seton Amateur Radio Club is taking part in Museums on the Air Weekend, operating GB2MOF from the Museum of Flight at East Fortune. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Sunday 13 June Aylesbury Vale Radio Society is taking part in the Practical Wireless 144MHz contest. Details from Roger, G3MEH, on 01442 826 651.

On Sunday 13 June Felixtowe & District Amateur Radio Society is attending the ESWR rally. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Sunday 13 June Chesham & District Amateur Radio Society is taking part in the PW QRP Contest. More details from Terry, G0VFW, on 01442 831 491.

On Monday 14 June Coulsdon Amateur Transmitting Society is holding its annual DF hunt. More information from Andy, G8JAC, by email to g8jac@btinternet.com.

On Monday 14 June Surrey Radio Contact Club is having a VHF NFD meeting at the QTH of G8IYS. More information from Ray, G4FFY, on 01732 357474.

On Tuesday 15 June Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 15 June Bromley & District Amateur Radio Society is holding a DF hunt. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 15 June Chelmsford Amateur Radio Society is operating GB90MZX from central Chelmsford. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 16 June Bury St Edmonds Amateur Radio Society is having a talk on the 10GHz band by Bernie Wright, G4HJW. Details from. Details from George Woods, G3LPT on 01359 259518.

On Wednesday 16 June Chesham & District Amateur Radio Society is on the air and having a CW training session. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 16 June Havering & District Amateur Radio Club is having a talk by Diane Curtis on the ins and outs of Council Tax. Contact John, M0UKD, on 07817 365354.

On Wednesday 16 June Norfolk Amateur Radio Club is taking part in the RSGB clubs contest plus having an informal, construction, and workshop evening. Details from Chris Danby, G0DWV, on 01603 419204.

On Wednesday 16 June Southampton Amateur Radio Club is holding a junk sale. More information and a location map on the club website at www.southampton-arc.org.uk.

On Wednesday 16 June Worthing & District Amateur Radio Club is visiting RAF Truleigh Hill Radar Station. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 17 June Colchester Radio Amateurs is having a talk by Jonathan, G0DVJ, on CW for everyone. Details from Kevan, 2E0WMG, on 07766 543784.

On Thursday 17 June Cray Valley Radio Society is holding its annual DF hunt. Details from Bob, 2E0RCV, on 020 8265 7735 after 8pm.

On Thursday 17 June Horsham Amateur Radio Club is having a social evening at The Countryman Inn, Shipley. Details are on the web at www.harc.org.uk.

On Thursday 17 June Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 17 June Shefford & District Amateur Radio Society is visiting Kelvedon Hatch Bunker. Details from David, G8UOD, on 01234 742 757.

On Friday 18 June Bittern DX Group commences its weekend event, operating GB2OH for Boys and their Toys weekend at Oxborough Hall, Norfolk PE33 9PS. Details from Linda, G0AJJ, on 01692 404154.

On Friday 18 June Loughton & Epping Forest Amateur Radio Society is having an HF night on the air. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 18 June Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Peter, G4AKG, on 01444 239371.

On Friday 18 June Wey Valley Amateur Radio Group Club is having an on air evening out. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 19 June Loughton & Epping Forest Amateur Radio Society commences its weekend event, operating GB2NWA from North Weald Airfield as part of International Museums Weekend. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Saturday 19 June South Essex Amateur Radio Society is running a field event at Bay Museum, Canvey Island for International Museums Weekend. Contact Norman, M0FZW, on 01268 692776.

On Sunday 20 June Newbury & District Amateur Radio Society is running the Newbury Radio Rally & Boot Sale. Details from Richard, G3ZGC, on 01635 46241.

NEWS FOR THE SOUTH WEST

On Monday 14 June Cornish Radio Amateur Club is having a computer section meeting. Details from Steve, G7VOH, on 01209 844939.

On Tuesday 15 June West Devon Radio Club is having a radio operating night, where members can try their equipment on the club antennas. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 16 June Taunton & District Amateur Radio Club is operating the club station. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 16 June Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 16 June Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 17 June South Bristol Amateur Radio Club is having a barbecue with Fred, G7LPP, weather permitting. Contact Len, G4RZY, on 01275 834 282.

On Thursday 17 June Swindon & District Amateur Radio Club is having a talk. Contact Den, M0ACM, on 07810 317750.

On Friday 18 June North Bristol Amateur Radio Club is having a digital demonstration. Details from Dick on 01454 218362.

On Saturday 19 June Trowbridge & District Amateur Radio Club is attending Southwick & North Bradley Scout Fete. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

NEWS FOR WALES

On Tuesday 15 June Wrexham Amateur Radio Society is having a Morse night. For more information contact Glyn, MW0BNB, via the web at www.qsl.net/wars.

>Steve,

>I agree. It is bizarre that people would need a webinar to learn how
>to find stuff.

Training can be useful, even in organizations full of experts, to
quickly and efficiently get everyone up to a baseline of knowledge, as
well as be able to get/contribute consistent results. I certainly
expect that most amateurs, and ARRL members, are technically savvy, and
can quickly come up to speed with new systems and technologies. Those
like you and me that "grew up" with technologies like the Internet in
their personal and professional lives may find them to be intuitive.
Others may not. Not everyone might be able to quickly self-train, and
the alternative to accessible one-to-many training like webinars may be
to devote a lot of individual customer service support to those who
might need extra assistance.

>The old site wasn't broken. "If it ain't broke, don't
>fix it." It's just like when Microsoft or some other software
>company comes out with a new and "improved" program or operating
>system. You have to learn how to use it all over again.

Welcome to the world of the technology life cycle! Though perhaps
you've been here before...

Unfortunately systems don't exist in a vacuum, nor do they have infinite
lifespans. They require a lot of supporting infrastructure, including
hardware, operating systems, applications, as well as trained
administrators and users. Each provider of the individual pieces may
choose to improve (or try to improve) their products periodically, and
make obsolete, or "end-of-life" their previous versions. Finite
resources means having to make sometimes difficult tradeoffs between
supporting the old and developing the new. Hardware might not be
available on the new or reconditioned market, or have parts available,
or be able to run current versions of operating systems. Operating
systems may no longer have security updates, documentation, and training
provided by their vendors. Same with applications. Current
applications may not run on old operating systems and hardware, or
vice-versa. Trying to maintain in-house training for old systems in the

face of lack of support from vendors and turnover in staff can be daunting. Maybe the ARRL was facing all of these challenges, and decided that this was a good time to upgrade. Perhaps the new site is much easier to extend and support new advanced features. I would even be sympathetic to the need for an upgrade if the new site was feature-neutral, but was easier or less expensive to maintain, or had higher performance and capacity.

While the overall long-term progress is commendable, there are those speed bumps when doing transitions and upgrades. I at least credit the ARRL for trying to run both systems in parallel during a test phase, then cutting over when the site substantially worked (even taking the hit and embarrassment when it was clear that they needed to delay rollout due to performance issues). Internal systems at the ARRL have been rolled out this way for many years. It's only now more visible when applied to directly member-accessible resources like their web site.

Somewhat imperfect analogy: It's like asking why didn't we stick with the '57 Chevy or the Saturn V rocket (or the Drake transceiver), as those were notable examples of what worked well in the past. The general answer is that those examples were quite serviceable for their time, but technology improves and is incorporated into new products. Blueprints and other institutional knowledge for '57 Chevy's and Saturn V rockets exist, but unless you have huge warehouses of original New-Old-Stock (NOS) parts, or existing factories that can make "vintage" components (anything from transistors to just era-specific screws and bolts), you may wind up having to re-engineer, re-integrate, and re-certify a design with currently available components, and at that point, you may as well have started with a clean sheet design in the first place.

(The analogy is imperfect, as I know that small-scale boutique or cottage industries have licensed the '57 Chevy tooling and blueprints from GM and can provide identical, sometimes improved, versions of nearly 100% of the original parts catalog, including a full body, for a '57 Chevy. But that's still not practical or cost-effective for large-scale production of something to be used for modern, everyday transportation. Especially if it has to meet current safety and reliability standards. Drake ran out of parts for some of its legendary amateur radio equipment some years back, is not planning to reproduce them, nor are third-party vendors stepping up to do so.)

>And many links on the site don't work.

It seems that that's the biggest "bug" in the new system. That, and not making sure that all existing direct links from the old site, that might be stored in members' bookmark files (such as the A-1 operators page), had redirection from old names to new so that members were not experiencing broken links. At the very least, all old addresses that were deleted or modified should have been redirected to the main page, instead of returning a "404" Error with no further information.

>How come only Midwest Division members get to have a webinar?
>What about us out West? Or New Englander? Or Southerners?

It appears that the Atlantic Division leadership took the initiative to set up these webinars for the benefit of their members, using volunteers and free or inexpensive on-line resources (i.e., it's not a fully-funded ARRL-wide service yet). They have done webinars on other amateur-radio-related topics in the past, not just "simple" ones like ARRL web site training, and are likely to do others in the future. They seem to be treating it as a pilot/proof-of-concept with the intention of gradually rolling it out to other Divisions. Immediate expansion to everyone may not be practical due to limited current resources, such as the maximum number of attendees that can be accommodated at the gotomeeting.com site. I think that it's a commendable initiative, and I choose to view the present glass as half-full rather than half-empty, and look forward to when it can be filled.

>Yesterday, I tried to use the Field Day site locator to locate Field
>Day sites. The search function didn't work. But I was able to
>mouse-drag the map to the area I wanted.

Was the Field Day site locator available on the old site? If not, then maybe that's an example of a new capability that wasn't practical to roll out on the old site. I agree that it should have been fully functional when rolled out to production, but the fact that it was available and partially working shows that the ARRL is planning improvements over the old site.

TO take this issue first.. The web site is supposed to have a ton of new features.. And a conference (Training conference) which is what this is can help you to forget,, ur, learn to quickly access the features you need.

As for why only Midwest.. Cause that's the directors sponsoring the event.. Other directors are welcome to do the same in their areas.

434. SARL NEWS - SUNDAY 13 JUNE 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-06-12 19:00:19 UTC
From: website@sarl.org.za
Message-ID: <20100612190005.DCF8B33C91@panix2.panix.com>

SARL NEWS - SUNDAY 13 JUNE 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

IS YOUR STATION READY FOR THE YOUTH ON 16 JUNE?

SA-AMSAT ANNOUNCES ITS OFFICE BEARERS

LEARNERS TO BUILD PAYLOAD FOR HABEX

NAME THE CUBESAT PROJECT

GREAT TURNOUT FOR THE 85TH ANNIVERSARY SPRINT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

IS YOUR STATION READY FOR THE YOUTH ON 16 JUNE?

Clubs and individual radio amateurs are encouraged to set up stations in public areas like shopping malls to celebrate Youth Day 2010. It is a great opportunity to display amateur radio as the supreme of all scientific hobbies and a great opportunity to encourage young people to take up careers in electronics and communications.

Full details for the event are available on www.sarl.org.za from the home page. Click on 'Youth activity'.

Individual radio amateurs are invited to adopt young people for the day and invite them into the shack to operate under your supervision.

SA-AMSAT ANNOUNCES ITS OFFICE BEARERS

The SA-AMSAT Committee - during its teleconference meeting this week - finalised its office bearers. David Long, ZS5FR, will continue as president. He is joined by Eddie Leighton as vice president. Other appointments are: secretary/treasurer Hans van de Groenendaal, ZS6AKV, technology manager, John Willescroft, ZS6EF, SAARDT representative, Craig Gibson, ZS6CG; and committee members: Laurie Devereux, ZS5DL and Dave Smith, ZS5LPT. The regional organizers are for ZS6, ZS4 and ZS3, Eddie Leighton, ZS6BNE, for ZS5 Dave Smith, ZS5LPT, and for ZS1 and ZS2 Allan Saul, ZS1LS.

LEARNERS TO BUILD PAYLOAD HABEX

The SciBono Discovery Centre (ZS6SCI), in association with the Gauteng Department of Education initiated the High Altitude Balloon Experiment project, called HABEX.

HABEX was inspired by the BACAR project. The objective is to involve schools in Gauteng in the entire process of developing and building a payload that will be launched into high altitude using an unmanned meteorological balloon. SciBono approved a budget for the building of HABEX and approval has been obtained from CAMU to launch the balloons on 24 July. We plan to launch from Klerksdorp Airfield.

Ten school teams are involved and several radio amateurs have also opted to join in this exciting project. A team of radio amateur engineers and designers are assisting the schools in developing the payloads. You can also join in the activities planned for the HABEX 2010 Launch.

"We are so enthused by the project that a world record attempt will also be made to launch the unmanned balloon to an altitude exceeding 38 000 metres," Chris Gryffenberg, ZS6COG, told SARL NEWS. "To achieve this, special balloons have been ordered to carry the payload to this altitude. Currently 10 payloads are under construction and schools will be actively building their payloads on 16 June on Youth Day".

The weekend of 23 - 24 July will see many radio amateurs and learners from schools camping out and preparing their missions in true Space Programme Style with a mission control, search and recovery teams and even a launch pad. "If you want to be part of this exciting project you are requested to contact the SciBono Discovery Centre on 011-639 8400 and ask for Fannie Matumba. We still need many search- and-recovery teams to assist in this massive undertaking," Chris said.

NAME THE CUBESAT PROJECT

SA-AMSAT is inviting radio amateurs to propose a name for its CubeSat project. The project was announced at the recently held Space Symposium and will involve the design and construction of a CubeSat. A CubeSat is a 10 cm cube with a mass of up to 1 kg. The project name should be a single word in any of South Africa's official languages and reflect the spirit of the project. A good example is the name given to the Around-the-world-balloon project which is called "lalela", the Zulu word for "listen". The winning entry will receive a satellite handbook.

Entries should be sent by e-mail to saamsat@intekom.co.za. The closing date is 15 July.

GREAT TURNOUT FOR THE 85TH ANNIVERSARY SPRINT

49 logs were received in the recently held 85th Anniversary sprint. The winner is Jan Botha, ZS4JAN, who achieved 232 points and won an ARRL Handbook. Jan requested the contest committee to present the book to the youngest radio amateur participating in the contest. Thanks Jan, and congratulations Jean-Pierre, ZU6PJ, who was the youngest participant. The second place was achieved by Wessie Wessels, ZS2A, with 147, and the third spot by Philip Esterhuizen, ZS4PJ, with 144 points

Three logs were received from young radio amateurs. Mitchell Mynhardt, ZS6YH, was first with 128 points, second was Jean-Pierre Coetzee, ZU6PJ, with 48 and third Ben Scholtz, ZU1BEN with 10 points. Congratulations to Mitchell, ZS6YH, for also winning an ARRL Handbook. Pam Momberg, ZS6APT, won the lucky draw prize.

The winner's prizes will be shipped by mid-July.

For the full results and stats of the contest, a PDF file can be downloaded from zs6wr.co.za/contest.php.

ZS85SARL ON THE AIR ON YOUTH DAY

A group of amateurs from the Boland Amateur Radio Club will be participating in the Youth Sprint on Wednesday 16 June, under the call sign ZS85SARL.

Their objective is twofold. Firstly, to offer the youth and other radio amateurs the opportunity to work this special call sign in celebration of SARL's 85th year of existence, and secondly, to obtain the last of the outstanding contacts to ensure that ZS85SARL qualifies for a WAZS certificate.

UHF/VHF INDABA.

No feedback has been received so far about this contest, or about the Indaba scheduled for 26 June. It would be appreciated if we could get some feedback if anyone will be attending the Indaba.

If there is not a favourable response, the only option will be to scrap the contest from the calendar and replace it with something else.

Please give this some serious thought.

ACHIEVEMENTS

Congratulations to Jannie Minny, ZS4JR, and his triplets Janita, Hannelie and Emelia and his wife, Johannatjie, who all passed the recent RAE with B points. It is just possible that it is the first time that triplets wrote and passed the RAE together. Congratulations to all of you.

Jan Jordaan, ZS3JAN, previously ZR3JAJ, was on 5 June exactly 1 year on the air. During that period he upgraded from ZR to ZS, obtained WAZS100, WAZS 200 and Topband certificates and hhis application for a WEAZS 300 has been submitted. Congratulations to you Jan, you have set an excellent example.

WEST RAND AMATEUR RADIO CLUB FLEA MARKET

The West Rand Amateur Radio Club is hosting its next flea market at 12:00 on Saturday 26 June at the clubhouse at Kroton Street, Weltevredenpark, Roodepoort. Everyone is most welcome. For more information, contact Joop, ZS6C, at 082 342 3280.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels although Sunspot 1 078 and a companion are growing nicely in the southern hemisphere. The sun is waking from a deep slumber and in the next few years we expect to see much higher levels of solar activity. The effective sunspot number is expected to be less than 10 for the coming week.

20 m will provide the best opportunities for DX followed by 15 and 17 m. Conditions to India will be good from the afternoon onwards. During the late afternoon and early evenings it will be favourable towards Europe. Contacts with the USA are still challenging. Exchanges with Australia and New Zealand are becoming promising on 20 m at sunrise. Contacts with Brazil are becoming tough.

Local conditions are going to be good during the daytime on 40 m. With the change of season, 30 m has taken over from 20 m for contacts over the longer distances during the middle of the day. With the decrease in static levels 80 m is best for the shorter distances and also during the early mornings and late afternoons.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

12 - 26 June - ZS1VTS Voortrekker camp, Southern Cape; 16 June - Youth Day celebrations; SARL Sprint; HABEX payload construction; 26 June - UHF/VHF indaba at the NARC at 12:00; 26 June - West Rand flea amrket at 12:00; 15 July - Closing date to submit name for CubeSat project; 18 July - Intechnet at 19:30 on VHF/UHF/MICROWAVE matters; 23 - 24 July - Preparation and launch of the HABEX balloon project; 24 July - RTA symposium in Cape Town; 12 -14 August - International EME Conference, Dallas, Texas; 21 August - RTA symposium in Port Elizabeth; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual; 18 September - RTA symposium in Gauteng; 30 September - closing date for Phase 1 of the Innovation project.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items -

if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Leon, ZS4V, and edited by Jannie, ZR6PHD.

Thank you for listening, 73.

It is a matter of perspective and temperament.

My own perspective is that intelligent and smart people can and should design websites that allow people to do what they want, without having to learn or have other extraneous "stuff" get in their way. That stuff can act as a barrier.

Illustrative related story: I needed a new pair of skates, and I needed the quickly for a game the next morning. I like CCM skates, so I went to their website. I get a screen saying I needed to install a new version of Flash player. No other choice, and I wasn't going to get to see anything if I didn't. So I download the new version. Install, and I had to reboot. I'm starting to get annoyed. Then I go to the site again. Computer freezes. Task manager wasn't up to the task, so I had to hard shutdown, safe boot, restart. Okay, I'll give it another try. I went to the site, and got to see that critical Flash animation. It was a goalie sliding sideways across the screen. 45 minutes of messing around to see a goalie slide across the screen. I left them a note explaining that if I hadn't been committed to buying their skates, I would have given up and gone to another site and probably not given CCM another look.

The ARRL website is a true failure. broken links, and if we have to be trained to use it, it moves all the way to epic failure. I used to visit daily, now I don't use it at all. It has moved from being a great resource to something I avoid. Seriously, how does this site get published with bad links? Any decent web publishing package will run a check on your links and tell you which ones don't work.

There is a lesson here, and it is something that web designers have come across again and again, from the days of designing websites specifically for Internet Explorer, and bragging about it. Web designers have their preferences. I've sat in meetings where a designer has declared users that don't have whatever "feature" he wants to put in the page as irrelevant. It is also why a lot of businesses have to use Internet explorer 6, as bad a program as that is, they've designed their web apps specifically for it.

The lesson is that web pages should be designed for the user, not the designer. If training is involved, if links don't work, then it is hard to call this one a success.

DIGITAL AMATEUR TELEVISION (DATV) EQUIPMENT
BULK PURCHASE SCHEME

Following on from the success of the first bulk purchase scheme, the Wellington VHF Group Incorporated is accepting orders for a second scheme, closing at the end of June.

For more details please email:

zl2wa@clear.net.nz

****

>From The Business Manager ZL2TDM

Debby says....

Conference weekend has once again been and gone and a great time had by all who attended. No doubt there will be many stories or rumors floating round about the entertainment on Sunday night which featured yours truly and your President ZL2KH in a skit...hilarious to say the least.

The following points are some of the highlights and decisions made by Council and members of the AGM.

Councils Motions:

A decision for NZART to make a contribution to Peter Lake ZL2AZ of $1,000 to assist with expenses incurred while attending APG3 was carried unanimously by Council in appreciation of Peter's commitment to amateur radio nationally and internationally.

That 2011 subscription remains at $95 with a rebate increase of $15 if paid by 30 November 2010. All other subscription levies will remain the same. I (ZL2TDM ED) feel it is also timely that we encourage people to either pay early or on a monthly basis. It was noted that there has not been an increase in subscriptions since 2004 at the Blenheim Conference. Therefore I (ZL2TDM ED) must stress the Association has absorbed annual inflation costs over the past 6 years.

Council approved an application from ZL1TPH to join the FMTAG committee for a trial period of 6 months.

Based on a paper for by the Business Manager and having considered all possible options, council resolved that headquarters to remain in the same location in Upper Hutt, in the interim, until a suitable lower cost option becomes available. One of the options submitted by the Business Manager, that Council considered, was a home office environment. There are technical issues regarding access to computer based files, therefore Council further decided that Evan Sayer be appointed to lead a project team to resolve software issues regarding remote access to data.

Northern Region Councillor Phil King, ZL1PK is to review all the recently received submissions on the future of NZART and prepare a summary for Council's consideration. Phil will highlight and prioritise those areas needing urgent attention.

The following motion was also passed as a result of these submissions. That NZART implement a Membership drive at Branch level, with an incentive of 50%

of the first years subscription going back to Branches who sign up new members. This also includes members that have not been NZART members within the last 5 years.

Acting on a letter from Nelson Branch, Council gratefully received the donation of a trophy by the Branch. This will be awarded in recognition of candidates who have achieved high examination results in all age groups not already covered in the Youth achievement award.

Council resolved on request from ZL1TPH and ZL4PLM to advise FMTAG, they see no objection to a weak signal band between 2396 - 2400 MHz

Vaughan ZL1TGC updated Council on the Kordia situation. Site access has been reinstated, however anyone having concerns regarding this is to contact Vaughan. The Co-location Agreement has been signed with a copy being held at NZART HQ.

A request was raised from the floor that the Headquarters Infoline be made available in pdf format. ZL2KH will liaiase with ZL2NN to see the feasibility of this.

Jim ZL2BHF also requested that all branch newsletters be sent electronically to the ZL6A e-mail address if possible. This ensures branch information is notified nationally on the official broadcast, keeping everyone informed of branch events.

Remit 1 Lost on vote count
Remit 2 Carried on voices
Remit 3 Carried on voices
Remit 4 Lost on vote count
Remit 5 Lost on voices
Remit 6 Carried on voices

After remit 4 was decided - all delegates were polled to ascertain which of their members were in favour of the introduction of an entry level licence. The majority were not in favour of such a system - so there will be no entry level licence introduced.

The Rothschild Cup was awarded to Nelson Branch again, for 14 successful examination candidates in 2009.

Mark Gooding ZL2UFI invited us all to attend the 2011 conference in Upper Hutt.

Ethan Brown ZL1AE and Jason Light ZL3LD both received the Youth achievement award for 2009.

Denise Hider ZL3HI received the Arthur (Jumbo) Godfrey memorial award for services to her branch.

Brian Farrell ZL1HN placed a motion to enable junior transmitting members to attend conference at a reduced rate - this was lost

Gareth Bradshaw ZL3VP placed a motion for NZART to review ARX charges in light of other branches offering this service for free - this was carried.

Other interesting points were raised which will be in the full version of AGM minutes in the August Break In.

Mondays meeting of Council saw the following resolutions:

That Council appoint a National Training Officer for amateur radio examinations. Appointment to be advised.

ZL1TGC and ZL2HD are tasked with producing a paper incorporating all NZART Expenditure with a view of cost cutting where possible.

That Fred ZL2AMJ be tasked to update the NZART examination database within 12 months.

Furthermore: That a second exam database be recognized and remains the property Wellington VHF Group and a transition period of 12 to 24 months at the end of which, the existing one on the NZART web page be replaced.

NZART Council adopt a policy to encourage members to license or switch off their amateur fixed stations (which is not covered by a GURL) if not attended.

Following a motion passed at the AGM regarding ARX fees NZART Council resolved:

1. All new amateurs receive their certificate of competency and call sign free, paying $5 to cover administration costs to the branch.

2. All new amateurs must pay $95 to join the Association before they can receive a call sign and certificate of competency free. If they pass as at 1 October their subscription will cease as at 31 December the following year.

NB: This cannot be used in conjunction with the NZART membership promotion of new members submitted by NZART Branches I.E being eligible to claim the 50% rebate.

3. All other ARX fees remain the same to cover costs incurred for this service, such as special event call signs, secondary call signs replacement certificates, one letter call signs and changes to call signs.

That all Youth Achievement award recipients, NZART pay the conference registration to attend conference in the year after they receive their award, providing they are still NZART members.

Finally...Due to membership demand, changes to headquarters hours will be as follows:

Tuesday - Friday 8:30am - 2:30pm Commencing Tuesday 22 June

'til next time....Debby ZL2TDM

The Struggle For NZART Membership Has Not Changed in 80 Years!

BREAK-IN

EDITORIAL

Vol. IV. No. 5
WELLINGTON NZ
MAY, 1931

As this issue goes to print we feel that it would not be complete without some reference to the numerous letters of appreciation that members have sent to Headquarters. From the general tone of this Correspondence it is patent that out efforts are meeting with a most gratifying reception and have won the approval of most of the Amateurs in New Zealand.

As "Break-In" is the official organ of NZART, and in view of the fact that we consider the well-being of the one to be closely bound up with the interests of the other, we need scarcely emphasise the necessity for aiming at an NZART that is strong numerically and financially. A numerically strong NZART alone can support a really adequate magazine, and the magazine in turn will react upon the strength of the organisation. Every Association of any size depends upon an official organ to act as a leavening and a welding force, and NZART, scattered as it is throughout the length and breadth of New Zealand, has need of a strong "Break-In."

Every Amateur in New Zealand owes it to his hobby to join NZART. Only through strong combination can we Amateurs hope to hold together in the face of commercial interests that would fain encroach upon and usurp our Amateur channels. We cannot appeal too strongly to all Amateurs to support the only radio organisation in New Zealand that can offer them the strength that goes with unity and the freedom that accompanies strength. Every loyal member of our Association must make some sacrifice if NZART is to mean anything to him, and we suggest that he can do most by urging his fellow-Amateurs to sink their personal prejudices and combine with us in making NZART a truly national organisation.

S.H.P., C.R.H.T.

There's a New Game in Town! - AMATEUR RADIO!

THERE'S A NEW GAME IN TOWN!

AMATEUR RADIO!

Be a part of it...
All you need to run Amateur Radio Classes is waiting for you!

TO INSTRUCTORS: "Your material is ready!"

NZART Council encourages more training classes to increase the pool of radio amateurs, to add to the membership of the Association and to strengthen the Amateur Service in New Zealand. The Wellington VHF Group Inc., Branch 74 NZART, with the Tauranga Emergency Communications Group, NZART Branch 88, has successfully trialled new learning material and procedures for the new entrant to Amateur Radio. It provides for candidates for the Amateur Radio Examination working alone or in a class with hand-out notes to make the task of the Instructor much easier. Any qualified radio amateur anywhere can now be an Instructor.

A new 600-question question-bank is presented in a unique way to facilitate easy question-and-answer revision tests using all the real examination questions.

This teaching resource is ready for wider use and you are welcome to use it. >From first contact with a new candidate to the after-exam certificate and callsign processing, the procedure is entirely volunteer-based, "amateur-helping-amateur", so the cost to use it is $(nil)! Please help to increase interest in Amateur Radio in your community and establish a local class. This help for you is at hand!

The material is freely available by download from:
http://www.vhf.org.nz/pubs/VHFGuide/

Read about it there. Download a set of the booklets and view the contents. Print them double-sided and bind or staple them with transparent plastic covers as shown. Enquiries to the email address on the web site are welcome. Notification of your use of this material is required for examination and processing reasons and prepared and sealed examination papers are provided when required with ARX services following for the successful candidates.

The cost of printing this teaching material is on you. You may cover printing costs and charge the students as you wish.

Book 1 includes an application form to join NZART. These can be printed from the selected page in whatever quantity is required, one-per-candidate. Early joining is a requested priority!

Remember: All you need to run Amateur Radio Classes is ready and waiting for you!

Get your Branch involved now!

****

The Rugby World Cup 2011

The Rugby World Cup 2011 is scheduled to take place in New Zealand 2011. It can be confidently expected that there will be an invasion of large numbers of fans, supporters and hangers-on in towns and cities where Cup events are being held. There will be radio amateurs from overseas in and amongst them.

Council is now putting out a call for a volunteer(s) from the membership to compile and to keep updated, a web page for the NZART web site to:

List the venues where World Cup events are being held with the date(s).

List the local amateur radio Branch/club meetings scheduled for (say) the week before and the week after, at these venues.

Encourage special meetings for the purpose of welcome and fraternity friendship.

Provide details of the correct name of the local Branch/club, with the name(s) of a nominated contact person(s), callsign, email address, phone number.

Advise who to contact to provide the details of any transport arrangements to give visitors a lift to/from meetings.

List the local VHF and UHF repeaters and organise active monitoring of the repeaters during the period.

Advise the arrangements for qualified visitors from overseas to operate in NZ.

Advise overseas radio journals and overseas amateur radio news outlets in a timely manner of the existence of the web page and its purpose and to advise visitors to BRING YOUR HAND-HELD rig.

And to organise and attend to any other appropriate matters.

Anyone interested in doing this should please contact:

Roy Symon ZL2KH
25 Annandale St

Amateur Radio Operator Charged in NZ For Operating at 3100 watts

....Radio Spectrum Management was alerted to a video Mr Potter posted on 'You Tube', a well known online video sharing site, which showed his transmitter operating at 3100 Watts. Operating at such high transmitting power is likely to cause interference to, and disruption of, a range of other licensed radio services in the local area....

For more details please see:

http://www.scoop.co.nz/stories/PO1005/S00283.htm

RSM Call Book Database is on The NZART Website

The NZART Administration Liaison Officer, Don Wallace ZL2TLL, has obtained a pre-Call Book copy of the RSM Call Book Database that is on the NZART Website, but sadly not to stay ED.

The purpose of this is to give people the ability to check their own and their friends listings and for the person with the entry in error to get in touch with RSM to correct any errors. This will then give us a more accurate Call Book.

Details can be updated either online at:

http://www.rsm.govt.nz/smart-web/smart/page/-smart/WelcomePage.wdk

(you will need your log in details) or by phoning RSM on 0508 776 463.

For Silent Keys, there is a form available at

http://www.nzart.org.nz/policies/2006-callsign-removal-form.html

and this can be filled in and posted to Debby at HQ (PO Box 40-525 Upper Hutt 5140) with relevant supporting documentation by a person authorised to do so.

For further information, please see the help files online at:

http://www.nzart.org.nz/call-book/index.html

or contact RSM as above

Tony Case ZL1UD

FMTAG NOTES FOR JUNE 2010

PROPOSAL

ZL2CC has applied to change the frequency of the digipeater at Te Kapua, map reference NZ260 Y17 341904. The transmit and receive frequency will be 144.575 MHz. An engineering evaluation confirms that there will be no interference to other stations.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matter, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

****

INTRUDER ALERTS

___oooOOOooo___

>Date: 25/05/2010 07:17 a.m.

>Subject: [INTRUDER ALERT] 29 MHz

Sent by: intruderalert-bounces@iaru-r1.org

29684.8 and 29699.8 kHz - serial modems from Italy, area of Brescia,
probably Italian military, sporadic-E conditions at 1840 utc on May,
24th -The systems are transmitting daily and all day since several years.
Complaints of the German PTT were disregarded.

Meccano Robots

The Website, listed below, has simple robots using Meccano parts and simple
electronic components. A special PIC with its own compiler when used with a
simple program allows a TV remote to manoeuvre it. A lot more info available
on the website.

http://www.skippyrobot.co.za

Two robots are shown below:

****

Photos: The Hands-Off Future of Controlling Computers

....The system works by using an off-the-shelf webcam to track the movements
of the multicoloured glove and then uses software to map its movements onto
a 3D computer-generated model, as seen here.

The glove is covered with 20 irregular-shaped patches, which allow the
camera to recognise the front and back of the hand....

For more info please see:

Web Update

E-mailing Infoline
There two legacy mailing lists for Infoline. Starting with issue 208, these mailing lists are to be processed by the Mailman e-mail system, now used for all NZART e-mails.

1. [INFOLINE] - this is the bulk list that sends only the HTML formatted e-mail version. Currently at 679 subscribers, and

2. [BRANCHES] - this has the same HTML formatted e-mail, as 1 above, but has a MSWord copy of Infoline attached. Branches, Council and selected Infoline subscribers (that have asked for it) receive this copy. Currently at 65 subscribers.

You now have the choice of HTML, PDF or DOC formats for the 2010 Infolines on the web. Pick which one suits you.

Jamie Pye ZL2NN

Do You Have Anything to Contribute to a New NZART Website?
Some ideas for a new NZART Website have been loaded to:
http://www.nzart.org.nz/web-development/index.html

This is a work in progress and will be updated going forward. When you hit the first "Page not found" that is it.

New artwork and ideas will be added to the presentation. New page themes added and a new way of collaborative thinking and working together put forward. Peter Bennett, ZL1UPB has offered to assist co-ordinate efforts to improve the web site. The pages in the web development project are a guide

to generate interest, ideas and most importantly map out the future of New Zealand Amateur Radio's web presence. Are you a blogger, do you tweet, maybe a wiki author, do you read amateur radio news, are you making amateur radio news, the web team at NZART want to hear from you.

If you have ideas or suggestions, artwork or themes for this project please e-mail Peter at:
web-devel@nzart.org.nz.

Prochaine envoll�e : 26 ou 27 Juin 2010 * Next Flight : June 26 or 27, 2010

A l'occasion de la fin de semaine des Fielddays / For the Fielddays weekend

A �tre confirm� / To be confirmed

Selon la meteo � As weather permits

<http://raqi.ca/braq/live.htm> http://raqi.ca/braq/live.htm

Une belle opportunit� pour les clubs de d�montrer ce qu�est l�APR S,
puisque le ballon en est bien �quip� et pourra etre suivi tout le lon g
de son envol�e

Ce ballon transportera une r�p�titrice radioamateur de type �crossb and
VHF-UHF�. Il est pr�vu que cette r�p�titrice aura une tr�s gra nde
port�e et nous esp�rons que plusieurs souhaiteront profiter de cette occasion pour se faire entendre via le ballon.

Le fr�quence d�entr�e est 145.560 Hhz avec une tonalit� de 103.5 Hz;
et la fr�quence de sortie est 445.525 Mhz. La puissance d��missi on
sera d�environ 1.5 watts.

Gerry VE2AW animera en fran�ais et en anglais le r�seau BRAQ; on demande aux stations qui participeront d�utiliser l�alphabet phon�tique international pour s�identifier; on vous demandera ensuite

votre pr�nom ainsi que d�identifier votre emplacement (QTH). Une carte QSL comm�morative sera achemin�e pour tout contact radio qui

sera confirm&#65533; par l&#65533;animateur (Gerry).

&#65533; &#65533;
A great opportunity to demonstrate what is APRS, as the balloon is
well equipped and could be followed during his flight

The main payload will consist in a VHF-UHF crossband repeater
available to the amateur community while airborne.

The repeater input frequency is 145.560 Mhz with a tone of 103.5 Hz
and the output frequency is 445.525 Mhz. The power output of the
repeater should be around 1.5 watts.

This will be a bilingual (French and English) directed net and net
control with be Gerry VE2AW. Check-ins are invited to use the
phonetic alphabet and then will be required to provide their nickname
and location (QTH). A commemorative QSL card will be issued to all
stations which are confirmed by the net control station.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 13th June 2010

Silent Key

EI4Z Tom O'Donnell who was in his mid-nineties and the oldest living EI passed away last weekend. in St. Mary's Hospital in the Phoenix Park after a long illness, against which he battled courageously.

This sad news was relayed by his son Philip, an ex-radio officer, who said of his father "He came from an era when ships were made of wood and men were made of steel." Shortly before his death, Tom made Philip promise to carry on the EI4Z call-sign and wrote to Comreg expressing his wish.

As Philip already holds a PMG certificate, we hope to hear the EI4Z call QRV soon again activated by Philip.

To Philip, Joan, Ray and all the family we extend our deepest sympathy on Tom's death. May he rest in peace.

Revised Syllabus for the Amateur Station Licence Examination Approved

Following positive discussions with ComReg in March and the subsequent submission of a very detailed document by the IRTS Examinations Board, ComReg has now approved a revised syllabus for the Amateur Station Licence Examination. The revised syllabus will be effective for examinations held from 1 January 2011 onwards.

In the five years since IRTS took over responsibility for the theory examination, the Examinations Board of the Society has compiled a significant question pool and has gained considerable experience in setting, organising and correcting the theory examination for an amateur radio Licence.

It was this experience, coupled with feedback from candidates and tutors, as well as some changes in emphasis on the requirements for a licence that convinced the Society that it was time to provide a more structured and focused syllabus for the theory examination.

The objective of the revised syllabus is not in any way to lower the standard of the examination but rather to better reflect the topics to be covered for the examination and to assist candidates and tutors to

understand the extent and depth of knowledge required on the various topics.

The revised syllabus mirrors the structure and format of the examination, which is not being changed, and outlines for each subsection the topics that need to be covered. In addition, for each subsection there is a 'Notes for Candidates' section to help tutors and candidates organise their work in preparing for the examination in a more focused and meaningful way.

As at present, the revised syllabus is for an examination leading to a Harmonised Amateur Radio Examination Certificate (HAREC) and has been approved by ComReg as complying with CEPT Recommendation T/R 61-02.

We wish to express our sincere thanks to the staff of the Spectrum Licensing Division of ComReg for their constructive approach to this matter and for the timeframe within which approval for the revised syllabus was granted.

The web page at www.irts.ie/syllabus contains a link to the revised syllabus.

The 2011 syllabus is being published now in order to give as much notice as possible to tutors and prospective examination candidates of the changes. However, it is important to note that examinations held up to the end of 2010 will be based on the existing syllabus contained in the document "Studying for the Amateur Radio Examination" which is available for download from the IRTS web site.

Theory Examination

It is now less than two weeks to the closing date for the next Theory Examination for the Amateur Station Licence which will be held on Wednesday, 7 July at 2 p.m. in the ComReg Offices in Dublin and at the Limerick institute of Technology.

If you intend sitting the examination and have not yet applied to do so and paid the appropriate fee you should do so immediately.

For information on examination fees and other details see 'Theory Examination' in the Information section of the IRTS website at www.irts.ie The latest date for receipt of applications to sit the examination is Wednesday 23 June.

Class turns the tables on Instructors

In a show of their appreciation the Region 4 Theory Class in Limerick have presented Trophies to their Instructors. A class Rep has been in contact with the News Desk to have this item mentioned and to make it known that the Class appreciates the hard work, commitment, time & dedication shown to them by their Instructors recognized.

The trophies ware presented in the past week to Ger EI4GXB & Simon EI7ALB. Gerry EI3JU will receive his Trophy upon his return from his holidays. Thank you once again from your former candidates of the Limerick Region 4 Class. .

CQ Help for Friedrichshafen

The Society will again have a stand this year at the Friedrichshafen Rally from 25th to 27th June. Anyone travelling to the rally that is willing to give a couple of hours to help staff the stand please contact Se&#65533;n EI7CD on 01-2851599 or by e mail to ei7cd /at/ gofree.indigo.ie

---

Theory Classes in Clane

Michael EI2GKB who has run very successful classed in the South Dublin Radio Club intends to run classes for the Amateur Station Licence examination in Scoil Mhuire, Clane, Co. Kildare in the autumn. If you are interested please contact Michael on 087-2481970.

CW Field Day

A number of groups operated under field day conditions last weekend for the annual CW Field Day. Shannon Basin Radio Club and South Dublin Radio Club both operated from the grounds of Garbally College in Ballinasloe, County Galway. During the 24 hours of the contest, the Shannon Basin group overcame problems with their computer, their antenna and the generator - all the elements that make up an enjoyable field day weekend!

The Dundalk Amateur Radio Society took up residence for the contest on Howth Head and reports suggest that they finished with a very satisfactory score. Other groups operating portable for the contest were in Wexford and Kinsale. All the groups reported good conditions on the higher bands - with good sporadic-E openings on 10 and 15 metres providing plenty of QSOs with field day stations in Continental Europe. Conditions on the lower bands were particularly difficult, with more than the usual level of atmospheric noise on Top Band inparticular.

Portable Satellite Operation

Dave Ryan EI4HT / M0GIW be operating /P on Satellite from the following locaions over the next few weeks.

10th to the 29th of June from Pembroke Dock in the afternoons and from Rosslare Harbour in the evenings as passes allow. He will also be receive only when Maritime Mobile between Pembroke Dock and Rosslare Harbour each day as work allows.

During this time Dave hopes to also try some SSTV / P if anyone is about in the Wexford area. From 1st July to the 16th July Dave will be operating from Paphos in Cyprus from KM 64 ES.

Dave's plan is to use Satellites AO51 & HO68 as the schedule allows. And APRS on ISS if active. Also APRS as nodes are available whilst out and about, Should be visible on www.aprs.fi as EI4HT-7

Dave will be using the following equipment. Kenwood Thd-7 and Kenwood VC-H1 for SSTV if sat schedule allows. Garmin e-trex for APRS. Antenna ARROW dual band satellite antenna.

The following callsigns depending on locations. EI4HT/p M0GIW/p and 5B4 / EI4HT / P from Cyprus.

New Yahoo APRS Group

The primary goal of this new group is to try to encourage APRS activity in the Northern Counties. The group is open to all Country wide the Groups address isas follows.

http://groups.yahoo.com/group/APRS-NI/

South Dublin Radio Club news

Declan Craig EI6FR will be giving a talk titled "IOTA and DX petitioning" on Tuesday 15th June at Terenure college at 8pm sharp. Visitors are welcome. The club is also running radio exam classes every week as usual.

Directions and information is available on the website: http://www.southdublinradioclub.ie

---

Wicklow Radio Club

The next meeting is scheduled for Wednesday 23rd June at 7:30 in the Glebe National School.

History this Week

1902 Colour TV patented by Otto von Bronk, Germany.

1909 SS Slavonia first to use SOS distress signal, sankoff Azores.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-June, through Sunday, 13th-June there were 214 countries active. Countries available: 3A, 3B9, 3C0, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T31, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3C0C, ANNOBON ISLAND. Operators Elmo/EA5BYP (SSB and RTTY) and Javi/EA5KM (CW and SSB) are now active as 3C0C from Annobon Island (AF-039) until June 20th. Activity will be on 160-6 meters using CW, SSB and RTTY, with an emphasis on the lower bands and CW. They will try to have two stations on the air, but remember that they are only two operators, so please be

patient. On their Web page they reported on June 13th, that due to strong storms some antennas were destroyed. On Monday, June 14th, 3C0C will not be active, and the team will be standby to repair all the antennas once again. They state, "....many QRM on top bands, so was not possible be on the air on 80 and 160m. Anyway they will try next days. A couple of days ago they have some problems with one of the power generators... as you can see this is not a Resort and they are tired. In next days they will try to work more for NA, at the moment the propagation was not very strong. They are making a big effort to be on the air." For more details and updates on the 3C0C DXpedition, visit their Web page at: http://www.3c0c-annobon.com

9A, CROATIA. Zik, VE3ZIK/DO7ZZ, will be once again active from Bilice (Croatian coast) between July 1st and September 27th, as 9A/VE3ZIK. He will try to activate several IOTA/IOCA Islands in the EU-170 IOTA group, and also be in the RSGB IOTA Contest. Also, there is a chance he will activate several WFF area from Croatia. QSL via DO7ZZ, Bureau is OK, eQSL and LoTW. Also, E-mail Bureau request for QSL cards can be sent to: ve3zik@gmail.com

CY0, SABLE ISLAND (A visit to the island!). Duane, WV2B (VA1ZZ), states, "I am arranging a day-trip to Sable Island in mid-August. No ham radio involved, just a visit to see the station, horses, etc. At this time there are 2 seats remaining on the charter flight. If seriously interested, please contact me ASAP for details at: wv2b@juno.com "

DU, PHILIPPINES. Gerard, F2JD, is back to Manilla for 6 months or more. He will be signing DU1/G0SHN and plans to be active on all bands and modes. He will also try to activate some of the IOTA islands while there. QSL via F6AJA. The log will be available online at: http://lesnouvellesdx.fr/voirlogs.php

DX0, SPRATLY ISLANDS (Update). Jim Linton/VK3PC, DX0DX Public Affairs, reported to OPDX on June 13th (edited): "Team Leader Chris Dimitrijevic, VK3FY, has just returned from The Philippines where he held high level discussions related to the DX0DX DXPedition being held in January 2011.
A series of meetings included one with the current Municipal Mayor of Paga-Asa (Thitu Island) where the DXpedition will be mounted. Later he met with the Mayor-Designate who will take office in September, and at that time current Mayor becomes the Vice-Mayor.
Other discussions were held with military authorities plus officials of the IARU member radio society, Philippines Amateur Radio Association (PARA) which is strongly in support of the DXpedition.
Chris VK3FY said, 'Those face-to-face discussions enabled the amateur radio and humanitarian aims of the DXpedition to be fully explained and agreed, and also clarified the requirements of both local and federal authorities.
The result has been universal support for the activity. The next step is to complete the necessary immigration procedures for each non-Filipino national radio amateur that will be part of the DXpedition. Once that is completed a formal letter of approval is to be issued.

The team is mindful that it not only has to meet the requirements of
The Philippines authorities but also those of the DXCC Committee to have
the DXpedition accredited.'
At the 2010 PARA Hamvention & 17th International Grand Eyeball June
4-6th, Ed Valdez, DU1EV, who will on the DX0DX team, made a presentation
on the two previous DXpedition to the island (DX0K 2005 and DX0JP 2007),
and finished off by announcing the January 2011 DXpedition.
The announcement of such a major proposed activation, in terms of numbers
of operators (30) and duration (3 weeks) resulted in a standing ovation
being given to that news.
Ed/DU1EV and Chris/VK3FY spent a lot of time talking to some of the
300 delegates who were keenly interested to learn all they could about it.
The next few months will be extremely busy with further work on arranging
supplies, logistics, customs clearances, and finalizing sponsorship and
funding support.
A multi-nation team of 30 radio amateurs will operate ten HF stations
&#65533; CW (4), SSB (4) and RTTY (2), plus a VHF-UHF Station on 6m/2m /70cm and
23cm. That range of stations appears best suited in response to the known
demands of the DX community.
Sponsorship support has so far come from ICOM America, Ham Radio Outlet,
Spiderbeam, WX0B Array Solutions, Heil Sound and DX Engineering. Individual
donations via PayPal are welcome.
'The team is highly motivated with each individual member preparing
themselves for the trip to the Philippines and then on to island for this
major DXpedition,' concluded Chris VK3FY."
For more details visit: http://www.dx0dx.net

DXCC NEWS.....
Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following
operation is approved for DXCC credit:
E4X - Palestine; 2010 Operation
Cards for this operation will now be accepted for DXCC credit.

Reports have been coming out that individuals are receiving their
DXCC year in the mail.

FJ, ST. BARTHELEMY. Nikola, VE3EY, will once again be active as FJ/VE3EY
from St.Barthelemy Island (NA-146, DIFO FJ-001. It also counts for WLOTA
LH-0377) between November 22-30th. Activity will be on 160-10 meters
using CW, SSB and RTTY. He will also be in the CQWW DX CW Contest (November
27-28th) as a Single-Op/All-Band entry. QSL via VE3EY.

IOTA NEWS.....
EU-031. Gian, IC8WIC, will be active from Capri Island during the
RSGB IOTA Contest (July 24-25th) as a Single-Op entry. QSL
via his home callsign or by the Bureau.

EU-052. Mike, OE3MZC, will be active as SV8/OE3MZC/p from Corfu Island
(GRE-117, GRE-156, GRE-159, GRE-170 and GRE-179) during the
RSGB IOTA Contest (July 24-25th). QSL via OE3YCB by the Bureau.

EU-052. David, OK6DJ, will be active as SV8/OK6DJ from Zakyntosh Island during the RSGB IOTA Contest (July 24-25th). He will be there between July 20-30th. QSL via OK1DRQ. LoTW in 2011. Visit his Web page at: http://www.ok1fjd.estranky.cz/stranka/zakynthos

EU-114. Kevan, 2E0WMG, will be active as 2U0WMG/p from Herm Island, Guernsey, until June 17th. Activity will be on 80/40/20/17 meters using SSB. QSL via his home callsign, direct or by the Bureau.

EU-118. RARE IOTA (Just a Reminder)! Look for operators Oscar/EA1DR, George/EA2TA, Christian/EA3NT, Col/MM0NDX, Vincent/F4BKV and Bjorn/SM0MDG to activate Flannan Isles (an extremely difficult island to land on) between June 18-21st. Last activation was in 2002 (also in 1989 and 1995). Callsign will be MS0INT. Their main target will be working as many JA stations as possible and giving everyone a fair chance of working the EU-118 IOTA reference. Therefore, they aim to be active on 80-10 meters trying to get advantage on the best bands, with 2 simultaneous stations on the air (possibly 3 stations in daylight), one on CW and another on SSB. They state, "Since our stay on the island is limited, please remember that 1 QSO will be enough, no matter the band." QSL Manager will be M0URX. The team is still looking for sponsors. For updates, visit their Web page at: http://www.ms0int.com

EU-121. Members of the Dalkey Island Contest Group will again take part in the RSGB IOTA Contest (July 24-25th) as a Multi-Op/ Low-Power entry, from Clare Island using the callsign EJ1DD. Operators mentioned are: Paul/EI2CA, Peter/EI7CC, Sean/EI7CD, Jim/EI8BP, Ger/EI8CC and Aidan/EI8CE. QSL via EI7CC. The WLOTA reference number is 1935.

EU-125. German operators Robert/DH8HD, Hans/DO3HJW, Olaf/DL4HG, Andreas/DG3XA and Andreas/DL7AT will be active as OZ0TX and OZ/DA0T/P from Mando Island between July 22&#65533;27th. Activity will include a RSGB IOTA Contest entry. QSL via DL7AT.

EU-158. A group of Greek operators will activate Proti Island between June 22-26th. Activity will take part before, after and during the RSGB IOTA Contest (July 24-25th). During the contest, the group will use the callsign SX8PR, and outside of the contest operators will sign homecall/SV8. Operators mentioned are: Cliff/SV1JG, George/SV1QN, Spyros/SV1RC and John/SV1GYG. QSL via SV1JG.

EU-163. Operators Simon/DJ4MZ, Luise/DL2MLU, Ben/DL6RAI, Hrvoje/9A6XX and Marko/9A8MM will be active as 4O1OTA from Sveti Nikola Island, Montenegro, during the RSGB IOTA Contest (July 24-25th). QSL via IK2ILH.

EU-172. Eight members of the Grantham Amateur Radio Club will be active as OZ/G0GRC from Fyn Island (DIA FY-001) between June 18-23rd.

All of the QSOs will be confirmed automatically via the Bureau.
QSL route for direct requests go via G0RCI.

NA-126. Look for VB1H to be on the air from Harris Island, "New
C.IS.A.", between August 11-15th. There should be 2 HF stations
on the air operating both CW and SSB. Operators will be Don/
VE1AOE, Paul/VE1MPM, and Dana/VE1VOX. QSL via VE3EXY.

NA-160. A team of Honduran operators will be active as HQ3C from
Cayo Pequeno in the Cayos Cochinos marine reserve between
June 18-20th. Activity will be on all HF bands using SSB
and some Digital modes, if conditions allow. Operators mentioned
are: Jorge/HR2AW,Carlos/HR2CSB, Tony/HR2DX, Henry/HR2H,
Javier/HR2J, Marco/HR2MD and Pedro/HR2PAC. QSL via HR2RCH,
direct (w/SAE + 2 IRCs) or by the Bureau.

OC-012. Hase, JK1EBA, will be active as V63AKA from Yap Island in the
Federated States of Micronesia between June 22-30th. Activity
will be on the HF bands, as well as 6 meters, using CW and
SSB. QSL via his home callsign.

OC-171. Craig, VK4LDX/VK8PDX, will be active as VK4LDX/P for a short
term DXpedition to Magnetic Island between July 24-25th. His
main purpose for this activity is the RSGB IOTA Contest (between
1200z, July 24th to 1200z, July 25th) as a Single-Op/All-Band/
Low-Power/24H entry. Craig will use 100 watts into verticals
for 40/20/15/10 meters. He hopes to set up early on Saturday,
July 24th, to operate from 0000z using PSK on 20/15 meters.
Later on the Saturday, Craig hopes to be available on the ANZA
DX Net which starts at 0515z on 14183 kHz. After that he will
go on 20/15 meters PSK until around 1100z and then prepare for
the contest. QSL via direct. You don't need to send any USDs
or IRCs for return postage, just send a self-addressed envelope.
He does not do LoTW or eQSL. If you do not wish to send a card
direct you can send it to him via the Bureau. Visit his Blog
at: http://vk4ldx.blogspot.com

OC-171. Akira, JA1NLX, will be active as JA1NLX/VK4 from Dunk Island
in the Queensland State (North Coast) South IOTA Group in
Australia between September 17&#65533;24th. Activity will be on
80/40/30/20/17/15/12/10 meters using CW. Suggested frequencies
are: 3505, 7015, 10115, 14035, 18075, 21035, 24895 and 28035
kHz (QSX up 1-3 kHz). Equipment will be under 50 pounds!
His transceiver: K2 or FT857 with microHAM CWKeyer. Antenna
will be: 5m long Buddistick with a lots of radials for 80-10m.
QSL via JA1NLX, by the Bureau, direct w/SASE or LoTW. Online
log (on his Web page) and LoTW will be uploaded when he returns
home. Visit his Web page at:
http://www.ne.jp/asahi/ja1nlx/ham/VK4_2010.html

SA-060. Operators Orlando/PT2OP and Fred/PY2XB will be active as ZX8C
from Cotejuba Island between July 1&#65533;5th. Activity will include

an entry in the WLOTA Contest. More details will be forthcoming.

FJ, ST. BARTHELEMY. Nikola, VE3EY, will once again be active as FJ/VE3EY between November 22-30th. Activity will be on 160-10 meters using CW, SSB and RTTY. He plans to be in the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. QSL via his home callsign.

J2, DJIBOUTI. Vincent, F5MJV (ex-FM5JV, FO5RN and FO0/F8UFT), and current "Union Francaise des Telegraphistes" (UFT) President has been assigned to Djibouti. The length of his stay is currently unknown, but indications are to be at least until 2011 and more likely until 2012. Vincent has received a license, and his callsign is J28JV. His activity will be limited at first from his military location on just the weekends (Friday and Saturday). However, he is expected to set up an antenna at his home, so he will be on the air during the evenings. Activity will be on the HF bands, including the 30/17/12 meter bands. He will be mainly on CW and the Digital modes, and possibly SSB. QSL via F5NQL. ADDED NOTES: Vincent plans to make numerous trips to the IOTA "Gulf of Tadjoura Group" (AF-053), especially to Mucha Island (WLOTA 1596), during the weekends. He is also picking up gear necessary to set up a portable station to go to. Vincent also indicates that he will not be able to activate Saaoubia Islands (aka Sept-Freres, AF-059) because the Djiboutian regulations forbid him to go there. During his stay, Vincent will be active with/joined sometimes by Darko/E70A (J28AA) and in July (around the 15th) with Freddy/F5IRO (J28RO).

J3, GRENADA. Harry, AC8G (J37K), is planning a 5 night stay in Grenada for the CQWW DX SSB Contest (October 30-31st -- Contest callsign will be J3A) with considerable operating the two days before with emphasis on non-contest bands and modes. He states that additional operators can be added. If interested, AC8G (Harry) can be contacted via hflasher@dayton.net or 937-434-9616. QSL J3A via WA1S.

KH0, MARIANA ISLANDS. Tony, JA6CNL, will be active as KH0N from Saipan (OC-086) between June 18-22nd. Activity will include the All-Asian DX CW Contest (June 19-20th). Outside the contest, he will spend some time on the 80/30/17/12m bands on CW. QSL via his home callsign or to: NKDXC, P.O. Box 11, Yahata, Kitakyushu, 805-8691 Japan.

KH6BZF PROPAGATION FORECAST/REPORT (For June 14-20th)....

NWR 2010. The 2010 National Wildlife Refuge Week is set for October 10-16th, and Amateur Radio will again be helping to mark this event. The National Wildlife Refuge System, managed by the U.S. Fish & Wildlife Service, spans our nation. This year, the refuge system celebrates 107 years of conservation and quality recreation. Amateur Radio operators are helping spread the word about the National Wildlife Refuge System by operating within a refuge during National Wildlife Refuge Week. Only authorized, responsible access to refuges is sanctioned by this event. Amateur Radio observation will take place between Saturday, October 9th and Sunday, October 17th. Amateur Radio stations are expected to operate from several national wildlife refuges during 2010 NWR Week. Contact 5 special refuge stations listed as active sites to earn a certificate. For more information, contact the NWR Week Amateur Radio coordinator at: info@nwrweek-radio.info
For more details, visit the NWR Web page at: http://www.nwrweek-radio.info

9M2HB LOGS. Hutch, NK0S, reports that he has "finished converting the logs for 9M2HB, and they have been sent to NN3W for uploading to LoTW. The logs cover from 3rd June 1987 through 4th August 1994. Any questions related to contacts should be made to me. I still have the paper logs and if I made a mistake or two (probably) I will be glad to research and correct as/if necessary." His E-mail address is: nk0s@ec.rr.com

Alain, F6BFH, recently active from the Caribbean as FG/F6BFH, TO5SM and TO5SM/P, informs that all direct requests are being answered and sent out.

Florentin, F4DYW (ex-FT5WO), reports that the documentation about his Crozet license and his radio equipment is all packaged up and is being sent home first. Documentation will be forwarded to the DXCC Desk once he returns home. Be patient!

V44KAI LOGS. Joey, W5TFW, reports that he has "started" to put Joel's, V44KAI QSOs on LoTW and eQSL. He states, ".... this is going to be a slow,..... process, so bear with me." His QSL cards are supposed to be delivered by UPS to Joey on June 7th (again,... bear with him).

QSLS VIA LoTW: UA1OIL

QSLS RECEIVED VIA MAIL: 9G5TT, C4N, CR2A, CR2X, CU2AG, EP3PK, HH4/K4QD, OG0A, OH2BH, OJ0B, PJ2/N4QQ, VO2NS, VP2MCC, VQ9LA, XU7ACY and YI9PSE

QSLS RECEIVED VIA THE BUREAU: 8P9JR, D44TXI, D44TXO, LZ128LO, ON65L, PW6C, T77NM, V63J and VP8YLH

T31, CENTRAL KIRIBATI (Update - PACIFIC ODYSSEY 2010). Members of the Pacific Odyssey DXpedition Team made a safe return to Apia, Samoa, on June 5th. The team was active as 5W0OX until June 8th. Complete details on what happened is available on their Web page at:
http://www.uz1hz.com/newz.html
The Ukrainian team states that they are persistent people and want to activate Kanton Island. They report that they have found a new vessel, and on September 8th, 2010, they will be going again to activate Kanton.

T6, AFGHANISTAN. Mirek, SP8UFB, is active as T6MB from the "Bagram Air Base" for the next six more months. Activity has been mainly on 20 meters using RTTY and PSK, but also look for activity on CW and SSB. Taking into account the local restrictions, it can not be active on 80 and 30m. QSL via SP8UFB. He will answer QSLs upon his return.

T6, AFGHANISTAN. Terence, K5TLL, will be on a "tactical DXpedition" here between October 2010 and May 2011. His callsign will be T6TL. He will be using an old Icom 706 and a dipole antenna. Activity will be on 40-10 meters using SSB and the Digital modes. Frequencies will be listed on QRZ.com when the time comes. QSL via his home callsign. ADDED NOTE: Terence's friend, John, KD5NOI, will also be on a "tactical DXpedition", but from Kandahar Airfield. Activity will also start in October using the callign T6JC. QSL via his home callsign.

V6, MICRONESIA. Four members of Yamakto ARC (JA1ZEK) will be active from Yap Island (OC-012) between June 22-29th. This is their 19th DXpedition since 1993. In April of 2008, they had visited Yap Island, but their QTH was very poor for DX operation. This time they found a good hotel. Operators mentioned are: Sasi/JA1KJW, Hase/JK1EBA, Karl/JA3MCA, Kund/JA8VE and Mat/JA1JQY. Their callsign and QSL information are V63JQ (via JA1KJW), V63AKA (via JK1EBA), V63MCA (via JA3MCA), V63VE (via JF1OCQ) and V63JY via JA1JQY). The team will brings five transmitters and one 500W amp,

and plans to operate 160-6 meters using CW, SSB and RTTY. They will be on the air 24 hours, operating at least two bands and a 6m beacon, but with a maximum five bands operating. Operators mail addresses provided are:
JA1KJW - Satoshi Nakayama, 1-17-8 Sibuya, Yamato, 242-0023 JAPAN
JK1EBA - Akira Hasegawa, 3702-3 Fukuda, Yamato, 242-0024 JAPAN
JA3MCA - Kaoru Tachibana, 385-21 Ohba-cho, Yokohama, 225-0023 JAPAN
JF1OCQ - Hiroyuki Miyake, 1-3-6 Asakura, Maebashi, 371-0811 JAPAN

XT2, BURKINA FASO. Members of the "VHF DX Gang" will be active as XT2EME from an orphanage (La Maison du Coeur) in Ouagadougou between July 15th and August 2nd. Operators mentioned are: Andre/HB9CVC, Peter/HB9HLV and Ludovic/HB9EOU. The founder, Mrs. Josette Boegli, is from Switerland and Peter, HB9HLV, has been involved in the activities of the orphanage for more than ten years. The group's goal is to make 20,000 QSOs on CW, SSB and PSK. QSL via HB9HLV. The group will be announcing a XT2EME Web page for details about their activities in XT2-land, as well as sponsors and donations for the orphanage (via a PayPal account) very soon. The "VHF DX Gang's" Web page is available at: http://www.hb9eme.ch

XV2/XV4, VIETNAM. Mal, VK6LC, will once again be returning to Vietnam between August 12th and September 10th. He is calling this "DX-Vocation". His trip is to do remedial repair work on the antennas in Ho Chi Minh City and to activate his old station XV2LC again. He also states, "As a special from the deep south, I will operate from the majestic tropical Mekong Delta as XV4LC." Activity will take place from two different locations:
1) First QTH will be near the famous floating Mekong River "Cai Rang" floating markets in Can Tho (pronounced as "con kur"). Here he will use a Delta Loop for 40/20/15m and a Quad Loop for 17m. Operating CW and SSB.

2) Mal will then operate from a farm near Soc Trang located on the Mekong River Plains. This operation will be predominately CW with some SSB using all portable equipment and antennas. He states, "Space being not a problem here, I will try for 160m."

QSL both operations via VK6LC. For some pictures, see XV2LC and XV4LC on QRZ.com.

YJ0, VANUATU. Bill Horner, VK4FW, President of the ODXG (Oceania Amateur Radio DX Group Inc.), is looking at the viability of running a 7 day DXpedition to Vanuatu (YJ0). Chris, VK3QB, will be the DXpedition leader and is in the process of finalizing a viability study. The emphasis will be on having fun, working some DX and handing out QSOs for what is still a reasonably sought after entity. Depending on how many people are on this DXpedition, the plan will be to run 2 stations using wire dipoles and verticals. They are aiming to make about 5,000 to 7,000 QSOs over the five days and nights of the operation. At this stage, they are looking at running this DXpedition in the 2nd half of August or first week of September. Final details and stations/bands/modes will not be announced

until they get to the next phase of planning and this won t commence
until Bill has at least 4 people on the list. This expedition will be
limited to 6 people, so if you are interested please contact Chris, VK3QB,
as soon as possible at vk3qb@wia.org.au or phone 0429 187 593.

YP1, ROMANIA (WFF Op!). A group of Romanian hams will again activate
Danube Delta (YOFF-021) between June 23-29th. They will use the callsign
YP1WFF/MM because the expedition will be on a boat on the second biggest
European river delta. After traveling on each of Danube's Arms, they will
also try to activate local lighthouses, so be alert on DXClusters!
QSL via YO3JW. For more info, visit the Romanian WFF Web page at:
http://wff-yo.blogspot.com/2010/06/new-dxpedition-by-yp1wff-in-yoff-021.html

440. ft857 car mount

Newsgroup: rec.radio.amateur.misc
Date: 2010-06-14 05:09:06 UTC
From: Gary Smith <vkthree@gmail.com>
Message-ID: <4c15b973$0$14150$c3e8da3@news.astraweb.com>
Source record: 5809

Hi, just wondering if anyone knows of a DIN size mounting plate or similar
for mounting an FT-857 head in a VT Commodore.

Thanks

Gary
VK3LCD

441. Re: Webinar on How to Use the New ARRL Web Site

It was on the old site for the last 2 years, and worked perfectly.

The arrl.org web site is intended for all people, hams and non-hams
alike, and not just for a specialized subset of people who can get
training. It is bad design if the general public cannot find what
they need without taking a class. Heck, I have problems finding stuff
on the site, and I'm an experienced ham and I have my own web site.

Dick AC7EL

442. [DXNL] DXNL 1680 (Jun 16, 2010)

Newsgroup: rec.radio.amateur.misc
Date: 2010-06-14 18:59:50 UTC

DXNL 1680 - Jun 16, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

BV - TAIWAN, AS-020
Yoshihiro,BW2/JK2VOC, announced to be active from Jun 18-20.
He asks for QSLs direct via his homecall.

DU - PHILIPPINES
Gerard,F2JD, is on the road to Manila (OC-042) again from where he
will sign DU1/G0SHN in all modes on all bands for the next six months.
He also plans to activate other IOTA islands during his stay.
QSL via F6AJA, bureau ok.
An online log is available at: http://lesnouvellesdx.fr/voirlogs.php

HB0 - LIECHTENSTEIN
Marc,OZ1MDX, plans to show up as HB0/OU4U working in CW, SSB, RTTY and
maybe also PSK31 on HF from Jun 22-27.
Direct QSLs should be sent to Tim, M0URX. For bureau QSLs Tim asks for
an online request at: http://www.m0urx.com/qsl-request-form.html

J2 - DJIBOUTI
Vincent,F5MJV (ex-FM5JV,-FO5RN,-FO0/F8UFT...), is working in Djibouti
for the next time. The length of his stay is not known but it should
last at least until 2011 or 2012. His callsign is J28JV.
In the beginning he will work from the military area on fridays and
saturdays. He may be QRV also in the evenings of other weekdays as soon
as he has put up antennas in his residential area. Vincent is working
mainly in CW and digital modes (only some SSB) on all bands, including
the WARC bands.
QSL cards should be sent via bureau or direct to his QSL manager F5NQL.
Vincent also plans to activate the IOTA Gulf of Tadjoura Group (AF-053,
WLOTA 1596) during his stay. Unfortunately he received no permission
to set foot on the Saaoubia islands (AF-059).

JT - MONGOLIA
Sank,JT1AS, received the special callsign JT70AS to celebrate his

70th birthday. He is using this call in RTTY and PSK on HF until the end of the year.
QSL cards direct via Sank N., PO Box 719, Ulaanbaatar-23, Mongolia.

KH2 - GUAM, OC-026
Dave,N2NL, is working on Guam (OC-026) for three years starting on Jun 17. His callsign will be KH2/N2NL only in CW. During contests he will use the call NH2T like in the RSGB IOTA Contest (Jul 24/25).
QSLs via LoTW or via his QSL manager W2YC (direct/bureau).

KH0 - NORTHERN MARIANA ISLANDS, OC-086
Tony,JA6CNL, will stay on Saipan (OC-086) from Jun 18-22. He will sign KH0N in CW mainly on 80m/30m/17m/12m. He also plans to participate in the All Asian DX CW Contest (Jun 19/20). QSLs via his homecall.

R1MV - MALYJ VYSOTSKIJ ISLAND, EU-117
On May 27, 2010, an agreement on the lease of the Russian part of the Saimaa Canal zone to Finland was signed in Lappeenranta/Finland by the Prime Ministers of the Republic of Finland and the Russian Federation. The new 50 year agreement supersedes the initial lease of 1963 which is due to expire in 2013. The new lease no longer includes Malyj Vysotskij Island, the present R1MV DXCC entity. The coming into effect of the agreement is subject to ratification by the parliament of Finland and the Russian duma later this year.

T31 - CENTRAL KIRIBATI / ZK3 - TOKELAU
As everybody knows T31UR, T31X and ZK3X had to be cancelled due to a transportation problem. The team announced that they have found a new boat bringing them from Apia to Canton Island. The new date for the DXpedition is now Sep 8. For more information check their website:
http://www.uz1hz.com/pacificodyssey.html

V6 - FEDERATED STATES OF MICRONESIA, OC-012
Sasi,JA1KJW, Hase,JK1EBA, Karl,JA3MCA, Kund,JA8VE, and Mat,JA1JQY, are going to activate Yap Island (OC-012) from Jun 22-29. This is their 19th DXpedition to this island since 1993. This time they have found a new hotel which should produce better signals on the air. Activities will take place in SSB, CW and RTTY on 6m-160m with five radios and a 500 watts power amplifier.
Their calls and QSL routes are V63JQ (via JA1KJW), V63AKA (JK1EBA), V63MCA (JA3MCA), V63VE (JF1OCQ) and V63JY (JA1JQY).

YA - AFGHANISTAN
Mirek,SP8UFB, received his licence for T6MB recently. He will be active in CW, SSB, PSK and RTTY from the Bagram Air Base for six months. Maybe he will not be able to work on 80m and 30m. QSLs should be sent via his homecall and will be confirmed after he has returned home safely.

ZS8 - MARION AND PRINCE EDWARD ISLAND, AF-021
Pierre,ZS8M, was very active especially on 20m and 17m during the last week. Listen for him on 14240, 14245, 18132 and 18140 kHz from 0630-0930 UTC and 1230-1530 UTC. Meanwhile his postbox has changed.

The new QSL route is now (immediately active):
Pierre D. Tromp, PO Box 1151, Worcester, 6850, South Africa.
If someone has already sent his QSLs to PO Box 1481 it is not necessary
to send them again because the mail is forwarded automatically.

9H - MALTA, EU-023
Markus,OH1MN, is spending his holidays with his family on the island of
Malta (EU-023, MIA MM-001, WLOTA LH-1113) between Jun 19 and Jul 3. He
will show up as 9H3MK on 80m-6m as much as possible. Markus is working
in SSB and digital modes and requests QSLs via his homecall OH1MN.

BELGIUM, SPECIAL EVENT STATION
Some members of the "Radio Club de Binche" are going to activate the
callsign ON44WAR from La Gleize on Jun 19/20. Every second half and
full hour they will work in CW on 7025 or 3560 kHz, every other half
and full hours they will be QRV in SSB on 40m and 20m. QSL via ON7RY.

ITALY, SPECIAL EVENT STATION
The airport in Malpensa started its operation 100 years ago. The
special call II2MAL will be QRV for this reason until the end of June.
This station has the WAP reference number WAP-194. QSLs via IW2MNO.

DXCC: Bill Moore,NC1L, writes that the QSLs of the recent DXpedition to
Palestine (E4X) are accepted for DXCC credit now.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jun 19/20: All Asian DX Contest, CW

The second worldwide D-Star-Contest takes place from Jun 19-27.
Every submitted log may win a prize. All rules are available online at:
http://www.icom.co.jp/d-starsite/contestworld/rule.html

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-118, GM/MM, Flannan Islands: EA1DR, EC2ADN, EA3NT, MM0NDX and SM0MDG are
planning an activity as MS0INT from Eilean Mor Island from Jun 18-21.
QSL via M0URX (direct/bureau).

NA-160, HR, Cortes/Atlantida/Colon Department Group: HQ3C is the callsign of
a DXpedition to the Cayos Cochinos marine national park from Jun 18-20.
HR2MD, HR2AW, HR2PAC, HR2J, HR2H, HR2CSB, and HR2DX will work in SSB
and digital modes on all bands from their QTH Cayo Pequeno.
QSLs direct or via bureau to HR2RCH.

443. June Newsletter to Instructors and Teachers

Newsgroup: rec.radio.amateur.misc
Date: 2010-06-15 15:52:46 UTC
From: ARRL Education Services <memberlist@www.arrl.org>
Message-ID: <20100615152118.176992056D@bmail.arrl.org>
Source record: 5812
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

Greetings!

I'm posting a June newsletter on our website for you to view or download. It's been a while since the last newsletter due to all of the time required to build out the new website. I hope you'll find the information we provide on the new website easier to access, useful and informative. With desktop editing capability we will be able to keep information current. Going forward, newsletters will be used more to point you to information posted there rather than as a primary means of communication. Consider bookmarking pages you find useful as "favorites" in your personal profile so you can visit them easily.

Please click here to view the newsletter:
http://www.arrl.org/announcements-news-briefs-newsletters

If you would like to contact me please use the contact information provided below.

A "reply" to this bulk email address will not reach me.

73,

Debra

==> THE VIEW FROM FLAGLER COUNTY

Many readers have asked about the "ARES® Code of Conduct" that was recently promulgated here by the new leadership in the East Coast District, which includes Flagler County, and Volusia County (Daytona Beach). The Code was discussed in a recent issue, and it is reproduced below. Please note that the set of principles only applies regionally; it is not an ARRL or otherwise nationally-approved document. However, other ARES groups may be interested in incorporating elements of the code in their own local programs.

The East Coast District ARES Code of Conduct

ARES members are the personification of Amateur Radio to the public and to our governmental and quasi-governmental agencies whom we serve. As such, we have elected to publish guidelines under which we expect ARES registered volunteers will operate. Although these are not conditions for participation, we strongly encourage each ARES member to abide by these standards.

• ARES members will conduct themselves with respect and courtesy to those whom we serve. We will be listeners and communicators.

• ARES members will not act as or be perceived as agents or employees of the agencies whom we serve. We are a serving agency and have no authority to act on behalf of the agency.

• ARES members will not use profanity, vulgar language or language or expressions which may be considered derogatory when in public.

• ARES members will not park in restricted areas, unless specifically authorized or invited to do so by the agencies we serve.

• ARES members will not use flashing lights while vehicles are underway, since it is illegal in the State of Florida. Use of flashing yellow lights is permitted only when vehicles are stationary for the purposes of collision avoidance. If in doubt, please inquire with Net

Control and they will request clarification from the EOC.

• ARES members will not solicit contributions or gifts, merchandise or services from any individuals or businesses while using the name of local EOC's or the phrase Emergency Services. All solicitations using the name of Flagler Emergency Services or Volusia Emergency Services (or associated, related names) must be approved in writing by those associated agencies, in advance. No ARES member (including ARES leadership) is authorized to use the name of the agencies without their prior written permission.

• ARES members will not use the logos or identifying marks of the agencies that we serve without prior approval in writing by those agencies.

• Prospective ARES members who are convicted felons will not be accepted into the organization.

• All prospective ARES members must be able to pass their respective County EOC credentialing requirements. These requirements are not negotiable.

Flagler County ARES news and views are now being posted to a new blog site that also features updates on the ever-evolving northeastern Florida D-STAR network. Check it out here: The Journal of the North East Florida D-Star Repeater Network

==> NORTHWESTERN OHIO RESPONSE TO TORNADOES

On Saturday night, June 5 and Sunday, June 6, severe weather and tornadoes ripped across an area of northwestern Ohio, laying down a

large path of destruction. ARES and SKYWARN groups in Erie, Huron, Sandusky and Wood counties activated nets at 10:30 PM Saturday, and many did not stand down until 4:30 AM Sunday morning. Reports of severe weather damage, flooding, and downed power lines filled the nets for the majority of the six-hour period.

In Wood County, ARES Emergency Coordinator (EC) Bob Schumann, W8NYY, reported that the severity of the damage was becoming quickly apparent with the increasing frequency of reports coming in during the period of 11:15 and 11:30 PM, with Tony Everhardt, N8WAC, and Assistant EC Ed Brown, K8ZCS, giving on site reports of severe damage to Lake High School, located in Millbury. Everhardt reported that he was able to see the funnel cloud only when electrical transformers began exploding and lighting up the sky. Brown added that there were broken natural gas lines and downed power lines in the area as well, which required EC Schumann to recall weather spotters from the area for their own safety. Continuous reports came in of telephone poles and power lines down blocking roads, and live electrical wires presenting an immediate danger.

During the early morning hours, EC Schumann was advised by Wood County Sheriff Mark Wasyslyshyn that a temporary command center was being set up across from the Lake Township Police Department building, which had been heavily damaged by the tornado. A decision was made to deploy the Wood County ARES trailer there. A supply of police band radios were kept in the trailer along with a generator and other Amateur Radio equipment if needed. Subsequently, Sheriff Wasyslyshyn reported that communications had been restored to Lake Township. Many Wood County ARES members remained on standby. EC Schumann was proud of the work that was performed by the radio amateurs of Wood County: "It's my hope that their dedication was responsible for the reports that ultimately sounded the sirens, which saved lives."

District Emergency Coordinator (DEC) George Henzler, WB8HHZ, maintained contact with Ohio Section Emergency Coordinator (SEC) Jack Sovik, KB8WPZ, during the time of the incident, as is outlined in the Ohio Section Emergency Response Plan <http://www.trac-online.org/Docs/oserp.pdf>. Sovik said "The professionalism of the ARES members, working in conjunction with the National Weather Service and their SKYWARN program, as per the written Memorandum of Understanding <http://www.arrl.org/files/file/Public%20Service/National%20Weather%20Service%20MOU.pdf>, saved lives and kept the NWS and the public appraised of the situation that was developing in the immediate affected areas."

==> ILLINOIS TORNADO EMERGENCY RESPONSE

More than 20 ARES members from LaSalle, Bureau and Grundy counties were active before, during and after the June 6 touchdown of an F2 <http://www.tornadoproject.com/fscale/fscale.htm> tornado in Streator, Illinois. At 10:00 AM, LaSalle County SKYWARN Coordinator Laurie Bradach, W9CAV, updated the spotter group with the hazardous weather

outlook and told operators to expect activation later in the day.

At 7:35 PM, the National Weather Service posted a tornado watch for LaSalle County; Jim Morris, N9PLM, of Streator, started a weather net on the 147.12 MHz Starved Rock Radio Club Repeater. At 8:15 PM, Keith Risley, KB9VFX, reported from his spotting location that there was a lowering of a rotating wall cloud. Risley reported that the winds suddenly increased in speed with enough force to rock his truck. The storm finally produced a noticeable funnel, which was heading towards Streator. This information was passed to Morris and on to the NWS liaison in Grundy County. Risley arrived in Streator and assisted at the 911 dispatch center until 3 AM. Although there was no damage at Morris's home, he went portable so he could assist neighbors affected by the storm.

LaSalle County RACES/ARES EC Joe Tokarz, KB9EZZ, situated at the county EOC, assumed net control duty. The EOC is in the process of moving to a new building and the amateur gear is maintained separately from the EOC conference area. Bradach, at the EOC conference area, established a radio link with Tokarz so traffic could flow between the EOC conference area and the amateurs in Streator.

Several ARES members, who were also Community Emergency Response Team <http://www.citizencorps.gov/cert/> (CERT) trained, assembled three miles north of the damaged area. From there, they relayed traffic to the EOC.

The volunteers were released at 1:30 AM Sunday, allowing just enough time for tired operators to get a few winks in before staffing the gate at the Starved Rock Hamfest at 6 AM!

Lessons Learned

-- Get Dad a weather radio for Fathers Day!

-- Have at least two safe, pre-planned spotting locations; no cul-de-sacs nor dead ends--locations MUST have at least two escape routes.

-- The closer the operator can stay near work or home, the better for the operator and his/her family. A good spotting location is where the spotter can go on to his/her porch and report "It's coming," "it's here," "it's gone," and be close enough to take care of family members.

-- Don't let your antenna become the tallest object around--even if you have a great insurance policy.

-- During the middle of the disaster is the wrong time to take a class in weather spotting, damage assessment, CERT, ARRL EC-01, and FEMA IS courses. Take classes as they are offered by the local Red Cross and Emergency Management during "peacetime."

-- Modify your mobile rig so you can take it, a battery and a power supply with you. Someone's rig will fry and you can get them back to

work with your "portable" mobile rig.

-- Have the public service frequencies for your operating area/counties in your rig's memories. Initially, communications will be spotty at best and these frequencies may allow you to relay time-critical information to the decision makers. -- Joe Tokarz, KB9EZZ, LaSalle County (Illinois) RACES/ARES EC

==> TORNADO IN MICHIGAN BRINGS COMMUNICATIONS RESPONSE

At approximately 2:13 AM on Sunday June 6, an F2 tornado formed about five miles west of Dundee, Michigan, and then traveled through the north part of the village (pop. 4000) and moved eastward over a total distance of ten miles. Fifteen homes were destroyed, one trapping a resident inside for several hours before rescue crews could reach her. More than 160 homes sustained extensive damage and 1717 received damage. A hotel was also damaged. There were no major injuries, and no serious communications outages beyond the loss of local residential and business telephone lines which were knocked down by the storm.

Local members of the Monroe County Amateur Radio Public Service Corps assisted with shelter communications and served Red Cross and Salvation Army members as well as the regional Community Emergency Response Team <http://www.citizencorps.gov/cert/> (CERT). Many of the local CERT members are also radio amateurs.

Two hundred hotel patrons were housed in the shelter set up at the Dundee Middle School, while several fire departments provided lighting and services. Sheltering began immediately after the storm subsided, and amateurs with hand-helds were on duty. The local UHF repeater K8RPT-R ran on battery power in excess of 24 hours until a portable generator returned power to the tower site on Monday. As soon as the damaged hotel was deemed secure by the owners, patrons were bussed to the scene to pick up their belongings and make travel arrangements. Many had severely damaged or overturned vehicles as a result of the tornado's action and were assisted by Red Cross officials.

Damage reports covered approximately 1300 homes and businesses. More than 200 utility poles were snapped off and required replacement. Local residents began cleanup and volunteers from a 50 mile radius offered their services to assist. - Michigan Section Manager Dale Williams, WA8EFK [Williams' home was 1000 feet from the path of the tornado - ed.]

==> ARES DIGEST

Mississippi SAR Conducted; Subject Deceased

Over the Memorial Day weekend, the DeSoto County EMA RACES/ Reserve Group had planned to assist county Search and Rescue (SAR) with communications for lake patrol activities, but ARES DEC/EC Kenneth Johnson, KB0ZTX, reported that on Saturday morning, plans changed. The Search and Rescue Group was called out to assist the Tunica County

Sheriff's Office with locating a missing person at Tunica Lake <http://maps.google.com/maps?hl=en&tab=wl>. The Group started their support at the Command Post at 9 AM Saturday morning and wrapped up before dark. They then deployed again on Sunday AM with the team; however, the search was concluded when the deceased person was located. The Group provided communications for the Command Post and documentation of the activities during the search. The operators completed the weekend's support by returning to the original lake patrol activities. The following RACES members supported the callout: KE5NBD, N5UOV, KE5NBC, W9IK, and KB0ZTX.

Operation Gale Wind Leads to ARC/ARES Negotiation

Lauderdale/Clark counties (Mississippi) EC Richard Morefield, AE5FE, reports that the Lauderdale Emergency Management Agency (LEMA) conducted their annual Simulated Emergency Test (SET) called Operation Gale Wind. This event simulated extreme weather conditions as a result of a hurricane that made landfall and consequent tornadoes in the Lauderdale County area.

During the exercise, two warnings were issued for tornadoes that resulted in structural damage and injuries at Clarkedale School, Meridian High School, Northeast High School, and Naval Air Station (NAS) Meridian. Additionally, simulated injuries were reported from Lockheed at the Industrial Complex. ARES communication in conjunction with local EMA communications were used to give local hospitals advance notice of casualties inbound to their facilities. Confirmations of arrivals at Rush Hospital were relayed to the Lauderdale EMA EOC.

As a result of this exercise the Red Cross Key Chapter expressed an interest in partnering with ARES; an agreement is currently being negotiated in accordance with the MOU between ARRL and ARC National Headquarters. The City of Meridian, the Lauderdale County Sheriff's Office, and Anderson Hospital also expressed an interest in ARES capabilities and the speed and ease with which information was transferred reliably.

==> 2010 MS150 CITRUS TOUR ARES-SUPPORTED

The Central Florida Chapter of the Multiple Sclerosis (MS) Society hosted the Citrus Tour MS150 on Saturday, May 15 and Sunday, May 16, supported by many ham volunteers. The Citrus Tour MS150 tested their ability to show up, set up, and go.

The main concern for everyone involved was a forecast of heat for the ride to the Caribe Royal Resort in Orlando. The Citrus Tour 2010 this year started off with bike riders departing from the lovely Bok Tower Gardens in Lake Wales, Florida, and traveling one of three routes: a 50 mile leg, a 75 mile leg, or a Century Loop, the 100 mile leg.

Coordinating activity was veteran net control operator "TJ" Avalon, NQ1T, of Mulberry. Avalon operated from the Polk County Emergency Management's Mobile Command Vehicle, situated at the Start/Finish line

at Bok Tower Gardens. This was the busiest place to be during the weekend event. Paramedics were on hand to help with down riders, and were dispatched from the Command Post. For a look at course maps, click here <http://bikeflc.nationalmssociety.org/site/PageServer?pagename=Bike_FLC_Maps>.

The coordinator for communications for this year's event was Laura Pennington, NO4OO, Polk ARES EC, from Lakeland. In addition to communications, Pennington also served on the MS150 Committee, bringing lessons learned from last year's event to the table. Her experience made this year's event run even smoother.

A total of 40 licensed Amateur Radio operators took part in this year's event. From the Command Post to tail end Charlie, there was an amateur

stationed every stretch of the way. Hams were deployed in the Supply vehicles.

Two cyclists were also hams. Second time cyclist Jason Triolo, KD4ACG, also known as BIKE 1, and returning biker, Dana Rodakis, K4LK, was BIKE 2, endured the event on the 75 mile course. Rodakis was equipped with a D-STAR ICOM 91-AD for D-PRS reporting.

SAG (Special Assistance Group) members consisted of Orange, Osceola, Polk County ARES members, and members of the Orange and Hillsborough County CERT Teams. Also present were members of the Tampa Bay and Orange County REACT Teams.

The Command Post monitored the movements of several key SAG and Supply units, and SHADOW 1 (Ride Director, and Pennington) via APRS from Analog and Internet feeds. Live Weather Radar from the National Weather Service sites at Ruskin (Tampa) and Melbourne were also monitored from the Command Post, as was Television from WFTS Channel 9 out of Orlando, inside the Command Post. -- Evans Mitchell, KD4EFM, Assistant EC, Polk County (Florida) ARES

==> LETTERS

In re your "Final" in the last issue, here are a few additional suggestions for disaster preparedness. Add a couple of books to while away the time spent in an evacuation shelter. They may help your mental security and stability.

I'm glad to see you are thinking about your animals in your planning. However, many people don't think to add a well built, airline approved travel crate for their pet(s). Think about it: If those cardboard carriers many pet owners use to transport pets to the Vet's on a good day can fail, why trust your pet's safety to one under the worst of worst case scenarios? And forget about those EZ snap together crates -- if they can go together that easily, when dropped or bumped they can come apart that easily. NEVER trust the pop-rivet attached handle for anything but short trips by hand.

I also suggest (especially for cats) to put their walking harness on early and leave it on. Animals can smell the anxiety chemicals in your sweat and often react accordingly. You might not get another chance. I also strongly suggest a strong 20 foot leash/line be added to your kit and kept or attached to the crate. Your pet will need to exercise and relieve itself, and even the best trained pets can and will take off for any reason. Always keeping your pet on a lead during a disaster will also allow you to yank your pet out of a fight or other dangerous situation like a displaced gator or snake.

Go to your local mountain climbing supply store to purchase enough heavy duty webbing and a couple of carabiners to fashion a secure hoist sling for helo-evac. If the climbing shop doesn't do custom work, you can take the webbing to any shoe shop to get it sewn together. [Readers should get professional advice and work for a harness for helicopter evacuation - ed.]

As for heading to the hospital for the duration, or any evacuation center for that matter, I would also take a light pop-up tent, sleeping bag and blow up mattress. A little personal space and place to sleep will be a premium. It will be hard enough to sleep with all the sights, sounds, and smells a hospital in disaster mode creates. A tent, no matter how small or simple, pitched in a corner somewhere (along with some ear plugs) will provide that much needed separation you might not be able to get otherwise. It's also a commodity you might be able to share with someone in need of comforting. -- Jeff Sabatini, KI6BCX, San Bernardino County (California) Fire Department Emergency Communications Service

==> SMALL ISLAND, MANY HATS: ST. JOHN ARES AIDS GROUPS FACING ANTENNA TOWER SHUTDOWN

Talk about an "Oh, no!" moment. Hams on St. John in the US Virgin Islands recently learned that a radio tower - home to repeaters serving a volunteer emergency rescue group and the Virgin Islands National Park Service - was being shut down. Tower eviction notices arrived. St. John Rescue and the Virgin Islands National Park Service were up against a

60-day deadline to get the repeaters off the old site.

Hundreds of times each year, residents and visitors on St. John are aided by St. John Rescue volunteers: Members assist police, fire and emergency medical services on calls ranging from traffic accidents to medical emergencies. Visitors and residents depend on the National Park Service for assistance within park land, and park employees routinely partner with Rescue. Reliable communications are critical.

With the help and cooperation of Virgin Islands National Park Superintendent Mark Hardgrove, a new physical location for a tower was found on Lizard Hill, on park land. But relocation challenges lay ahead. The Lizard Hill site was already home to a 20-foot Rohn 25G tower with VHF antenna and feed, but current needs called for something more substantial. The project would require advanced technical expertise. Up stepped George Cline, KP2G, of ARES and Communications Officer for St. John Rescue - a volunteer who has been instrumental in much of the island's emergency communications infrastructure. Hardgrove asked Cline to serve as volunteer operations director for the project, which would include installing additional sections of tower to bring it up to 68 feet, and relocating the repeaters.

As members of both ARES and St. John Rescue, Cline, ARES President Paul Jordan, NP2JF, and Rescue Chief Gilly Grimes, NP2OW, knew the importance of a seamless move as did Park Ranger and Rescue member Dave Horner. With willing volunteers from ARES, Rescue and the National Park, the group prepared for the sizable task.

Luckily, Rescue had some spare parts on hand related to the earlier installation and operation of three VHF repeaters. Materials included about $800 worth of cable, $200 in cable end fittings, lots of cable ties, ground rods, clamps, lightning arrestors and more - all necessary to get two antennas on the tower and working. (The parts are kept on hand by Rescue for emergency repairs; repurchasing these items will be necessary so they are readily available.)

Tower supports were needed. Cline donated all of the made-up galvanized steel cables, the tower guying hardware, the hardware for the ground end of the guys, insulators, turnbuckles, and other items. By providing his technical support and labor at no cost, along with needed supplies, Cline saved Rescue and the Virgin Islands National Park Services quite a bit of money, as did the many other volunteers who helped make the move a success.

Gilly Grimes stepped up to do the tower climbing - not an easy job in the first place. Gusty winds slowed the work a bit, but the project moved forward.

The long-time Mamey Peak repeater site had provided radio coverage for the north, northeast and northwest sections of St. John, including the much-used North Shore beaches. To avoid as little gap in service as possible, it was critical to get the tower up and stabilized with steel

guy wires so that antennas could be mounted before repeaters were put in place. Time from shutdown, moving, installation and bringing the repeaters up on frequency at the new location was less than two hours; the plan and related execution were successful.

Future work is planned. Cline says, "Duplicate antenna and coaxial cable installations will have to soon be made to provide ready and in-place backup antennas."

With donated time and materials, the money output to build the new tower and move the repeaters was small; continuing radio service for the park and Rescue, in support of public safety - priceless. -- Phyllis Benton, NP2MZ, ARRL Virgin Islands Section Public Information Coordinator

==> K1CE FOR A FINAL

As we have seen in recent times, the government, at any level, cannot fully protect its citizens from manmade or natural disaster. That is not to be taken as criticism of the government, it is rather just a fact of life. As such, it is largely up to us as ordinary citizens and radio amateurs to be personally prepared to protect ourselves, our families, and our neighborhoods against calamity. I think as radio amateurs, we are generally more prepared than the average citizen, and indeed, certainly have more opportunity for better communications with the outside world.

I hate to, but have to, harp on this: Be prepared. Here is a good site <http://www.mysafeflorida.org/prepared.html> I found that speaks to the basic needs of Floridians, but is universally applicable. Get prepared NOW, before the next incident occurs.

Sick of hearing about how important it is to be prepared? Think of how sick you'll be when you see the water rising over your doorstep into your home and up the walls, with no food, potable water, supplies, or plan. Last year, I saw the water up to my front door, and wrestled sand bags in place during Tropical Storm Fay. Yes, Fay was only a Tropical Storm. I've taken preparedness very seriously this year. You should, too.

The program for tonight's Flagler County ARES meeting is the Go-Kit, another essential element of preparedness for all of us as radio amateurs and emergency communicators.

See you next month! 73, Rick, K1CE, Flagler County, Florida

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

** MMMonVHF MS Sprint Contest 2010 (World Wide MS Contest!) **

The VHF-DX-Portal MMMonVHF in cooperation with the magazines DUBUS
and Funk-Telegramm (by Joachim, DL8HCZ) invited you to take part
in our 144 MHz Meteorscatter Sprint Contest, which took place for
the first time in the 2008 Perseid shower. The 144 MHz Meteor-
scatter Sprint Contest will take place each year on the day of the
from IMO (International Meteor Organization) announced maximum of
the Perseid shower:

2010 contest period: Date: 12./13. August 2010
Time period: 12.00hrs till 13.August 2010 12.00hrs UT

PLEASE take all rules and info of the the MMMonVHF and
DUBUS 144 MHz Meteorscatter-Sprint Contest 2010 here:
http://www.mmmonvhf.de/ctest.php
Results 2009: http://www.mmmonvhf.de/ctest2009.php
Results 2008: http://www.mmmonvhf.de/ctest2008.php

** SDR-based monitoring system for Sporadic E **

In early June 2010 basic ideas for a SDR-based real-time moni-
toring system for Sporadic E were presented by Matej, OK1TEH.
Development of such system could have many advantages:
- Better quality of real-time maps with locations and maximum
usable frequencies of Es clouds;
- Better quality of observed data as the data available via
DX-clusters depends on the accuracy of the spotter;
- Data is independent from the amount of reported traffic.
With such system more rural areas of the earth could be covered
as well;
- Relationship between Es and thunderstorms is plausible at the

moment. A SDR-based system could lead to final prove of the
suggested relationship with thunderstorms and the recently
discovered sprites;
- A dense network of monitoring stations would not only be
capable of providing data about Sporadic E but also about
propagation in the troposphere or even be capable to give data
about the trail of a meteor through the earth's atmosphere.
Please send your reactions to our MMMonVHF-Forum. In this way it
can be a piece of discussion to everybody - ALL DETAILS:
http://www.mmmonvhf.de/minibb/index.php?action=vtopic&forum=11
SOURCE: Frank, PA4EME, on behalf of the MMMonVHF Team

** LX / JN29 **

A group of MS and EME operators are planing some weekend active
from Luxembourg on 144 MHz EME and MS with good equipment. Pse
be so kind and send in some information about your interest.
You can pass via MMMonVHF: http://www.mmmonvhf.de/kontact.php
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** JM67 **

Investigating about interest for JM67 - if good response I will
be active from there during "MS Sprint contest" 12/13 august.
Please answer to: ggiunta"at"tin.it SOURCE: Gius, IT9VDQ KST-Chat

** Kids Day on June 19 **

The next Kids Day takes place on June 19. During this event
organized by the American Boring Amateur Radio Club kids are
working on the bands under supervision of another HAM.
Preferred frequencies are 3.685, 7.085, 14.270-14.300, 21.380
to 21.400, 28.350-28.400 MHz and local 2m repeaters.
SOURCE: DXNL 1679 (Jun 9, 2010)

** Solar Flares and Radio Bursts **

A new sunspot has popped up and it is crackling with solar flares.
Today, AR1081 has unleashed a series of M- and C-class eruptions
plus at least one strong shortwave radio burst detected by
amateur radio astronomers on the Pacific side of Earth. High
resolution movies of the flares and an audio recording of the
solar radio burst may be found at http://spaceweather.com

** The OH8K Team was on Tour in LA/SM again **

Please find the details about the 10 days trip still at :
http://www.mmmonvhf.de/latest.php?comment=1&id=3149
464 QSO done from SM / LA from 10 different Locator-Squares

Here three coment at their expedition:

Big spirit by HB9DFG, Chris - 2010-06-12 14:16
Hello all - It's amazing what this group is doing for us to get
some new or rare fields! That's HAM-spirit of the finest style,
isn't it!? Just a small thank you for all they are doing for us
at home! Best regards, Chris, HB9DFG

Like old times... by PA3CEE, Eltje - 2010-06-08 16:52
How nice that the team is on the road again. During the last 12
years I worked them in 52 different squares. I enjoy every second!
Paljon kiitoksia!

DANKE - THANK YOU by DL8EBW, Guido "Guy" - 2010-06-16 08:44
Its always our pleasure at MMMonVHF to spread out your details!
We get always first hand News and be always in time informed!
THANK YOU VERY MUCH! Guy DL8EBW, Team of MMMonVHF

** VHF WW Contest 2010 - 50MHz - HS on Air! **

Thai hams authorised to use 6-metres during CQWW VHF contest 2010
Thai radio amateurs have been granted temporary permission to use the 6-metre (50-54MHz) amateur band for the first time in almost two decades by the Thai regulator, the National Telecommunications Commission (NTC). This will allow Thai amateur radio operators to operate during the CQ Worldwide VHF contest for 48 hours on July 17-18, 2010. The last time such permission had been granted was in 1992 during the Southeast Asia Net convention staged in Chiang Mai that year. The only other sanctioned six-metre operation in Thailand had been by the late founder of RAST, Gen Kamchai Chotikul, HS1WR (SK), in the late 1970s and early 1980s, according to Champ, E21EIC. RAST had applied for permission to operate on six-metres during the CQWW VHF Contest this year following a suggestion by RAST Committee member John/Narissara, HS1CHB, during a committee meeting in May, 2010 and a formal written request had been subsequently conveyed to the NTC secretariat. Permission was granted in mid-June and has been conveyed to members by email, on this website and the RAST Forum will be updated with this news.

** KL7/KB7Q qrv EME qrv BP40da **

KL7/KB7Q Gene will take the 6 meter gear and try some EME from BP40da during his stay at ALASKA, May 15th to August 15th
LATEST NEWS from Gene, KB7Q, dated 2010-06-15: I've been working single Yagi stations on my moonset out over all that salt water. I don't have skeds the next two nights. Any interest?
June 15 - 0730 utc / June 16 - 0730 utc
I can try my moonrise too of course, but my Azimuth has to be > 90 degrees and I have slight hills, but it is out over a salt marsh. I do have elevation for "big gun" stations too.
SOURCE: tnx to Gene, KB7Q, direct to MMMonVHF

** 3D2LR - 2010 6m EME DXpedition by W7GJ to Fiji 3D2 **

LATEST NEWS from Lance, W7GJ, dated 2010-06-15:
I just got off the phone with the Communications Department in Fiji. They have assigned me the callsign of 3D2LR...
SOURCE: tnx to Lance, W7GJ direct to MMMonVHF,

** T70A / T77C (JN63FW) qrv **

We will be qrv during IARU test on 50 MHz with callsign T77C.
We'll be qrv for the first time on 70 MHz from T7 with the club callsign T70A. Rig will be 6 el DK7ZB, OZ2M X-Verter and 25 W.
CU 4&6m - SOURCE: tnx to Anto, IK4PMB, direct to MMMonVHF

** VA7EWK via satellite - 3-11 July 2010 **

Patrick, WD9EWK will be signing VA7EWK from Vancouver Island (NA-036, CIsA BC001, WLOTA LH-0858 GRIDS: CN78 CN79 CN88 CN89 CO60 CO70) on 3-11 July 2010. QRV on the satellites from various locations in several grids. Satellites: AO-51, SO-50, AO-27, HO-68

AO-7, FO-29, VO-52, possibly SO-67 if it is back in service. QSL via WD9EWK, direct or bureau. Website: july2010.wd9ewk.net/
SOURCE: [rsbgiota.org] via ICPO Bulletin (03-11 June 2010)

** IOTA AS-043 **

Ichy, JH7IPR, will be active as JH7IPR/1 from Hachijo-Island beginning on June 26th. Watch 7021 kHz at 1100z on that date. His length of stay is not known. This is a fairly rare JCG. Activity will be on HF and 6 meters.
SOURCE: Ohio/Penn DX Bulletin #962

** IOTA NA-110 **

Operators Dragan/K0AP and Vlado/N3CZ will be active from Fripp Island, South Carolina, as homecall/4 between July 3 to 10th. Activity will be holiday style on 80-6 meters using mainly CW and SSB, with a possibility of RTTY and PSK. QSL via their home calls, by the Bureau or direct.
SOURCE: Ohio/Penn DX Bulletin #962

** JW, SVALBARD HF and 6m activity **

Toshi, JA8BMK, will be active as JW/JA8BMK from Svalbard Island (EU-026) between July 1-11th. Activity will be on 20-6 meters using CW, SSB and RTTY. QSL via his home callsign, direct or by the Bureau. ADDED NOTE: Toshi will be attending the Friedrichs-hafen Hamfest before going to JW-land between June 25-27th.
SOURCE: Ohio/Penn DX Bulletin #962

** Yap Island (OC-012 - WWL: PI77) qrv 22 and June 29 **

Four members of JA1ZEK, Yamakto ARC, will be operate from Yap Island(OC-012) between June 22 and June 29. This is their 19th DXpedition since 1993. At 2008 April, they had visited Yap Island but their QTH was very poor for DX operation. This time they could find a good hotel. Operators are Sasi JA1KJW, Hase, JK1EBA, Karl JA3MCA, Kund JA8VE and Mat JA1JQY. Their callsign and QSL information are V63JQ(via JA1KJW), V63AKA(via JK1EBA), V63MCA(via JA3MCA), V63VE(via JF1OCQ) and V63JY(via JA1JQY). They brings five TRX and one 500W amplifier, and will operate 6m to 160m, SSB,CW,RTTY. They will keep 24 hours operation at least two bands with 6m beacon, but maximum five bands operation.
JA1KJW Satoshi Nakayama, 1-17-8 Sibuya, Yamato, 242-0023 JAPAN
JK1EBA Akira Hasegawa, 3702-3 Fukuda, Yamato, 242-0024 JAPAN
JA3MCA Kaoru Tachibana, 385-21 Ohba-cho, Yokohama, 225-0023 JAPAN
JF1OCQ Hiroyuki Miyake, 1-3-6 Asakura, Maebashi, 371-0811 JAPAN
JA1JQY Shigeo Matsui, 2-31-10, Shimoseya, Seya, Yokohama 246-0035
SOURCE: From Toshi, JA1ELY via Maurice, F5NQL

** UPDATE St.Martin activity **

Jimmy, W6JKV will be active from the island of St. Martin
(NA-105, DIFO FS-001, WLOTA LH-0383, Grid Loc. FK88) between
24 June and 5 July 2010. Focus will be on 6 metres.
QSL via home call, direct or bureau. SOURCE: N8OFS

** IW1QN JN44GK in 50 MHz Contest **

Hallo to Everybody. During IARU 50Mhz (19/20 June) will be active
from Mount Beigua (SV) 1287m asl like Multioperator station. Info:
Call: IW1QN, Loc: JN44GK, Operator: IW1QN, IK1INW, IW1RIN, Mode:
SSB/CW, Ant1: 5Elem F9FT-QN, Ant2: JPole I hope to listen you.
SOURCE: IW1QN Federico via F5NQL News

** CM79/CM89/CN70/CN80 50 MHz activation plan **

LATEST NEWS from Russ, KB8U, dated 2010-06-14:
I'm ready to head out toward CM79 on Wednesday. I shipped a bunch
of gear UPS and it's supposedly there already (and hopefully not
too damaged). Look for me on 50.145 and 50.099. I'll also hollar
some short CQs on 50.125 from time to time (and I'll try to then
move to 50.145. If the band is packed, look for me above 50.210
Please - read the do's and don't belows. Additionally, if I switch
modes to CW because you're having a hard time copying me on SSB,
finish the QSO on CW on your end, too. I have an old 706 which
receives CW on LSB so cross-mode QSOs require excessive knob-
twiddling. SOURCE: Russ KB8U via Reflector
Read all about the trip: http://www.mmmonvhf.de/latest.php?id=3330

** Skopelos Isl (KM19 / EU 72) qrv HF-50 MHz **

Giannis, SV2FPU and others will be active as J48S from Guruni
lighthouse on Skopelos Island (EU-072) on 19-26 June. They plan
to operate on 160-6 metres CW, SSB, RTTY and PSK (announced
frequencies on qrz.com under J48S) with a large number of antennas
and a focus on Asia and the Americas. QSL via SV2FPU, direct or
bureau. SOURCE: Giannis, SV2FPU via 425 DX News #997

** HF and 6m activity from Guam, KH2, for next 3 years **

Dave, N2NL is returning to Guam on 17 June, and will remain there
for three years. He plans to be active on 160-6 metres as either
KH2/N2NL and NH2T. QSL via W2YC and LoTW.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING JUNE 20 2010

WIA Centenary Update

The Oxley Region Amateur Radio Club decided to make its 35th Annual Field Day weekend on the 12th and 13th June the focus of its efforts to promote amateur radio in its community.

The club made full use of the Media Kit provided by the WIA for affiliated clubs, preparing its own Media release based on the generic release provided in the kit, and following the advice in the kit as to how and when to approach the local media outlets.

Club spokesman Alan Nutt VK2GD was interviewed on the ABC Mid North Coast breakfast program, talking about amateur radio generally and the Club?s Field Day.

In the afternoon Michael Owen was a guest for 20 minutes on Fiona Wyllie?s ABC State Wide program, originating from the ABC studios in Port Macquarie.

A sound bite of an early experimental station acting as a broadcasting station from the WIAs Sounds of Amateur Radio CD provided an interesting introduction to the interview.

On the same day, the Port Macquarie News featured a photograph of Oxley Club President Henry Lundell VK2ZHE and Vice President Jim Neil VK2VIV and an article based on the clubs media release.

In a further radio spot, Henry VK2ZHE and Michael VK3KI was interviewed on the Super radio network across the country.

On Monday a brief but prominent item about the Field Day was included in the NBN TV 6 o?clock news. Prime TV have also arranged with Henry to shoot footage for an item 'Amateur Radio 100'.

The Club will be conducting a training/assessment weekend in the near future, and as a result of the publicity it is expected that the participants will include several people who otherwise would not have made contact with the club.

And the Centenary of Organised Amateur Radio in Australia publicity blitz continues.

First in Canberra during the WIA Centenary Convention, then radio clubs at Wagga, Mt Gambier, and Port Macquarie all score excellent promotion using the WIA Media Kit.

This is being recorded on the WIA website Centenary section under a new page called VK100WIA Club & Media Feedback, as clubs report their successes in getting media coverage & provide newspaper clippings, reports & other material.

Its far too detailed for us to cover it in a single broadcast, but well done to all concerned.

Today however we'll hear part of an interview that occurred on ABC 774 in Melbourne last Tuesday, the first voice is the presenter Red Symonds and he's talking with Gippsland Gate Radio and Electronics Club President Chris Chapman VK3QB.

(Play recording, outcue is Red saying Chris Chapman).

The re-enactment and plaque unveiling occurred last Friday at Koo-Wee-Rup southeast of Melbourne.

Mark Stephenson VK3PI of Western and Northern Suburbs Amateur Radio Club in Victoria says they have a VK100WIA Special event field operation June 21.

Mount Cooper Field Operations (Highest point in metropolitan Melbourne) for Day 3 of WANSARC VK100WIA operations, WANSARC members will operate in the field at Mount Cooper, north of Reservoir and south of Bundoora.

HF, VHF and UHF operations will be conducted, together with D-Star and Digital Amateur Television. This is another excellent opportunity for the public to see and hear amateur radio in action as part of the WIA Centenary celebrations.

HAMS ACROSS AUSTRALIA.

Saturday the 12th saw a group of us head up to Mt Ginini to undertake some maintenance of the equipment following a failure of the 2 metre repeater earlier in the week. (Over worked during the AGM weekend)?

The group comprised of Peter VK1NPW, Glenn 1NUT, Bruce VK2MIB, Matt 1MA, Adam VK1FADD (and girlfriend Kara) and Phil VK1PL (accompanied by daughter Erica).

When we arrived after a reasonable trip up the road encountering thin patches of snow between Bulls Head and the Mt Ginini peak we opened up the hut and made ready to get into it. The tower and antenna's were caked with snow & ice and so we thought that could be a bit dangerous so we sent in Bruce as the sacrificial lamb to bang the tower a couple of times so the bulk of the ice would fall in a controlled manner, it was impressive to see the clumps fall and break-up on the way down.

As the snow was up around the concrete base of the tower, and on reading the instructions on the can of waterproofing paint we decided there was no point in proceeding with the brush back and repainting as the instructions stated you should only do so when the temperature is above 10 degrees, something I don't think will occur until late October at the earliest.

So, we confirmed the issue with the repeaters was once again the repeater controller not working following a "brown-out" and so we shut everything down, got out the tools and started work on the 70cm and then 2 metre Transmitters to change the CTCSS tones over to the 91.5Hz standard. This was done, and everything put back in place.

We too the opportunity whilst there to remove some pieces of metal work still remaining from the old triangular tower with Bruce attacking a number of bolts still sticking out of the ground with his angle grinder.

After that we all had lunch, packed up and headed home.

So, the Mt Ginini site is now transmitting a Sub Tone of 91.5 Hz on both 147.950 & 438.050 MHz, and you need a sub-tone of 91.5 Hz to access the 70cm Repeater (2 metres is still open squelch).

Riverina Field Day 2010 - 25th July

The Albury Wodonga Amateur Radio Club (AWARC - Formerly the Twin Cites Radio & Electronics Club) are hosting their Hamfest on the 25th July, and will be conducted this year at the 1st Lavington Scout Hall in Mutsch Street commencing at 10am.

A.T.R.C. from Sydney selling Yaesu, Icom, Kenwood, and much more. Yaesu is also attending with a new range of products, there are a number of other suppliers distributing connectors, cable and large antenna supports as well as second hand equipment.

There will be hot food available and FREE tea and coffee across the day.

Tables are $10 each and the entry is $5 per person.

GippsTech 2010

It is almost that time again: GippsTech 2010 will be happening on the weekend of 10 and 11 July, at Monash University Gippsland Campus in Churchill, about 170 km east of Melbourne.

GippsTech has a well-recognised reputation as a premier amateur radio technical conference, with its focus primarily on techniques applicable in the VHF, UHF and microwave bands, especially for weak-signal contacts.

A Partner's Tour will be conducted, together with an informal social gathering for dinner on Friday and a Conference Dinner on Saturday.

Details of the presentations offered to date, together with maps, an outline of accommodation options and a downloadable registration form are available from the Eastern Zone Amateur Radio Club website:

vk3bez.org/

If you are planning to attend, PLEASE REGISTER by Friday July 2.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

How great are the forces of nature.

One force that sustains the planet is inertia. This is the force that prevents a body flying off under the attack of a butterfly's wings or stops the mountains from walking across the landscape. Yes inertia is a real force to be reckoned with and maybe we can harness it to keeping our hobby in check.

Just think if people were really enthusiastic, they might stimulate activity.
Just think if people introduced novel ideas, they might walk paths that we haven't trod.
Just think if people had a sense of adventure, they might even go far enough to fall off the edge of the known world.
Just think if people became so enthused they might even try and recruit new members.

We must protect the traditions that have made the Ancient Order of Smoke Signallers and Mirror Flashers what it is today. Give inertia the respect it deserves.

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING -

TOWNSVILLE

GREETINGS ! THIS IS GAVIN VK4ZZ, WITH NEWS FROM
CENTRAL, NORTH AND FAR NORTH QUEENSLAND !
MATMAN AND ROSLYN ARE TAKING A WELL EARNED BREAK, SPENDING
THIS WEEKEND WITH FAMILY ON THE ATHERTON TABLELANDS.
SO, THIS WEEK THE NEWS IS BEAMING TO YOU NOT FROM
THE MATCAVE BUT FROM THE BORG CUBE.

FIRSTLY, SOME IMPORTANT NEWS ABOUT A TRAINING OPPORTUNITY YOU
DO NOT WANT TO MISS OUT ON !

THIS ITEM HAS BEEN RELEASED BY ROGER CORDUKES VK4CD,
WIA NOMINATED ASSESSOR NA001

FRED SWAINSTON VK3DAC HAS PLANNED A PUBLIC SAFETY TRAINER
TRAINING WEEKEND FOR THE 30TH AND 31ST JULY AND 1ST AUGUST
TO BE HELD IN TOWNSVILLE AT THE SES HEADQUARTERS, GREEN
STREET WEST END.

FRED WOULD LIKE ALL THOSE AMATEURS WHO ARE INTERESTED IN
DOING THIS COURSE TO REGISTER ON THE WIA WEBSITE AND CONTACT
ROGER ASAP!

FOR THOSE WITH CERTIFICATE FOUR TRAINING AND ASSESSMENT, IT WILL BE AN
EXCELLENT COURSE THAT WILL GIVE QUALIFICATIONS IN EMERGENCY COMMUNICATIONS
(WICEN AND SES).
FOR THOSE WITHOUT CERTIFICATE FOUR BUT WITH WICEN INTEREST AND
EXPERIENCE, YOU CAN STILL BECOME INVOLVED AND DO THE COURSE.
FRED CAN TAKE A TOTAL OF FIFTEEN PARTICIPANTS.

FRED WILL CONDUCT THE COURSE ON FRIDAY EVENING, FOLLOWED BY
SATURDAY FROM 8AM TO 4PM, THEN SUNDAY FROM 8AM TO 4PM.
HE WILL DELIVER THE TRAINER TRAINING IN ABOUT HALF THE HOURS THAT IS
REQUIRED FOR ORDINARY PARTICIPANTS SO IT IS A VERY FULL WEEKEND AND
WELL WORTH THE EFFORT !
THIS IS A GREAT OPPORTUNITY FOR CENTRAL, NORTH AND FAR NORTH QUEENSLAND
AMATEURS, SO DO NOT MISS IT !

ROGER HAS SUBMITTED SOME NAMES TO FRED AS INTERESTED.
PLEASE ENSURE YOU HAVE REGISTERED ON THE WIA WEBSITE FOR
WIA EMERGENCY COMMUNICATIONS TRAINING.

FINALLY, ROGER ASKS CAN YOU PLEASE SPREAD THE WORD TO THE
CLUBS IN YOUR AREA. FURTHER DETAILS TO FOLLOW TO INTERESTED
AMATEURS.

CONTACT ROGER CORDUKES VK4CD ON
TELEPHONE 07 47740221, MOBILE 0417638366
OR ON EMAIL VK4CD AT WIA DOT ORG DOT AU

NOW, TO TELL YOU ABOUT WHAT HAPPENED AT FNNQARG !

The 27th Far North and North Queensland Amateur Radio Gathering
happened during the June Long Weekend at Cardwell Beachcomber
Motel and Tourist Park with hams travelling from Charters Towers, Townsville,
Burdekin, Cairns, Garradunga and Atherton Tableland regions.
The normal ham population of just 1 in Cardwell (that's Brad VK4CDL) increased
greatly with 18 hams and 5xyls on site during the gathering and 9
hams and 1xyl visiting.
The traditional Cricket Match was won by Far North Queensland with a
score of 76 to 48.
The Trek Trivia Challenge was won by the team of Brad VK4CDL, Art VK4GO,
Joan VK4FTVL and Colin VK4UCM.
The lucky door prize was won by John VK4FNQ.
The group vote on Sunday resulted in 15 for King Reef Resort at
Kurrimine Beach
and 11 for Cardwell Beachcomber Motel and Tourist Park, so the 28th FNNQARG
will be near the monster fish paradise of Kurrimine Beach, shoreside
from Silkwood.
If you want a spot at the 2011 FNNQARG from Friday arvo June 10th
to Monday morn June 13th you need to get cracking with your booking right now.
Choice spots have already been booked and you might miss out !
contact King Reef Resort on 07-40656144
or email info@kingreef.com.au

SPEAKING OF GATHERINGS - LISTEN TO THIS !

The date for the famous and popular Central Highlands Amateur Radio
Club AGM at Camp Fairbairn near Emerald has been announced.

CHARC Secretary Gordon VK4KAL has advised that the AGM will be on
from 4pm Friday 17th to Midday Sunday 19th September 2010.

Find out more by contacting Gordon on vk4kal@wia.org.au

LADIES !

One of the friendliest radio nets in the land happens
this Tuesday evening from 7-30pm on the Townsville
VHF Repeater ... the Ann Renton Memorial Ladies Net !
The net is open to young and old, YL or OM and is a
golden opportunity for anyone who needs practice
on-air to go onto the net as 2nd operator.
So join in to this Tuesday evenings net and
lets see if the YLs can outnumber the OMs !

YUM YUM, GASTRONOMIC HAM TIME !

Breakfast with the President, this month hosted by the TARC Vice President,
will be happening from 7am this Saturday 26th June.

Bring yer brekkie items down to the BBQs located either side of the entry
to the Strand Jetty, make bake and cook all the while whilst
socialising in one of North Queenslands award winning settings.

NEXT ITEM IS A WAKE UP CALL FOR ALL TARCADIANS !

A timely reminder that your member subs need to be
paid by the end of this month, Wednesday 30th June 2010.
Get on it right away and contact Treasurer Joan VK4FTVL if you are having any
problems paying.
Joan can be contacted on telephone 07-47515261 or email coljoan@bigpond.com

SO, WHILE YOU ARE ON THE PHONE TO JOAN OR ROGER GETTING MORE
DETAILS ABOUT THINGS I WILL BRING THIS EDITION OF QNEWS FOR
THIS SUNDAY TWENTIETH OF JUNE TO A CLOSE.

THIS HAS BEEN GAVIN VK4ZZ IN TROPICAL PARADISE FOR
THE TOWNSVILLE AMATEUR RADIO CLUB INC.

VK7
local area news :- http://reast.asn.au/news.php
vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

Tasmanian radio engineer Barry McCann vk7tbm has received an OAM in the
Queens Birthday honours for his contribution to maritime communications.

Barry was the co founder of what has become Australia's largest marine radio
network, Coast Radio, a radio communications network manned by volunteers,
providing radio services to commercial fishers and recreational boaters.

The network covers a large stretch of water from the South Australian Victorian
border, 300 nautical miles south of Tasmania, and up to the New South Wales
Victorian border.

The idea for the marine radio network came about after Barry spent an unplanned
night at sea in the mid 1970's, after the engine in his boat failed.

Congratulations VK7TBM, Barry McCann OAM.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

On Saturday 22 May, John VK3XD and Ewen VK3OW conducted Foundation assessments
for four candidates who had been preparing under the guidance of Stephen VK3SN.

Claire, Madeleine, Michael and Bronwen worked hard to be ready and were
rewarded with successful completion of all requirements.

All have now been issued with callsigns and have had their first QSO:

Claire VK3FCEW
Madeleine VK3FMCW
Michael VK3FMAW
Bronwen VK3FIRH

Listen out and say hello to these new Foundation amateurs!

Persons in the N/West Area of VK7 interested in Training and Assessments for all classes of Amateur Radio are advised that the atvgroup can provide all these requirements and in addition provision of Facilitators via the Radio and Electronics School if candidates so desire.

For more information regarding these facilities, please contact the Club's Learning Organizer Tony VK7AX, or the Club.

Contact details can be found on the Club Web Site or the WIA site under VK7 Clubs.

http://www2.vk7ax.id.au/atvgroup/

VK's Weather Channel's world record attempt

The Weather Channel is calling on schools across Australia to help it break the Guinness World Record for the world's largest interactive weather report as part of National Science Week.

For the record to be broken, over 261 schools will need to measure the temperature in their playground at midday EST on August 18 and send it through to The Weather Channel. This information will become part of The Big Report, which will be broadcast on The Weather Channel at 6pm EST that night.

The current record of 261 schools was set by the BBC in March this year.

To take part, schools need to register online at
www.weatherchannel.com.au/bigreport
between June 1 and July 21

Congratulations to South Africans Jannie Minny, ZS4JR, and his triplets Janita, Hannelie and Emelia and his wife, Johannatjie, who all passed the recent RAE. It is just more than possible that it is the first time triplets wrote and passed the RAE together. Congratulations to all of you.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

POSSIBLE CHANGES IN EU DIRECTIVE ON INTERFERENCE COULD IMPACT HAM RADIO

DL9KCE reports via the IARU Region One website that a review of a possible revision of a European Union Directive on interference to and from telecommunications devices might impact on Amateur Radio.

In Article 3 the Directive contains a number of essential requirements to protect health and safety, ensure electromagnetic compatibility and to avoid harmful interference. The way in which these essential requirements are defined in the Directive is generally considered appropriate by stakeholders. However, the concept of "intended use" of the equipment seems to create some confusion between the essential requirements of the Directive and other public interests, such as public security or freedom of communication, which are beyond its scope but which might affect the

Amateur Radio Service in the future.

There has also been some evidence suggesting that harmonized standards may sometimes be too stringent. Market surveillance campaigns have shown that a proportion of unlicensed low power devices appear to be non conformant with the harmonized standards. However, the recorded level of harmful interference does not seem to have been affected by this.

In the end, the report on the Directive says that the scope of the Directive needs to be reviewed. For instance, the radio and TV receivers which are not able to transmit by radio or cable do not fall within the scope of the Directive, while those which are able to transmit signals do. And for ham radio it means that any changes to the Directive will have to be carefully watched.

==========

WEIRD AND WONDERFUL

Wonder pits another story from the Weird N Wonderful file, hello I m
Jim Linton VK3PC.

At the end of World War II, with peace declared, huge quantities of equipment were simply dumped.

A story published in Signal, the magazine of the Vintage Military & Amateur Radio Society, concerns reports of Royal Air Force radio gear being tipped down dis-used coal mine shafts in Staffordshire.

A local farmer Thomas Weston retrieved thousands of these units and through an associate George Eyre sold them on the open market to make a tidy profit.

Everything was going well until the farmer s local member raised a question in the British Parliament about this disgraceful waste of resources occurring at a time the nation was undergoing tough post-war financial restraint.

That caused a political storm and the farmer was threatened with legal action by the Coal Commission on the grounds that he was trespassing when entering the mines.

But in the following year 1947 the farmer got under their guard by buying land containing two old mine shafts and without restriction restarted his enterprise.

It seems that other things were dumped after the war too. Rumours include items ranging from old mess hall cutlery through to boxed unassembled aircraft.

(Additional follows from from Ed. VK4BB)

Here in South East Queensland at Archerfield, just opposite the airfield in those huge water filled quarries and surrounds are said to be several Lancaster Bombers, buried after 1952 and the Woomera Tests. At Drayton

on the Darling Downs it's said that brand new Mustang Fighters still crated are buried... just awaiting the 'un earthing'.

And Jim is correct on that 'cutlery, during my stint in the Army, I was involved in burying goodies no longer required on the military land of Bulimba! Nothing exotic, but if you are after well worn cutlery!! HiHi.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

Designer and electronics enthusiast Diana Eng, KC2UHB, has developed a collapsible fabric Yagi for portable amateur radio satellite operation. In her column in MAKE Magazine she writes that one of her favourite ham radio activities is making contacts on satellites. She says that it is really fun to know that you're controlling something that's receiving and sending communications from space.

Eng notes that communicating with satellites means carrying a big Yagi antenna around. So she decided to use her fashion sewing skills to make a collapsible fabric Yagi antenna that's much easier to transport.

Eng notes that the actual antenna design is based on the work of engineer and writer Kent Britain, WA5VJB. The difference is the materials used in the final assembly. Thin brass tubing is used for the antenna elements while rolled up cloth doubles as both the boom and as a carrying case for the finished antenna. This makes it easily transportable as well as quick to set up in the field or for classroom satellite demonstrations.

Full instructions on how to build one is on line at
http://blog.makezine.com/archive/2010/05/collapsible_fabric_yagi_antenna.html

NAME THE CUBESAT PROJECT

SA-AMSAT is inviting ZS radio amateurs to propose a name for its CubeSat
project.

The project was announced at the recently held Space Symposium and will involve
the design and construction of a CubeSat. A CubeSat is a 10 cm cube with a mass
of up to 1 kg. The project name should be a single word in any of
South Africa's official languages and reflect the spirit of the project.

A good example is the name given to the Around-the-world-balloon project which
is called "lalela", the Zulu word for "listen".

The winning entry will receive a satellite handbook.

Entries should be sent by e-mail to saamsat@intekom.co.za

closing date is 15 July.

WW SPECIAL INTEREST GROUPS --- INTERNET --- THE HAMS DOMAIN

VK7AX eQSO Chat Room

A reminder that the atvgroup now has a chat room available on eQSO courtesy
VK7AX.

The Server and chat rooms can be found on eQSO under the Call sign of VK7AX.

Two Rooms are available at the moment, "101English" and "ATV & SSTV" Chat.

An eQSO RF gateway with a link to the VK7RTV 2M Repeater is permanently
connected to the 101ENGLISH Room, which effectively means all 2M VK7RTV
repeater traffic is available when connected to the 101ENGLISH Chat room of
VK7AX.

It is suggested that NON RF type traffic use the "ATV & SSTV" Chat Room where it is more private and clients need not worry about being connected to a repeater network.

Amateurs interested in eQSO can download the software which is free and available at eqso.org

This year, the ARRL will be using Twitter <http://twitter.com/ARRL_FD> to promote their Field Day events.

According to ARRL Media and Public Relations Manager Allen Pitts, W1AGP, more and more people, both young and old, are using social networking sites such as Twitter and Facebook to keep their friends up-to-date with their latest activities.

Twitter is a social networking and microblogging service that enables its users to send and read messages known as tweets, text-based posts of up to 140 characters.

Social networking is new to a lot of us, but it is really not hard at all to learn and do. The more people on, the more tweeting we do, we have the wonderful opportunity to expose Amateur Radio to a new audience.

One of the most iconic UK special event callsigns, GB2GP, Gilwell Park, the headquarters of the Scout Association, UK, is on air this weekend, 19, 20 June.

A team of nine UK Radio Scouters from all over the south of England will be running not only the station but also lots of different radio activities.

These include Radio Orienteering for the Beaver and Cub's.

Over 5,000 Beavers and Cubs aged five to 10 1/2 from all over the UK are at the event.

All the usual HF and VHF frequencies as well as EchoLink.
They should be found at or around the World Scout frequencies, the most common of which are 7.090 and 14.290 MHz.

(SOURCED TO RSGB)

In keeping with Boy Scouts of America's centennial theme, Celebrating the Adventure, Continuing the Journey, four retired badges have been brought back for the USA group's 100th anniversary.

Effective date for earning these new merit badges,

Carpentry (1911-1952), Tracking (formerly Stalking, 1911-1952), Pathfinding (1911-1952) and Signaling (formerly Signaler, 1910-1992) is April 1,2010, requirements must be completed no later than December 31, 2010.

The contemporary merit badges closely resemble the original designs of their counterparts, but with a gold border, immediately identifying it as a 2010 historic merit badge.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

WICEN events on the horizon

The next WICEN event is the LCCC "Mini Cora" Rally being held on Saturday July 25th.

This rally will have 8 stages consisting of 4 stages each run twice and will be run with 2 stages near town (Zoo / Pipeline & Bluetts) and 2 out near Uriarra (Sherwood & Tidbinbilla).

CRARC need to support 12 field stations with a suitable number of people in HQ.

Roger Cordukes VK4CD, WIA Nominated Assessor NA001 advises Fred Swainston has planned a Public Safety Trainer Training weekend for Townsville for 30 &#65533; 31 July, 1 August at SES HQ Townsville

Fred would like all those amateurs who are interested in doing this course to register on wia.org.au and also contact Roger ASAP.

For those with Cert IV (Training and Assessment), it will be an excellent course that will give qualifications in Emergency Communications (WICEN and SES). For those without Cert IV but WICEN interest and experience, you can still become involved and do the course. Fred can take a total of 15 participants.

Fred will conduct the course on Friday evening followed by Saturday 8am to 4pm and Sunday 8 to 4, so it is a very full weekend, and well worth the effort.

This is a great opportunity NQ amateurs, so do not miss it!

==> + PUBLIC SERVICE: AMATEURS IN ARKANSAS PROVIDE SUPPORT TO LOCAL
AUTHORITIES AFTER FLOOD KILLS 20

In the early hours of Friday, June 11, as many as 300 campers were
taken unawares when 6-10 inches of rain fell in the rugged Ouachita
Mountains. The deluge caused the normally quiet Caddo and Little
Missouri rivers to overflow their banks during the night. Around dawn,
floodwaters barreled into the Albert Pike Recreation Area, a 54-unit
campground in the Ouachita National Forest, about 75 miles west of
Little Rock. Cars were wrapped around trees and children's clothing
could be seen scattered across several campsites. In all, authorities
said that 20 people lost their lives; 18 of the 20 victims have been
publicly identified, among them eight children age 7 or younger. Eight
of the 18 were from Louisiana, seven were from Texas and three were
from Arkansas. The Pike County Sherriff requested the assistance of
Amateur Radio operators to assist with search and rescue operations, as
```

well as communications support, at the site. Read more here
<http://www.arrl.org/news/amateurs-in-arkansas-provide-support-to-local-autho
rities-after-flood-kills-20>.

==> PUBLIC SERVICE: CALIFORNIA HAMS HELP COORDINATE OFF-ROAD RESCUE

On Saturday, June 12 around 1:30 PM local time, Jim Siemons, AF6PU,
of Walnut Creek, California, was checking his e-mail when he received a
message from a friend who was concerned that his brother -- who, along
with four friends had taken an off-road adventure along California's
famed Rubicon Trail -- had not come home when expected. Siemons' friend
told him that his brother's group had left on Wednesday with four
off-road vehicles in an attempt to cross the Trail. Since Siemons and
his friend's brother were members of the same off-roading club, his
friend thought Siemons might have some information. Siemons forwarded
the e-mail to several other club members; within five minutes, he
received a phone call from fellow club member Jenny Ward, KI6YBQ,
suggesting that he try Amateur Radio to attempt to locate the missing
group. There is no cell phone coverage on the Trail and very limited
official agency radio coverage, making Amateur Radio the only effective
means of communication in the area. Read more here
<http://www.arrl.org/news/california-hams-help-coordinate-off-road-rescue>.

==> + FCC NEWS: ARRL COMMENTS IN FCC SPREAD SPECTRUM PROCEEDING

In response to a 2006 ARRL Petition regarding spread spectrum issues,
the FCC released a Notice of Proposed Rule Making (NPRM) on March 16
(WT Docket No 10-62). The Commission is looking to amend Part 97 to
facilitate the use of spread spectrum communications technologies by
eliminating the requirement that amateur stations use automatic power
control (APC) to reduce transmitter power when the station transmits a
spread spectrum (SS) emission, as well as reducing the maximum
transmitter power output when transmitting a SS emission. The ARRL
filed comments on this matter on June 14, 2010. Read more here
<http://www.arrl.org/news/arrl-files-comments-with-fcc-regarding-spread-spect
rum-issues>.

==> ATTENTION WEATHER SATELLITE USERS: FCC SEEKS INFORMATION, COMMENTS
ON CURRENT USE OF 1675-1710 MHZ

The National Broadband Plan (NBP) recommends that the FCC should
make 500 MHz of spectrum available for broadband use within the next 10
years, including 300 MHz between 225 MHz-3.7 GHz for mobile use in the
next five years. The FCC's Office of Engineering and Technology (OET)
has engaged in discussions with the National Telecommunications and
Information Administration's (NTIA) Office of Spectrum Management to
begin examining various frequency bands that may be suitable for mobile
broadband use. NTIA has preliminarily identified the 1675-1710 MHz band
for such use and is examining the impact on its incumbent federal
users. As such, the FCC issued a Public Notice (ET Docket No 10-123) on
June 4, 2010, seeking information to help better comprehend the current
use of the 1675-1710 MHz band by non-federal entities and better

understand its potential utility for broadband. This portion of the spectrum is utilized by weather satellites. Read more here <http://www.arrl.org/news/fcc-issues-public-notice-to-seek-information-comments-on-current-use-of-1675-1710-mhz>.

==> + FCC NEWS: FCC SEEKS COMMENTS ON AMATEUR 5 MHZ (60 METERS) ALLOCATION

In May, the FCC released <http://www.arrl.org/news/fcc-proposes-additions-changes-to-amateur-5-mhz-allocation> a Notice of Proposed Rulemaking (NPRM) -- ET Docket No 10-98 <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-76A1.pdf> -- proposing to amend the Part 97 rules governing the Amateur Radio Service. Specifically, the Commission looks to modify the rules pertaining to the use of five channels in the 5330.6-5406.4 kHz band (60 meters) to replace one designated channel with one that is less encumbered, to authorize three additional emission designators and to increase the maximum authorized power in this band. On June 15, a summary of the NPRM was published in the Federal Register <http://edocket.access.gpo.gov/2010/pdf/2010-14384.pdf>, which started the clock on the deadline for comments. Comments must be filed on or before July 15, 2010 (30 days after publication in the Federal Register); reply comments must be filed on or before July 30, 2010 (45 days after publication in the Federal Register). Instructions on how to file comments are listed beginning on page 6 of the NPRM <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-76A1.pdf>.

==> + ARRL FIELD DAY: FIELD DAY STATION LOCATOR SERVICE RETURNS FOR 2010

First introduced in 2008, the ARRL's Field Day Station Locator Service <http://www.arrl.org/field-day-locator> has proved a popular addition to the Field Day toolbox. This service -- an interactive map that helps amateurs or those interested in Amateur Radio find a Field Day <http://www.arrl.org/field-day> site near them -- is free to clubs or individuals who will be operating public Field Day stations. Stations can also be listed by state or province. So far, hams in all 50 states and Puerto Rico have listed Field Day sites on the Field Day Locator. If your group would like to be a part of the Station Locator Service, it's easy to get started -- just go to the Field Day Station Locator Web site <http://www.arrl.org/field-day-locator> and follow the instructions (this is a different link than was printed in the Field Day packets). ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On June 26-27, join tens of thousands of Amateur Radio operators as they gather for a public demonstration of the Amateur Service.

==> + ON THE AIR: A HAM RADIO HOMECOMING

Beginning with the 2010 ARRL November Sweepstakes <http://www.arrl.org/sweepstakes>, the prohibition against alumni

operating at a school club station has been repealed. According to Ward Silver, N0AX, the goal of the rule change is to get more school clubs active for Sweepstakes and on HF. Sweepstakes is just a little over four months away -- the first and third weekends of the month. What are your plans? Wouldn't it be nice to hear the call sign of your alma mater ringing out in the middle of the Sweepstakes exchange? Sure it would!

"Entering Sweepstakes in the Multioperator category was once a staple of the fall semester's competitive atmosphere, but many high school and collegiate clubs have fallen silent or nearly so over the past decades," Silver explained. "Your school club might be interested in hosting an alumnus or two -- why not contact them? If the club station has been inactive in recent years, this would be a good way to help get activity jump-started again. To get the juices flowing, challenge a nearby club or try to beat a score from days gone by." Read more here <http://www.arrl.org/news/a-ham-radio-homecoming>.

==> + INTERNATIONAL PERSPECTIVE: FORTHCOMING IARU ACTIVITIES AT THE ITU

Working Parties 1A and 1B of the International Telecommunication Union's (ITU) Study Group 1 will meet in Geneva from June 21-28. A major item of discussion will be protection of radio services from interference from Broadband over Powerline (BPL), called Power Line Communications (PLC or PLT) in Europe. The International Amateur Radio Union (IARU) has already contributed to the ITU-R report SM2158, Impact of Power Line Telecommunication Systems on Radiocommunication Systems Operating in the LF, MF, HF and VHF Bands Below 80 MHz. This report shows the acceptable criteria for degradation of the HF radio noise floor caused by BPL is defined as being 0.5 dB. Work in WP1A will concentrate on the protection of radio services from the effects of BPL in range from 80-200 MHz. Read more here <http://www.arrl.org/news/forthcoming-iaru-activities-at-the-itu>.

==> + LEGISLATIVE: HR 2160 NOW COUNTS 40 HOUSE SPONSORS

Last month, another Congressional Representatives -- Mike McIntyre (D-NC-7) -- pledged his support for HR 2160 <http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&docid=f:h2160ih.txt.pdf>, The Amateur Radio Emergency Communications Enhancement Act of 2009, bringing the total number of cosponsors to 40, including original sponsor Sheila Jackson-Lee <http://www.arrl.org/news/houston-representative-introduces-amateur-radio-bill-in-congress> (D-TX-18). HR 2160 is also sponsored by W. Todd Akin (R-MO-2), Michael Arcuri (D-NY-24), Roscoe Bartlett (R-MD-6), Jo Bonner, (R-AL-1), John Boozman (R-AR-3), Madeleine Bordallo (D-Guam), Andr&#65533; Carson (D-IN-7), Geoff Davis (R-KY-4), Bob Filner (D-CA-51), Jeff Fortenberry, (R-NE-1), Scott Garrett (R-NJ-5), Bart Gordon (D-TN-6), Brett Guthrie (R-KY-02), Maurice Hinchey (D-NY-22), Michael Honda (D-CA-15), Mary Jo Kilroy

(D-OH-15), Ron Klein, (D-FL-22), Tom Latham (R-IA-4), Zoe Lofgren (D-CA-16), Blaine Luetkemeyer (R-MO-9), Thaddeus McCotter (R-MI-11), Michael E. McMahon, (D-NY-13), Cathy McMorris Rodgers, (R-WA-5), Charlie Melancon (D-LA-3), Candice Miller (R-MI-10), Dennis Moore (D-KS-3), John Olver (D-MA-1), Bill Posey (R-FL-15), Denny Rehberg, (R-MT), Dana Rohrabacher (R-CA-46), Aaron Schock, (R-IL-18), Bennie Thompson (D-MS-2), Michael Turner (R-OH-3), Greg Walden, W7EQI (R-OR-2), Peter Welch (D-VT), David Wu (D-OR-1), C.W. Bill Young (R-FL-10) and Don Young (R-AK). On the Senate side of Capitol Hill, S 1755
<http://www.arrl.org/news/senate-introduces-companion-bill-to-hr-2160>
-- also called The Amateur Radio Emergency Communications Enhancement Act of 2009 -- cleared the Senate
<http://www.arrl.org/news/amateur-radio-bill-passes-senate-moves-to-the-house>
by unanimous consent in December 2009 and now sits in the House Committee on Energy and Commerce. Click here
<http://www.arrl.org/sample-letters> for information on how to encourage your Congressional representative to sponsor HR 2160.

==> + SOLAR UPDATE

Tad "The starred and stately nights seemed haughty dames in jeweled velvets, nursing at home in lonely pride, the memory of their absent conquering Earls, the golden helmeted Suns <http://www.classicreader.com/book/309/29/>!" Cook, K7RA, reports: Sunspots disappeared for the past two days, June 15-16, which is a bit scary considering the weak solar cycle we've seen recently. In the northern hemisphere, we are just a few days from the summer solstice. Despite the lack of sunspots for the last two days of the June 10-16 week, the average daily sunspot numbers rose 2.5 points from the previous week. Geomagnetic activity peaked on June 16, with the planetary A index at 19 and high latitude College A index at 42. This should decline over the next couple of days. Look for more information, including a look at some reported 10 meter propagation from Arizona to Rarotonga, on the ARRL Web site on Friday, June 18. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Herman Melville's Moby Dick <http://www.classicreader.com/book/309/29/> (Chapter 29, "Enter Ahab; to Him, Stubb").

==> THIS WEEK ON THE RADIO

This week, a running of the NCCC Sprint Ladder takes place June 18. The Kids Day Contest and the Feld Hell Sprint are both June 19. The All Asian DX Contest (CW) and the West Virginia QSO Party are June 19-20. The Run for the Bacon QRP Contest is June 21 and the SKCC Sprint is June 23. Next week, everyone is on the air for ARRL Field Day on June 26-27. Look for the His Majesty King of Spain Contest (SSB) and the

Marconi Memorial HF Contest, also on June 26-27. The SARL Digital Contest is June 27 and the RAC Canada Day Contest is July 1. There is another running of the NCCC Sprint Ladder on July 2. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, June 20, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, July 2, 2010: Amateur Radio Emergency Communications Level 1; Antenna Design and Construction; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1714 - June 18 2010

Amateur Radio Newsline report number 1714 with a release date of
Friday, June 18, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Amateur radio gets ready for the 2010
Scouting Jamboreee, hams assist as floods hit Arkansas and tornadoes
hit Ohio, a dispute over first place in the International Amateur
Radio Headquarters Station category and a balloon ride across the
English Channel gets tracked using A-P-R-S. Find out the details on
Amateur Radio Newsline(tm) report number 1714 coming your way right
now.

RADIO CELEBRATIONS: HAM RADIO AT THE 2010 BOY SCOUT JAMBOREE

The 2010 National Scout Jamboree is a little more than a month away.
This years theme is the celebration of 100 years of scouting in the
United States and ham radio will be an important part of the
festivities. Amateur Radio Newsline's Mark Abramowicz, NT3V, is at our
East Coast bureau with more:

--

For anyone who's ever been or still is a Boy Scout - youth or leader -
celebrating an anniversary of this significance is truly a
once-in-a-lifetime happening.

And, why not do it with a huge campout or jamboree at a military base
called Fort AP Hill, Virginia, just outside of Woodbridge?

Of course, to make it really a special event you set up an amateur radio
station!

The staff of K2BSA - the call sign of the Boy Scouts of America - is making
final preparations for the event - which runs from July 26 through Aug. 4.

Ed Dudley, WA4ISI, is the volunteer coordinator for the K2BSA staff. He
says the staff of nearly 50 volunteers is made up of folks from a variety
of fields who will be coming from all around the country.

"We have doctors and lawyers," Dudley says. "We have scientists, engineers
and we have youth that are Scouts that will be part of the staff."

Among the youth, Andrew Koenig, KE5GDB, Amateur Radio Newsline's 2009 Young Ham of the Year.

Dudley says the centerpiece of the K2BSA operation is a large demonstration station located inside a large circus-style tent with HF and VHF stations set up, a temporary antenna farm that might rival some of the smaller DX operations, and plans in the works for a contact with one of the astronauts aboard the International Space Station.

But Dudley says that's not all.

"We'll also be doing the Radio merit badge at the merit badge midway and we have a third group that will be doing licensing and testing," Dudley says. "We'll have classes and give the test every evening that there's not an arena show.

"When they have the arena shows, everything shuts down. But every other night we'll have testing for the amateur radio licenses, all levels."

Dudley says the mission of the K2BSA staff is clear - showing off the best of amateur radio.

"Well, we have an opportunity here to show ham radio to lots of Scouts, and when I say lots, I mean lots," Dudley says. "There are approximately 40,000 Scouts and adults that are actually participants in the jamboree, plus there's six or seven-thousand staff members.

"All of these people can come in and see what's going on. But, beyond that there may be several hundred thousands of visitors."

At the K2BSA demonstration, Dudley says the idea is to get Scouts and visitors talking on the air with other Scouts around the country and around the world.

"I'd like to see Scouts from all over the world that can come into a local ham station and make a contact and talk to some of these guys at the jamboree," Dudley says. "That's what the demonstration is

"It's sort of like Jamboree on the Air in that we're trying to do contacts with other Scouts. Of course we'll talk to everyone else, too."

The bottom line: Dudley would love to see the ham community get active during the jamboree. And, of course, if you contact K2BSA, there is a nice little bonus.

"Get on your radio and give us a call," Dudley says. "If you'd like a QSL card, we'll have a unique QSL card for the jamboree.

"We do ask that you send an SASE along with that because we may make thousands of contacts and we'd love to send you a card but we can't afford to pay for the mailing for all of them."

Check out the July QST cover story by Bill Morine, N2COP, to learn more about K2BSA's operations at the National Boy Scout Jamboree and listen for the web address at the end of this story, too.

Your humble correspondent will be part of the K2BSA staff for the third time in my Scouting career. And, I hope to be able to file a story or two for the Amateur Radio Newsline while there.

For now, for the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More information on this years Scout Jamboree is on line at www.nsj2010ham.com (NT3V, ARNewsline(tm))

**

RESCUE RADIO: HAM RADIO CALLED OUT IN ARKANSAS CAMPSITE FLOOD

Ham radio was called out on June 6th to assist in the search for missing people following flooding in the Albert Pike campground, about 75 miles west of Little Rock, Arkansas. Despite temporary cell phone towers being installed, emergency personnel still need help communicating in the remote Arkansas wilderness. Because of this local law enforcement has requested the help of ham radio operators across the state.

The Central Arkansas Ultra-High Frequency Amateur Radio Club was quick to respond. Its spokesman is Josh Carroll, N5JLC. He says cell phones can only cover so much of an area. According to Carroll the cellular towers and services that have been put in place are functioning properly. The problem is they're working for a certain portion of the affected area, and the area we're currently concerned with is still very spotty as far as cellular service and communications. So that's why they requested the assistance of the ham radio community.

The flash flood swept through a popular Arkansas campground on Friday, June 4th. At least 19 people have been confirmed killed, and one person is still missing after sudden severe floods rampaged through the area. (NPR, N5LJC)

**

RESCUE RADIO: OHIO HAMS READY AS TORNADOES STRIKE

The ARRL reports that during the early overnight hours of Saturday, June 5 through Sunday, June 6, severe weather and tornadoes ripped across an area of Northwestern Ohio, laying a large path of destruction. ARES and SKYWARN groups in Erie, Huron, Sandusky and Wood Counties activated nets as early as 10:30 p.m. Eastern Daylight Time on the 5th, with many not standing down until 4:30 a.m. the next day. According to ARRL Ohio Section Manager Frank Piper, KI8GW, traffic on the nets was filled with reports of severe weather damage, flooding and downed power lines. (ARRL)

**

ENFORCEMENT: CONNECTICUT HAM ARRESTED ON SUSPICION OF ARSON

A Norwich, Connecticut ham arrested last month on charges he called in a fake report of a gunman at Wal-Mart is in custody again. This time on charge of suspicion of arson linked to a 2007 fire.

According to the Norwich Bulletin on-line newspaper, Keith Mutch, KB1RBI, was arrested Wednesday, June 16th on a warrant on charging him with second degree arson and first degree criminal mischief in connection with a June 7, 2007 fire at a vacant home in Norwich. No injuries were reported at the blaze.

Mutch was also charged with tampering with a witness for actions connected to his May 28 arrest on charges he used a two way radio on January 26th to call in reports of an armed man threatening to shoot people outside Wal-Mart in Norwich. Police said they developed information that Mutch had contacted one of the witnesses in the Wal-Mart incident and tried to convince her to change her story.

Mutch was arriagned on Thursday, June 17th in Norwich Superior Court. He is being held on a total of $325,000 in bonds.

Norwich Police Lt. Stephany Bakoulis said that an investigation continues into suspicious fires and more arrests are expected. More is on-line at tinyurl.com/2ffee7h

From the newsroom, Im Bill Pasternak, WA6ITF, in Los Angeles. (NorwichBulletin.com, TheDay.com)

**

ENFORCEMENT: CALIFORNIA SOS HOAXSTER SENTENCED TO 30 MONTHS IN FEDERAL PRISON

A federal judge sentenced Kurtis Thorsted of Salinas, California to 30 months in federal prison. This, after the 53 year old pleaded guilty in July in U.S. District Court in San Jose to broadcasting a fake distress signal in October 2008.

At that time he made the transmissions Thorsted told would-be rescuers in that he was in a kayak off the coast of Santa Cruz and having difficulty getting to shore. However it was found that he was actually at his home in the city of Salinas.

Thorsted also pleaded guilty in October to making two other fake mayday calls to the Coast Guard. In all, the court found that Thorsted has made 51 false distress messages over six months and costing the Coast Guard $102,000 in search and related costs.

This is not the first time that Thorsted has been convicted of transmitting a false distress message. In April 2004 he was sentenced to two years in federal prison and ordered to pay more than $29,000 in restitution to the Coast Guard for a similar series of hoax calls. And in one of the earlier incidents, Thorsted's phony call interrupted a real distress call from a 33-foot boat 4 miles off the coast of Santa Cruz island. More on this story is on-line at tinyurl.com/2f63oq8. (VHF Reflector, SF Chronicle)

WORLDBEAT: NO FIRST PLACE AWARD IN DISPUTED IARU HQ CONTEST

The 2009 IARU contest between the world's national amateur radio society headquarters stations has produced a bitter dispute over the scores. This as an argument rages between the Spanish and German national societies over who actually finished in first place as the ARRL says that nobody will be declared to have taken first place. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

Dave Patton, NN1N, is the Manager, ARRL Membership and Volunteer Programs. In a June 7th statement for the ARRL Awards Committee Regarding headquarters station entries in the 2009 IARU HF World Championship he writes that a most unfortunate dispute has arisen in connection with the outcome of the 2009 IARU HF World Championship. This, between AO8HQ on behalf of Spain's Union de Radioaficionados Espanoles or URE and DA0HQ on behalf of the Deutscher Amateur Radio Club or DARC.

Pattons says that as the administrator of the contest on behalf of the IARU, the ARRL regrets that it has contributed to this development in two ways. He says that far to much emphasis has been allowed to develop on competition between headquarters station entries. He explains that the special category of headquarters stations was intended to raise the visibility of the IARU member-societies among active radio amateurs, and to make the contest more interesting to participants by providing additional multipliers. But says Patton, it was never intended to be a competition for the highest world score. Clearly there can never be a "level playing field" for such competition, nor does it further the objectives of the IARU.

Second, in adjudicating the 2009 contest results a serious error was made in the initial computation of scores. He explains that many contacts were incorrectly identified as "busted calls" that were not. As a result of this error, when the results were first published AO8HQ was shown as having the highest score when in fact the DA0HQ score, after correction of the computation, is slightly higher. Therefore, the ARRL Awards Committee has decided that no certificate will be awarded for the high scoring IARU member society HQ station in 2009. Instead, a certificate will be awarded to each continental leader, and certificates of appreciation for their participation will be awarded to all headquarters stations.

And there are major changes coming to get this event back on track. Effective with the 2010 IARU HF World Championship, no adjudication of HQ station logs will be conducted by the ARRL. A certificate of participation will be awarded to each IARU member society headquarters

station and that will be it. Also effective with the 2010 event, by submitting a log the submitter agrees that the log may be made public, at the discretion of the contest sponsor.

For the Amateur Radio Newsline, I'm Brice Tennant, K6PZW, in Los Angeles.

--

In the committee statement Patton says that the ARRL will not engage in any further correspondence with regard to the 2009 IARU HF World Championship but it does welcomes suggestions for improvements for future events. He also says that it is extremely regrettable that the matter has escalated into a distraction from the other issues facing the words amateur radio organizations today. The ARRL Awards Committee Statement can be seen on line at tinyurl.com/3xfo54h (radio-sport.net, DARC, URE)

ENFORCEMENT: FCC SHUTS DOWN UNLICENSED BROADCASTER IN BROOKLYN NY

The FCC has issued a Forfeiture Order in the amount of $4,500 to Mark Nierman and Kakadu Productions, Inc.. This for willfully and repeatedly violating Section 301 of the Communications Act of 1934 by operating an unlicensed radio station on the frequency 99.9 MHz in Brooklyn, New York.

The investigation revolving this matter goes back almost 9 months. In response to several complaints from licensed area broadcasters, on October 12th and 13th of 2009, an agent from the Enforcement Bureau's New York Office used a mobile direction-finding vehicle and determined that the source of broadcast transmissions on 99.9 MHz was a radio station operating from an apartment building located in Brooklyn's Coney Island area. The agent also observed an FM broadcast antenna on top of a water tank on the roof of the apartment building. The agent subsequently took field strength measurements and determined that the signals being broadcast exceeded the limits for operation under Part 15 of the Commission's Rules and therefore required a license.

After taking the measurements the agent went to the office of the building management company. The office's director stated that he was aware of the antenna and that a five-year lease had been executed between Luna Park and Mark Nierman of Kakadu Productions allowing a radio station to operate in the bulkhead room of the structure beginning on May 30, 2009. The lease price was $6,000 a year.

Accompanied by the building superintendent, the agent then returned and conducted an inspection of the FM broadcast antenna on top of the water tank. The agent observed coaxial cable connecting the antenna to radio station equipment located inside the bulkhead room. The agent also observed that the radio station equipment was active and recorded information about the apparatus. The building superintendent then shut down all the equipment at the agent's request.

On October 16th the New York Office issued a Notice of Unlicensed Operation to Kakadu Productions. The notice warned Kakadu that operation of the unlicensed radio station on 99.9 MHz violated Section 301 of the Act and outlined the potential penalties for such a violation, including seizure of the equipment, fines and imprisonment. The notice also directed Kakadu to terminate operation of the unlicensed station immediately and provided Kakadu ten days to reply.

On October 26th Kakadu submitted a reply to the FCC stating that it had ceased operating the unlicensed radio station. Also, that it would comply with FCC directives in any future radio operations.

On January 8th, 2010, the New York Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Nierman and Kakadu for apparently willfully and repeatedly operating an unlicensed radio station. Nierman and Kakadu jointly submitted a response on February 9th. In it Nierman and Kakadu did not dispute the violations identified in the NAL but request cancellation of the proposed forfeiture based on their inability to pay. In support of their claim of financial hardship, Nierman and Kakadu submitted three years of individual and corporate tax returns.

After reviewing the documentation the FCC concluded that a reduction of the forfeiture to $4,500 is warranted. Nierman and Kakadu were given the customary 30 days to pay the fine or to file a further appeal. (FCC)

MOBILE OPS: DISTRACTED DRIVING SHOULD BE TREATED BY PHYSICIANS

Distracted driving should be treated as a medical condition. So says Dr. Amy Ship, a primary care physician at Beth Israel Deaconess Medical Center who suggests it's time for physicians to talk to patients about driving while distracted.

Dr. Ship says that distracted driving is a problem that has risen to the rough equivalence of drunken driving thanks to the proliferation of phones that allow drivers to talk and text. Writing in the June 10 issue of the New England Journal of Medicine, Ship notes physicians routinely ask patients about habits associated with potential harm like the use of helmets, seatbelts, cigarettes, drugs and alcohol. And with data showing 28 percent of all accidents in the United States are caused by drivers talking on cell phones or texting, it's time to step into this issue too.

While the absolute increase in the risk of collision attributable to distracted drivers is hard to assess, Ship says one study showed talking and driving posed a four time greater risk than undistracted driving. A second study suggested texting raised the risk of collision by a factor of 23. You can read the entire article on Dr. Ship's work at tinyurl.com/25bbt55. (Science Daily)

THE SOCIAL SCENE: AMSAT SPACE SYMPOSIUM IN CHICAGO IN OCTOBER

AMSAT has announced that its 2010 Space Symposium and Annual Meeting will be held on Friday, October 8 through Sunday, October 10. This years venue is the Chicago area Elk Grove Holiday Inn which is near O'Hare Airport for the event. This is the same hotel that recently has hosted the Central States VHF Conference and W9DXCC events.

AMSAT has also put out a call for papers to be presented at the Symposium. These can be on any topic of interest to the amateur satellite community. A final copy must be submitted by September 1st for inclusion in the printed proceedings. Abstracts and papers should be sent via e-mail to k9jkm (at) amsat (dot) org. (ANS)

**
THE SOCIAL SCENE: N6R FROM THE REAGAN LIBRARY FOR FIELD DAY 2010
And a reminder that for the tenth consecutive year, the callsign N6R will operate as a Field Day station from the grounds of the Ronald Reagan Presidential Library and Museum in Simi Valley, California. This, to commemorate the lives of President Ronald and Mrs. Nancy Reagan.
Joining the Ventura County Amateur Radio Society which is the primary organizer will be a number of other local groups. These include the Amgen Amateur Radio Club. The Conejo Valley Amateur Radio Club the Simi Settlers Amateur Radio Club, the Ventura County Amateur Radio Club and the Hollywood Hills QRP Contest Club.
N6R will operate from 1800 UTC on June 25th to 1800 UTC on June 27th with up to 16 stations on all of the High Frequency bands. Also listen out for the N6R call on the VHF and UHF bands from 6 meters on-up using many modes including fast-scan ATV and satellite operations.
If you are lucky enough to make contact with N6R this year, please QSL with an Self Addressed Stamped Envelope to Ventura County Amateur Radio Society in care of Peter Heins, N6ZE, 1559 Norwich Ave., Thousand Oaks, CA, 91360 (N6ZE, W6AQ)

NAMES IN THE NEWS: KJ4GQV BALLOONS ACROSS ENGLISH CHANNEL TRACKED BY APRS

A ham has successfully crossed the English Channel using helium filled party balloons. Jonathan Trappe, KJ4GQV, recently strapped himself to 54 balloons and floated across the English Channel.

Tied to an assortment of red, green, yellow, blue and white balloons the thirty-six year old Trappe is from of Raleigh, North Carolina made his trip across the Channel on May 28th. KJ4GQV took off from a field at the Kent Gliding Club, near Ashford in the UK. He landed , and landed at 7:42 UTC in a farmer's vegetable patch a few miles from Dunkirk., France.

To make his flight KJ4GQV was strapped in a specially equipped chair below a bright cluster of balloons. About five hours later, he lowered himself into a French field by cutting some of the balloons away. His equipment list didn't stop at balloons and a chair. It also included an aircraft transponder, aircraft radios, emergency locator beacon, in-flight satellite tracking, and am oxygen system. He also carried APRS gear that provided real time tracking of his KJ4GQV callsign via his website.

Trappe says crossing wasn't a matter of just grabbing a few balloons. Rather KJ4GQV says on his website that he made a trip in March to gain clearance from French and British aviation authorities. He also to gain permits for the trip from customs and immigration offices on both sides.

Jonathan Trappe, KJ4GQV, is no stranger to balloon flights. Two months ago he claimed the record for the longest free-floating balloon flight. This, after spending 14 hours cruising over North Carolina and traveling 109 miles. On another flight, his website says he ascended to 17,930 feet, just below controlled airspace. You can read more on-line at www.clusterballoon.com/ (Various published reports)

**

RADIO RECORDS: FIRST TWO WAY CONTACT MADE ON 8.97 KHZ

What is believed to be the first Amateur Radio two-way contact on 8.97 kHz using truly radiated fields took place on Friday, June 4, 2010 between DJ2LF and DF6NM. The distance was over a is 20.2 km path.

Both DJ2LF and DF6NM were using small backyard Marconi antennas for transmit and receive. DJ2LF antenna had an estimated effective height of about 5 meters while DF6NM was at about 7 meters. Both had an effective radiated power of about five microwatts using a 100 watt car radio amplifier as a transmitter. A computer and sound car with no preamplifier served each station as a receiver.

Both stations employed a special "micro-QSO" format,. This system is designed to exchange the minimum single-bit report and confirmation in only three turnovers, each containing a single dash. Station identification was by frequency alone. (DF6NM)

**

HAM RADIO IN SPACE: THREE HAMS IN NEXT ISS CREW

A new crew with two licensed U-S hams will soon be on board the International Space Station. Set to go on-orbit are U.S. astronauts Douglas Wheelock, KF5BOC and Shannon Walker, KD5DXB, They will be joined by Russia's Fyodor Yurchikhin, RN3FI, on for a mission lasting about six months.

Wheelock, Walker and Yurchikhin will arrive on Russian Soyuz booster launched on June 15th. They will be onboard the orbiting space station when the final shuttle flight of a United States Space Shuttle departs from its last planned mission to the lab in November before the fleet is finally retired. That flight will use the shuttle Endeavour.

The new three-person crew will join Russian commander Alexander Skvortskov, NASA flight engineer Tracy Caldwell Dyson and Russia's Mikhail Kornienko, who have been on the orbiting laboratory since April and are set to return to Earth shortly. A Russian Progress cargo carrier is also due to arrive at the orbiting lab later this month. (NASA, AMSAT, others)

DX

In DX, the long anticipated Spratley Island DXpedition slated for January of 2011. This according to VK3FY has just returned from The Philippines where he held high level discussions related to the upcoming DX0DX operation. The series of meetings included one with the current Municipal Mayor of Thitu Island where the DXpedition will be mounted. Another was held with the Mayor-Designate who will take office in September. Other discussions were held with military authorities plus officials of the Philippines Amateur Radio Association which is strongly in support of the DXpedition. VK3FY says that those face-to-face discussions enabled the amateur radio and humanitarian aims of the DXpedition to be fully explained and agreed. It also clarified the requirements of both local and federal authorities. The operation will last three weeks and require upward of 30 operators.

Bill Moore, NC1L, ARRL Awards Branch Manager, reports that 2010, E4X operation from Palestine operation will now be accepted for DXCC credit. If you worked this operation, the QSL route is via EA5RM.

JA6CNL, will be active as KH0N from Saipan between June 18th through the 22nd. His operation
will include the All-Asian DX CW Contest on June 19th and 20th. Outside the contest, he will spend some time on the 80, 30, 17 and 12m bands operating only Morse. QSL via his home callsign.

VE3ZIK will be active from Bilice on the Croatian coast between July 1st and September 27th as 9A stroke VE3ZIK. He will try to activate several I-O-T-A Islands in the EU-170 group as well as take part in the RSGB Islands on the Air or I-O-TA Contest. QSL via DO7ZZ.

Lastly, VE3EY will be active as portable FJ from St. Barthelemy Island from November 22nd to the 30th. Operation will be on 160 through 10 meters using CW, SSB and RTTY. QSL via his home callsign.

Four members of Yamakto Amateur Radio Club will be active from Yap Island in Micronesia between June 22nd and the 29th. The team will brings five transmitters and one 500 watt amplifier with plans to operate 160 through 6 meters using CW, SSB and RTTY. They will be on the air 24 hours, operating at least two bands and a 6 meter beacon, but with a maximum five bands

operating as time permits. This is their 19th DXpedition since 1993. Please QSL as directed on the air.

(Above from various DX news sources)

**

RADIO SCIENCE: THE WORLDS BIGGEST RADIO TELESCOPE

And finally this week, word that the world's biggest radio telescope has been established in The Netherlands. Amateur Radio Newslines Bill Pasternak, WA6ITF, takes a look at its very unusual design:

--

Scientists in the Netherlands revealed the largest radio telescope in the world while claiming that it is capable of detecting faint signals from almost as far back as the Big Bang that many believe created the universe.

Called the LOFAR the acronym stands for LOw Frequency Array, its owner is the Netherlands Radioastronomy Institute which says that its construction is unique. Iinstead of a traditional large dish the new radio telescope is made up of 25,000 small antennas measuring between 50 centimeters and two meters across.

The main unit is based near the northeastern Dutch town of Assen, but the antennas are spread out across the rest of the Netherlands and also in Germany, Sweden, France and Britain. When you combine all the antennas you get a giant telescope with a diameter of about 1,000 kilometres or about 600 miles.

A unique design for the modern times we live in.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

The data gathered by the telescope will be processed by a supercomputer at the University of Groningen and then transmitted to the Netherlands Radio Astronomy Institute. (W0WOI via VHF Reflector)

GB2RS NEWS

Sunday 20th June 2010

The news headlines

Errors on the 5MHz NoV

Special event callsign for the National Hamfest

VHF and Up stream at the RSGB Convention

If you have renewed your 5MHz Notice of Variation licence with Ofcom, you may have noticed a mistake on the paperwork. Your callsign might have an extra letter added, for example G4LFM will have become GE4LFM. If this has happened you need to contact Ofcom as soon as possible to correct this error. They will re-issue paperwork accordingly with your correct callsign. Please note that you must contact Ofcom direct and not the RSGB as only Ofcom can correct the error.

The National Hamfest is run by the RSGB in conjunction with Lincoln Short Wave Club on 1 and 2 October. Lincoln Short Wave Club has been issued with GB10NH for the show and for use during HAM WEEK UK when it will be activated from the club's HQ near Lincoln. At the National Hamfest, the station will be running from the Information Tent. The operators would like all visiting amateurs and SWLs to bring a QSL to pin on the visitors' board in the tent.

The RSGB Convention that takes place between 8 and 10 October. There will be a wide variety of talks and lectures over the weekend. Many visitors will have worked and recognise the call GM4CXM on VHF and UHF and know that Ray works long distances seemingly easily. He certainly is one among a growing band in GM-land who are active on the higher bands. Well, Ray will tell you it isn't always easy to work these long distances but it can be done with perseverance and attention to detail in operating procedures as well as with the right equipment. As part of the VHF and UP stream Ray will be giving a guide to DXing and contesting on 23cm and 70cm. His talk will cover equipment, antennas, operating tips and other resources to work DX over 700km every day. His talk is aimed at beginners but that doesn't mean that many old hands won't learn a thing or two as well.

The Technical stream at the RSGB Convention has announced that there will be a talk on Electrical Safety for the Radio Amateur by Rupert Thorogood, G3KKT. He will describe the changes with the coming into effect of the 17th Edition in 2008, especially regarding Additional

Protection. Rupert will demonstrate the full range of tests that are to be carried out on RCDs and there will be a handout on how to approach nuisance tripping. Rupert is an ideal lecturer for this subject as he is a registered Electrical Inspector, a Chartered Engineer and a Fellow of the Institution of Electrical Engineers.

Dave Bourne, the QSL sub manager for the BRS, short wave listener series of QSL cards is stepping down from his post, which he has held for 35 years. The Society and the listening community is greatly indebted to Dave. His place is being taken by another long time avid listener, Rob Small, BRS8841. All cards waiting and collection envelopes have been transferred to the new manager whose details can be found in the members section of the RSGB website and will appear in the 2011 RSGB Yearbook.

This year sees the 25th AMSAT-UK International Space Colloquium and Jim Heck, G3WGM is looking for pictures of the early years. The first event was held in Harrow School. It later moved to the University of Surrey and recently to the Holiday Inn at Guildford. Jim is looking to have a display of early pictures at this year's event, which takes place on 31 July and 1 August. If you have any pictures of the early years please let Jim know by email to g3wgm@amsat.org. The Colloquium is open to all radio amateurs and short wave listeners. For further details see www.uk.amsat.org/colloquium.

South Bristol ARC will be starting a new Intermediate course on 1 July. The venue is the Community Centre, rear of 122 to 124 Novers Park Road, Filwood, Bristol. The lead instructor will be Andrew Jenner, G7KNA and he will be holding an induction session on Thursday 24 June. Candidates are invited to contact Andrew by e-mail to g7kna@ukfsn.org.uk as soon as possible in order to have their names registered.

One of the North-West team of GB2RS readers, John G0NAJ, had open heart surgery on Tuesday 15 May. We wish him all the best, and look forward to his return on GB2RS. In the meantime, the other readers should be able to maintain a nearly full service, although they may not be able to read on 51.530MHz on the evening of 11 July.

On Sunday 20 June, Adrian Johnson, M0NOD, will be cycling the 54 mile London to Brighton bike ride in aid of the British Heart Foundation. He will be taking along his handheld and accessing GB3HY and GB3SR along the route. He asks that local amateurs listen for his calls and have a quick chat.

And now for the details of rallies and events for the coming week

Today, Sunday 20 June, sees the Newbury Radio Rally and Boot Sale at Newbury Showground, next to M4 junction 13. There will be a big display area of amateur radio stations, exhibitions, special groups, clubs and societies. Talk in is on S22, car parking is free and admission is ?2. Details from rally@nadars.org.uk.

The West Of England Radio Rally takes place on Sunday 27 June at the Cheese & Grain, Bridge Street, Frome, Somerset BA11 1BE. There will be

trade stands, an RSGB bookstall as well as catering facilities and easy access for disabled visitors. Further details from Shaun, G8VPG, on 01225 873 098.

The Hamtronic show in Friedrichshafen, Germany takes place from Friday 25 June until Sunday 27. For the first time as part of the international radio operator exhibition there will be a Contest University dedicated to training beginners and professionals. The 35th annual show also happens to coincide with the 60th anniversary of the founding of the German Amateur Radio Club, DARC. There will be the usual strong RSGB presence at Friedrichshafen including a large book stall.

Now for the news of special events

GB2GP will be on the air from Gilwell Park, the headquarters of the Scout Association, today, 20 June. They hope to be running on all the usual HF and VHF frequencies as well as EchoLink. They should be found at or around the Scout frequencies, the most common of which are 3.690, 7.090 and 14.290MHz.

Today, 20 June, Chorley and District Amateur Radio Society will be putting on special event station GB0AH from Astley Hall Museum, Astley Park, Chorley, from 9.30am to 6.30pm. This is celebrating International Museums on the Air and they will be active on HF & 2 metres.

Jack, G3PWK will be operating GB70AAF for the Anniversary Airborne Forces on 22, 26 & 27 June.

Scarborough Special Events Group will be on the air as GB1AFD for Armed Forces Day, over the weekend of 26 and 27 June. Scarborough will host a parade of more than 400 soldiers celebrating their recent return from Afghanistan. The town's adopted Warship HMS Explorer will be in the bay and there will be fly past by a Spitfire.

Each year on 23 June the Old Cornwall Society holds midsummer bonfire celebrations whose origins date back over centuries. The Callington Amateur Radio Society is co-ordinating special event stations linking the Cornish sites and those in other countries. If you would like to be part of this project please contact Mike Bailiff, M0XGG by e-mail to mike@m0xgg.eclipse.co.uk or telephone 01822 834 373.

And now the HF DX news compiled from 425 DX News and other sources.

Four members of Yamakto ARC will operate from Yap Island, which is IOTA reference OC-012, between 22 and 29 June. They will operate 6m through to 160m using SSB, CW, RTTY. Callsigns will be within the V63 range and you should listen for QSL information.

J48S will be active from Skopelos Island, which is IOTA reference EU-072, from 19 to 26 June. QSL via SV2FPU. More details can be found on www.qrz.com.

Vincent, F5MJV will be in Djibouti until at least until 2011 and more probably until 2012. His callsign will be J28JV. At first he will be on

air on Friday and Saturday from his military location. He is hoping to be able to set up an antenna at home so he will be on the air also in the evenings. QSL via F5NQL and full details appear on QRZ.com.

Now the contest news

The 50MHz Trophy contest is taking place today, 20 June, until 1400UTC. The exchange is signal report, serial number and locator.

On 22 June it is the 50MHz UK Activity Contest, which runs from 1900 to 2130UTC. You can use all modes on the band and the exchange is signal report, serial number and locator.

24 June sees another leg in the 80m Club Championship. This SSB leg takes place between 1900 and 2030UTC. The exchange is signal report and serial number.

The 4th 70MHz Cumulative contest takes place on 27 June between 100 and 1200UTC. Using all modes on the band, the exchange is signal report, serial number and locator.

Finally for this week, the 14th Marconi Memorial contest tales place on 26 and 27 June from 1400 to 1400UTC. Using CW on the 1.8 to 28MHz bands, the exchange is signal report and serial number. There are sections for three differing power levels and single- and multi-operator stations.

Now the solar factual data for the period from the 7th to the 13th of June, compiled by Neil Clarke, G0CAS on 14 of June.

Solar activity started like recent weeks at very low levels. The solar disc had sunspots visible every day. During the 11th a new group emerged and grew rapidly. Early the next morning it produced a M2/SN solar flare taking solar activity to moderate levels. A further M class flare occurred on the 13th from a different sunspot group. Solar flux levels increased from 69 units on the 7th to 76 by the 12th and the 13th. The average was 71 units. The 90 day solar flux average on the 13th was 76 units, that's two units down on last week. X-ray flux levels increased and peaked at B1.3 units and the average was A7.4. Geomagnetic activity was quiet every day and the average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline to 290 kilometres per second by the 9th. Wind velocities then increased back to around 450 kilometres per second during the 13th. Particle densities were low throughout. Bz varied no more than minus 4 and plus 6 nanoTeslas during the period.

HF propagation was good for the season and the stage of the cycle. Sporadic-E occurred every day, including a 50MHz opening between Japan and Europe and one on 144MHz between the UK and Greece on 144MHz on the morning of the 11th.

And now the solar forecast. This week the slightly more active side of the Sun is expected to be looking our way. Solar activity is expected to be at very low levels though. There is as always the possibility that

activity could increase unexpectedly. Solar flux levels should be in the 70's for most of the week. Geomagnetic activity is expected to be quiet until towards next weekend when a recurring coronal hole is expected to arrive and last over the weekend. MUFs during daylight hours at equal latitude should be around 18MHz for the south and 15MHz for the north. Darkness hour lows are expected to be about 11MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 19MHz. The best time to try this path will be between 1500 and 2100 hours. Sporadic-E is expected to take place most days with openings to 144MHz during the more intense openings.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

First, some advance information. Tamworth Amateur Radio Society will be hosting a Train the Trainers course on 31 July. For more information contact Bob, G1BCZ on 0777 7694415 or by email to g1bcz@btinternet.com. Places are limited and early booking is recommended.

On Monday 21 June Gloucester Amateur Radio & Electronics Society is having an outdoor field operating session and draw to mark the longest day. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 21 June Kettering & District Amateur Radio Society is hosting a visit by Welland Valley Amateur Radio Society. For more information on Kettering contact Stephen Froggatt, G1LMN, by email to stevelornaf@aol.com. For details of Welland Valley ARS contact Peter D Rivers, G4XEX, on 01858 432105.

On Monday 21 June South Birmingham Radio Society is having a committee meeting. Contact Don, on 0121 458 1603.

On Monday 21 June Wythall Radio Club continues its Intermediate course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 22 June Derby & District Amateur Radio Society is holding a quiz night. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 22 June Kettering & District Amateur Radio Society is having an operating night. Contact Stephen Froggatt, G1LMN, by email to

stevelornaf@aol.com.

On Tuesday 22 June Loughborough & District Amateur Radio Club is having a talk on 1296MHz and up by Andrew, G7SEG. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 22 June Mid-Warwickshire Amateur Radio Society is having a picnic from 10.30 at Bidford-on-Avon. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 22 June Telford & District Amateur Radio Society is preparing for VHF field day and an oddity night where members are invited to bring along a strange thingy for others to guess what it is. Contact Mike, G3JKX, on 01952 299 677.

On Wednesday 23 June Bolsover Amateur Radio Society is having a fox hunt. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 23 June Kettering & District Amateur Radio Society is having a gentleman's group afternoon followed by an open evening from 7-9pm when all friends of KDARS are cordially invited to their new facility at Harrington Aviation Museum, NN6 9PF. Contact Stephen Froggatt, G1LMN, by email to stevelornaf@aol.com.

On Wednesday 23 June Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 23 June Midland Amateur Radio Society is having laptop computer training and Morse classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 23 June South Notts Amateur Radio Club is having ten-minute talks by members. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Thursday 24 June Brigg and District Amateur Radio Club is meeting at The Brigg and District Servicemen's Club, Coney Court, Brigg to discuss planning for the VHF field day contest. For further details please contact John, 2E0iii on 01652 632038.

On Thursday 24 June Kettering & District Amateur Radio Society is having a training night. Contact Stephen Froggatt, G1LMN, by email to stevelornaf@aol.com.

On Thursday 24 June RAF Waddington Amateur Radio Club is having a shack and chat night with radio and antenna play. Details from Judy Rowlands, on 07544 456422.

On Thursday 24 June Tamworth Amateur Radio Society is having a talk on baluns and ununs by Simon, MW0GSR from Snowdonia Radio Company. Contact Robert Williams, G1BCZ, on 0777 7694415

On Friday 25 June Coventry Amateur Radio Society is having a HF, VHF and UHF radio workshop. Contact John, G8SEQ, on 07958 777363.

On Friday 25 June South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 26 June Kettering & District Amateur Radio Society commences its weekend event for International Museums on the Air, operating GB2HAM at Harrington Aviation Museum. Contact Stephen Froggatt, G1LMN, by email to stevelornaf@aol.com.

On Saturday 26 June Lincoln Short-Wave Club is putting G5FZ on the air from the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 21 June Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 21 June Sheffield Amateur Radio Club is having a talk on amateur radio in Germany by Roland Karin, M0NUE. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 21 June Thornton Cleveleys Amateur Radio Society is holding a barbecue with John, G4FRK. Details from John Foster, 2E0EZY, on 01253 399377.

On Monday 21 June Workington and District Radio and IT Group is having a talk on vertical antennas by Steve, G0MTD. For more information get in touch with Barry Easdon, G0RZI, on 01946 812092.

On Tuesday 22 June Chester & District Amateur Radio Society is conducting outside portable operations at Frodsham Hill. Details from Barbara Green on 07957 870770.

On Tuesday 22 June Otley Amateur Radio Society is taking part in the 50MHz UKAC. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 23 June Hornsea Amateur Radio Club is having a fox hunt with G4YTV and G3RMX. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 23 June Mid-Cheshire Amateur Radio Society is having a general chat evening with shack operations. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 24 June Brigg and District Amateur Radio Club is meeting at The Brigg and District Servicemen's Club, Coney Court, Brigg to discuss planning for the VHF field day contest. For further details please contact John, 2E0iii on 01652 632038.

On Thursday 24 June Hornsea Amateur Radio Club is taking part in the 80m SSB Home Stations Club Contest. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 24 June South Manchester Radio and Computer Club is holding its summer solstice barbecue. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 24 June Wakefield & District Radio Society is having a table-top sale, barbecue and Treasurer's birthday celebrations. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 25 June East Cleveland Amateur Radio Club is having a radio components catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 26 June East Cleveland Amateur Radio Club commences its weekend event operating GB0ZLB from The Zetland Lifeboat Museum at The Esplanade, Redcar, TS10 3AH, for International Museums weekend. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

GEARS meetings for June, July and August will now be on the 1st and 3rd Monday of each month. Details from Peter Lowrie, MI5JYK, by email to mi5jyk@yahoo.co.uk.

NEWS FOR SCOTLAND

On Tuesday 22 June Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Tuesday 22 June Livingston & District Amateur Radio Society is having Morse code practice. For more information contact Norman, on 07740 946192.

On Wednesday 23 June Ayr Amateur Radio Group is having a summer wind-up. Contact Charlie, MM0GNS, on 01563 551704.

On Wednesday 23 June Cockenzie & Port Seton Amateur Radio Club is having a 20m activity night. More information from Bob, GM4UYZ, on 01875 811 723.

On Wednesday 23 June Lothians Radio Society is having a barbecue. Contact Andy Sinclair, by email to lrs_secretary@moosedata.com.

On Friday 25 June Cockenzie & Port Seton Amateur Radio Club is having a normal club night. Please note the change of night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Sunday 20 June Newbury & District Amateur Radio Society is running the Newbury Radio Rally & Boot Sale. Details from Richard, G3ZGC, on 01635 46241.

On Monday 21 June Braintree & District Amateur Radio Society club is having a barbecue. For more information contact John, M5AJB, on 01787 460 947.

On Monday 21 June Burnham Beeches Radio Club is having a visit by RSGB regional manager Alison Johnston, G8ROG. Contact Dave, G4XDU, on 01628

625 720.

On Monday 21 June Surrey Radio Contact Club is having a fix-it and natter night. More information from Ray, G4FFY, on 01732 357474.

On Tuesday 22 June Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 22 June Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 22 June Dorking & District Radio Society is having a talk on air traffic control by Ross MacDonald from NATS, Gatwick. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 22 June Horndean & District Amateur Radio Club is having a talk on the Volks Electric Railway by Ian Gledhill. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 23 June Chesham & District Amateur Radio Society is having a construction project evening. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 23 June Darenth Valley Radio Society is preparing for VHF Field Day. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 23 June Farnborough & District Radio Society is having a talk on the BBC by Tony Crake, G0OVA. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 23 June Hastings Electronics and Radio is having a barbecue and operating /p all day. Details from Gordon, on 01424 431 909.

On Wednesday 23 June Havering & District Amateur Radio Club is having an informal club evening. Contact John, M0UKD, on 07817 365354.

On Wednesday 23 June Newbury & District Amateur Radio Society is having a talk on electromagnetic theory without maths. Details from Richard, G3ZGC, on 01635 46241.

On Wednesday 23 June Norfolk Amateur Radio Club is making final preparations for the Barford Rally. Details from Chris Danby, G0DWV, on 01603 419204.

On Wednesday 23 June Peterborough & District Amateur Radio Club is having a demonstration and talk on kite-borne antennas by Roger, G4ROJ. Details and venue information from David Howlett, M0VTG, by email to padarc@tesco.net.

On Wednesday 23 June Worthing & District Amateur Radio Club is having a discussion evening. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 24 June Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Phil, G0JSG, on 01502

585448.

On Thursday 24 June Reading & District Amateur Radio Club is having a talk on high voltage power distribution to railways by Richard O'Keeffe, G0FFL. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 24 June Shefford & District Amateur Radio Society is planning for VHF NFD with Ken, G4YRF. Details from David, G8UOD, on 01234 742 757.

On Friday 25 June Mid-Sussex Amateur Radio Society is having a windmills evening at Jack and Jill Windmills. Contact Peter, G4AKG, on 01444 239371.

On Friday 25 June Whitton Amateur Radio Group is looking at contest logging software. Details on the web at www.warg.info.

On Saturday 26 June Gorleston Amateur Radio Society is having a lunch time meeting at the Short Blue Hotel, Gorleston. Contact David, G3OEP, on 01493 662 323.

NEWS FOR THE SOUTH WEST

On Monday 21 June Appledore & District Amateur Radio Club is having a mobile rally event. Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

On Wednesday 23 June Callington Amateur Radio Society is running a special event station for the St. Johns eve bonfire on Kit Hill with the Old Cornwall Society. More information from Chris Harris, G7UDX, on 07973 418 371.

On Wednesday 23 June Taunton & District Amateur Radio Club is having a talk on mobile aerials by Chris, G4DCH. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 23 June Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 24 June South Bristol Amateur Radio Club is on the air, supervised by David, G7PKJ. Contact Len, G4RZY, on 01275 834 282.

On Thursday 24 June Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Thursday 24 June Yeovil Amateur Radio Club is on the air and having a committee meeting. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 25 June North Bristol Amateur Radio Club is preparing sales tables for the West of England Rally. Details from Dick on 01454 218362.

On Saturday 26 June Appledore & District Amateur Radio Club is running a special event station at Abbotsham Fete. Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

On Sunday 27 June Trowbridge & District Amateur Radio Club is running a club table at the West of England Rally. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

NEWS FOR WALES

On Monday 21 June Dragon Amateur Radio Club is having a primer on the N1MM contest logging program. Contact Stewart Rolfe, GW0ETF, on 07833 620733.

On Tuesday 22 June Marches Amateur Radio Society is having a talk and demo on kite aerials by Roger, G4ROJ. For more information contact Dave, MW0AYM, on 01691 777242.

462. new SOUTH EAST EUROPE CONTEST CLUB

Newsgroup: rec.radio.amateur.misc
Date: 2010-06-19 12:57:25 UTC
From: Romeo S52RU <romeo.rabic@gmail.com>

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 20 JUNE 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (callsign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

MAY 2010 RAE CALL SIGNS NOT YET AVAILABLE

SARL YOUTH DAY SPRINT

IARU DELEGATION IN ACTION NEXT WEEK

NAME THE CUBESAT PROJECT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

MAY 2010 RAE - CALL SIGNS NOT YET AVAILABLE

The SARL regrets to advise candidates who recently wrote the radio amateur exam, that call signs have not yet been issued by the Authority. The person responsible for issuing the call signs has been allocated to process applications for the 2010 FIFA World Cup and has had to focus on dealing with all Spectrum licensing requests for this epic event.

The SARL is in constant contact with ICASA and will issue the call signs as soon as they become available. Please do not contact ICASA in an effort to speed up the process, as it will just create frustration for both yourself, the SARL - as well as the Authority - and may result in further delays.

The obtaining of call signs is a high priority and we are working closely with the relevant people to have this resolved as soon as possible.

ERRATUM: 160 m QSO PARTY ON 21 JUNE

PLEASE NOTE: There is a misprint in the Contest Manual. The 160 m QSO party on Monday 21 June runs up to 00:00 UTC (or 02:00 CAT).

SARL YOUTH DAY SPRINT

Thank you to all the operators who made their homes and shacks available to the youth on Wednesday. Now you must ensure that all the participants fill in a log sheet and post it to: SARL Youth Sprint, P.O. Box 1049, Kathu, 8446, or e-mail it to youthsprint@sarl.org.za before or on 1of July. All participants under the age of 26 will receive a certificate

IARU DELEGATION IN ACTION IN GENEVA NEXT WEEK

Working Parties 1A and 1B of the International Telecommunication Union's Study Group 1 will meet in Geneva from 21 to 28 June. A major item of discussion will be the protection of radio services from interference from Broadband-over-powerline (BPL), called Power Line Communications (PLC or PLT) in Europe and Africa.

The International Amateur Radio Union (IARU) has already contributed to the ITU-R report SM2158: "The Impact of Powerline Telecommunication Systems on Radio Communication Systems operating in the LF, MF, HF and VHF bands below 80 MHz". The report shows that the acceptable criterium for degradation of the HF radio noise floor caused by BPL, is defined as being 0,5 dB. Work in WP1A will focus on the protection of radio services from the effects of BPL in the range 80 - 200 MHz.

The IARU delegate to Study Group 1 and its working parties is Peter Chadwick, G3RZP. One of the items Chadwick has prepared for the meetings is a report on the effects of intermodulation in power supplies, causing the amateur band frequency notches in the BPL spectrum to be degraded. The report has been prepared from the work by Richard Marshall, G3SBA, published in the RSGB's member journal RadCom. It also emphasizes the difficulty such effects could have on the BPL system itself.

Chadwick will also present protection criteria for those amateur stations operating in the 2 m band. Chadwick, along with Ian White, GM3SEK, who helped prepare the criteria, said it is considered that the Amateur and Amateur Satellite Services require protection that BPL interference does not exceed -45 dB µV/m in the main lobe of the antenna, with a separation between the antenna and the BPL installation being at least 10 m.

Chadwick further said that there are a number of non-amateur services that could suffer interference from BPL or its harmonics, such as applications of social alarms for the elderly, pagers and medical implant telemetry, as well as broadcast services.

What the aggregation of radiation is concerned, he said the following about aircraft navigation and communications: "When the differences are

taken into account between the BPL, the mains leads and the social alarms and medical implant 'base' stations and the like, the acceptable levels of radiation to protect the amateur service are of the same order as those needed to protect these other services."

The SARL is a member of the IARU, which allows South Africans to benefit significantly from the work the IARU is doing to protect the amateur service. The IARU's strengths lie in the number of member societies and the number of members they have. This is one of the most important reasons why radio amateurs should support the SARL with their membership. If you are not already doing so, take action now and join. Details on www.sarl.org.za.

BOOKING FOR THE PRETORIA PIC COURSE IS NOW OPEN

Bookings for the PIC course on14 August in Centurion can now be made. Full particulars, as well as the booking form are available on the web at www.sarl.org.za. Click on RTA and follow the links. The four-hour course will be presented by John Williscroft, ZS6EF, using various audiovisual methods. At the end of the course you will be able to work with PICs and programme them for other projects. Allow an additional hour for question time and a refreshment break. The closing date for booking is 2 August.

If you have already booked, please check that your detail is recorded on the website. You can access the page by going to www.sarl.org.za, click on RTA and then follow the links to the booking page. If your booking is not reflected, please send an e-mail to rta@sarl.org.za. No other booking confirmation is sent.

LEARNERS TO BUILD PAYLOAD FOR HABEX

The SciBono Discovery Centre (ZS6SCI), in association with the Gauteng Department of Education initiated the High Altitude Balloon Experiment project, called HABEX.

HABEX was inspired by the BACAR project. The objective is to involve schools in Gauteng in the entire process of developing and building a payload that will be launched into high altitude using an unmanned meteorological balloon. SciBono approved a budget for the building of HABEX and approval has been obtained from CAMU to launch the balloons on 24 July. We plan to launch from the Klerksdorp Airfield.

Ten school teams are involved and several radio amateurs have also opted to join in this exciting project. A team of radio amateur engineers and designers are assisting the schools in developing the payloads. You can also join in the activities planned for the HABEX 2010 Launch.

"We are so enthused by the project that a world record attempt will also be made to launch the unmanned balloon to an altitude exceeding 38 000 m," Chris Gryvvenberg, ZS6COG, told SARL NEWS. "To achieve this, special balloons have been ordered to carry the payload to this

altitude. Currently ten payloads are under construction."

The weekend of 23 - 24 July will see many radio amateurs and learners from schools camping out and preparing their missions in true Space Programme Style with a mission control, search and recovery teams and even a launch pad. "If you want to be part of this exciting project please phone the SciBono Discovery Centre on 011 639 8400 and ask for Fannie Matumba. We still need many search and-recovery teams to assist in this massive undertaking," Chris said.

NAME THE CUBESAT PROJECT

SA-AMSAT is inviting radio amateurs to propose a name for its CubeSat project. The project was announced at the recently held Space Symposium and will involve the design and construction of a CubeSat. A CubeSat is a 10 cm cube with a mass of up to 1 kg. The project name should be a single word in any of South Africa's official languages and reflect the spirit of the project. A good example is the name given to the Around-the-world-balloon project which is called "lalela", the Zulu word for "listen". The winning entry will receive a satellite handbook. Entries should be sent by e-mail to saamsat@intekom.co.za. The closing date is 15 July.

RESULTS OF THE ANTIQUE WIRELESS ASSOCIATION HF QSO PARTY

Following are the results from the AM section: First, Jan Botha, ZS4JAN; Second, Theunis Potgieter, ZS2EC, and Third, the AWA station operated by ZS6ADY.

In the SSB section: First, Jan Botha, ZS4JAN; Second, Pieter Bosman, ZS3AOR, and Third, Theunis Potgieter, ZS2EC.

A total of 54 stations took part in the AM section but there were only 3 logs received, which is disappointing after such a good turnout. In the SSB section a total of 91 stations participated and only four logs were submitted with one control log from ZU1BEN.

Our thanks to all those who participated in the contest.

CLUB NEWS

The West Rand Amateur Radio Club is hosting its next flea market at 12:00 on Saturday 26 June at the clubhouse at Kroton Street, Weltevredenpark, Roodepoort. Everyone is most welcome. For more information, contact Joop, ZS6C, at 082 342 3280.

The Northern Cape Amateur Radio Club held their Annual General Meeting on Wednesday 16 June at the Kathu Technical College. The following Committee members were elected:

Chairman: Johan Smit , ZS3AAK; Vice Chairman: Sian van Deventer, ZS3SVD; Secretary: Carel Reineke, ZU3K; Treasurer: Roy Walsh, ZS3RW; Public Information Officer: Gerhard Coetzee, ZS3TG, and Youth Coordinator: Hugo Coetzee, ZU3H, who will be assisted by the rest of

the youth in the club.

The next ZS6PTA Mega flea market, as advertised on Swop Shop, will be held on Saturday 26 June at the Pretoria Motor Club in Silverton from 08:00 to 11:00. For more information or to book a table, please contact Almero, ZS6LDP, on 083 938 8955. You can also send an e-mail to almero@up.ac.za.

UHF/VHF INDABA

The SARL will host a VHF/UHF/MICROWAVE Indaba on Saturday 26 June 2010 at the National Amateur Radio Centre at 12:00 for 13:00. The agenda includes discussions on VHF/UHF/Microwave operating , contesting and contest rules. Attendance is free, refreshment will be served and participants will take part in a lucky draw for an ARRL Antenna Book and free software.

To assist with arrangements please confirm attendance by email by 21 June. The address: contest@sarl.org.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels, although a few tiny spots are now visible in the northern hemisphere. The sun is waking from a deep slumber and in the next few years we expect to see much higher levels of solar activity. The effective sunspot number is expected to be less than 10 for the coming week.

20 m will provide the best opportunities for DX followed by 15 and 17 m. Conditions to India will be good from the afternoon onwards. During the late afternoon and in the early evenings it will be first-rate towards Europe. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are becoming likely on 20 m at sunrise. Contacts with Brazil and South America are becoming difficult.

Local conditions are going to be good during the daytime on 40 m. With the change of season 30 m has taken over from 20 m for contacts over the longer distances during the middle of the day. With the decrease in noise levels 80 m is the best for the shorter distances and also during the early mornings and late afternoons.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

12 - 26 June - ZS1VTS Voortrekker camp, Southern Cape; 21 - 28 June - IARU working parties delegation in Geneva; 21 June - Confirm attendance at VHF/UHF/MICROWAVE Indaba to contest@sarl.org.za; 26 June - West Rand Amateur Radio Club flea market; 26 June - UHF/VHF indaba at the NARC at 12:00; 26 June - ZS6PTA mega flea market; 15 July - Last date to submit mane for CubeSat project; 18 July - Intechnet at 19:30 on VHF-/UHF- and

microwave matters; 23 - 24 July - Preparation and launch of the HABEX balloon project; 24 July - RTA symposium in Cape Town; 2 August - Closing date for PIC course in Pretoria; 12 - 14 August - International EME Conference, Dallas, Texas; 14 August - PIC course in Pretoria; 21 August - RTA symposium in Port Elizabeth; 31 August - Closing date for submission of proposals for the 2011 SARL Contest Manual; 18 September - RTA symposium in Gauteng; 30 September - closing date for Phase 1 of the Innovation project.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Leon, ZS4V, and edited by Jannie, ZR6PHD.

Thank you for listening, 73.

/EX

Last we heard, Woger is busy hiding from the Heils.
Seems that they paid Woger a visit...a rather unwelcome visit at that.
They knocked at Woger's door but of course Woger didn't answer.

What irked Woger is that the Heil's documented their visit with photos.

Woger talks tough, but was too cowardly to go out on his front porch to talk
to Mrs. Heil.

466. SPECIAL MMMonVHF Newsletter 2010-06-20

Newsgroup: rec.radio.amateur.misc
Date: 2010-06-20 19:23:20 UTC
From: MMMonVHF News Mailer <nl@mmmonvhf.de>
Message-ID: <201006201712.o5KHCR2q023858@server13.web4a.de>

Hallo dear MMMonVHF friends,

please find below our SPECIAL-NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-06-20
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "FORUM"-page:
http://www.mmmonvhf.de/minibb/index.php

****
Beta release of WSJT8
and a new FORUM- and discussion platform at MMMonVHF
****

First off all, here the original Mail from Joe, K1JT, which he
did spread around yesterday at MoonNet, WSJTGROUPS and others:

To: Users of WSJT
>From: Joe Taylor, K1JT

A beta release of WSJT8 is now available on the WSJT Home Page.

The following text comes from the first page of the WSJT8 User's
Guide, http://www.physics.princeton.edu/pulsar/K1JT/WSJT8_User.pdf

##########

WSJT8 is an experimental version of the familiar weak-signal
communication program WSJT. It offers new protocols or "modes"
optimized for meteor scatter, ionospheric scatter, EME, microwaves,
and QRP at HF. Like the modes in previous versions of WSJT, the new
ones are intended for making minimal QSOs, not for rag-chewing.
WSJT8 modes are not compatible with those in WSJT7. To use the new
modes, transmitting and receiving stations must *both* use WSJT8.

This introductory Userï¿½s Guide explains how the new experimental
modes differ from the familiar modes FSK441, JT6M, JT65, and JT4.
It assumes that you are already familiar with installing and using
WSJT7. Please consider the Guide is a living document; it will be
modified and extended frequently in coming weeks. The online
version can be called up with a single keystroke from within WSJT8,
so you can easily check for updates.

My working hypothesis is that the new modes in WSJT8 offer
significant advantages over those in WSJT7 ï¿½ and that it will
probably make sense to recommend a complete switch-over some months
from now. For that transition to happen in an orderly fashion,

weï¿½ll need a widely held consensus that the change is for the
better. If one of the new modes does not live up to present
expectations, or for another reason itï¿½s decided that some feature
of WSJT7 should be retained, that wish can probably be accommodated.

Input from users will be important following the initial beta
release of WSJT8. I need to know what works, what doesnï¿½t work,
what should be improved, and what enhancements should be given
highest priority. All comments and suggestions will be greatly
appreciated!

Please note: Before using WSJT8, be sure to read this full document
to familiarize yourself with the design goals and motivations for
the new modes, and with the available message formats.

##

If you found and downloaded WSJT8r1943.EXE before receiving this
announcement, you should download and install the program again
from the installation file WSJT8r1944.EXE.

Go here http://www.physics.princeton.edu/pulsar/K1JT/wsjt.html
to find the download link.

After gaining some experience with the beta release of WSJT8
Please share your views and opinions about it!

-- 73, Joe, K1JT

SOURCE: Joe Taylor, K1JT, 2010-06-19 via several VHF/MOON reflector

New FORUM Place on your VHF-DX-Portal MMMonVHF

as well as others of course the Team members of MMMonVHF was testing
the new BETA version of WSJT 8. We all did make our first steps and
experieces and have first off all give some regards and a "big thank
you" to Joe, K1JT, for again offering new tools to the community!

MMMonVHF will offer now a place at the FORUM (calls "WSJT"):

http://www.mmmonvhf.de/minibb/index.php?action=vtopic&forum=14

to have some hints, have some coment and have some discussion
platform about NEW and OLD versions! We did start today with the
recommendation abt. the 3-4 old versions which are still in use
on 144 MHZ EME and MS - there are big differences and so each of
these versions will have its own adavantage!

After we do place the Mail from yesterday and wish to start than
with the results of the MMMonVHF Users, we will pass the infos
later to Joe and maybe he is able to use the one or other idea
or have some solution abt some faults which did occure...

Have fun at the new FORUM Page "WSJT"

73 de Guy DL8EBW
on behalf of the Team of MMMonVHF

** DEADLINE for your NEWS input to MMMonVHF**

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php)
to the next MMMonVHF Newsletter will be next wednesday 2359 UTC...

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 20th June 2010

Silent Key

EI6Q Louis J Robinson, We are sad to have to report the passing of Louis J Robinson, who has been a long time Member of IRTS.

He will be sadly missed by his Family and Friends, May he rest in peace.

Theory Examination - Closing Date

The next Theory Examination for the Amateur Station Licence will be held on Wednesday, 7th July next at 2 p.m. in the ComReg Offices in Dublin and in Limerick at the Limerick Institute of Technology (Room 4B.05). Other centres may be made available where warranted by thenumbers.

The closing date for receipt of applications to sit the examination is Wednesday, 23 June. See Theory Examination in the 'Information' section of the website and Studying for the Amateur Radio Examination in the Downloads section.

Increased Power for Contests

The Society is continuing to pursue with ComReg the question of securing increased power for the duration of contests on a list of international HF and VHF contests still to be finalised. In order to take this matter further, ComReg wish to have submitted a list of licensed amateurs who would be interested in getting permission to operate with increased power for the contests concerned.

Anyone who wishes to have their name included on this list should e mail the contest manager Thos Caffrey EI2JD at contestmanager /at/ irts.ie or to thoscaffrey /at/ hotmail.com

---

80m Counties Contest - Today

A reminder that the IRTS 80 metres counties contest takes place Today , 20th June, from 14:00 to17:00 UTC.

Full rules for this contest are available at www.irts.ie/rules Note in particular the frequencies for this contest: CW 3.510-3.560 MHz; SSB 3.600-3.650 and 3.700-3.775 MHz

The IARU Region 1 Band Plan should be observed, and in addition: CW contacts should be made only in the recognised CW end of the band As this is a local contest, no operation should take place where the Band Plan indicates priority for intercontinental operation

---

CQ Help for Friedrichshafen The Society will again have a stand this year at the Friedrichshafen Rally from 25th to 27th June. Anyone travelling to the rally that is willing to give a couple of hours to help staff the stand please contact Se&#65533;n EI7CD on 01-2851599 or by e mail to ei7cd /at/ gofree.indigo.ie

---

EJ1DD QRV from Clare Island for IOTA Contest Members of the Dalkey Island Contest Group are again travelling to Clare Island this year for the IOTA Contest which is scheduled for the weekend of 24-25 July. The callsign will be EJ1DD and the operators are Paul EI2CA, Peter EI7CC, Sean EI7CD, Seamus EI8BP, Ger EI8CC and Aiden EI8CE.

QSL Manager is EI7CC. For the IOTA Award the reference Number is EU-121 and for the Lighthouse enthusiasts the WLOTA reference is 1935.

There may be some activity by individual team members either side of the contest using their own calls with the EJ prefix. All contacts will be very welcome whether you are a contester or not.

Theory Classes in Clane Michael EI2GKB who has run very successful classed in the South Dublin Radio Club intends to run classes for the Amateur Station Licence examination in Scoil Mhuire, Clane, Co. Kildare in the autumn. If you are interested please contact Michael on 087-2481970.

Magazine Collection-Free to good Home

There are approx 50 issues of Electronics Today from 1978 to 1981 Also approx 50 issues of Hobby Electronics, similar years and about 15 to 20 issues of Practical Electronics from 1979 and 1980.

There are also about 50 books and pamphlets on valves, transistors, TTL logic, etc the books are in the Dundrum area of Dublin

Recent Solarfest

The recent "Solarfest" at Dunsink Observatory included a lot of information on solar activity and sun spots. Peter Gallagher of TCD's physics department gave a demonstration of their Solar Monitor

website, http://www.solarmonitor.org/ This website has live and historical information on solar activity, including solar flare forecast information.

Portable Satellite Operation

Dave Ryan EI4HT / M0GIW will be operating /P on Satellite from the following locations over the nextfew weeks.

10th to the 29th of June from Pembroke Dock in the afternoons and from Rosslare Harbour in the evenings as passes allow. He will also be receive only when Maritime Mobile between Pembroke Dock and Rosslare Harbour each day as work allows.

During this time Dave hopes to also try some SSTV / P if anyone is about in the Wexford area. From 1st July to the 16th July Dave will be operating from Paphos in Cyprus from KM 64 ES.

Dave's plan is to use Satellites AO51 & HO68 as the schedule allows. And APRS on ISS if active. Also APRS as nodes are available whilst out and about, Should be visible on www.aprs.fi as EI4HT-7

New Yahoo APRS Group

The primary goal of this new group is to try to encourage APRS activity in the Northern Counties. The group is open to all Country wide the Groups address isas follows.

http://groups.yahoo.com/group/APRS-NI/

Major Castles On The Air activation in NorthernIreland

Castles And Stately Homes On The Air in Northern Ireland will have a major activation on 16 July. Bobby, MI0RYL has obtained permission to activate both the Stormont Parliament Buildings and Stormont Castle within the Stormont estate in Belfast.

To commemorate this activation, a special QSL card will be issued to any contacts that are made. Propagation permitting, they hope to cover many bands and modes throughout the day to allow as many people as possible the opportunity to make contact.

The station should be up and running by 10am with the castle activation number GI022 and WAB No J37

Wicklow Radio Club

The next meeting is scheduled for Wednesday 23rd June at 7:30 in the Glebe National School.

History this Week

1752 Benjamin Franklin flies his storm kite to prove electricity. 1844 Vulcanized rubber patented by C.Goodyear of New York City 1896 Prof. Bragg demonstrates X-rays in Adelaide.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th-June, through Sunday, 20th-June there were 217 countries active. Countries available: 3A, 3B9, 3C, 3C0, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3C0C, ANNOBON ISLAND (Now QRT - Now Active As 3C9B). Operators Elmo/EA5BYP and Javi/EA5KM, active as 3C0C from Annobon Island (AF-039), had to go QRT on June 17th, "due to logistical problems". Both Elmo and Javi flew back to Malabo, Equatorial Guinea, and are now active as 3C9B, possibly until June 21st, or sooner. As of press time, the 3C0C log shows (dated

June 16th) that they made a total of 11,657 QSOs with some 5606 unique callsigns. For more details and updates on the 3C0C DXpedition, visit their Web page at: http://www.3c0c-annobon.com

5V7, TOGO (Change in Plans). The announced DXpedition to Gabon (TR) by the Italian team lead by Silvano, I2YSB, has been cancelled (see OPDX.953). The new destination for the Italian team will now be Togo (5V), and the operation will take place during the month of October. The team will be the same. They plan to operate with three stations on all the bands. No other details have been provided other than the pilot station will be IK7JWY. An opened survey on I2YSB's Web page is now available to list your wants for bands and modes at: http://www.i2ysb.com/joomla5
More details should be forthcoming.

AEGEAN VHF & 6M CONTEST 2010. The Aegean DX Group announces that the AEGEAN VHF & 6m Contest will take place on July 3-4th. Many stations with special callsigns will operate from all over Greece (J4x, SX1, 2, 3, 4, 6, 7x and also from all Greek islands SX5, 8, 9), as well as from all the Greek Locators (of course and KM37) and in every mode CW, SSB, FM, RTTY, SSTV, PSK etc. It will be a great opportunity for every radio amateur to get a QSL cards from Greek stations on VHF & 6m band for their VHF or 6m Awards or to simply to confirm Greece on VHF & 6m. The Contest will be held according to the IARU Band Plan of Region-1 on 50, 144, 432 MHz. There will be not any QSOs in FM modulation on 50 MHz because it is restricted by the Greek authorities. For more information, take a look at the Aegean DX Group's Web page at: http://www.aegeandxgroup.gr ﷺunder contest
ﷺ
You can also send and E-mail to Leo, SV2DCD, (Contest Manager) at:
sv2dcd@yahoo.com
Or send a letter to the following address: AEGEAN DX GROUP, P.O. Box 4, Samos Island, GR 83100, HELLAS-Greece.

CR3, MADEIRA ISLANDS. Jose, CT1BOH, will be active as CR3E from Madeira Island (IOTA AF-014, Grid IM12JU, ITU Zone 36) during the 2010 IARU HF World Championship Contest (July 10-11th). QSL via W3HNK. Visit his contest page at: http://www.qsl.net/ct1boh

CY0, SABLE ISLAND (Update). Randy, N0TG, reports (edited): "Everything continues to move along preparing for operations October 22-31st. The charter aircraft has been booked as well as travel arrangements for the team to meet up in Halifax a couple days prior. The Battle Creek Special has been received early from the W8 group. Additional items are also being acquired and will be shipped later this summer to Halifax. Logistics coordination is being provided by the Halifax Amateur Radio Club's support and point of contact, Gary, VE1RGB, will identify and coordinate select items for advance shipment to Sable. We invite everyone to visit the DXpedition's Web site for additional details at:
http://www.CY0dxpedition.com
The HOME page reflects the logos of the many clubs and organizations that have provided financial support. Additionally, a link also brings up the list of individuals who have made a personal donation. We appreciate

all who have participated in assisting the DXpedition."

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that
the following operation is approved for DXCC credit:
E4/7K1REG • Palestine; 2000 Operation
If you had this operation rejected in a past submission send a note
to: dxcc@arrl.org
Please note the year in which this credit was rejected based on the
date at the top of your Award Credit Slip.

E2/HS, THAILAND (6 meters!). Champ, E21EIC, informs OPDX that Thai hams just received a temporary license for 6 meters (50-54MHz) for CQ WW VHF Contest from NTC (National Telecommunications Commission). They will allow them to operate 2 days between July 17-18th, 2010 (July 18-19th, 2010 Thailand time) which support from RAST by John/HS1CHB and Champ/ E21EIC. Champs states that no operations on 6 meters have ever been allowed for 30 years since previous RAST Founder Gen.Kamchai Chotikul or Kam, HS1WR (SK). However, the last 6 meters operation did take place during the 1992 SEANET convention in Chiang Mai, Thailand. Champ states, "This is very good news for all Thai Hams to have the opportunity to operate 6m. We all hope that the NTC will continue to authorize Thai Hams to operate 6 meters -- hopefully as for permanent license."

GJ, JERSEY (EU-013). Contest: YL Elena, RV3ACA, will be active as GJ2A or GJ/OH8CA during the RSGB IOTA Contest (July 24-25th) as a Single-Op/ SSB or Mixed entry. She will be active outside of the contest between July 21-26th. QSL via RV3ACA.

IOTA NEWS.....
EU-011. Members of the Cray Valley Radio Society team will once again activate St. Mary's Island in the Isles of Scilly during the IOTA Contest (July 24-25th). The team will be there between July 20-26th. In the past the team has operated on all HF bands prior to the contest using their callsigns/P. During the contest they will be active as M8C and after until they leave the Islands under their own callsigns. QSL via G4DFI, the QSL Manager of M8C and the Club callsign.

EU-012. Fred, ON6QR, will be active as GM/ON6QR from Shetland Island during the RSGB IOTA Contest (July 24-25th) as a Single-Op/ 24-Hr entry. QSL via his home callsign.

EU-055. Operators Jindra/OK1AMM, Franta/OK1HH and Bob/OK2BOB will be active as LA/homecall from Finnoy Island between 1000z June 23rd and 0600z June 30th. Activity will be on 160-6 meters using CW and SSB. QSLs via their home callsign, by the Bureau is "OK".

EU-072. Members of the White Tower DX Team will be active as J48S from Skopelos Island (LOTA GRE-071, WLOTA-2221, GIOTA NAS-076 and WW LOC KM19TE) between now and June 26th. Activity will be on 160-2 meters using CW, SSB, RTTY and PSK. QSL via SV2FPU. Operators

mentioned are: Giannis/SV2FPU, Ilias/SW2HTI, Thomas/SV2CLJ, Andreas/SV2JAO, Ioannis/SV3AWG and Fanis/SV3GKY. Visit the WTDXT Web page at: http://www.whitetowerdxt.com

EU-076. Wolf, DM2AUJ, will be active as LA/homecall from the Lofoten Islands between June 24th and July 8th. Activity will be on 80-10 meters using CW and SSB. QSL via his home callsign, direct or by the Bureau.

EU-118. RARE IOTA! By the time you read this, operators George/EA2TA, Christian/EA3NT, Col/MM0NDX, Vincent/F4BKV, Simon/IZ7ATN and Bjorn/SM0MDG should be on their last day activating Eilean Mor (GRID IO68EH, IOSA OL-01, SCOTIA DI-25, WAB NA74, WLOTA LH-0023 and ARLHS SCO-084) in the Flannan Isles (an extremely difficult island to land on) and are expected to go QRT during sometime on Monday, June 21st. QSL Manager will be M0URX (see Web page for details). For updates, visit their Web page at: http://www.ms0int.com

EU-123. Iain, MM0TFU, will be active as homecall/p from Blackwaterfoot, Isle of Arran between July 23-26th. Look for activity before, during and after the RSGB IOTA Contest (July 24-25th). His operations will mostly be on 6m outside of the contest. QSL via LoTW (preferred), but also direct or by the Bureau via MM0TFU.

EU-136. Nicola, IZ3QWV, will be active as 9A/homecall from Krk Island (ACIA IC-105, CIA-22, IOCA CI-046, MIA MC-185, WLOTA LH-1342) between July 3-10th. Activity will be casual but on all HF bands. QSL via his home callsign, by the Bureau or direct.

NA-205. Ken, VO1KVT, will once again be active as VO2MK from Mundy Island (WW Loc. GO14JL) sometime between July 10-20th. Activity will be on the HF bands and 6 meters. Please note that only a 2 day activation is planned between the above dates. QSL via VO1KVT, direct or by the Bureau.

I.C.P.O. BULLETIN GOING QRT. Dave, VA3RJ, announced this past week that next week will be his last I.C.P.O. Bulletin (Islands, Castles & Portable Operations). Dave's I.C.P.O. Bulletin was a great source for WLOTA, WCA, WFF and other Special Event activities, as well as DX news/activities. His weekly bulletin will be surely missed. The Editor of the OPDX and its readers wish to thank Dave for his many years of providing information to the DX community. Good luck and enjoy the new free time.

J6, ST. LUCIA. By the time you read this, Howard, WB6WXE, will once again be active as J6/WB4WXE until July 6th. His activity will be mainly on 6 meters, with some HF operations on 17, 15 and 40 meters when 6 meters is dead. He will use a 6 element beam with 350 watts and operate from a site which is at 2,000 feet ASL. He will use a 2 element beam on 17 and 15 meters. QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For June 21-27th)....
Jun 21 AN SOLAR REFERENCE KEYS
Jun 22 AN --------------------
Jun 23 HN-LN BN - Below Normal
Jun 24 HN AN - Above Normal/Geomagnetic Level is QUIET
Jun 25 HN-LN LN - Low Normal
Jun 26 HN-LN HN - High Normal/Geomagnetic Level is UNSETTLED
Jun 27 HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

NP2, U.S. VIRGIN ISLANDS. Operators Dan/K1TO, Julio/WD4R, Bruce/W4OV, John/NP2B, Jeanette/NP2C, Brian/KP2HC, Ann/KP2YL, Erik/NP2X, Fred/K9VV and Lisa/W4LIS will be active as NP2B from St. Croix during the CQWW DX SSB Contest (October 30-31st) as a Multi-Single entry. QSL via NP2B.

OJ0, MARKET REEF. Seppo, OH1VR, continues to celebrate his 50th anniversary in Ham Radio as OH1VR with another activity. Seppo will be active as OJ0VR from June 30th (QRV about 2000z) to July 3rd (QRT about 0300z). QSL direct to OH1VR CBA. Visit his Web page at: http://www.oh1vr.net
Markus, OH3RM, will operate as OJ0A during the same time period. QSL via OH3RM CBA.

PJ2, CURACAO (New Elections on Curacao?). The EUDXF Web reports: "The Island Council of Curacao was unable to find the two third majority required for their constitutional change. New elections are to be held within two months. A new council only needs a simple majority to decide on the constitutional change aiming for a status aparte for Curacao."

6W/GM4FDM AND S79GM BUREAU STATUS. Tom, GM4FDM, announced this past week that the "First batches of each were sent to the Bureau this afternoon (June 14th) -- For those who requested a Bureau card and sent me an email..... Another batch will go to the Bureau later this week."

9M2HB ON LOTW! Rich, NN3W, reported that over 13,000 9M2HB QSOs have been uploaded to LoTW on June 17th. He states, "Thanks to NK0S for doing the conversion!"

ADDRESS CHANGE (QSL Manager). Ron, AC7DX, a QSL Manager, informs OPDX that he has a new address for incoming QSL mail. His new address is: Ron Lago AC7DX, 1345 City View, Eugene, Oregon 97402-0456.

CK8G QSL STATUS. A reports states that John, VE8EV, is sending CK8G cards out. All bureau cards are already sorted and ready to go.

Algarve STAR DX Team announced that the logs and video from the recent CQ7OA Berlenga Island DXpedition last weekend are now available on their Web page. They made 9412 QSOs on 40-6 meters using CW, SSB and RTTY. Their Web page is: http://algarvedx.com

PIRATE ALERT. It was announced that a station signing TS7C has been active. The callsign TS7C was a DXpedition to Kerkenah, Tunisia, in January 2009. This callsign is unique and hasn't been reissued. All activity in 2010 under this callsign is the work of a pirate.

QSL MANAGER NEEDED FOR A 11 YEAR OLD YL! Vlada, UT5KDS, in Rivne, Ukraine, is looking for a QSL Manager -- possibly in USA or maybe other countries. Vlada is a 11 year old schoolgirl who has no income for printing or sending QSL cards. She is searching for a sponsor/manager who can send cards for her. Vlada's E-mail address is: ut5kds@mail.ru

QSLS VIA LoTW:

QSLS RECEIVED VIA MAIL: 3D20CR, 4A5M, 4O3A, 4U1UN, 4U50SPACE, 4U64UN, 5V7PM, 7Q7VB, 9K2HS, 9X0LX, A61BK, AH8DX, CE0Y/LA9SN, CE1/K7CA, CP6XE, D4C, D60VB, DU1EV, EF8M, EL2DX, ER4DX, ER4KAA,, FG1GW, FO8RZ, FS/F6AUS, IR9ITALY, J5V, J73CBS, JD1BMH, L33M, OF50RR, OL35OLP, OR4TN, PY2XB/PY0F, R1FJM, SN3R, ST2KSS, SV2ASP/A, SV5/DJ7RJ, TG9IRP, TZ6EI, V26E, V44KAI, V88/DL7JAN, VK3ZL, VK9XX, YI9PSE and ZK3YA

QSLS RECEIVED VIA THE BUREAU: 3Z70IIWW, 3Z10UM, 4X/EA5RM, 5Q2J, 8J1RL, 9A0CI, 9A8ZRS, 9M2TO, 9M8YY, AH2R, A65BI, AO3K, AO5A, AO5W, AM1A, D2NX, DH0IPA/LH, DR775TMG, EE2K, EH1PAZ, EF1W, ED5D, F4UKP/P, G3RCV/P, HF14MTR, IR6D, IS0/OM8A, II20CJ, JD1BLY, LM9K75Y, LA/PA3EMC, LA9M/P, LR5D, NY8A/KH2, ON65POL, OY/SP6IXF, OZ/PA7PA, OH0/SM3TLG, PA/OT7X, R1ANB, RA1QQ/1, R50KTV, S04R, SG3U, SN0WFF, P29VCX, P29VLR, T8CW, TA2ES, TC1ELH, TC1YLH, TC17A, TK9X, TM4RSX, TM5WRC, TM6JUN, TM100B, VC8B, UE3RFF, UE6FFF, US0KFF/P, UA1OEJ/1, UA3EDQ/1, V31BG, VC8B, VY0TA, YU150AU and YT09AU

S7, SEYCHELLES (Update). Juan Carlos, EA2RC, will be active as S79SAL from Mahe Island between July 18-31st. Activity will be on the HF bands using SSB, RTTY and PSK31. QSL via his home callsign, by the Bureau or direct. Remember, to look for S79SAL to join Marq, CT1BWW/S79BWW, during his first official WFF (World Flora Fauna) DXpedition on Seychelles -- reference number WFF004. For more details, see OPDX.957 or the Web site at: http://www.ct1bww.com/s79bww

SPECIAL EVENT BY LY AND SP STATIONS. Look for Lithuanian and Polish stations to activate the following special event stations to mark the 600th anniversary of the Battle of Grunwald/Zalgiris (1410-2010). The Lithuanian Amateur Radio Society (LRMD) will issue special wooden plaques to those operators and SWLs who fulfill the following conditions:
* Contact special event stations with the LY600 and LY1410 prefixes (13 stations), SN1410G, SN600G, SP600G, HF600PG, SQ600G and possible other special event SP stations.
* Collect 600 points between June 16th and August 15th (2010). Points can be earned as follows:
A. European stations: 100 points for each contact with special event stations LY600, LY1410 or SP600G, HF600PG, SQ600G (at least 4 contacts are required); 25 points for each contact with any other LY or SP station.
B. DX stations: 200 points for each contact with a special event station LY600 or SP600G, HF600PG, SQ600G (at least 2 contacts are required); 50 points for each contact with any other LY or SP station. Other Grunwald-Zalgiris special event stations may operate in Poland during the period, and they will also count for 100/200 points each.
* Application deadline: December 31st, 2011. Please send a certified list of contacts (without your QSLs) and the fee to the LRMD Award Manager. Please give your E-mail address in case they need to contact you.
* Fee: EUR 15.00 or equivalent in USD, or IRCs. LRMD Award Manager:
P.O. Box 1000, LT-01014 Vilnius-1, Lithuania.
E-mail: diplomai(at)lrmd.lt or ly4q(at)qrz.lt
Current information on the event may also be found at:
http://www.lrmd.lt/en/awards.htm
http://sp9jpa.blogspot.com
List and operating dates of special event stations:
SN600G (via SP9PKR) June 1st-July 31st
SN1410G (via SP9PKZ) June 1st-July 31st
SQ600G (via SP4ZHR) June 25th-July 20th
HF600PG (via SP4ZHT) July 1-17th
SP600G (via SP4KSY) July 1-31st

All stations operating dates June 16th-August 15th
LY1410G (via LY3X) LY600KM (via LY2KM)
LY600A (via LY5A) LY600NI (via LY2NI)
LY600BY (via LY3BY) LY600Q (via LY4Q)

LY600GV (via LY2GV) LY600W (via LY5W)
LY600J (via LY3J)

WRTC CALLSIGN ANNOUNCEMENT. The General Radio Frequency Centre of Russian Federation has just issued special callsigns to be used during the WRTC-2010 and the 2010 IARU HF World Championship Contest (July 10-11th). Callsigns are as follows:
R31A R31D R31N R31U R31X
R32C R32F R32K R32O R32R R32W R32Z
R33A R33G R33L R33M R33Q R33U
R34C R34D R34O R34P R34W R34X R34Y R34Z
R36C R36F R36K R36O R36W R36Y R36Z
R37A R37G R37L R37M R37P R37Q R37U
R38F R38K R38N R38O R38W R38X
R39A R39D R39M R39R
The World Radiosport Team Championship (WRTC) is the major HAM Radio contest event of year 2010. The WRTC-2010 will take place near Russia's capital Moscow where 50 teams from all over the world will compete in the same field conditions. For more details about the event and rules on the contest, visit the WRTC Web page at: http://www.wrtc2010.ru/?id9

YJ0, VANUATU (Update/Press Release). Bill Horner, VK4FW, President of the ODXG (Oceania Amateur Radio DX Group Inc.), sent out the following (edited): "Vanuatu 2010 DXpedition News Release -- In co-operation with ODXG, a group of four Australian amateurs will be activating Vanuatu (YJ0) from August 27th until September 2nd. The accommodation and flights are booked and the team is waiting on callsign allocation from the Vanuatu government. Chris/VK3QB (Leader), Allan/VK2CA, Luke/VK3HJ and Brenton/VK3CBV will spend six days and nights working the HF bands from the Island of Efate [illegible] as well enjoying some of the sites of this beautiful country.
More details will be released in the coming 2 weeks including Web site details, QSL details and likely bands/modes. However, at this stage the team plans to keep things simple with two HF stations limited to 100 watts and vertical and wire dipole antennas. For more information please contact Chris, VK3QB, at: vk3qb@wia.org.au "

ZA, ALBANIA (Update - IOTA Op!). Kris, HA5X, in Albania until June 24th, will receive transportation by the Albanian Navy to Sazan Island (IOTA EU-169, M.I.A. MA-01, LH. ALB-004 and L-0028) early Monday morning (EU time) on June 21st. He expects to be active by noon and will stay on the island for about 24 hours. For updates and pictures on his Albanian activities, visit his Web page at: http://za.ha5x.hu

Dear friends,
As ,most of you knows, I am very active from Montenegro 4O land . . .
From the 1st of July I will be there again (if I don't go to Moscow
on
WRTC).
If anyone of you need 4O let me know.
I will be active mostly on 6, 10, 15 and 20m...but offcourse there is
a lot
of equipment (4O3A location) for 40, 80 and 160m.
I am connected almost all the day on the Skype (now too...) like yu1yv-
acim

> Last we heard, <PKB>

Last we heard, Lloyd Austin Davies, N0VFP was too busy hiding from Oris!

I happened to be traveling through Huntsville, Alabama early this morning, I deceided to stop in Athens and see just how tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with several people in the Deja Newsgroup (now Google) and I issued a challenge to him. I told him I would be attending the Dalton, Ga. Hamfest if he wanted to continue the conversation. He said he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on the newsgroups. He always talks tough behind his keyboard. And, I understand he is now doing the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a nasty looking section of town. I'm a pretty good sized man, but I put my gun in my back waistband after exiting the car. I located his apartment and knocked on the door. The doorbell was missing and bare wires were sticking out of the wall. I heard someone say I'm coming and shortly the door opened with a safety chain lock still engaged. He asked what I wanted and I introduced myself and asked if we could have a conversation. He turned white as a sheet and attempted to slam the door, but I already had a foot wedged in the opening. He started shaking uncontrollably and was shouting leave me alone, leave me alone! I told him he didn't seem so tough now face to face and then noticed a putrid odor of urine and he was pissing his pants and crying like a baby. Please leave me alone Oris he said, I was just having fun and meant no harm, please leave, please. I could see the filthy floor of this apartment and the dirty floors and the stench of a grown man pissing on himself were almost enough to make me want to vomit, and I don't have a queasy stomach. Upon telling him that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

Oris Grim

DXNL 1681 - Jun 23, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Mike, DJ5AV
(e-mail: dj5av@darc.de)

C5 - Gambia: Arliss, W7XU, Ed, W0SD, as well as their XYLs Holly, N0QJM, and Edith, W0OE, will be on the air from Gambia June 26th through July 5th. Primary focus will be on 6 m band (50.103 MHz). Requested call is C5E, to be released on arrival. They lost many contacts in the past on 6 meters as signals have faded out before they got a report, so just send your report and NOT your grid square. Some HF SSB and CW activity is planned for late night non-Sporadic E hours, while RTTY on 17 and 20 m will be concurrent with the 6 m operations. QSL via W7XU.

J6 - St. Lucia: Howard, J6/WB4WXE, will also use 6 m mainly June 21st through July 7th from St. Lucia. In times without propagation on 6 m find him on 17, 15 or 40 m. QSL via homecall.

VP8 - Falkland-Islands: Richard, GM0VMW, currently is on duty on the island for 1 month and activates VP8DND/p on 20 through 2 m whenever possible. QSL direct via homecall.

XV - Vietnam: Through late June Wayne, K6ZSJ, operates from Nha Trang as XV7ZSJ on 40 and 20 m, CW and SSB. QSL via homecall.

YO - Romania: Look for group of Romanian OPs as YP1WFF/mm from National Parc Donaudelta (YOFF-021) June 23rd through 29th on board or from several lighthouses. QSL via YO3JW, find more informations on http://wff-yo.blogspot.com/2010/06/new-dxpedition-by-yp1wff-in-yoff-021.html

9V - Singapore: Experienced DXer and Contester Lu, 9V1/W4LT, is on business since June 16th and will stay through about late July. As time permits he is active with TS-570D, MicroKeyer and portable vertical. After his stay he will visit Papua New Guinea, hopefully as P29VLT.

The Netherlands, Special Event call: PD80TT reminds the 80th Dutch TT Motor Grand Prix June 23rd through July 20th in Assen. QSL via PD7BZ.

DXCC: The operation from Palestine as E4/7K1REG (2000 operation) has been approved for DXCC credit: if you had this operation rejected in a past submission, send a note (dxcc[@]arrl.org) and note the year in which this credit was rejected based on the date at the top of your Award Credit Slip. DXCC may not reply to all requests due to the possibility of a large amount of mail. You can confirm that your record has been updated by checking your LoTW account and your total(s) in the live daily DXCC listings.

Pirate:

TS7C was the call of a DXpedition to Tunesian Island Kerkenah in Jan 2009. This callsign has not been reissued and reported activity in May and June 2010 is by a pirate.

6-m-Band in Thailand in CQWW VHF Contest special permission:

During the Worldwide VHF Contest July 17th/18th 2010 operators in Thailand are allowed to use 6 m band 50 through 54 MHz. The last permission for 6 m happened 20 years ago.

LINKS:
Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jun 26/27: King of Spain Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-043, JA1, South Izu Islands: Ichy, JH7IPR, will be JH7IPR/1 starting June 26th on island Hachijo. QSL via homecall (d/B).

EU-055, LA, Sogn og Fjordane etc. County Grp.: Jindra/OK1AMM, Franta/OK1HH, and Bob/OK2BOB, will be on the air June 23rd-30th using LA/homecall on the island of Finnoy. QSL via H/Cs (d/B).

EU-072, SV, Thessalia Region Group: A groug of Greek operators lead by SV2FPU will visit Skopelos (GIOTA NAS-076, LH Guruni) June 19th-26th as J48S. QSL via SV2FPU (d/B).

EU-076, LA, Lofoten Islands: Look for Wolf, LA/DM2AUJ, in Kabelvag on the island of Austvagoya June 24th through July 8th operating holiday stile mostly on CW with some SSB. QSL via H/C (d/B).

EU-174, SV, Thassos: SV8/DL2DQL (Tony) and SV8/DM3DL (Gerhard) will be QRV from Thassos June 27th through July 18 including participation in the IARU HF World Championship. Time is limited because they are on vacation with their XYLs. QSLs via d/B/L, SV8/DM3DL also eQSL.

NA-105, FS, PJ7, St. Martin (Sint Maarten): Find Jimmy, FS/W6JKV, June
24th through July 5th on the island of St. Martin (DIFO FS-001).
QSL via HC (d/B).

OC-012, V63, Yape Islands: Hase/JK1EBA will be on the air as V63AKA
June 22nd through 30th from Yap Island (Mikronesia). QSL via HC (d/B).

Lighthouse activities (WLOTA/ARLHS/ILLW)

GM4KGK LH 1477 Lewis resident
J48S LH 2221 Skopelos 19.-26.06.
JH7IPR/1 LH 0436 Hachijo ab 26.06.
RZ1OA/p LH 1589 Sosnoveckij through 23.06.
UA1OLM/p LH 1589 Sosnoveckij through 23.06.
SQ1KSA LH 4120 Wolin resident
TK5MH LH 1390 Corsica resident
VA7EWK LH 0858 Vancouver Is. resident
VE7DP LH 0858 Vancouver Is. resident
9H3BS LH 0046 Gozo resident

Following lighthouses were added to the WLOTA list recently:

LH 3119 Ushino Shima JR6
LH 3168 Hate Shima JR6 AS-017
LH 3213 Rukan Sho JR6
LH 3296 Kamiyama Shima JR6
LH 3326 Sesoko Shima JR6 AS-017

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

477. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2010-06-22 06:05:02 UTC
From: rram@panix.com
Message-ID: <radio/rec-radio-info/guidelines-1-1277186701@panix.com>
Source record: 5846
Cross-posted to: rec.radio.info,rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.answers,news.answers

```

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

June 23, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- All In A Day's Work - Field Day and Canada Day
- WRTC-2010 Special Call Signs Announced
- 2000 QSOs Before The Age of 10
- CQ WW SSB Analysis by EI6DX
- Use Your Own TV Transmitter - Sorta
- Where Does It Go Next?

NEW HF OPERATORS - THINGS TO DO

What else is there, but Field Day? If Field Day leaves you hungry for
more, try out the Canada Day Contest sponsored by the ARRL's sister
organization, RAC.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Arrgh - The MIT Haystack Observatory turns out to be in the hills of
Westford, MA, a bit south of NH. (Thanks, Bruce WW1M and others) The
correct URL for W9ZRX's files is www.k3lr.com/w9zrx/
<http://www.k3lr.com/w9zrx/> - the final slash is required.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

June 26 - June 28

- ARRL Field Day
- QRP ARCI Milliwatt Field Day
- His Majesty King of Spain--Phone
- Marconi Memorial HF Contest--CW
- SARL Digital Contest
- Ten-Ten Spirit of 76 QSO Party (June 28 - July 4)
```

July 1 - July 4

- Canada Day Contest
- NS Weekly Sprint--CW
- 070 Club Firecracker PSK31 Sprint
- Venezuelan Indep Day Contest
- DL DX RTTY Contest
- DARC 10-Meter Digital Corona
- MI QRP July 4th Sprint--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The WRTC Organizing Committee has announced the special call signs
<http://www.wrtc2010.ru/press/wrtc_callsigns.pdf> to be used during the
WRTC-2010 <http://wrtc2010.ru/> contest.

R31A R31D R31N R31U R31X
R32C R32F R32K R32O R32R R32W R32Z
R33A R33G R33L R33M R33Q R33U
R34C R34D R34O R34P R34W R34X R34Y R34Z
R36C R36F R36K R36O R36W R36Y R36Z
R37A R37G R37L R37M R37P R37Q R37U
R38F R38K R38N R38O R38W R38X
R39A R39D R39M R39R
There will special awards <http://www.wrtc2010.ru/?id=51&idp=29>
available to everyone who works WRTC stations during the event and
sends a log to help with the WRTC log checking. The awards page also
offers a handy form to keep track of which stations you still need.
(Thanks, Harry RA3AUU)

Jim K9JG writes to ask if this Wall Street Journal article on a
shorthand expert
<http://online.wsj.com/article/SB10001424052748703303904575292982869708158.html?mod=WSJ_hp_RIGHTInDepthCarousel_1>
"...remind(s) anyone of the articles we see about the demise of CW?"

If you have trouble putting in long hours during the contest, maybe
this new smart underwear
<http://news.yahoo.com/s/nm/20100610/lf_nm_life/us_underpants_health>
could help figure out why!

During this roving season, it would be cool if your logging software
could link your log to a map, wouldn't it? CQ/X <http://www.no5w.com/>
by Chuck NO5W can do just that - check out the Log On A Map
<http://www.no5w.com/CQxLogsOnMap.html> feature in the graphic!

NASA is predicting big events on the Sun
<http://www.telegraph.co.uk/science/space/7819201/Nasa-warns-solar-flares-from-huge-space-storm-will-cause-devastation.html>
during 2013. Perhaps that might be a good year to plan a big rover
expedition during the VHF+ contests. Where they use the word
"devastation", we helioaters use the words "big opening"! And just what
IS wrong with the Sun
<http://www.newscientist.com/article/mg20627640.800-whats-wrong-with-the-sun.html?full=tru

e>,
anyway? Could it be the position of certain planets
<http://arxiv.org/abs/1005.5303>? (Thanks, Brian K1BRF and Steve N2IC)

Mike K1MK points out that the best place to find vertex coordinates for the CIRAF (ITU) zones is probably the file Cirafz.sq which is located in the database subdirectory that comes with the VOACAP propagation prediction program.

Web Site of the Week - Romeo S52RU announces the formation of the South East Europe Contest Club <http://www.seecc.co.nr/> and invites everyone to visit their new Web site!

WORD TO THE WISE

Heat - it's the enemy of most electronic equipment, accelerating aging and breakdown of materials and devices. To keep your equipment keeping you on the air, keep things cool! So how hot is it? Bill W6WRT says that, "For low cost, it would be hard to beat a cook's meat thermometer." Bill mounted the all-mechanical thermometer on a piece of wood with its probe on or in the equipment for a convenient visual display, no batteries required.

==> SIGHTS AND SOUNDS

Here's another fine young operator at the mike - Yoshiki KH0UA <http://www.youtube.com/watch?v=U48LpNsykGk> made more than 2000 QSOs in the CQ WPX SSB contest. Best comment during the video - "Lunchtime, but can't stop the running!" (Thanks, Dave KM3T)

Now you can see QTHs for the WRTC-2010 station locations <http://www.wrtc2010.ru/?id=22> using Google Earth. The numbers 100 through 900 are the names for the clusters and sites. T1-2-3-4 etc - the meeting points. (Thanks, Harry RA3AUU)

A recent AMSAT <http://www.amsat.org/> News Bulletin (ANS-164) includes links to a couple of interesting videos. The first video is of a French Over-The-Horizon (OTH) radar called Nostradamus <http://tinyurl.com/299g7oy> that operates between 3 and 30 MHz. The second tackles a ham radio urban legend - the Slinky dipole <http://tinyurl.com/23fftkg> - will it work?

==> RESULTS AND RECORDS

Stan EI6DX used his CQWW analyzer to download and parse the 5709 public SSB logs from 2009 CQ WW. His results <http://www.ei6dx.com/cqww-contest-analysis/cqww-activity-analyzer/> show that activity in 2009 was higher than in 2008 and in 2007. There is a steady increase in total contacts year to year. 10 meter activity is up against previous years, too.

The results of the 2010 7QP <http://codxc.org/New/2010smry.pdf> have been posted on the 7QP Web page. Certificates will be sent out by 6/14 and plaques should be out by the end of June. Contest Manager, Dick K4XU extends, "My special thanks to all the state clubs and individual

state captains and lieutenants for all their efforts that make this event work, to K2DI for the data reduction software to produce the results, and to WS7N, our Web guru, plaque meister and host for the N7LE multi-multi."

Results for the 2010 Minnesota QSO Party <http://www.w0aa.org/> results are available now on the Minnesota Wireless Association's Web site. Mark WA0MHJ would like to say thank you to all of the participants for another record setting year of participation.

The results for the 2009 Manchester Mineira All America CW Contest <http://www.powerline.com.br/cwjf/> - the 25th anniversary of the contest - have been posted online and very nice results booklet mailed to all participants. Next year's contest will extend to a world-wide format. (Thanks, CWJF President, Ed PY4WAS)

OPERATING TIP

Clipped Dits - Take a look at the log checking report (LCR) from a major CW contest and look for the mistakes others have made in copying your call sign. If there are lot of first-character or last-character errors, perhaps your transmitter and/or amplifier have a problem turning on or off at the right times.

==> TECHNICAL TOPICS AND INFORMATION

The past couple of issues of the Mount Airy VHF Radio Club's newsletter, "Cheese Bits <http://packratvhf.com/Cheese%20Bits/cheesebits.html>", include an article by John KB3XG on converting a TV transmitter's driver amplifier to ham use. They don't say anything about what happened to the final stages...

Uh-oh! You dutifully cleaned off all of your vacuum tubes to make them shiny and the numbers came off with the dirt! Pat AA6EG saves the day - "Put the tube in the refrigerator, cool it down, then bring it into a warm room temperature environment. There will be moisture condensing on the glass envelope, sometimes leav[ing] a readable outline of the tube numbers."

John W0UN notes that the Velleman K8090 interface kit <http://www.vellemanusa.com/us/enu/product/view/?id=525191> has a USB interface that may be easier to use than the K8056 serial-interface kit. The K8061 <http://www.vellemanusa.com/us/enu/product/view/?id=522974> is an extended USB interface kit.

HamCalc <http://cq-amateur-radio.com> users will be glad to know that version 122 of this collection of handy calculators and programs was released for free downloads on June 17th. (Thanks, author George, VE3ERP)

Super-low-power (QRSLP) is just around the corner if this recent EE Times article <http://www.eetimes.com/225600354> about being able to use transistors while they're off is any clue. Maybe they could work something out for linear amplifiers, too! And run them off of potato-power <http://hothardware.com/News/Potatoes-May-Power-The-Batteries-Of-The-Future/> (QRPP)!

Larry W1DYJ recommends this Directive Systems <http://www.directivesystems.com/STACKING.htm> article about stacking Yagis <http://www.directivesystems.com/STACKING.htm>. The article uses VHF antennas, but the ideas apply to stacking, in general. There are several good "App Notes" on the site.

Technical Web Site of the Week - David G3YNH's Web site "From Transmitter to Antenna <http://www.g3ynh.info/zdocs/index.html>" bills itself as "...a collection of scientific articles on the subject of impedance, impedance matching and high-frequency power transmission." And that it is - dig in and enjoy! (Thanks, Brad AA1IP)

==> CONVERSATION

Where Does It Go Next?

As WRTC-2010 approaches the question arises, as it always does, of "Where does WRTC go next?" While our primary focus needs to remain on enjoying and supporting WRTC-2010, it is encouraging to note the interest of the international community in the future of World Radiosport Team Championship. How is the WRTC flame passed from group to group? How is the application made? Who makes the decision?

Answering the last question first, the WRTC Sanctioning Committee (WRTC-SC) is made up of representatives from the preceding WRTC sponsors and host committees, led by WRTC-2000 committee chair, Tine Brajnik S50A. The Sanctioning Committee is responsible for evaluating applications from potential sponsors. The rights to host the event as a WRTC are then awarded to the selected group. The WRTC-SC is only responsible for awarding hosting rights and is not a "steering committee" in charge of rules or procedures - those details are left to the hosts.

The application process begins with a query to the WRTC-SC by an interested person or group who then receives a set of WRTC goals, requirements, and guidelines. The potential sponsors must agree to meet the requirements and pledge a good faith effort to conduct the event so as to further WRTC goals and follow the WRTC guidelines. An introduction to the sponsoring organization and its leadership team should be provided along with a broad description of the proposed event. It is not necessary to submit a detailed proposal for the event at this early date.

There follows a sequence of communications and meetings with the applying group. This refines the event proposal, clarifies requirements to the applicants, and further demonstrates to the WRTC-SC the

capabilities of the potential sponsors. At the conclusion of this process, the WRTC-SC is confident that the sponsors are willing and able to take on the job of conducting a WRTC and makes the announcement of the award. Once the award is made, the WRTC-SC is available to assist the sponsoring committee, but promoting and conducting the WRTC is up to the new hosts.

Sponsors for the 1996 and 2000 events in California and Slovenia were announced after the previous event was over. At the conclusion of each WRTC since 2000, the home of the next WRTC - Finland, Brazil, Russia - has been announced to applause and gratitude from the assembled hosts, competitors, judges, and spectators. Will there be a similar announcement in Moscow for WRTC-2014? We shall see! While interest has been expressed in hosting WRTC-2014, the Sanctioning Committee has not yet received a formal application and is therefore anxiously waiting to hear from a group wishing to organize the next great worldwide event. In order that we might discuss it before WRTC-2010, the WRTC-SC should receive the request by the end of June. Please contact any of the members of the WRTC SC listed below.

Brothers and sisters - enjoy WRTC-2010 and the hospitality of its hosts! Acknowledge the years of work undertaken on behalf of all of us. Consider what they have accomplished, as well as the preceding five WRTC hosts of the past two decades, in establishing a tradition of competition among friends. What better way to support that tradition than by insuring it continues?

For the World Radiosport Sanctioning Committee,

73,

Tine Brajnik, S50A - President (WRTC-2000)
Ward Silver, N0AX - Secretary (WRTC-1990)
Dan Eskenazi, K7SS (WRTC-1990)
Bob Cox, K3EST (WRTC-1996)
Rusty Epps, W6OAT (WRTC-1996)
Martti Laine, OH2BH (WRTC-2002)
Atilano Oms, PY5EG (WRTC-2006)
Sergio Almeida, PP5JR (WRTC-2006)

==> CONTESTS

23 June through 6 July

An expanded, downloadable version of QST's Contest Corral in PDF format <http://arrl.org/contests> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Field Day--Phone,CW,Digital, from Jun 26, 1800Z to Jun 27, 2100Z. Bands (MHz): 1.8-28, 50+. Exchange: Category, ARRL/RAC section or DX. Logs due: Jul 27. Rules <http://arrl.org/contests>

His Majesty King of Spain--Phone, from Jun 26, 1200Z to Jun 27, 1200Z. Bands (MHz): 1.8-28. Exchange: RS, serial or EA province. Logs due: Jul 15. Rules <http://www.ure.es/>

Marconi Memorial HF Contest--CW, from Jun 26, 1400Z to Jun 27, 1400Z. Bands (MHz): 1.8-28. Exchange: RST and serial number. Logs due: 30 days. Rules <http://www.arifano.it/Contest_Marconi.htm>

QRP ARCI Milliwatt Field Day--Phone,CW,Digital, from Jun 26, 1800Z to Jun 27, 2100Z. Bands (MHz): 1.8-28, 50+. Exchange: Category, ARRL/RAC section or DX. Logs due: Jul 27. Rules <http://www.qrparci.org/>

SARL Digital Contest--Digital, from Jun 27, 1300Z to Jun 27, 1600Z. Bands (MHz): 7, 144. Exchange: RST and serial number. Logs due: 15 days. Rules <http://www.sarl.org.za/>

Ten-Ten Spirit of 76 QSO Party--Phone,CW,Digital, from Jun 28, 0000Z to Jul 4, 2400Z. Bands (MHz): 28. Exchange: Call, name, member number, S/P/C. Logs due: 15 days. Rules <http://www.ten-ten.org/>

Canada Day Contest--Phone,CW, from Jul 1, 0000Z to Jul 1, 2359Z. Bands (MHz): 1.8-28, 50-144. Exchange: RS(T), Province/Territory or serial. Logs due: Jul 31. Rules <http://www.rac.ca/service/contesting>

NS Weekly Sprint--CW, from Jul 2, 0230Z to Jul 25, 0300Z. Bands (MHz): 1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

070 Club Firecracker PSK31 Sprint--Digital, from Jul 3, 8 PM to Jul 4, 2 AM. Bands (MHz): 7. Exchange: RST and S/P/C. Logs due: Aug 3. Rules <http://www.podxs070.com/>

Venezuelan Indep Day Contest--Phone,CW, from Jul 3, 0000Z to Jul 4, 2400Z. Bands (MHz): 1.8-28. Exchange: RS(T) and serial. Logs due: Aug 31. Rules <http://www.radioclubvenezolano.org/concurso.htm>

DL DX RTTY Contest--Digital, from Jul 3, 1100Z to Jul 4, 1059Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Aug 10. Rules <http://www.drcg.de/>

DARC 10-Meter Digital Corona--Digital, from Jul 4, 1100Z to Jul 4, 1700Z. Bands (MHz): 28. Exchange: RST, serial. Logs due: 14 days. Rules <http://www.darc.de/ukw-funksport>

MI QRP July 4th Sprint--CW, from Jul 4, 2300Z to Jul 5, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, and QRPMI number or power. Logs due: 30 days. Rules <http://www.miqrp.org/>

VHF+ CONTESTS

ARRL Field Day--Phone,CW,Digital, from Jun 26, 1800Z to Jun 27, 2100Z. Bands (MHz): 1.8-28, 50+. Exchange: Category, ARRL/RAC section or DX. Logs due: Jul 27. Rules <http://www.arrl.org/contests>

QRP ARCI Milliwatt Field Day--Phone,CW,Digital, from Jun 26, 1800Z to Jun 27, 2100Z. Bands (MHz): 1.8-28, 50+. Exchange: Category, ARRL/RAC

section or DX. Logs due: Jul 27. Rules <http://www.qrparci.org/>

SARL Digital Contest--Digital, from Jun 27, 1300Z to Jun 27, 1600Z. Bands (MHz): 7, 144. Exchange: RST and serial number. Logs due: 15 days. Rules <http://www.sarl.org.za/>

Canada Day Contest--Phone,CW, from Jul 1, 0000Z to Jul 1, 2359Z. Bands (MHz): 1.8-28, 50-144. Exchange: RS(T), Province/Territory or serial. Logs due: Jul 31. Rules <http://www.rac.ca/service/contesting>

MI QRP July 4th Sprint--CW, from Jul 4, 2300Z to Jul 5, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, and QRPMI number or power. Logs due: 30 days. Rules <http://www.miqrp.org/>

==> LOG DUE DATES

23 June through 6 July

June 23 - RSGB 80m Club Championship, CW, upload log <http://www.rsgbcc.org/cgi-bin/hfenter.pl>, paper logs and diskettes to: (none). Rules <http://www.rsgbcc.org/hf/rules/2010/r80mcc.shtml>

June 24 - UN DX Contest, Email logs to: contest@cqun.kz, paper logs and diskettes to: UN DX Contest, P.O. Box 88, 010000 Astana, Kazakhstan. Rules <http://kw.cqun.kz/index.php?option=com_content&task=view&id=516&Itemid=57>

June 26 - Bill Windle QSO Party, E-mail log summary to: bwqp@firstclasscw.org, paper logs and diskettes to: (none). Rules <http://g4foc.org/index.php?id=57>

June 27 - Run for the Bacon QRP Contest, Email logs to: (none), upload log <http://www.fpqrp.com/autolog.php>, paper logs and diskettes to: (none). Rules <http://www.fpqrp.com/fpqrprun.php>

June 27 - CQ WW WPX Contest, CW, Email logs to: cw@cqwpx.com, paper logs and diskettes to: CW WPX Contest, CQ Magazine, 25 Newbridge Rd, Suite 405, Hicksville NY 11801, USA. Rules <http://www.cqwpx.com/rules.htm>

June 30 - EUCW Fraternizing CW QSO Party, Email logs to: eucwfp@agcw.de, paper logs and diskettes to: Werner Jochem, DK7VW, Wendelsborn 34, D-66606 St.Wendel, Germany. Rules <http://www.agcw.org/eucw/eucwp.html>

June 30 - ARCI Hootowl Sprint, Email logs to: contest@qrparci.org, paper logs and diskettes to: ARCI Hoot Owl Sprint, c/o Jeff Hetherington, VA3JFF, 139 Elizabeth St. W., Welland, Ontario L3C 4M3, Canada. Rules <http://www.qrparci.org/content/view/1518/118/>

June 30 - VOLTA WW RTTY Contest, Email logs to: log2010@contestvolta.it, paper logs and diskettes to: (none). Rules <http://www.contestvolta.com/44volta-e.pdf>

June 30 - BARTG Sprint 75, Email logs to: ska@bartg.org.uk, paper logs and diskettes to: (none). Rules <http://www.bartg.org.uk/documents/Contests/sprint75/BARTG%20Sprint%2075%20Rules%202010.pdf>

June 30 - IARU Region 1 Field Day, CW, Email logs to: (see your national society rules), paper logs and diskettes to: Your national society. Rules on your national society web site

July 1 - Feld Hell Sprint, Email logs to: (none), Post log <http://sites.google.com/site/feldhellclub/Home/contests>, paper logs and diskettes to: (none). Rules <http://sites.google.com/site/feldhellclub/Home/contests>

July 1 - SARL Youth Day Sprint, Email logs to: zs3tg@vodamail.co.za, paper logs and diskettes to: SARL Youth Day Sprint, PO Box 1049, Kathu 8446, South Africa. Rules <http://www.sarl.org.za/public/contests/SARL%202010%20Contest%20Manual.pdf>

July 1 - Baltic Contest, Email logs to: lrsf@lrsf.lt, paper logs and diskettes to: Baltic Contest, P.O. Box 210, LT-44003Kaunas, Lithuania. Rules <http://www.lrsf.lt/bcontest/english/rules_html.htm>

July 1 - MI QRP Memorial Day CW Sprint, Email logs to: n8xx@arrl.org, paper logs and diskettes to: Hank Greeb, N8XX, 5727 11 Mile Rd NE, Rockford, MI 49341, USA. Rules <http://www.qsl.net/miqrpclub/contest.html>

July 1 - SBMS 2 GHz and Up WW Club Contest, Email logs to: (none), paper logs and diskettes to: William A. Burns, WA6QYR, 247 Rebel Road, Ridgecrest, CA 93555, USA. Rules <http://www.ham-radio.com/sbms/club_test/club_test.pdf>

July 1 - UKSMG Summer Contest, Email logs to: m5ade@uksmg.org, paper logs and diskettes to: Adrian Deane, M5ADE, 5 Osbourne Terrace, London Rd, Thrupp, Stroud, Glos., GL5 2BJ, UK. Rules <http://www.uksmg.org/page.php?5>

July 3 - VK/Trans-Tasman 160m Contest, Phone, Email logs to: VK: vktasman@hotmail.com, ZL: vktasman@robglassey.com, paper logs and diskettes to: VK:, VK/trans-Tasman Contest, 28 Crampton Crescent, Rosanna, VIC 3084, Australia, , ZL:, VK/trans-Tasman Contest, P.O. Box 21-363, Christchurch 8143, New Zealand. Rules <http://home.iprimus.com.au/vktasman/RULES.HTM>

July 4 - WAB 50 MHz Phone, Email logs to: aebbooks@ntlworld.com, paper logs and diskettes to: Tony Beardsley, G3XKT, 14 York Avenue, Sandiacre, Nottingham NG10 5HB, United Kingdom. Rules <http://wab.intermip.net/Contest%20Rules.php#OtherRules>

July 5 - AGCW VHF/UHF Contest, Email logs to: vhf-uhf@agcw.de, paper logs and diskettes to: Manfred Busch, DK7ZH, Ebachstr. 13, D-35716 Dietzhoelztal-Mandeln, Germany. Rules <http://www.agcw.org/en/?Contests:VHF-UHF_Contest>

July 5 - Alabama QSO Party, Email logs to: logs@alabamaqsoparty.org, paper logs and diskettes to: Jim Johnson, KC4HW, 6274 South CR 49, Slocomb, Al 36375-5528, USA. Rules <http://www.alabamaqsoparty.org/2010/2010Rules.pdf>

** HAM RADIO 2010 in FRIEDERICHSHAFEN **

International Exhibition for Radio Amateurs Amateur radio is a
pastime that brings people together, as this years 34th annual
HAM RADIO show clearly demonstrated:
http://www.hamradio-friedrichshafen.de/

LATEST NEWS about HAM RADIO from the MMMonVHF Team:
As well some members of the MMMonVHF Team are available at the HAM
RADIO! Until now its sure that Erwin, DK5EW, will be there around
friday afternoon. Guy, DL8EBW will try to show up on saturday (26th)
but will stay only for some hours (planned 10-15 local) ...
Also Frank, PA4EME, will be there friday and saturday but back
home on sunday morning ... WE HOPE TO MEET YOU !!!
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** 144 MHz SPORADIC E - Date 2010-06-14 **

Two big openings. The first opening was between 4X4 and YU and out
of reach for most stations. The second one had two reflection areas
JN92 and JN30. Nice to see that 7X was worked and many worked into
SV9 and SV5. Have a look to:
http://www.mmmonvhf.de/es.php?year=2010&month=06&day=14
A very nice VIDEO did send Raimund, DG9MAQ, to MMMonVHF - he was
able to work SV9CVY from his /mobil station - have a look at his
YOUTUBE Video : A Sporadic-E 144 MHz SV9CVY -DG9MAQ/Mobile
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** WSJT BETA 8 **

New FORUM Place on your VHF-DX-Portal MMMonVHF
PLEASE do use and welcome the new FORUM Place on your MMMonVHF:
http://www.mmmonvhf.de/minibb/index.php?action=vtopic&forum=14

to have some hints, have some coment and have some discussion
platform about NEW and OLD versions of WSJT!
As you might have seen there are several tests going on with the
BETA version of WSJT 8 - PLEASE ee aware that WSJT7 and WSJT8 modes
ARE NOT COMPATIBLE!!! So if you wonna take part in that tests pse
do announce it clear that you are running WSJT 8 and searching for
partners looking for the same - WJST 7 (and earlier) USER might
otherwise copy your signal and have no chance for decoding...
SOURCE: Guy, DL8EBW, on behalf of the MMMonVHF Team

** 70 MHz DEMONSTRATION in Italy **

First of all let me present you my apologies for dealing here with
something that is not strictly related to the 50-MHz band, but
considering that 70-MHz operators are also 50-MHz operators and
that the UKSMG announcements represent an invaluable opportunity
for information spreading, I take the liberty to inform the VHF
enthusiasts that on the early afternoon of June 24th, starting at
about 12:00 UTC, we shall have a 70-MHz demonstration to University
and Telecom Ministry staff. Some tests may be carried out during
the morning too. The station will be located at ESRIN, the Italian
Rome-based establishment of the European Space Agency, whose club
station holds the call IZ0FEJ. We seek cooperation from any one for
showing the operation of the JT6 mode, beyond sporadic-E SSB &
CW contacts (if propagation will assist us). So, we must be sure
that somebody will be present at the other end of the link.
Operating frequency will be 70.210 MHz and we may QSY to 70.310 if
band will be too crowded. We will also try to be on the ON4KST chat
for coordination. Thanks in advance for help.

BV2A (PL05SH) : Next activities on 144 MHz EME
LATEST NEWS from Bodo, DL3OCH, dated 2010-06-22: Dear EME friends,

the BV2A crew will have their next EME activity on next Saturday. We hope to work many of you. The setup will be almost identical to last time, but a bit improved. We have a 17element yagi and around 350W (at antenna). We will use BV2A and our grid is PL05SH. Look out for us somewhere around the 144.110 in JT65B first. We will be QRV from Saturday 1100UTC-2100UTC. We will focus on our moon rise and moon set time to get some NA and EU in the log. Unfortunately the window is pretty limited but we hope to get some QSOs in the log. For those that worked us already last time, the QSL is via Bruce BV2KI. vy 73 SOURCE: Bodo, BW/DL3OCH (direct to MMMonVHF)

The Gambia (C5) in the air on HF and 6m (and 2m Tropo) soon
LATEST NEWS from Arliss, W7XU, dated 2010-06-23: Three of our group (W0SD, W0OE and N0QJM) are leaving for Banjul, The Gambia, this morning (23 June). We hope the first 3 can be on the air on the 25th (6 meters, primarily), on 50.103. They have to pick up the license on the 25th, so depending on how long that takes, we may not be operational until the 26th. We will not know the callsign until we pick up the license. We received several requests to bring 2 meters along for attempts at tropo contacts We will have 170 watts on that band and a 9-el yagi. From what we have been told about conditions there, our 2 meter efforts will be mainly after dark.Whether or not we will have full time internet access is not known at this time. Even if you hear us on HF, someone will always be listening/beaconing on 6m (some people questioned us on that last year). I am not positive of the locator, but I believe it will be IK13pl.
SOURCE: Arliss, W7XU, direct to MMMonVHF

** July VHF Contest 2010, 3-4th July **

As well as in past years, Matej, OK1TEH, did setup a list of stations participating at the July VHF Contest 2010 (and the 61.st OK Field day) 3-4th July. For details please do refer the following WEBPAGE: http://www.darkside.cz/qrv.php

** ACTIVATING DL88 and DL89 on 50 MHz **

LATEST NEWS from the Team, dated 2010-06-22: Hello to all on the list....the K5N group is finalizing our trip to DL88 and DL89. We have acquired an old TV van with the pneumatic mast and are almost done with the preparations on the truck. We will be traveling on June 28th using K5QE/R as the call. We expect to be operational at DL88 on June 29th about Noon. We will operate on 50.150 MHz for both SSB/CW and FSK441(in the evenings after Es is closed). Rig will be a Pro2, a 250W amp, and a M2 6M5XHP. We will leave DL88 at 3PM on July 1 and begin the long drive out. We will set up in DL89xw for only one day on July 2nd. On July 3rd, we will be driving home, signing K5QE/R as we go. We will have NO Internet and NO cell phones, however, we have arranged with some members of the BBARC to post messages for us on some of the Inter-net forums. They will be posting on Ping Jockey Central when we are doing meteor scatter. We will be posting on ON4KST and the FFMA reflector at other times. It will REALLY HELP if you guys will post us to your favorite forum when you hear us. That will keep other stations aware of what is happening. Especially let everyone know when we change from SSB/CW to FSK. Thanks for that. The K5N Group is hoping for a big operation and we hope we can work everyone that needs DL88/89. If we get some great propagation, like we had in the June contest, we will work a lot of stations. GL to everyone.... NOTE: ALL WSJT operations will be on WSJT7. 73 The K5N Act.Group

** XT2, BURKINA FASO **

Members of the "VHF DX Gang" will be active as XT2EME from an orphanage (La Maison du Coeur) in Ouagadougou between July 15th and August 2nd. Operators mentioned are: Andre/HB9CVC, Peter/HB9HLV and Ludovic/HB9EOU. The founder, Mrs. Josette Boegli, is from Switerland and Peter, HB9HLV, has been involved in the activities of the orphanage for more than ten years. The group's goal is to make 20,000 QSOs on CW, SSB and PSK. QSL via HB9HLV. The group will be announcing a XT2EME Web page for details about their activities in XT2-land, as well as sponsors and donations for the orphanage (via a PayPal account) very soon. The "VHF DX Gang's" Web page is available at: http://www.hb9eme.ch
Ohio/Penn DX Bulletin #963

** DX Operation from St. Lucia **

This is a 50 Mhz operation, with some HF on 17, 15, 40m when
6 meters is dead. 6 element Yagi on 50 Mhz, 350 watts. 2 ele.
on 17, 15m. QSL home call. Howard - Begin date: 20100621
End date: 20100706 - Callsign(s): J6/WB4WXE
SOURCE: tnx to Bill, NG3K, direct to MMMonVHF

** VO2MK (GO14) on 10-20 July 2010 qrv HF and 6m **

Ken, VO1KVT will once again be active from Mundy Island (NA-205,
WW Loc. GO14JL) as VO2MK on 10-20 July 2010. QRV on HF and 6 m.
Note: 2 days planned activation between 10/7 and 20/7.
QSL via VO1KVT, direct or bureau.

Roy VK6BO has retired from the 14.116 Traveller's Net

NEW ZS HAMS RED CARDED!

Increased Power for Contests

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING JUNE 27 2010

WIA Centenary Update

Looking ahead in the VK100WIA roster.

Today Sunday the 27th of June, the South Coast Amateur Radio Club from its club rooms at Hackham is in the middle of its three-day rostered slot.

The 1st to the 3rd of July sees the Ipswich and District Amateur Radio Club operating from its club rooms with members providing their support to put the special callsign on air. Local publicity is planned.

The 4th to the 6th of July is the roster slot of the Orange & District Amateur Radio Club. About half a dozen members plan to operate moon bounce, aircraft propagation enhancement as well as phone and CW on HF, plus VHF and UHF.

The 7th to the 9th of July, Gympie Communications and Electronics Group with some very long term WIA members keen to activate VK100WIA on CW, and augers well for the centenary celebration there.

And Saturday the 10th and Sunday the 11th of July has the Sunraysia Amateur Radio Group at the Tri Annual Junction Rally, Wentworth. This is major event featuring Vintage Engines, Boats, Machinery and Vehicles. The club plans to mount a vintage radio display as part of its support for VK100WIA.

The special callsign continues to be demand on the bands with 4,000 contacts expected to be logged this week and heading towards 100 DXCC entities worked.

Check out the VK100WIA logbook on the WIA website

A number of stations in Western Australia report hearing VK100WIA being operated in the eastern seaboard, but are missing out on needed contacts for the WIA Centenary Award.

It would appreciated if all club's rostered to use the callsign, particularly when on 40-metres, put out a few calls for VK6 stations and listen for them.

In return when VK100WIA is operated from the west the VK6 guys will do the same and listen for stations in the east.

CQ Centenary Award

So youve made contact with VK100WIA. There will be lots more opportunities between now and the end of October.

But how are you going with getting the required 100 points (50 if outside Australia) towards the WIA Centenary Award?

The award rules state that a contact with VK100WIA operated by the WIA or one of its affiliated clubs is worth 10 points (only one contact with each) and a minimum of two contacts with the special callsign.

However from that minimum, you can make up the award points by further qualifying contacts with VK100WIA, or individual WIA members who are worth two points each.

Its easy, simply call CQ Centenary Award and log contacts with WIA members.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Ewan McLeod VK4ERM vk4erm@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Since 2007 the AGM weekend has been very much the idea of Robert Broomhead, who has managed the WIA weekends since then. Robert resigned as a WIA director at the end of last year and has advised the Board that he would like to see someone else takeover the weekends on an ongoing basis.

Following the successful Centenary Weekend at Canberra, a number of people have requested that the WIA identify the date and venue of the 2011 AGM weekend, so that they can make early arrangements to attend.

A number of sometimes conflicting considerations could influence a choice of venue. These include accessibility for larger amateur populations, the attraction of a place that is itself interesting or has interesting attractions, the identification of a theme associated with radiocommunications, the remoteness of the possible location and the travel options to that location, the cost of travel and the cost of accommodation, and the accommodation options available, the facilities for holding larger meetings even the possible weather at different locations.

While it is appreciated that trying to compete with the 2010 Centenary Weekend would make no sense at all, the Board has decided to invite members to offer their suggestions for future WIA AGM Weekends, preferably by email to WIA Secretary Geoff Atkinson at secretary@wia.org.au.

Because of the constraints imposed by the requirements for audit and formal notice of meeting the WIA AGM must be held sometime in May each year. It cannot be held earlier than the start of May.

Suggestions are requested by 1 July.

HAMS ACROSS AUSTRALIA.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been reading...

We live in the wide brown land down under but what if we lived in an area with a population of about 34,000 and our radio club maintained a system of repeaters with just 35 members. You can read the amazing story and view the stunning pictures in the July issue of World Radio Online.

http://www.worldradiomagazine.com/

Yukon Amateurs get to climb tall mountains and fly equipment to the repeater sites by helicopter. This to support their hobby and support local emcomms.

Amateur Radio Newsline's Bill Pasternak has an interesting article on putting together a "go bag" from what is available in the shack. Being prepared is a good part of assisting in an emergency.
With the announcement of a further WIA train the trainer course in Townsville, in last week's National News, this is a good time for us all to reflect on being prepared.

Oh yes, World Radio Online is a free download and the July edition runs to some 20Mb and 54pp.

I'm Geoff Emery and that's what I,ve been reading....how about you?

CLUBBING -

GOLD COAST AMATEUR RADIO SOCIETY
http://www.goldcoastamateurradio.com
IRLP Node 6702

A very successful AGM was held at the Gold Coast Radio Society Clubrooms last Saturday with a good attendance.

The Club would like to welcome the new Executive and best wishes go to VK4TD George who is the new President.

VK4KMA Dave is Treasurer and VK4BEN as Secretary

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF with news from the Redcliffe AR Club.

Last Monday night was the club's annual general meeting. The Meeting was opened by the president David, VK4DC and with some 30 members present. After a minute's silence for all silent keys for the last 12 months David reported to the club on its success for the last 12 months. Club membership had increased to 118 members, many successful activities such as work bees, field competitions & training sessions being supported by a large majority of members. David also reminded all members that this is a hobby not a job. He said that having fun whilst involving members is the recipe for the club's success.

Certificates of appreciation we also handed out including:
Shaun, VK4FY for his work in providing the new web site Echolink & IRLP services; Peter, VK4XPJ for his work supporting club members projects throughout the year; John, VK4YJV for extraordinary efforts in construction, working bees, repeater upgrades and Peter, VK4EA Peter for his work in the obtaining of many grants for the club.

John, VK4WX, joined the meeting to present the Peter Garrison Shield to Charles, VK4BTC. Charles has been busy providing many repairs to equipment / building & leading in the caravan rebuilding project. These behind the scene repairs/work were much appreciated by all members. The club is fortunate in having willing members such as Charles step in & take on projects. Charles reported a sense of fulfilment that he has enjoyed through this work.

New Office bearers were elected with George VK4XY leading the elections. David VK4DC was reelected as President with Kev, VK4UH as the new vice President, Peter, VK4TAA as Club secretary and Peter, Vk4EA as the new treasurer.

A normal club meeting followed with a reminder to see Peter VK4EA or members of the exec to pay your membership fees, $30 single or $35 Family. Peter advised that there is an EFT payment service available and an email will go out shortly to all members advising the EFT details for this option.

The June long weekend working bee was successful in moving the mast & installing new antennas on the roof. The club also had a spring clean. The triband antenna will be installed on a Wednesday over the coming weeks.

Finally the RD contest is coming up in August. Shaun VK4FY & Scott VK4FLAE will be leading the event. Camping will be available at the Murrenbong scout camp site for those who wish to stay over night.

So until next week, for Redcliffe club, I'm Ray VK4CF

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greetings from Rockhampton and District Amateur Radio Club, the RADAR club.

2010 continues to bring several new initiatives for the club and further development from 2009.

The RADAR club, conducting meetings from the local State Emergency Services Building, has been lucky to obtain long term use of a site at Rockhampton Regional Council's massive Heritage Centre.

The centre attracts close to fifty thousand visitors every year through markets, theme days and school visits, to name a few.

RADAR, particularly through the efforts of Jeff, VK4NJB with support from Mike the builder VK4LMB, Ray the hot spanner man VK4HOT, Doug VK4DUG, Bob VK4CHV and a large number of club members has converted what was basically an unused barn to a full blown vintage radio museum, complete with air conditioned radio shack.

Keep an ear out for VK4CHV, that's it, VK4CHV, the dedicated callsign for Capricorn Heritage Village.

Although the Radio site officially opens on 25th July in conjunction with the Villages Emergency Display Day, the club has hosted market day visits and importantly, Primary School sessions to showcase the hobby. More, later, on radio frequencies used on the day so amateurs can call in and can join the occasion.

To assist the club to further its display, donations of old equipment, parts or publications would be gratefully received. Why have your old gear collecting dust in the shed when it could be encouraging others to continue our enjoyable interest? Jeff, email jcbrett@bigpond.com would be delighted to hear from you.

GREETINGS ! THIS IS DON VK4FNQA, WITH NEWS FROM NORTH QUEENSLAND,
BACK IN THE COMFY SURROUNDS OF THE MATCAVE AFTER
A WEEK IN THE INVIGORATING CLIMATE OF THE ATHERTON TABLELANDS.

FIRSTLY, HERE IS AN UPDATE ON THE PUBLIC SAFETY TRAINER TRAINING WEEKEND
HAPPENING IN TOWNSVILLE FROM FRIDAY EVENING 30TH JULY TO
SUNDAY AFTERNOON 1ST AUGUST.

FRED SWAINSTON VK3DAC IS PLANNING TO CONDUCT AN INTENSIVE TRAINING
SESSION AT THE SES HEADQUARTERS, GREEN STREET, WEST END AND
IS BEING ASSISTED WITH LOCAL LOGISTICS BY ROGER CORDUKES VK4CD.

FRED HAS CONTACTED SOME OF THE CANDIDATES FOR THE COURSE BUT
WOULD LIKE MORE AMATEURS WHO ARE INTERESTED IN DOING THIS COURSE
TO REGISTER ON THE WIA WEBSITE AND CONTACT ROGER ASAP!

FOR THOSE WITH CERTIFICATE FOUR TRAINING AND ASSESSMENT, IT WILL BE AN
EXCELLENT COURSE THAT WILL GIVE QUALIFICATIONS IN EMERGENCY
COMMUNICATIONS, BOTH WICEN AND SES.
FOR THOSE WITHOUT CERTIFICATE FOUR BUT WITH WICEN INTEREST AND
EXPERIENCE, YOU CAN STILL BECOME INVOLVED AND DO THE COURSE.
FRED CAN TAKE A TOTAL OF FIFTEEN PARTICIPANTS.

AS FRED WILL BE DELIVERING THE COURSE IN ABOUT HALF THE TIME THAT
IS NORMALLY REQUIRED THERE IS SOME HOMEWORK INVOLVED PRIOR TO
THE VERY FULL WEEKEND - HOWEVER IT IS ALL VERY WELL WORTH THE EFFORT !
THIS IS A GREAT OPPORTUNITY FOR CENTRAL, NORTH AND FAR NORTH QUEENSLAND
AMATEURS, SO DO NOT MISS IT !

PLEASE SPREAD THE WORD TO THE CLUBS IN YOUR AREA.
FURTHER DETAILS TO FOLLOW TO INTERESTED AMATEURS.

CONTACT ROGER CORDUKES VK4CD ON
TELEPHONE 07 47740221, MOBILE 0417638366
OR ON EMAIL VK4CD AT WIA DOT ORG DOT AU

HERE IS THAT WAKE UP CALL AGAIN FOR ALL TARCADIANS !

YET ANOTHER TIMELY REMINDER THAT YOUR MEMBER SUBS NEED TO
BE PAID BY THIS WEDNESDAY 30TH JUNE 2010.
DONT DELAY, DO IT TODAY.
DETAILS ON WHAT AND HOW TO PAY CAN BE FOUND ON THE INSIDE
FRONT COVER OF THE MAGAZINE OF RENOWN, BACK-SCATTER.
REMEMBER TO CONTACT TREASURER JOAN VK4FTVL IF YOU ARE
HAVING ANY PROBLEMS PAYING.
JOAN CAN BE CONTACTED ON
TELEPHONE 07-47515261 OR
EMAIL COLJOAN AT BIGPOND DOT COM

AND NOW A CALL GOES OUT TO HELP MIKE GET ON HIS BIKE.
THIS IS AN UPDATE ON THE ACTIVITY THAT DASHING
AERO PARAMEDIC, AVID DX-ER AND ALL ROUND GOOD GUY
MIKE VK4MSA IS CURRENTLY IN TRAINING FOR.
THE BIG W TOWNSVILLE TO CAIRNS CHARITY BIKE RIDE WILL BE
LEAVING TOWNSVILLE ON THURSDAY 29TH JULY AND FINISHES IN
CAIRNS ON SATURDAY 31ST JULY, ALONG THE WAY RAISING FUNDS
FOR THE CHILDRENS CANCER INSTITUTE OF AUSTRALIA.
MIKE HAS THE ENTRY FEE ALL SAVED UP BUT HAS TO RAISE AT
LEAST 500 DOLLARS FOR CHARITY BEFORE HE CAN
PARTICIPATE IN THE RIDE - AND TIME IS RUNNING OUT !
SO, CAN YOU HELP OUT A FELLOW HAM WHO IS DOING SOMETHING GOOD?
CONTACT MIKE VK4MSA NEXT TIME YOU HEAR HIM ON AIR OR HEAD OVER

TO THIS WEBSITE TO FIND OUT MORE AND HELP DONATE.

WORLD WIDE WEB DOT EVERYDAYHERO DOT COM DOT AU SLASH
MICHAELPAULSEN

SO THAT IS ALL THERE IS TIME FOR THIS WEEK AND I WILL BRING
THIS EDITION OF QNEWS FOR SUNDAY TWENTY SEVENTH OF JUNE
TO A CLOSE.
NEXT WEEK I WILL BRING YOU SOME EXCITING NEWS ABOUT LADIES
UTILISING THE WIA CENTENARY CALLSIGN TOWARDS THE END OF THE MONTH.

THIS HAS BEEN DON VK4FNQA IN TROPICAL PARADISE FOR
THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN
LISTENING TO, AND ENJOYING QNEWS FROM VK4WIA..

VK5

Solar power for amateur radio

The Amateur Radio Experimenters Group will have an interesting
presentation on solar power at its monthly meeting for July.

Peter Cockburn VK5TZX will talk about the design, construction and use of
a solar based power supply system for an amateur station or home.

The AREG meeting on Friday the 16th of July starting at 8pm will be at
Reedbeds Hall, Phelps Court, Fulham South Australia.

Visitors are most welcome. Check out the location map and more details on
the club's website www.areg.org.au

(vk3pc)

July Presentation

Constructor's Night • Optical Transceivers

REAST will be putting together simple light transceivers during the night and
then testing and talking to each other via red LED light.

Please bring along your soldering iron, some solder and side cutters for a fun
night of construction. Don't worry if you don't own a soldering iron there will
be some spare irons, etc just in case you don't have one.

Kits will be available for between $10 and $20 to cover the component cost and
everything is in the kit including a 9v battery!

Orders are coming in fast so, get in quick and let Justin VK7TW know if are
coming along so REAST can have enough kits available on the night.

This occurs on Wednesday 7th July 2010 starting at 8:00pm.

Even if you don't want to put a kit together then you are most welcome to go along and help the novice kit constructors and have some fun with the finished kits talking to each other.

(73, Justin, VK7TW)

VK8

Adrian, VK2VHF tells WIA News that all through the week "Darwinians" were able to send free telegrams!

This to anywhere in Australia.

Before text messages, email and Twitter, there was the telegram, and this past week people in Darwin celebrated back to Morse Week.

BTM week commemorates the construction of the Overland Telegraph Line in the 1870s which connected Australia to the rest of the world.

Messages were transmitted through morse code from Lyons Cottage in Darwin to Rundle Mall in Adelaide.

One Telegraphist Barrie Barnes says the telegram was then transcribed and posted.

"Australians 50, 60, 70 years ago communicated with each other via telegram, which was transmitted between post offices by morse code," he said." It doesn't run down a physical line as it did then, which was a piece of galvanised iron wire. It's now sent over the normal telecommunication links, but it does traverse the same route as the overland telegraph line."

It is the 20th time the event has been held in Darwin

ACMA NEWS

ACMA Newsletter has article on amateur radio

ACMAsphere is the ACMA's monthly newsletter, covering its activities in the fields of broadcasting, the internet, radiocommunications and telecommunications.

Page 16 of issue 53, June 2010 is devoted to amateur radio, primarily an article "Working with the amateur community to ensure spectrum integrity"

wia.org.au/newsevents/news/2010/20100622-2/index.php

HOME OF THE GOOD GUYS

Roy VK6BO has retired from the 14.116 Traveller's Net and the Indian Ocean Maritime Net due to relocation and subsequent loss of HF antennae.

Roy has handed over these responsibilities to Bob VK6KW who, with assistance from the many relay stations, has volunteered to keep the nets running. Roy made his last 20 meter transmission at 11:45UTC on Wednesday 16 June 2010 after many many years of twice daily scheds, his service has been recognised by the Australian Government by making him an OAM.

Roy, We salute you.

(VK6KAD)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Adelaide intensive Standard License Course to be held in August 2010

Are you Adelaide based and interested in getting/upgrading to a Standard License?

AREG is planning to run a Standard License Course in August over a week.

The course syllabus will be divided in to 5 x 3 hour evening lectures to be give by a variety of lecturers (5CP, ZSN, ZMC, TZX) in a single week Monday to Friday. A regulations exam will be held on the Saturday morning followed by a refresher lecture, followed by the Standard Exam.

Participants will be expected to have done some study before the course and (obviously) during the week.

Cost of the course will be about $100 per student (excluding WIA examination fees) to cover hall and equipment hire, coffee etc. AREG are looking to train 10-15 persons.

If you are interested email Chris VK5CP

vk5cp@arrl.net

This intensive course is the best way to upgrade and give your F call mates some stick when you operate the world on 20M in the sunspot peak.

LEARNERS TO BUILD PAYLOAD FOR HABEX

The SciBono Discovery Centre (ZS6SCI), in association with the Gauteng Department of Education initiated the High Altitude Balloon Experiment project, called HABEX.

The objective is to involve schools in the entire process of developing and building a payload that will be launched into high altitude using an unmanned meteorological balloon and approval has been obtained to launch the balloons on 24 July.

Ten school teams are involved and several radio amateurs have also opted to join in this exciting project. A team of radio amateur engineers and designers are assisting the schools in developing the payloads. You can also join in the activities planned for the HABEX 2010 Launch.

(sourced to sarl)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

NEW ZS HAMS RED CARDED!

The S.A.R.L. regrets to advise candidates who recently wrote the radio amateur exam, that call signs have not yet been issued by the Authority.

And it's all to do with the Soccer World Cup!

The person responsible for issuing the call signs has been allocated to process applications for the 2010 FIFA World Cup and has had to focus on dealing with all Spectrum licensing requests for this epic event.

Oman on 50 MHz

On the IARU-R1 website, Abdalla A41KB reports that radio amateurs in Oman can now use the 50-52 MHz (6m) band.

The Omani Telecommunications Regulatory Authority has allocated the 50-52 MHz band to the amateur service on a secondary basis.

Royal Omani Amateur Radio Society (ROARS)
roars.org.om

cALIFORNIA SOS HOAXSTER SENTENCED TO 30 MONTHS IN FEDERAL PRISON

A federal judge sentenced Kurtis Thorsted of Salinas, California to 30 months in federal prison. This, after the 53 year old pleaded guilty in July in U.S. District Court in San Jose to broadcasting a fake distress signal in October 2008.

At that time he made the transmissions Thorsted told would-be rescuers in that he was in a kayak off the coast of Santa Cruz and having difficulty getting to shore. However it was found that he was actually at his home in the city of Salinas.

Thorsted also pleaded guilty in October to making two other fake mayday calls to the Coast Guard. In all, the court found that Thorsted has made 51 false distress messages over six months and costing the Coast Guard $102,000 in search and related costs.

This is not the first time that Thorsted has been convicted of transmitting a false distress message. In April 2004 he was sentenced to two years in federal prison and ordered to pay more than $29,000 in restitution to the Coast Guard for a similar series of hoax calls. And in one of the earlier incidents, Thorsted's phony call interrupted a real distress call from a 33-foot boat 4 miles off the coast of Santa Cruz island. More on this story is on-line at tinyurl.com/2f63oq8

WEIRD AND WONDERFUL

Radio Amateur's spectacular English Channel crossing.

Just a few weeks ago, in a scene reminiscent of the 2003 Aussie movie "Danny Deckchair", North Carolina Radio Amateur and pilot Jonathan Trappe, KJ4GQV tied himself to 54 helium balloons, floated across the English Channel and landed in a French farmer's vegetable patch.

Strapped into a paragliding harness known as a "gondola", he wore an unlikely outfit for a dare devil adventurer - a crisp white buttoned shirt,

black fleece, green combat trousers and scruffy trainers.

At his highest, Mr Trappe was 7,500ft and travelled at around 17mph.

KJ4GQ, as the first ?cluster balloonist? to cross the 22-mile Channel,
said he had fulfilled the ultimate dream: ?Didn't you have this dream -
grabbing on to a bunch of toy balloons and floating off"?

Read the Telegraph article 'Adventurer flies across Channel in helium filled
balloons'

Trans-Tasman CW & Digital Contest

This is a reminder of the newly resurrected Trans-Tasman CW & Digital contest
which runs on 160m for CW & Digital on 26 June 2010.

Operation is between 0800-1300UTC (best 4 hours out of 5) and you can operate
CW, RTTY, PSK31, and others.

http://homepages.paradise.net.nz/robglassey/TT_CW_dig/index.html

This week, the 14th Marconi Memorial contest is taking place 26 and 27 June
from 14.00 to 14.00 UTC. Using CW on the 1.8 to 28MHz bands, the exchange is
signal report and serial number. There are sections for three differing power
levels and single- and multi- operator stations.

Thai radio hams on 50 MHz for CQWW VHF contest

Radio Amateurs in Thailand have been authorised to use 50-54 MHz (6m) during the CQWW VHF contest July 17-18 2010.

This will be the first use of the band by Thai hams for 18 years.

Thai radio amateurs have been granted temporary permission to use the 6-metre amateur band by the Thai regulator, the National Telecommunications Commission

The last time such permission had been granted was in 1992 during the Southeast Asia Net convention staged in Chiang Mai that year.

Increased Power for Contests

The Irish Society is continuing to pursue with ComReg the question of securing increased power for the duration of contests on a list of international HF and VHF contests still to be finalised.

In order to take this matter further, ComReg wish to have submitted a list of licensed amateurs who would be interested in getting permission to operate with increased power for the contests concerned.

With the International Lighthouse and Lightship Weekend (ILLW) approaching, Jason, VK4FJGS has organized a luxury 50 foot power cat to transport RADAR participants to Cape Capricorn Lighthouse some 30 nautical miles east of the mouth of the Firzroy River. Approximately 14 members will attend. The Lighthouse cottages have been converted to a holiday escape theme, open to the public, with power, refrigeration, full cooking facilities and even TV and video a far call from the clubs ILLW effort last year with all equipment set up under a tarp and carried up the hill to the Sea Hill Lighthouse on two wheeled trollies.

The Cape Capricorn Escape cottages are also being offered on Mates Rates cost of diesel to power generators only.

Incidentally, RADAR is claiming the 2009 award for activating the most remote and basic lighthouse weekend field station!!!

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

Jack, G3PWK will be operating GB70AAF for the Anniversary Airborne Forces on 22nd, 26th & 27th June.

Scarborough Special Events Group will be on the air as GB1AFD for Armed Forces Day, over this weekend of 26th and 27th June. Scarborough will host a parade of more than 400 soldiers celebrating their recent return from Afghanistan. The town's adopted Warship HMS Explorer will be in the bay and there will be fly past by a Spitfire.

Four members of Yamakto ARC will operate from Yap Island, which is IOTA reference OC-012, between 22nd and 29th June. They will operate 6m through to 160m using SSB, CW, RTTY. Callsigns will be within the V63 range and you should listen for QSL information.

Tougher action against Dutch pirate radio stations

The Radiocommunications Agency Netherlands (AT) is stepping up action to prevent illegal radio radio broadcasts.

The agency will not only close down stations that are on the air without permit, but will also target aerial towers ?obviously intended for illegal broadcasts?.

As a first step, AT inspectors will pay warning visits to land and home owners on whose premises suspicious constructions are spotted. ?If these are used illegally, they will be fined 2,500 euros plus a conditional fine of 2,250.? The total fine that illegal broadcasters risk ?can total up to 33,750 euros?, according to AT spokesman Gernant Deekens.

The new approach will first be used in the relatively rural northeastern province of Drenthe. Pirate stations are often run from hideouts in sheds and barns, playing popular music to a local audience for a couple of hours a day. It is often felt that ?official? radio stations are catering insufficiently for regional tastes, prompting enterprising individuals to set up their own transmissions on AM or FM. The quality of the transmitters is often such that the broadcasts are causing interference on other channels, often without the pirates even being aware of it.

?Pirate radios are causing a lot of trouble in the north and east of the Netherlands,? according to AT Chief Inspector Peter Spijkerman. ?Their illegal broadcasts are interfering with legal radio stations here and in neighbouring Germany. Air traffic communication, too, is disrupted by illegal transmissions. This can lead to dangerous situations. We primarily want to take preventive action, but if people break the law, we?ll give the pirates tit for tat,? Mr Spijkerman warned.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

Wireless transceiver cuts power consumption by 90%

European research group Imec plans to produce a short range RF transceiver ten times more power efficient than today's Bluetooth and Zigbee chips.

Imec recently demonstrated discrete modules capable of sending 1,024 kbyte/s over 5 meters while consuming less than one milliwatt. Regular production is planned for the end of the year.

Radio components consume as much as 47% of the power used by wireless networks, making them the first of many targets for Imec's low-power electronics program. The ultimate goal is to reduce the power consumption of electronics for wireless sensor networks so they can operate using energy harvesting techniques and not require batteries.

WW SPECIAL INTEREST GROUP --- MILITARY

70th anniversary of de Gaulle broadcast

A BBC video reports on the impact of an historic radio broadcast by
Charles de Gaulle 70 years ago.

The BBC say:

The French Resistance is one of the most heroic and enduring stories of
World War II. Thousands of French men and women defied the Vichy regime,
and many died or were executed trying to free France from German occupation
after 1940.

Their own hero was General Charles de Gaulle who had rallied resistance
fighters in a broadcast made 70 years ago, from a small BBC studio in London.

As Allan Little reports its impact was far greater and enduring than the number
of French citizens who heard it crackling over the airwaves.

Watch the BBC video at
http://news.bbc.co.uk/1/hi/programmes/newsnight/8747876.stm

QRP spots via APRS and Twitter

QRPspots is a popular site for low power operators to let people know who's
active. Spots can now be posted by APRS and Twitter as well as via the website

In an email VA3SIA explains how to use it via APRS messages, he writes:

Just send an APRS message to callsign 'QRPSPT' it can be in any format as long
as there's a callsign and frequency in there somewhere.

So, these all work: (in this example from VA3SIE).

7042
Gets posted as VA3SIE spotting VA3SIE on 7042kHz.

Just heard VE3WMB on 14.063MHz
Gets posted as VA3SIE spotting VE3WMB on 14063kHz.

Terry WA0ITP @ 3560 kHz
Gets posted as VA3SIE spotting WA0ITP on 3560kHz.

Beta of WSJT8

WSJT8 is an experimental version of the familiar amateur radio weak-signal communication program WSJT and a free beta version of the software is available.

It offers new protocols or 'modes' optimized for meteor scatter, ionospheric scatter, EME, microwaves, and QRP at HF.

Like the modes in previous versions of WSJT, the new ones are intended for making minimal QSOs, not for rag-chewing.

WSJT8 modes are not compatible with those in WSJT7.
To use the new modes, transmitting and receiving stations must both use WSJT8.

WSJT8 can be downloaded from
physics.princeton.edu/pulsar/K1JT/

New cell phone antenna

Rescue Emergency workers in rugged, rural areas may never lose a cell phone call again thanks to a new antenna developed by Montana State University researchers in collaboration with Advanced Acoustic Concepts, Inc.

The MSU antenna is considered a "smart" or "adaptive array" antenna because it uses a computer chip to automatically aim the message transmission beam in the right direction, chooses the most appropriate signal strength, optimizes the strength of transmitted beams and adapts to the environment.

The automatic control allows users to communicate in rugged terrain while on the move. Unlike normal antennas, which broadcast in all directions simultaneously, smart antennas maintain a direct signal between individuals users, which could mean fewer dropped calls and the ability to move more data, such as streaming video.

Amateur Radio Newsline(tm) Report 1715 - June 25 2010

This is a closed circuit advisory and no necessarily for air. With an update on Newsline's finances, here's our producer Bill Pasternak, WA6ITF:

--

First the good news. As we go to air this week, all the bills through the end of May have been paid and we still have close to a thousand dollars left in the account. Not counting our upcoming costs in the presentation of the 2010 Young Ham of the Year Award, we hopefully have enough in the account to hold us over the summer.

Why the change from months past? Its mainly due to our adopting SKYPE Internet phone service to make most of our long distance phone calls. Unfortunately, SKYPE cannot call everywhere so we still have to maintain our regular long distance service. But that's gone from about $300 a month down to about $50. And as an added benefit the overall quality of the interview audio using Skype is vastly improved.

The bad news, if you can call it that, is that we still need to raise about $600 to cover our portion of the expenses in presenting the Young Ham of the Year Award that will take place in Huntsville, Alabama in mid-August.

While corporate underwriters Vertex Standard and CQ Magazine cover most of the expenses for the award recipient, we still have the obligation of sending a member of the Newsline team to officiate at the ceremony and we also host a Newsline sponsored dinner to honor the award winner.

Anyhow, if you can assist us in covering these expenses, tax deductible contributions can be made via Pay Pal at our website www.arnewsline.org, or by US mail to the address you will hear a the end of this weeks newscast. To which I say my personal thank-you for your support of Amateur Radio Newsline and our Young Ham of the Year Award program.

That ends the closed circuit advisory. I'm Bill Pasternak, WA6ITF, and now here's Frank Haas, KB4T, this weeks newscast. Frank

--

Thank you Bill. Now, Amateur Radio Newsline report number 1715 with a release date of Friday, June 25, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. A Wisconsin town says a ham tower must be lowered. The I-A-R-U says that three member societies have gone missing. A sports event causes ham radio licensing delays in South

Africa. The ARRL warns its members of an e-mail phishing scheme and a radio club in Whales gets a big grant to buy new gear. Find out the details on Amateur Radio Newsline(tm) report number 1715 coming your way right
now.

RADIO LAW: WISCONSIN TOWN ORDERS HAM TOWER TO BE LOWERED OR TAKEN DOWN

A family of Mount Pleasant, Wisconsin ham radio operators may soon have to significantly lower or get rid of their amateur radio tower. This following a decision by the township Plan Commission on Wednesday, June 16th. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

The Commissioners sitting on the Mount Pleasant panel unanimously rejected the request by Jim Markstrom, KB9MMA, to keep the 62-foot tower at his home. This, after staff members cited several concerns. These being that the height exceeds the limit allowed by a village ordinance; that a similar tower collapsed in the late 1990s; and concerns by neighbors said Markstrom misrepresented their views on it.

Madison attorney Mark Hazelbaker is representing the Markstroms. He pointed to federal and state laws that require local governments to "reasonably accommodate" amateur radio communication when the authority attempts to restrict it for health, safety or aesthetic reasons. He also noted that an engineer's report showed the tower's base was safe and actually overbuilt. Hazelbaker stated that even if it were to fall, the study suggests it would most likely collapse within itself.

He said lowering the tower to 28 feet which the highest allowed by Mount Pleasant based on the distance it could fall, would unreasonably limit transmissions. But Mount Pleasant officials countered that wasn't the case with a ham radio tower that fell onto a play area at home fewer than 15 years ago.

Jim Markstrom is a 35-year-old professor and engineer who volunteers as amateur radio emergency coordinator for Racine County. His 10-year-old son Samm, KC9POP, recently won an award for relaying severe weather reports via ham radio.

Mount Pleasant began investigating the tower after receiving complaints from nearby residents about interference on home electronics. Although local governments cannot legally intervene on that basis, officials determined Markstrom never received zoning approval to put up the tower. Ten neighbors signed a petition asking Mount Pleasant to order its removal.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale.

--

Attorney Hazelbaker said the Markstroms still hope to work with village officials to find a better resolution. But he also warned that further legal action is a possibility. (Journal-Times, eHam, others)

**

WORLDBEAT: WORLD CUP DELAYS ISSUANCE OF HAM LICENSES IN SOUTH AFRICA

A major sporting event has come in the way of issuing new hams their call letters and licenses in South Africa.

According to the South African Radio League, candidates who recently passed the nations radio amateur exam will have to wait a while longer before receiving their ham tickets. This is because the person at the nations telecommunications agency who is responsible for issuing amateur radio call signs has been temporarily reassigned to process applications for the 2010 F-I-F-A World Cup soccer championship. As such, he has had to focus on dealing with all aspects of spectrum licensing requests for this epic event.

The South African Radio League says that it is in constant contact with the regulatory body and that the new licensees will be issued their callsigns as soon as they become available. It also asks those on the waiting list to be patient and not contact the telecommunications regulator in any personal effort to try to speed up the process. The South African Radio League says that this will just create frustration for the applicant, the SARL as well as the licensing authority. It could also result in further delays. (SARL)

**

WORLDBEAT: THREE IARU MEMBER SOCIETIES GO MISSING

The International Amateur Radio Union reports it has not been able to contact three national ham radio societies for at least five years and believes that there is no evidence of their continued existence. The three groups are the Papua New Guinea Amateur Radio Society, CORA in French Polynesia and The Burma Amateur Radio Transmitting Society. Under its rules the IARU it has called for evidence to be submitted that these radio societies are in existence by no later than September 13, 2010.

Meantime in other changes, the Radio Club of Paraguay has been reinstated to full IARU membership status, the Union des Radioamateurs du Congo is a newly is a newly elected member, and a membership application is being considered from the Montenegrin Amateur Radio Pool formed in October 2008. (VK3PC)

**

WORLDBEAT: OMAN GIVES HAMS 6 METERS

The International Amateur Radio Union's Region One website reports that Omani hams have been given access to part of the 6 meter band. The report attributed to A41KB says that radio amateurs in that nation can now use

the 50 to 52 MHz under permit by the Omani Telecommunications Regulatory Authority. Omani hams have this access on a secondary basis to other users of the spectrum. More is on line at www.iaru-r1.org. (IARU Region 1)

**

WORLDBEAT: THAI HAMS TO HAVE 6 METERS FOR CQWW VHF CONTEST

Hams in Thailand have been authorized to use of 6 meters during the CQWW VHF contest. Thai amateur radio operators to operate 50 to 54 MHz during the CQ Worldwide VHF contest for 48 hours on July 17th and 18th by a blanket permit granted by the National Telecommunications Commission. This will be the first use of the 50 to 54 MHz allocation by Thai hams for 18 years. The last time such permission had been granted was in 1992 during the Southeast Asia Net Convention that year. (RAST)

**

BREAK 1

(5 sec pause here)

**

ALERT: ARRL WARNS OF E-MAIL PHISHING SCAM

The ARRL says that crooks are trying to use its identity to try to get members personal information and its waning members to ignore any requests seemingly coming from the League asking for such data. Amateur Radio Newsline's Bruce Tennent, K6PZW reports:

--

In a posting to its website, the ARRL says that it has received several reports from members with arrl dot net e-mail accounts. These people tell the League that they have recently been contacted via e-mail with requests asking for personal information, such as user names and passwords.

The ARRL says that these e-mails are fraudulent attempts at phishing and did not originate from that organization. For those not aware, the term phishing, which is pronounced fishing but spelled with a ph, is where a cyber criminal will use someone else's trusted name, e-mail or both to try to get you to send them your personal information.

According to ARRL Chief Financial Officer Barry Shelley, N1VXY, there is never a time when the League would ask via mass e-mail for user names and passwords of arrl dot net users. He says that if you receive an e-mail asking for personal information and it looks like it originated from ARRL, do not respond. Shelley says to just delete it.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

On a technical level, Shelley says that this is a very crude attempt at phishing, using an easily determined spoof of the originating and return address. (ARRL)

**

ENFORCEMENT: FCC FINES THREE WHO AIDED UNLICENSED BROADCASTER

The FCC has jointly fined three Massachusetts residents $10000. This for what the regulatory agency calls providing services and facilities incidental to the operation of an unlicensed transmitter.

In simpler terms, it means that the regulatory agency determined that Delroy Johnson, Paul Parara, and Richard Parara were in some way sanctioning or supporting the operation unlicensed transmitters on 97.5 MHz in Hyde Park and Dorchester, Massachusetts. Its not asserting that any of the three ran the transmitting facility, but that their support made it possible for the transmissions to be made.

By way of background, this past March 8th the Commission's New York Field Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to the three regarding this matter. Neither Johnson nor the Parara's has filed a response to the NAL. So, based on the information before us it the FCC has affirmed the fine and given the three the customary 30 days to pay or to file an appeal. (FCC)

**

RESCUE RADIO: HAMS RESPOND TO BILLINGS MONTANA TORNADO

Ham radio was there in the afternoon hours of June 20th when severe weather struck the plains city of Billings, Montana. With very little notice a tornado formed and touched down. Damage was severe to several businesses and a sports arena.

Radio amateurs trained in emergency response were quickly involved in this event providing communications assistance. The Yellowstone County Amateur Radio Emergency Service team provided Skywarn communications to the National Weather Service office in Billings which included the first reports of the tornado on the ground and the damage it caused.

Tom Frieders is a Warning Coordination Meteorologist with the National Weather Service. He says that the ham radio operators played a key role in giving them needed information in order to provide accurate and timely warnings to the public. (N0QXW)

**

HAM RADIO ON THE NET: QRZ.COM REACHES 400,000 USER MILESTONE

And a word of congratulations to our friends at QRZ dot come. This as the website registers its 400,000th user into the system over the weekend of June 19th and 20th. QRZ founder and owner Fred Lloyd, AA7BQ, says that he does not know exactly who it was when it happened, but it made his group

very proud just the same.

Lloyd also says that on Friday, June 18th that QRZ installed another 12gb of RAM into its two main servers which doubled the amount that they previously were using. Prior to the upgrade, QRZ could service 350 simultaneous requests. Now, that number has jumped to nearly 1000. (QRZ)

**

PROPAGATION NEWS: IARU REGION 1 BEACON GUODE UPDATED FOR MGM

With more and more VHF DX openings taking place there's some good news regarding propagation beacons operating in IARU Region One. This with word the regions VHF Beacon Guide has been updated for Machine Generated Modes or MGM.

The change comes as the result of a recent meeting in Vienna, Austria where the Region-1 VHF Handbook has been updated to version 5.42. The chapter on Beacons has been updated with Machine Generated Modes messaging options and can now be seen at tinyurl.com/22lasba. (Southgate)

**

THE SOCIAL SCENE: LAST CALL FOR PAPERS FOR AMSAT-UK COLLOQUIUM 2010

Turning to the ham radio social scene, AMSAT-UK has issued a final call for speakers for its Colloquium 2010. This event is set for July 31st through August 1st at the Holiday Inn at Guildford in the United Kingdom.

Speakers are invited on a variety of amateur radio space related and associated activities. The submission of a papers by speakers for presentation at the colloquium along with any PowerPoint or similar material should be made by e-mail to david (dot) johnson (at) blackpepper (dot) co (dot) uk (AMSAT-UK)

**

THE SOCIAL SCENE: MICHIGAN NET CELEBRATES 75th ANNIVERSARY

And congratulations to the Michigan Net also known as Q-M-N as it celebrates its 75th anniversary this year. QMN is the nation's oldest public service communications network, having been in continuous operation since late 1935.

QMN conducts routine CW traffic nets on 3563 kHz daily. It also sponsors the National Radio Emergency Net that provides nationwide communications support for major disaster operations as well as an ongoing training program serving the entire United States.

More Information on the Michigan Net is on line at www.michigannet.org (WB8SIW)

**

THE SOCIAL SCENE: HAMRADIO IN GERMANY

Europes Hamtronic show in Friedrichshafen, Germany better known simply as HamRadio takes place as we go to air on Friday, June 25th and continuing through to Sunday the 27th. For the first time as part of this international exhibition there will be a Contest University dedicated to training beginners and professionals in the art of radiosports.

Also, this 35th annual show also happens to coincide with the 60th anniversary of the founding of the German Amateur Radio Club, better known as the DARC.

HamRadio is often referred to as the Dayton of Europe. We will have more on the show upcoming in future Amateur Radio Newsline reports. (DARC)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO IN SPACE: SUMBANDILASAT BACK ON LINE

South Africa's Sumbandila amateur radio satellite is back on the air. SO-67 as its known in AMSAT parlance carries an FM transponder are Uplink 145.875 MHz and Downlink 435.345 MHz +/- Doppler shift and is available for all hams to use world-wide. (ZR1JAK)

**

HAM RADIO IN SPACE: NAME THE SA CUBESAT PROJECT

South Africa-AMSAT is inviting radio amateurs in that nation to propose a name for its CubeSat project. The group says that the name should be a single word in any of South Africa's official languages and reflect the spirit of the project.

For those not aware, a CubeSat is a 10 cm cube with a mass of up to 1 kg. The South African CubeSat project was announced at the recently held Space Symposium and will involve the design and construction of the flight hardware.

And less we forget, the closing date to submit an entry is the 15th of July. Entries should be sent by e-mail to saamsat (at) intekom (dot) co (dot) za. (Southgate)

**

RADIO IN SPACE: THE LUNAR LANDER CUBESAT PROJECT

In a story first reported in the European E-E Times, Vermont Technical College, Norwich University, St. Michael's College, and the University of

Vermont are working together to land a tiny CubeSat on the moon.

The design team is currently working on initial proposal for the spacecraft. This, with the aim of achieving further NASA funding in June 2011. Primary funding for this effort is already being provided by the Vermont Space Grant Consortium under NASA grant.

In the current phase of the program The Vermont CubeSat project, led by Professor Carl Brandon of Vermont Technical College aims to launch by 2015. It is developing the first CubeSat that can be launched from a geostationary orbit to successfully land on the moon. The CubeSat electronics are based on a Texas Instruments MSP430 processor and the software will control navigation, communications, scientific instruments, camera and the CubeSat's propulsion system. No word on what modes and radio bands it will operate. More is on-line at tinyurl.com/22vuz7q (EE Times, Southgate, ANS)

**

RADIO IN SPACE: NASA RELEASES KEPLER DATA ON EXTRASOLAR PLANETS

NASA's Kepler Mission has released 43 days of science data on more than 156,000 stars it has radioed back to Earth. Astronomers will use the new data to determine if orbiting planets are responsible for brightness variations in several hundred stars.

These stars make up a full range of temperatures, sizes and ages. Many of them are stable, while others pulsate. Some show starspots, which are similar to sunspots, and a few produce flares that would sterilize their nearest planets. These stars are being monitored for subtle brightness changes as part of an ongoing search for Earth-like planets outside of our solar system. (NASA/Ames Research Center)

**

ON THE AIR: THE STATELY HOMES OF NORTHERN IRELAND

On the air, the Castles And Stately Homes On The Air in Northern Ireland will have a major activation on July 16th. This with word that MI0RYL has obtained permission to activate both the Stormont Parliament Buildings and Stormont Castle within the estate of the same name in Belfast.

Propagation permitting, MI0RYL hopes to operate on as many bands and modes as possible throughout the day so as to allow as many amateurs as possible the opportunity to make contact. To commemorate this operation a special QSL card will be issued to any contacts that are made. (IRTS)

**

DX

In DX, we begin with word that NN3W reports that over 13,000 QSO's for the 9M2HB operation have been uploaded to Logbook Of The World. He thanks N-K-Zero-S for doing the data conversion.

On the air, CT1BOH will be active as CR3E from Madeira during the 2010 IARU High Frequency World Championship Contest on July 10th and 11th. QSL via W3HNK.

WB4WXE will be portable J6 on St. Lucia through July 7th concentrating his operation on 6 meters. At times with no propagation on 6 you will find him on 17, 15 or 40. QSL via WB4WXE.

GM0VMW currently is on duty on in the Falkland Islands and is operating as VP8DND/P on 20 through 2 meters. He's on the air as time permits. QSL direct via his home call.

If you hear a station signing the call TS7C you will waste your time making contact with him. It seems that the callsign TS7C was a DXpedition to Kerkenah, Tunisia, done back in January of 2009. This callsign is unique and hasn't been reissued.

Lastly, the planned operation from Gabon has been cancelled. I2YSB has announced that the new destination for the team will be Togo with the operation taking place during the month of October. They expect to operate with three stations on all the bands. No other details have been provided other than the pilot station will be IK7JWY.

**

THAT FINAL ITEM: WELSH RADIO CLUB RECEIVES 5000 POUND GRANT

An amateur radio club in Wales is one of 199 community projects to be awarded grants from the United Kingdom's Big Lottery Fund. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

The fund's Awards for All program has made a 5000 Pound grant to the Porthmadog and District Amateur Radio Society in the United Kingdom. This, to permit it to buy new equipment.

The clubs spokesman is Gary Brookes. Brooks says that this is excellent news, and they are obviously very grateful to the National Lottery for the grant.

Brooks notes that his is a small club, but this is a massive investment, and a big opportunity to promote the society, and what we do in the area. The grant monies will enable more local people to learn about the hobby and to get involved.

The Big Lottery Fund distributes monies on behalf of the National Lottery to good causes across the United Kingdom. Its goal is to enable others to make real improvements to communities and the lives of people across that nation.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

Currently, 5000 Pounds is the equivalent of about $7400 United States Dollars. (Caernarfon and Denbigh Herald)

GB2RS NEWS

Sunday 27th June 2010

The news headlines

Ofcom releases report on PLT

Oman now on 6 metres

CISPR seeks plasma TV interference experiences

Last Wednesday Ofcom published its long-awaited report, The Likelihood and Extent of Radio Frequency Interference from In-Home PLT Devices. This 156 page report assesses the likelihood of interference to various users of the radio spectrum over the next decade. The main conclusion is that action is needed to reduce the interference footprint of PLT devices, and that this action could take various forms. The Society is considering the report in detail prior to initiating discussions with Ofcom about the follow-on actions it intends to take.�We expect the position to become clearer over the next few weeks and months.

The Omani Telecommunications Regulatory Authority has now allocated the band 50-52MHz to the amateur service on a secondary basis.

The international standards committee responsible for EMC matters, CISPR, have launched an information-gathering campaign, specifically aimed at determining the extent and seriousness of interference from plasma TV receivers. Initially they have asked national standards organisations for this data and, in the UK, BSI contacted our Regulator, Ofcom. They posed the simple question, asking how many complaints have there been? Ofcom indicated that they had received only 12 to 15. Over the last few years, the EMC Committee have received many more complaints from members, but no recording system is in place. So, we now need your help. If you have suffered, or are suffering now, from interference from a plasma TV receiver we need to know. All that you have to do is send a very brief e-mail to plasma.tv@rsgb.org.uk. We only need to know the number of interference cases, no details, and no names/addresses. Please act as soon as possible, since the timescale for gathering this information is very tight.

The RSGB Convention that takes place between 8 and 10 October has a wide variety of talks and lectures over the weekend. One of the latest talks to be confirmed is by David Johnson, G4DPZ on the current status of amateur satellite communications. He will also update the audience on the FUNcube satellite project. It is hoped that live satellite demos

will take place as passes allow. Bookings for this popular event are already up on last year and you can find details of weekend packages or day tickets at www.rsgb.org.uk/rsgbconvention.

The RSGB VHF Field Day takes place next weekend, 3 and 4 July. Although this is basically a 24-hour contest, there are exceptions. The 50MHz part takes place during the first eight hours and the 70MHz part takes place during the last eight. It is interesting to note how VHF NFD has developed over the years. At one time there were just a few categories and the only awards were for portables, but now there are two categories for fixed stations as well, Open and Restricted. For full details of the rules, go to the RSGB Contest website at www.rsgbcc.org/vhf and click on the calendar for 3 or 4 July.

Jersey Amateur Radio Repeater Group has got its repeater GB3GJ back on the air. Information about the repeater can be found at www.radioclubs.net/gb3gj and the group welcome calls from anyone who can get through for signal reports. The repeater is based on a commercial Tait repeater transceiver and requires 71.9Hz CTCSS.

The National Hamfest is being organised by the RSGB in conjunction with Lincoln Short Wave Club and will take place on Friday 1 October and Saturday 2 October. Building on the success of the first National Hamfest in 2009, improvements are being made to the layout. Outside the main hall, the trading area is being extended to around twice the area used last year. Outside traders did brisk business at the last year's show and it is hoped to be able to accommodate many more at this year's event. There will also be a large area for car booters. Pitches can be booked via the National Hamfest website at www.nationalhamfest.org.uk.

South Bristol ARC will be starting a new Intermediate course on 1 July. The venue is the Community Centre, rear of 122-124 Novers Park Road, Filwood, Bristol. Lead instructor will be Andrew Jenner, G7KNA. Candidates are invited to contact Andrew by e-mail to g7kna@ukfsn.org.uk as soon as possible in order to have their names registered.

Celebrating the role of the armed forces throughout history and in particular the role of the cadet forces, Bletchley Park in Buckinghamshire is hosting an Armed Forces weekend on 3 and 4 July. The event will also look at how Bletchley Park assisted the armed forces during World War Two. Other activities during the weekend will include a display by the Vintage Military Amateur Radio Society of radio equipment spanning the last hundred years, showing how communication in the armed forces has changed over time and become ever more vital. More information can be found at their website www.bletchleypark.org.uk or on 01908 640404.

And now for the details of rallies and events for the coming week

The West Of England Radio Rally takes place today, 27 June, at the Cheese & Grain, Bridge Street, Frome, Somerset BA11 1BE. There will be trade stands, an RSGB bookstall as well as catering facilities and easy

access for disabled visitors. Further details from Shaun, G8VPG, on 01225 873 098.

On Saturday 3 July, the 1st Stockport Rally will be held at Walthew House, Shaw Heath, Stockport SK2 6QS. Doors open at 10am and admission is ?1. Tables are available at ?10 each. Details from Bernard, G3SHF, on 01625 850088 during the day or Nigel, G0RXA, on 0161 428 8413 in the evening.

The Bangor & District ARS Rally takes place at Donaghadee Community Centre, County Down BT21 0HB. Doors open at 12 noon and admission is free. There will be trade stands and a Bring & Buy. More details from Bill, GI4AAM on 028 9181 6707.

The Barford Norfolk Radio Rally will take place on 4 July. This well established radio rally has both indoor tables and outdoor pitches and as well as being a fine place to trade in all things radio and electronic is a traditional meeting place for many local as well as DX amateurs. Entry cost is just ?1 per person and outdoor pitches are under ?10, so together with hot and cold refreshments a good and affordable day out for the family. Gates open 8am for traders and 9am for visitors. Contact David, G7URP on 01953 457322 for more information.

Now for the news of special events

Jack, G3PWK will be operating GB70AAF for the Anniversary Airborne Forces) today, 27 June.

The Scarborough Special Events Group will be on the air as GB1AFD for Armed Forces Day today, 27 June. The town's adopted Warship HMS Explorer will be in the bay and there will be fly past by a Spitfire.

GB4BAH will be operated by members of the Coventry Amateur Radio Society on 3 July from The Almshouses, All Saints Square, Bedworth. This station is celebrating the 170th anniversary of the founding of Bedworth Almshouses by Rev. Nicholas Chamberlaine.

Then, on 4 July, GB4BLC will be operated by members of the Coventry Amateur Radio Society. This is a joint venture between Coventry Amateur Radio Society & Bedworth lions Club, operating from 30th Signals Regiment Gamecock Barracks, Bramcote near Nuneaton. The station is promoting amateur radio & Lions Club International to the public.

And now the HF DX news compiled from 425 DX News and other sources.

Pontus, SM0R and Jaan, SM0R/1 will be operating from IOTA reference EU-020 in Sweden from 2 to 4 July. They will be on the air using the HF bands and 50MHz. QSL via SM0R either direct or via the bureau.

Wolf, LA/DM2AUJ, is on holiday in the Lofotem Islands, which is IOTA reference EU-076, until 8 July. He will be operating mostly CW with some SSB. QSL to his home callsign either direct or via the bureau.

Jimmy, FS/W6JKV, will be on the island of St Martin, which is IOTA reference NA-105 until 5 July. QSL to his home callsign either direct or via the bureau.

Looking ahead now. On the week commencing 25 September, members of Sands Contest Group and Workington Radio Club along with Brendan Minish, EI6IZ will be visiting the Isle of Aran off the coast of south western Scotland, operating under the callsign MM0SCG. They will be operating on VHF and HF using SSB, CW and data modes. The location is IOTA island number EU-123.

Now the contest news

The 4th 70MHz Cumulative Contest takes place today, 27 June, from 1000 to 1200UTC. Using all modes, the exchange is signal report, serial number and locator.

Tuesday 29 June sees the 70MHz UK Activity Contest on the air from 1900 to 2130UTC. Again using all modes, the exchange is signal report, serial number and locator.

Finally for this week, the RSGB VHF NFD takes place on 3 and 4 July from 1400 to 1400UTC. Using all modes on the bands, 6m, 4m, 2m, 70cm and 23cm, the exchange is signal report, serial number and locator. There are rules on which bands can be used at certain times, so please check the rules before taking part.

Now the solar factual data for the period from the 14th to the 20th of June, compiled by Neil Clarke, G0CAS on the 21st of June.

Sunspots were visible every day except for the 15th and the 16th. The sunspot groups were small and only produced one C class solar flare which occurred on the 14th. Solar flux levels declined slightly from 73 units on the 14th to 69 by the 19th. The average was 71 units. The 90 day solar flux average on the 20th was 75 units, that's one unit down on last week. The 90 day solar flux levels have declined since late March when 83 units was recorded. X-ray flux levels varied little day to day and averaged A4.9. Geomagnetic activity started at quiet levels but by the 15th a coronal hole disturbance arrived, this peaked on the 16th with an Ap index of 19 units. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 360 kilometres per second to 600 kilometres per second by the 16th. Wind speeds then gradually declined. Particle densities were low except for the 15th which increased to 22 particles per cubic centimetre. On the quiet day the Bz varied between minus 3 and plus 4 nanoTeslas and between minus 9 and plus 7 nanoTeslas on the 16th which was the most disturbed day.

Strong Sporadic-E occurred on most days on frequencies up to 70MHz, though there were also substantial periods when sporadic-E was not present. F2-related propagation at HF tended to be a bit below expected levels as a consequence of the midweek disturbance.

And now the solar forecast. Without an upsurge in sunspot activity then solar activity is expected to be at very low levels. There are no signs that an upsurge in imminent, but as we know things can change with very little warning. Solar flux should be in the 70's for most of the week. Geomagnetic activity is expected to be unsettled for the next few days due to a recurring coronal hole. Activity should subside to quiet levels from midweek onwards. MUFs during daylight hours at equal latitudes should be around 18MHz for the south and 15MHz for the north. Darkness hour lows are expected to be about 11MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 19MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 0900 and 1700 hours. Sporadic-E is expected to take place most days on the lower VHF bands with openings up to 144MHz possible now that we are at the peak of the summer season.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 28 June Gloucester Amateur Radio & Electronics Society is having an informal meeting. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 28 June South Birmingham Radio Society is holding a field day planning meeting. Contact Don, on 0121 458 1603.

On Monday 28 June Stratford Upon Avon District Radio Society is having a 2m fox hunt, starting at the Home Guard Club. Contact G0CHO, on 01608 664488.

On Monday 28 June Wythall Radio Club continues its Intermediate Course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 29 June Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 29 June Kettering & District Amateur Radio Society is holding an operating night. Check out the website for details http://kdars.co.uk.

On Tuesday 29 June Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 29 June Wythall Radio Club continues its Intermediate Course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 30 June Bolsover Amateur Radio Society is holding a committee meeting. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 30 June Hinckley Amateur Radio Society has its junk sale. Details from John, M0JAV, on 07836 731544.

On Wednesday 30 June Kettering & District Amateur Radio Society is having a gentleman's group afternoon. Check out the website for details http://kdars.co.uk.

On Wednesday 30 June Lincoln Short-Wave Club is putting G5FZ on the air and holding a barbecue. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 30 June Midland Amateur Radio Society is holding a contest meeting with training and Morse classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 30 June South Notts Amateur Radio Club is having a talk on inductors by G4EDX. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc.

On Wednesday 30 June Telford & District Amateur Radio Society is having a barbecue in the park and testing 3cm receivers built from club kits. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 1 July Kettering & District Amateur Radio Society is holding a training night. Check out the website for details http://kdars.co.uk.

On Thursday 1 July RAF Waddington Amateur Radio Club is having a shack and chat night with radio and antenna play. Details from Judy Rowlands, on 07544 456422.

On Friday 2 July Coventry Amateur Radio Society is having a talk on the Pennine Way & amateur radio by Tommy Read. Contact John, G8SEQ, on 07958 777363.

On Friday 2 July South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 3 July Lincoln Short-Wave Club starts its weekend event for VHF NFD at its contest site at Brattleby. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 3 July Telford & District Amateur Radio Society starts its weekend event at Long Mynd for VHF field day. Help is welcome. Contact Mike, G3JKX, on 01952 299 677.

On Saturday 3 July Wythall Radio Club is taking part in VHF NFD. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Sunday 4 July Kettering & District Amateur Radio Society is having an open meeting 11am followed by a social meeting. Check out the website for details http://kdars.co.uk.

NEWS FOR THE NORTH OF ENGLAND

On Monday 28 June Angel of the North Amateur Radio Club is having a talk on exotic aerials by Bill Gleave, G8YWK. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 28 June Bolton Wireless Club is having an activity night including a summer round-up of recent VHF contests and direction finding. For details, send an email to boltonwireless@gmail.com.

On Monday 28 June Sheffield Amateur Radio Club is having a VHF NFD planning meeting and contest workshop. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 28 June South Manchester Radio and Computer Club is holding its monthly technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Monday 28 June Thornton Cleveleys Amateur Radio Society is having a technical talk. Details from John Foster, 2E0EZY, on 01253 399377.

On Tuesday 29 June Chester & District Amateur Radio Society is watching a new Other Man's Shack video. Details from Barbara Green on 07957 870770.

On Tuesday 29 June Morecambe Bay Amateur Radio Society is having a social evening. For more information contact Martin Hazel, M0ZIF, on 01524 848193.

On Tuesday 29 June Otley Amateur Radio Society is taking part in the 70MHz UKAC and having a natter night. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 30 June Hornsea Amateur Radio Club is having an activity, shack, workshop and DVD evening. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 30 June Mid-Cheshire Amateur Radio Society is having a committee meeting coupled with the new club project, a frequency counter. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 1 July South Manchester Radio and Computer Club is having a PC clinic with Dave, G4UGM. Details from Ron, G3SVW, on 0161 969 3999.

On Saturday 3 July Sheffield Amateur Radio Club is taking part in VHF NFD as G2AS/P from Wharncliffe Chase, IO93FL. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Sunday 4 July East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

No news items were received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 29 June Livingston & District Amateur Radio Society is having a club evening. For more information contact Norman, on 07740 946192.

On Thursday 1 July Aberdeen Amateur Radio Society is holding a junk sale. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 2 July West of Scotland Amateur Radio Society is having a club night that includes presentations, guest speakers, a raffle and a quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Saturday 3 July Cockenzie & Port Seton Amateur Radio Club is taking part in VHF field day. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA

On Monday 28 June Felixstowe & District Amateur Radio Society is having an update on the UK Radio Astronomy Group by Laurence Newell. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Tuesday 29 June Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 29 June Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 30 June Chesham & District Amateur Radio Society is having a pedestrian DF hunt around Chesham on 145.550MHz FM. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 30 June Havering & District Amateur Radio Club is chatting about VHF Field Day. Contact John, M0UKD, on 07817 365354.

On Wednesday 30 June Norfolk Amateur Radio Club is preparing for the DF fox hunt and testing equipment. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 30 June Worthing & District Amateur Radio Club is putting GX3WOR on the air and having a discussion evening. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 1 July Horsham Amateur Radio Club is having a talk on Goubau lines and other small aerials by Mike Underhill, G3LHZ. Details are on the web at www.harc.org.uk.

On Thursday 1 July Lowestoft & District Amateur Radio Club is having a club night at shack. Details from Phil, G0JSG, on 01502 585448.

On Thursday 1 July Shefford & District Amateur Radio Society is having a 2m pedestrian DF hunt. Details from David, G8UOD, on 01234 742 757.

On Friday 2 July Crystal Palace Radio and Electronics Club is having a talk on the history of Woodside Brickworks by Edward Handley. Contact Bob, G3OOU, on 01737 552 170.

On Friday 2 July Mid-Sussex Amateur Radio Society is preparing for NFD. Contact Peter, G4AKG, on 01444 239371.

On Friday 2 July Wey Valley Amateur Radio Group is holding its summer barbecue. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 3 July Basingstoke Amateur Radio Club commences its weekend event for VHF Field Day. Details from Clive, G4ODM, on 01256 326050.

On Saturday 3 July Bittern DX Group is taking part in VHF National Field Day. Details from Linda, G0AJJ, on 01692 404154.

On Saturday 3 July Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Saturday 3 July Shefford & District Amateur Radio Society is taking part in VHF National Field day. Details from David, G8UOD, on 01234 742 757.

On Saturday 3 July Surrey Radio Contact Club commences its weekend event for VHF NFD. More information from Ray, G4FFY, on 01732 357474.

On Sunday 4 July Norfolk Amateur Radio Club is running the Barford Radio Rally. Contact Chris Danby, G0DWV, on 01603 898678.

NEWS FOR THE SOUTH WEST

On Sunday 27 June Trowbridge & District Amateur Radio Club is running a club table at the West Rally in Frome. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Monday 28 June Bristol RSGB Group is having a talk on radio astronomy by Andrew Burns, Chair of Wiltshire Astronomical Society and co-founder of the Griffon Educational Observatory in Spain. Details from Robin, G3TKF, on 01225 420442.

On Tuesday 29 June West Devon Radio Club is having a radio operating night and invites members to try their equipment on the club antennas. Homebrew is welcome. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 30 June Taunton & District Amateur Radio Club is operating the club station. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 30 June Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 1 July South Bristol Amateur Radio Club is preparing for VHF NFD with G4XCB. Contact Len, G4RZY, on 01275 834 282.

On Thursday 1 July Swindon & District Amateur Radio Club is having a natter night and preparing for VHF NFD. Contact Den, M0ACM, on 07810 317750.

On Thursday 1 July Yeovil Amateur Radio Club is having a talk by G7LNJ on the R1155, a Lancaster icon. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

==> + ARRL FIELD DAY: HAVE A FROLICKING, ROLLICKING TIME IN THE
"PLAYGROUND"

Part 97 -- the portion of the FCC rules that covers the Amateur Service
-- states in Section 97.1
<http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.1.pdf> that
one of the goals of our Service is "the continuation and extension of
the amateur's unique ability to enhance international goodwill." But
according to ARRL Field Day Manager Dan Henderson, N1ND, we are more
than casual observers or bystanders on this global stage: "We are
participants in that magical playground. And I am proud to say that I'm
a ham -- my playground is the world!" This year, ARRL Field Day
<http://www.arrl.org/field-day> is June 26-27.

Henderson explains that even though at times the focus of the
Amateur Radio community is rightfully on how we can work with our towns
and communities by providing public service and emergency
communications, "Deep down anyone who has picked up a microphone,
```

tapped out a call sign on a brass key or descrambled a digital Baudot or PSK-31 signal understands there is fun here. That fun knows no borders. The thrill of the chase of adding new states, countries or grid squares to our Worked All States <http://www.arrl.org/was>, DXCC <http://www.arrl.org/dxcc> and VUCC <http://www.arrl.org/vucc> totals underscores that when we 'play radio' -- as some friends of mine used to say -- we are there in large part to enjoy our hobby."

This is just one of the messages you can find in ARRL Field Day. Each year tens of thousands of participants bring an element of fun with them as they combine the public service aspects of the Amateur Service with the experimental nature our hobby. As they build relationships with served agencies and local officials at Field Day sites across the US and Canada -- and beyond <http://www.arrl.org/field-day-locator> -- they learn new skills as they make or renew friendships both on and off the air.

Henderson advises that as you prepare for what many consider the best "total Amateur Radio" experience of the year, "keep in mind the old adage -- 'All work and no play makes Jack a dull boy.' Let your 'inner child' out as you embrace ARRL Field Day 2010. Do something new this year: Build a different antenna, try one of the newer digital modes, operate on a band that you rarely utilize, serve as a get-on-the-air coach for your club, show some neighbors what this 'radio thing' is all about, organize a Scout or youth group visit to your club's set-up -- you are only limited by the borders of your mind. But then again, is there a limit? After all -- our playground is the world!"

==> ARRL FIELD DAY: W1AW ANNOUNCES 2010 FIELD DAY BULLETIN SCHEDULE

Stations active during ARRL Field Day -- June 26-27 -- are eligible to receive 100 bonus points for copying the special Field Day bulletin transmitted by W1AW (or K6KPH on the West Coast) according to the schedule below. You must include an accurate copy of the message in your Field Day submission. The Field Day bulletin must be copied via Amateur Radio; it will not be included in Internet bulletins sent out from Headquarters and will not be posted to Internet BBS sites. Read more here
<http://www.arrl.org/news/w1aw-announces-2010-field-day-bulletin-schedule>.

==> + 2009 ARRL ANNUAL REPORT NOW AVAILABLE

<http://www.arrl.org/news/2009-em-arrl-annual-report-em-now-available>
The ARRL Annual Report for 2009 -- now available online and in print -- reviews the major events of the year and documents the renewed growth of both the ARRL and the activities of the Amateur Radio Service. In 2009, the ARRL experienced a growth in membership, ending the year with 156,125 members, an increase of nearly 1 percent from 2008. ARRL President Joel Harrison, W5ZN, called it "obvious, contrary to the soap box of the doom and gloom crowd" that interest in Amateur Radio is still in great shape: "2009 was a year where we exceeded our goal of 30,000 new Amateur Radio licensees and the ARRL membership grew

right at 1500 members. Even in a year of national economic turmoil, our publication and advertising sales were strong for the year and provided a solid financial result that will allow us to continue to fund a number of initiatives that support and defend the Amateur Radio Service." Read more here <http://www.arrl.org/news/2009-em-arrl-annual-report-em-now-available>.

==> + ARRL PUBLICATIONS: LOTS IN STORE IN THE JULY/AUGUST NCJ

The July/August issue of NCJ, The National Contest Journal, is filled with the latest news from the contesting world. Whether you are new to contesting or are a seasoned pro -- or somewhere in the middle -- you will find something in NCJ just for you. In addition to the contest-related articles, the results from the January North American Sprint (CW) and the February North American Sprint (SSB) are in the July/August issue of NCJ, as well as the results from January's CW and SSB North American QSO Parties and February's RTTY North American QSO Party. Of course, there are all the regular columns and features you expect from NCJ: "Workshop Chronicles" by Don Daso, K4ZA; "Contest Tips, Tricks and Techniques" by Gary Sutcliffe, W9XT; "VHF-UHF Contesting" by Jon Jones, N0JK; "RTTY Contesting" by Ed Muns, W0YK; "Propagation" by Carl Luetzelschwab, K9LA; "Contesting on a Budget" by Ralph Bellas, K9ZO; "Software for Contesters" by Pete Smith, N4ZR, and "Contesting 101" by Kirk Pickering, K4RO. NCJ is published six times a year by the ARRL; it is edited by Al Dewey, K0AD. NCJ is what every contester needs in their shack -- subscribe today! Read more here <http://www.arrl.org/news/lots-in-store-in-the-july-august-ncj>.

==> + ARRL PUBLICATIONS: QEX -- THE JULY/AUGUST ISSUE

The July/August issue of QEX is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters, to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. QEX is edited by Larry Wolfgang, WR1B. Subscribe to QEX today. Read more here <http://www.arrl.org/news/em-qex-em-the-july-august-issue>.

==> + PUBLIC SERVICE: WX4NHC AND AMATEUR RADIO FEATURED ON NHC'S NEW HURRICANE PREPAREDNESS WEB SITE

In April, the National Hurricane Center (NHC <http://www.nhc.noaa.gov/index.shtml>) debuted a new Web site <http://www.nhc.noaa.gov/HAW2/english/intro.shtml> dedicated to hurricane preparedness. The site explains that a lack of hurricane awareness and preparation are common threads among all major hurricane disasters, and that by knowing your vulnerability and what actions you should take, you can reduce the effects of a hurricane disaster. One of

the tools that the NHC mentions on its Web site <http://www.nhc.noaa.gov/HAW2/english/forecast/observations.shtml> is WX4NHC <http://www.wx4nhc.org/>, the Amateur Radio station located at NHC Headquarters in Miami, Florida. In speaking about the WX4NHC volunteer ham radio operators, the NHC notes that "formal Amateur Radio activity at the National Hurricane Center was initiated in 1980 and has been an important source of real-time weather observations before, during and after hurricane landfalls. Dedicated ham radio volunteers work at NHC during storm events to help provide NHC meteorologists with very important data that is used in the hurricane warning process. Please visit www.wx4nhc.org <http://www.wx4nhc.org/> for a more detailed history of the WX4NHC ham radio service." WX4NHC Assistant Coordinator Julio Ripoll, WD4R, said he hopes that this updated NHC Web page "will help promote public awareness about Amateur Radio and more activity from the Amateur Radio community during this hurricane season."

==> + AMATEUR RADIO IN SPACE: AMSAT ANNOUNCES 2010 CONFERENCE, CALLS FOR PAPERS

The 2010 AMSAT Space Symposium and Annual Meeting <http://www.amsat.org/amsat-new/symposium/2010/index.php> will be held Friday, October 8 through Sunday, October 10 at the Chicago/Elk Grove Holiday Inn located near O'Hare Airport (the same hotel that recently hosted the Central States VHF Conference, Digital Communications Conference and NIDXCC events). Amateur Radio operators interested in space communications are invited to participate in the Symposium offerings, including a space symposium with amateur satellite presentations, as well as a chance to learn about operating techniques, news and plans from the amateur satellite world. Attendees will be able to meet AMSAT board members and officers and attend the annual membership meeting, the annual banquet, the President's Club receptions and the Area Coordinators' breakfast. Room rate and reservation information will be announced shortly on the Symposium's Web site <http://www.amsat.org/amsat-new/symposium/2010/index.php>.

The AMSAT Symposium Committee is also inviting proposals for papers for publication in the Symposium's proceedings, as well as poster presentations and equipment and operating demonstrations. Any topic is welcome, as long as it is of interest to the amateur satellite community. Those interested in presenting must submit the tentative title of their presentation as soon as possible, with a final copy submitted by September 1, 2010 in order to be included in the printed proceedings. Abstracts and papers should be submitted via e-mail <k9jkm@comcast.net> to JoAnne Maenpaa, K9JKM. For more information, please consult the Symposium Author's Guide <http://www.amsat.org/amsat-new/images/fck_images/AuthorGuide201029.txt>.

==> + SOLAR UPDATE

Tad "Dreams are the bright creatures of poem and legend, who sport on Earth in the night season, and melt away in the first beam of the

Sun, which lights grim care and stern reality on their daily pilgrimage through the world <http://ebooks.adelaide.edu.au/d/dickens/charles/d54nn/>" Cook, K7RA, reports: Despite the fact that the previous week had two days with no sunspots, this past week had a lower average daily sunspot number, falling nearly 11 points from 26.9 to 16.1; geomagnetic conditions were quieter as well. In tomorrow's bulletin, we will have an updated propagation forecast for Field Day weekend. The latest forecast shows a slowly rising solar flux, but possibly with unsettled geomagnetic conditions. Predicted solar flux for June 24-27 -- today through Sunday -- is 74, 75, 75 and 76, with the planetary A index at 5, 8, 15 and 12. The unsettled conditions on Saturday would be from a solar wind stream spewing out a coronal hole, which may be delayed by a day or two. A two day delay would be better for Field Day operations. Look for more information on the ARRL Web site on Friday, June 25. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by Charles Dickens' The Life and Adventures of Nicholas Nickleby <http://ebooks.adelaide.edu.au/d/dickens/charles/d54nn/> (Chapter 13).

==> + E-MAILS ASKING FOR PERSONAL INFORMATION ARE NOT FROM ARRL

We have received several reports from ARRL members with arrl.net e-mail accounts who have recently been contacted via e-mail asking for personal information, such as user names and passwords. Please be assured that these e-mails are fraudulent attempts at phishing <http://en.wikipedia.org/wiki/Phishing> and did not originate from ARRL. "This is a very crude attempt at phishing, using an easily determined spoof of the originating/return address," said ARRL Chief Financial Officer Barry Shelley, N1VXY. "There is never a time when we would ask via mass e-mail for user names and passwords of arrl.net users. There is simply no need to ever do so." If you receive an e-mail asking for personal information and it looks like it originated from ARRL, please do not respond, just delete it.

==> THIS WEEK ON THE RADIO

This week, everyone is on the air for ARRL Field Day on June 26-27. Look for the His Majesty King of Spain Contest (SSB) and the Marconi Memorial HF Contest, also on June 26-27. The SARL Digital Contest is June 27 and the RAC Canada Day Contest is July 1. Next week, there is another running of the NCCC Sprint Ladder on July 2. The DL-DX RTTY Contest and the Venezuelan Independence Day Contest are July 3-4. The Michigan QRP July 4th CW Sprint is July 4-5. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the

ARRL Special Event Station Web page
<http://www.arrl.org/special-events>.

==> ON THE AIR: RMS EXPRESS WITH WINMOR NOW AVAILABLE FOR WINLINK 2000

<http://www.arrl.org/images/view/News/Winmor.jpg> The Amateur Radio Safety Foundation (ARSFI) has announced the availability of RMS Express user software with WINMOR, a new radio-email application for use with the Winlink 2000 network. The WINMOR protocol was introduced at the 2008 ARRL/TAPR Digital Communications Conference in Chicago. The goal of the WINMOR development effort was to create a soundcard digital mode that would provide an alternative to PACTOR for accessing the Winlink 2000 network. After two years of beta testing, WINMOR TNC, a software-based "helper application," is now available as part of the new Winlink RMS Express user software suite. Read more here <http://www.arrl.org/news/rms-express-with-winmor-now-available-for-winlink-2000>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, July 25, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, August 6, 2010: Amateur Radio Emergency Communications Level 1. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

SARL NEWS - SUNDAY 27 JUNE 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

MAY 2010 RAE-CALL SIGNS RELEASED

RADIO TECHNOLOGY-IN-ACTION CAPE

THE IARU's INTERNATIONAL AMATEUR RADIO SATELLITE FORUM

ARRL WARNS OF E-MAIL PHISHING SCAM

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

MAY 2010 RAE CALL SIGNS RELEASED

The SARL is pleased to announce that the long wait for your call sign is now over and it is available on the SARL's web page.

To obtain your call sign, please click on the link on the top left hand side of the web page www.sarl.org.za that refers to the May 2010 RAE results and you will be directed to the results page. The SARL has an agreement with ICASA that you may immediately start using your call sign and get onto the air.

There are still a few candidates who have outstanding paperwork. Your call sign will not be issued until the paperwork has been received by the SARL office. If you call sign is withheld, there will be a 'reason code' as to why this has happened and the SARL urges you to remedy the issue by no later than next week Friday.

We look forward to having a chat with you on the air soon. Enjoy your call sign and have fun with the hobby. Remember that you will only now

start your road of learning and the enjoyment of the hobby to its fullest.

Any queries can be directed to Mariska at admin@sarl.org.za or alternatively you can phone the office at 011 675 2393.

SUMBANDILASAT BACK ON THE AIR

SumbandilaSat is back on the air. Requests for operation over your area should be sent to saamsat@intekom.co.za by Mondays for possible inclusion in the schedule published on Thursday night/Friday morning regarding the following week. It may not always be possible to accede to every request. The weekly schedule will be published on www.amsatsa.org.za. South African stations do not have to send requests for operation as Allan Saul will do the required scheduling while SO67 orbits over Southern Africa.

With recent changes in software, please note that the operating procedure has changed. Get full details on www.amsatsa.org.za.

RADIO TECHNOLOGY-IN-ACTION IN CAPE TOWN

Radio Technology- in-Action 2010 will be held in Cape Town at the Cape Peninsula University of Technology in the Auditorium of the Gencor Building at the Bellville Campus on 24 July. Get all the details and the kit-ordering form from www.sarl.org.za. Click on 'RTA'.

Three kits will be on offer and will be available for purchase on the day of the RTA. Payment will be cash only. Kits may also be pre-ordered and paid for online prior to the RTA and be collected at the RTA. No mail order facilities are available.

Registration for the RTA is R50 which includes some light morning and lunch time refreshments.

The three kits on offer are:

A 100 mw DSSS kit for 40 m. Two Direct Sequence Spread Spectrum (DSSS) transceivers built in open PCB fashion, as a learning tool for DSSS. All sections of each transmitter and receiver are able to be explored and tested with simple gear found in your shack. A CD containing assembly and operating instructions are supplied - but no cables. The cost is R350.

A TDR (Time Domain Reflectometry) 1 GHz Sampling Scope. Specifically designed for TDR work - but can also be used for other applications. It is a USB device that plugs into a PC and runs a Windows Program simulating an image of a normal oscilloscope. A CD containing software, assembly and operating instructions is supplied - but no cables are supplied. The cost is R350.

A DSP (Digital Signal Processing) speaker kit. For use on speaker output of any device to reduce or eliminate noise. It is ideal for HF Receivers. Built in open PCB fashion and ideal as a DSP learning tool.

A CD containing assembly and operating instructions is supplied - but no cables. The cost is R325.

More details about the presentations will be covered in next week's SARL News, or you can download the full programme from www.sarl.org.za; select 'RTA' and follow the links.

THE IARU's INTERNATIONAL AMATEUR RADIO SATELLITE FORUM

The IARU's International Amateur Radio Satellite Forum will be held this year in combination with the AMSAT-UK Colloquium in Guildford, England on the weekend of 31 July 31 to 1 August.

The forum, chaired by IARU Amateur Satellite Advisor Hans van de Groenendaal, ZS6AKV, takes place on the Sunday morning. On the Agenda is also a report back on the activities of the IARU's Satellite Advisor and his advisory panel.

There will be a brief presentation covering the ITU's notification requirements for satellites operating in the amateur service and the requirements for disabling transmissions, should the signals interfere with other users of the radio spectrum.

The forum is open to all delegates at the colloquium.

Colloquium Info at http://www.uk.amsat.org/colloquium/

NAME THE CUBESAT PROJECT

The competition to name the SA-AMSAT CubeSat project is attracting international attention with several entries from overseas' countries. Thus far no entries have been received from South Africa. This seems somehow ironic that overseas' amateurs take a greater interest in the SA-AMSAT project than local amateurs. Get the detail on how to enter at www.amsatsa.org.za.

ARRL WARNS OF E-MAIL PHISHING SCAM

The ARRL says that crooks are trying to use its identity to try to get members' personal information. It warns members to ignore any requests seemingly coming from the League, asking for such data. Amateur Radio Newsline's Bruce Tennent, K6PZW, reports:

ARRL WARNS AGAINST SCAMS

In a posting on its website, the ARRL says that it has received several reports from members with "arrl.net" e-mail accounts. They tell the League that they have recently been contacted via e-mail with requests asking for personal information such as user names and passwords.

The ARRL says that these e-mails are fraudulent attempts at phishing and did not originate from that organization. For those not aware, the term "phishing", which is pronounced "fishing" but spelled with a "ph", is where a cyber criminal uses someone else's name, e-mail or both, to try to get one to send them your personal information.

According to the ARRL's Chief Financial Officer Barry Shelley, N1VXY, there is never a time when the League would ask via mass e-mail for user names and passwords of "arrl.net" users.

BOOKING FOR THE PRETORIA PIC COURSE OPEN

Bookings for the PIC course on 14 August in Centurion can now be made. Full particulars, as well as the booking form are available on the web at www.sarl.org.za. Click on 'RTA' and follow the links. The four-hour course will be presented by John Williscroft, ZS6EF, using various audiovisual methods. At the end of the course you will be able to work with PICs and programme them for other projects. Allow an additional hour for question time and a refreshment break. The closing date for bookings is 2 August.

If you have already booked, please make sure that your detail is recorded on the website. You can access the page by going to www.sarl.org.za, click on 'RTA' and follow the links to the booking page. If your booking is not reflected, please send an e-mail to rta@sarl.org.za. No other form of booking confirmation is sent.

CONTEST NEWS

SARL Digital Contest. The SARL Digital contest is on the air this afternoon from 13:00 to 16:00 UTC on 40 metres as well as 2 metres using PSK. The contest is open to all radio amateurs in Southern Africa.

The exchange is a signal report plus a QSO number, starting at 001. Logs must be sent to the Lichtenburg ARC, PO Box 410, Lichtenburg, 2740 or by e-mail to zs6lrk[at]nwinternet[dot]za[dot]org. the closing date for log submissions is 12 July 2010.

IARU HF Championships. The annual IARU HF Championships takes place on 10 and 11 July 2010 and this year the WRTC will also be run on that weekend. Is there a radio club or clubs who are interested in operating ZS0HQ on phone and CW during the contest? What about ZS85SARL? If you are interested please notify Dennis, ZS4BS, by e-mail to zs4bs[at]netactive[dot]co[dot]za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Currently Sunspot 1 082 is the only sign of activity on an otherwise very moderate sun. The effective sunspot number is expected to be less than 10 for the coming week.

20 m will provide the best opportunities for DX followed by 15 and 17 m. Conditions to India will be excellent from the afternoons onwards. During the late afternoons and early evenings it will also be favourable towards Europe. Contacts with the USA are still tough. Contacts with Australia and New Zealand are becoming promising on 20 m at sunrise. Contacts with Brazil and South America are becoming demanding.

For the CW and digital enthusiasts, 30 m may be very gratifying with openings to many parts of the world.

Local conditions are going to be excellent during the daytime on 40 m. With the change of season 30 m has taken over from 20 m for contacts over the longer distances during the middle of the day. With the decrease in noise levels, 80 m is the best for the shorter distances and also during the early mornings and late afternoons.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

27 June - This afternoon, The SARL Digital contest from 13:00 to 16:00 UTC on 40 metres as well as 2 metres; 10/11 July - IARU HF Championships and WRTC; 18 July - Intechnet at 19:30 on VHF-/UHF- and microwave matters; 23 - 24 July - Preparation and launch of the HABEX balloon project; 24 July - RTA symposium in Cape Town.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Leon, ZS4V, and edited by Jannie, ZR6PHD.

Thank you for listening, 73.

/EX

>From The Business Manager ZL2TDM
Debby Says...
SMART (Spectrum Management and Registration Technology)
Firstly I have an announcement from Radio Spectrum Management Office.

Recently they were updating SMART and inadvertently reactivated Silent Key records, RSM and I are presently working through these records, to make sure they are removed entirely.

Speaking of which...After quite a long day with RSM representative Peter Gray, whose official title is Technical Approvals Officer, we have come up with the following processes that should make it easier for you to

understand how SMART works.

Silent Keys
On receipt of a death notice, I can remove a call sign from the RSM database. A scanned record of this notice is kept in their database, so should any family member come back after a period of time there is a history as to how it was removed and who requested it.

This does not negate the current form that we do ask to have signed, it just helps when there are no known family members that can be contacted.

I can remove the call sign, but this does not remove the record all together. This can only be done by an RSM (head office) officer and on request by an ARX (Amateur Radio Examiner) then this will be rendered inactive by them.

I am presently preparing a list of silent keys that I am aware of whose record still appears in a search of the name. If you know of a silent key that this applies too, can you please let me know and I will include it on my list to forward to RSM.

Name Suppression
Should you wish to have your details withheld in SMART, you must apply in writing to the Registrar of Radio Frequencies, Andrew Mulcahy, and state the reason for this before it can be approved.

I am unable to suppress this information at the time of activating your record in SMART, this application must be sent directly to Andrew.

Correction
In my last issue of HQ Infoline, I advised motions passed by Council at their meeting in Auckland. As these have yet to be approved by Council at their next meeting in July, they are not yet set in concrete.

One particular motion referred to ARX fees and membership to NZART. The motion was incorrectly worded, and has changed from what was advised and Council have yet to approve it.

Please watch for the July on air Council meeting minutes to be placed on the web which will state the new fee structure for the NZART ARX services.

Talk soon...Debby ZL2TDM
****
Did You Notice?
Did You Notice that there was a request from NZART Council, for a volunteer(s) to help with information for amateurs that are coming to New Zealand for The Rugby World Cup 2011?. 'Infoline 208' and 'The-Rugby-World-Cup.pdf' have the full details of what is required. These two documents can be found on the NZART Web at:

http://www.nzart.org.nz/pdf/2010/The-Rugby-World-Cup.pdf, and
http://www.nzart.org.nz/infoline/2010/infoline-208.html.

****
Did You Know That Exam Candidates Can Join NZART For $30?
A special fee structure for new candidates is offered to encourage them to join the Association at the time of making application for a new call sign and certificate of competency.

Examination $15.00
Callsign and certificate allocation $75.00
NZART membership for first year $30.00
Total payable $120.00
see:
http://www.nzart.org.nz/exam/examprocedures.html#examproc

****
Amateur of The Year 2010
At the NZART AGM held recently in Auckland, I was delighted to award the "Amateur Of The Year" to Peter Aikin ZL1TX. Hearty congratulations to Peter. It is amateurs like Peter who keep our hobby in good heart - and the award was designed for amateurs who contribute as much as he has.

I am including the nomination I received so that all can see the magnificent job that Peter has done.

Roy Symon, ZL2KH
President, NZART (Inc)

Nominee for Amateur of the Year, Peter Aikin ZL1TX

The Committees of the Wellington VHF Group Inc, Branch 74, and Whangarei Amateur Radio Club (Inc), Branch 28, hereby jointly nominate Peter Aikin as "Amateur of the Year 2010".

In recent years Peter has made an outstanding, indeed remarkable, contribution to the hobby of amateur radio, particularly in Northland and also at a national level.

In Whangarei, the Bay of Islands, and the Far North there are seven repeater sites with fourteen amateur repeaters. Peter has made his specialist skills available for the benefit of all Northland amateurs through upgrading and maintaining these sites and equipment.

In particular he was responsible for re-engineering the National System equipment throughout the region when that was required a little while ago, even procuring surplus Tait T800 gear from the U.K. for the purpose. In addition, he assisted with the Dargaville repeater 147.175 MHz, he made a transmitter for the Whangarei Data repeater, then became involved in the Kaikohe/Kerikeri repeaters, and finally became involved with the Far North repeaters.

The cavity filters which he built for the Whangarei ATV repeater are just one of the many examples of his dedication to precision workmanship and cost saving to our hobby.

As a further benefit to amateurs in the North, he has been able to recognize and accumulate retired equipment, which can be re-purposed for use by

amateurs. One example was his rewriting of the software to reprogram the firmware in a commercial RT to operate as a 2 m and 70 cm dual band amateur radio. Many of these have now been converted by him and are in daily use by amateurs. This project was published in Break-In.

Peter has contributed to his local branch, with continued enthusiasm and leadership within the repeater and radio equipment areas. He is now again leading the charge in the introduction of digital radio, building a new D Star unit from surplus commercial equipment.

Peter has presented technical papers to several VHF Conventions, and has led seminars and discussions on technical matters. The VHF/UHF community has appreciated his input.

Branches 28 and 74 are proud to nominate Peter. In summary he has made a significant contribution to the wellbeing of the hobby both in the North and in VHF/UHF, in keeping with the finest amateur ideals, and is a worthy recipient of the award of "Amateur of the Year".

Yours Sincerely,

Signed:

Wellington VHF Group Inc, Dick Greenbank ZL2TGQ, President
Whangarei Amateur Radio Club (Inc), Brian Winger ZL1BSW, President
****
A 1928 Description of Amateur Station 1AS
Station 1AS
(OZ1AS in 1928 and ZL1AS after 1930)
The term "station" is used because the shack stands upon a high "platform"-also one hears of "signals" there. Having climbed to reach there you are welcomed by 1AS, and the first thing that strikes you (if you are not careful) is the door frame. The exertion of the climb encourages you to sink into one of the chesterfields, set along the whole length of the shack (no matter which you choose they're both alike). After resting you are escourted to the extreme end of the shack, and 1AS points out his set (you wouldn't recognise it otherwise). Whether the "set" is on him or not he's never explained. There's neither anything out of the ordinary or anything in common with other sets of the same breed. The circuit is a "troubled harley." Now for constructional details: Secure two stout uprights and some threeply, nail them together and you have a frame. Obtain some air and wind on 'steen turns of wire, and you have a splendid "felix." Suspend this in the space between the two threeply panels, add a few other gadgets and a "bottle." (The arrangement depending upon the amount of transformer oil in the rectifier). Having assembled the set as per instructions you squeeze the lemon, in other words turn on the juice, press the key, if your transmitter is not locked the ether is open, and QSL's will come rolling in from all continents. But no(ne ED.) addressed to you!

>From Break-In for March-1928 Vol 1 No. 3. Text for this issue of Break-In can be found at:
http://www.nzart.org.nz/breakin/breakin-archive.html

Some of the terms and inferences are not obvious to a young ham like the Infoline Editor. Bottle is a radio valve as far as I know, but what '...splendid "felix."' meant, I have no idea. Maybe the word should have been HELIX, then the reference would almost make some sense. ' Troubled Harley', 'steen turns' and 'amount of oil in the rectifier' runs riot with my imagination.

****
RSM Call Book Database is on The NZART Website
The NZART Administration Liaison Officer, Don Wallace ZL2TLL, has obtained a pre-Call Book copy of the RSM Call Book Database that is on the NZART Website, but sadly not to stay ED.

The purpose of this is to give people the ability to check their own and their friends listings and for the person with the entry in error to get in touch with RSM to correct any errors. This will then give us a more accurate Call Book.

Details can be updated either online at:

http://www.rsm.govt.nz/smart-web/smart/page/-smart/WelcomePage.wdk

(you will need your log in details) or by phoning RSM on 0508 776 463.

For Silent Keys, there is a form available at

http://www.nzart.org.nz/policies/2006-callsign-removal-form.html

and this can be filled in and posted to Debby at HQ (PO Box 40-525 Upper Hutt 5140) with relevant supporting documentation by a person authorised to do so.

For further information, please see the help files online at:

http://www.nzart.org.nz/call-book/index.html

or contact RSM as above

UPPER HUTT NZART Conference 2011 - Pre-registration

On behalf of the Steering Committee, we welcome you to the Upper Hutt NZART Conference 2011. The Conference will build on the success of the previous conferences, which were held in Upper Hutt in 2000 and 1979. The objective of this conference is to further enhance NZART as an organisation and amateur radio. The conference will maintain the quality of the previous

conferences while incorporating new features to enhance your experience.

Location:
Silverstream Retreat
3 Reynolds Bach Drive
Upper Hutt
Phone: 04 562 9080
Reservation free phone:
0800 800 499
Fax: 04 563 5284

Wouxun KG-UVD1P Dual band VHF/UHF Handheld by pre-registration, valued at $300.00. (with additional accessories of a USB Programming Cable and a Speaker/Microphone) Send a cheque for $25.00 to pre-register before 5-November-2010 and be in the draw to win this transceiver. It will be pre-programmed with New Zealand 2 m and 70 cm Repeaters (including National System Repeaters).

Prize draw will be announced in Break-In November/December 2010 issue.

Pre-Registration: UH Conference 2011, 204 Plateau Road, Upper Hutt 5018

(Note: there is no refund on this deposit by pre-registration.)

HF Contests

2010 NZART MEMORIAL CONTEST
When :- 3 & 4 July 2010
Times :- 2000 NZST until 2300 NZST both evenings
Band :- 80m
Modes :- CW and Phone
The Memorial Contest was established soon after the end of World War 2 to commemorate those who lost their lives in the service of their country. It is a fitting way to honour those Hams and others who selflessly served their country so that we, today, may enjoy the freedoms that we do.
The Contest is split into a number of categories catering for all HF

interests so please spare an hour, or two to honour those who paid the ultimate price that we now enjoy in our present lifestyles.
Contest Rules and other Operating Information is available from the NZART website - http://www.nzart.org.nz/contests/index.html

For contests not mentioned here, please see the latest "Contest Manager's Report" at:
http://www.nzart.org.nz/contests/index.html

Radio News Bulletin
Sunday 27th June 2010

Silent Key

We are sorry to have to inform you of the death on 18 June of Frank Cullen EI9FC. Frank was originally from Valencia Island in Kerry and died at his home in Dalkey County Dublin after an illness. He was 82 years of age. Frank will be sadly missed by his six children, his grandchildren, his brother, three sisters and his extended family.

Franks funeral took place from Knightstown Church on Valencia Island on Wednesday last. We extend our sincerest sympathy to his family and friends. May he rest in peace.

---

80 Metre Counties Contest

Unfortunately band conditions were very poor for last weekend's 80 metre counties contest. Band noise was very high and propagation conditions were very poor. In addition, the good summer weather, the World Cup and the US open provided alternative attractions leading to a small turnout of stations.

A few stalwarts stuck it out for the full three hours and probably worked anyone participating in the contest. The result should be interesting.

Participating stations please send your logs to the contestmanager /at/ irts.ie

---

Increased Power for Contests

The Society is continuing to pursue with ComReg the question of securing increased power for the duration of contests on a list of international HF and VHF contests still to be finalised. In order to take this matter further, ComReg wish to have submitted a list of licensed amateurs who would be interested in getting permission to operate with increased power for the contests concerned. Anyone who wishes to have their name included on this list should e mail the contest manager Thos Caffrey EI2JD at contestmanager /at/ irts.ie or to thoscaffrey /at/ hotmail.com

---

Oman on 50 MHz

On the IARU-R1 website, Abdalla A41KB reports that radio amateurs in Oman can now use the 50-52 MHz band. The Omani Telecommunications Regulatory Authority has allocated the 50-52 MHz band to the amateur service on a secondary basis.

North Cork Radio Group

The North Cork Radio Group would like to once again invite interested parties to the group. The group is now 6 months old and are pleased that in this time have gained momentum and are now proud to have 15 members.

The aim of the Group is to make Amateur radio more fun and appealing to prospective members, so far this year the Group have organized and attended 3 field day events, making use of the Groups callsign EI1NC/P.

The goal is to activate at least 1 field trip a month with an emphasis on "FUN" and the Group's operating styles are that of the operator and not competition. Meetings are on the first and third Wednesday of the month at the Halfway house in Rathduff from 8pm till late, these meetings are at a social level and give members the opportunity to get to know each other as well as plan future events.

The next meeting is on Wednesday the 7th of July and an open invitation is extended to all.

Further information on the group is available at http://NorthCorkRadioGroup.com

---

Major Castles On The Air activation in Northern Ireland

Castles And Stately Homes On The Air in Northern Ireland will have a major activation on 16 July. Bobby, MI0RYL has obtained permission to activate both the Stormont Parliament Buildings and Stormont Castle within the Stormont estate in Belfast.

To commemorate this activation, a special QSL card will be issued to any contacts that are made. Propagation permitting, they hope to cover many bands and modes throughout the day to allow as many people as possible the opportunity to make contact.

The station should be up and running by 10am with the castle activation number GI022 and WAB No J37

Tipperary Amateur Radio Club

The next meeting of the Tipperary Amateur Radio Group will take place on Thursday next the 1st of July in Raheen House Hotel Raheen Road

Clonmel at 8.00 pm ,All are welcome.

Rallies

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1885 C Bell and C.S. Tainter applied for a patent for the gramophone.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th-June, through Sunday, 27th-June there were 208 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5V, 5X, 5Z, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V8, VE, VK, VP2E, VP2V, VP6, VP8, VP8/h, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZL7, ZP, ZS, ZS8
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4O, MONTENEGRO. Acim, YU1YV, will once again be active from Montenegro, possibly as 4O3A (guest operator from this station) or 4O/YU1YV, starting July 1st. He likes 75/80m, but will be active mostly on 6, 10, 15 and 20 meters. He will also be in the IARU HF Contest (July 10-11th) as a Single-Op/All-Band entry.

5V, TOGO. Franco, I1FQH, will be active as 5V7DX from Kpalime Village in central Togo between July 15�30th. Activity will will be on 20-10 meters using a Spiderbeam and on 40-30 meters using a homebrew vertical. His rig will be an ICOM 7000 w/KL500 solid state amplifier. QSL via LoTW or via his home callsign, direct (w/SASE) or by the Bureau. Franco plans to put pictures and video upon his return home on You-Tube channel.

DL1, GERMANY. Sebastian, DL1AXX, will activate rare islands for the German Island Award between August 3-9th. Using the callsign DL1AXX/p, his planned activations are: Grot Deil Island, Reference O-34
Kastenwerden Island, Reference O-37
Weidenschwanz Island, Reference O-38
Sebastian states, "I will be QRV in the late afternoon and evening on CW on 20m and 40m. QSL via his home callsign.

GJ/MJ, JERSEY. A team of six operators will head to the island between June 29th and July 6th. Team members mentioned are: Gordon/G3USR, Tom/ GM4FDM, Alex/PA1AW, Rien/PA1BDO, Ron/PA3EWP and Jo/PA9JO. Their main focus will be on six meters, but in total 3 HF stations and dedicated 6 and 2 meters stations will be active. There will be no 4 meter operation. Operation will be from the Jersey Amateur Radio Society at the old German signal station at La Moye. Grid: Grid Locator : IN89ve - IOTA EU-01. Callsigns used are: GJ4FDM, GJ3USR and MJ/PA1BDO, MJ/PA3EWP, MJ/PA9JO and MJ/PA1AW. The team will enter in the 6 meter and VHF contests during the weekend of July 3-4th.
Six: GJ4FDM will be the main callsign used on 6 meter. The team will focus their activity on 50.125 SSB and 50.105 CW +/- QRM. When the band is "closed" a beacon will be on 50.105 beaming west. Please alert the team via team@jersey-2010.info (constantly monitored) The team will be on the ON4KST chat and also take skeds for digital modes. EME is still optional depending on actual antenna situation. During the July 3-4th contest another callsign will be used on 6 meters.

2 meter: MJ/PA3EWP will be the main callsign used on 2 meters. The team will focus their activity on 144.325 SSB +/- QRM. The team will be on the ON4KST chat and also take skeds for MS.

HF: The team holds broad interests in various modes and bands so activity will be widely spread depending on propagation. Please do not hesitate to contact the team by team@jersey-2010.info or a guestbook entry to advise them about your demand or propagation. Individual callsigns will be used on HF.

QSL: GJ3USR and GJ4FDM details on QRZ.COM.
MJ/PA1BDO, MJ/PA3EWP, MJ/PA9JO & MJ/PA1AW via PA1AW

Full details are available on the teams Web site at:
http://www.jersey-2010.info

IOTA NEWS.....
AF-091/ An Italian team of operators will activate Plane Island (AF-091)
AF-092. and Kuriat Island (AF-092) as TS7TI between September 13�23rd.

Operators mentioned are: Alfredo/IK7JWX, Leopoldo/I8LWL, Simon/ IZ7ATN, IK7XWU and Ampelio/IS0AGY. They are currently seeking sponsors/supporters for this DXpedition. More details are forthcoming.

AS-043. Ichy, JH1IPR/6, has postponed his trip to Hachijo Island on June 26th, due to a death in the family. He will travel to Hachijo Island around the end of August or the beginning of September.

EU-045. Members of the newly formed "Italia Zero DX Group" will activate "L'isola di Ponza" in the Tyrrhenian Sea, between Rome and Naples,
as IB0Y between August 1-8th. The international team of operators
mentioned are: Giovanni/IZ0PSA, Edmondo/VA3ITA, Laura/VA3LIA and James/KB0MZ. Activity will be holiday style on 80-2 meters using CW, SSB and the Digital modes. QSL via IZ0PSA or LoTW. A link for
live video streaming and updates is expected to be posted on QRZ.com.

EU-123. On the week commencing September 25th, members of Sands Contest Group and Workington Radio Club, along with Brendan Minish (EI6IZ), will be visiting the Isle of Aran off the coast of southwestern Scotland, and will operate under the callsign MM0SCG. They will be active on VHF, HF, SSB, CW and the Data modes. The island has lighthouses and the following reference numbers are good: SCOTIA Island number CS14 and IOSA number CL01. They will also activate SOTA summits, with time permitting.

EU-140. Operators Jari/OH1JO and Juha/OH1LEG will be activated Kaunissaari
Island using the special callsign OH1K for 5 days (possibly 7) starting July 27th. Activity will be on the HF bands (20/15/10m) and possibly 80/40/30/17/12m. Jari states, "Icom Pro-3 and FT-1000
MK V Field will be used." QSL via OH1JO. A special QSL card will be printed after the activation. All Direct cards with 1 IRC, 1 EURO and 2 USDs will be answered as soon as the cards are printed by UX5UO. Look for updates on QRZ.com (under OK1K or OH1JO).

NA-058. Members of the Kennehoochee Amateur Radio Club (W4BTI) will activate the special event station/IOTA/Lighthouse (USA 738 and USA 1014) as K4L from Sapelo Island, Georgia, between August 5-7th. Activity will be on the HF bands. QSL via W4BTI, direct or LoTW and eQSl.

NA-067. Jon, WB8YJF, will be active as homecall/4 from Ocracoke Island, NC (USI NC001S), between July 18-25th. Activity will be on 40/20/

15/10 meters (and possibly 80 meters) using CW, RTTY, and SSB.
Jon will also be active in the RSGB IOTA Contest (July 24-25th)
as a Single-Op/Low-Power. He states, "I will be taking a TA-33-
Mini and a Vertical - although at this point the vertical has
issues on 80m - which I hope to have rectified by then." QSL
via the Bureau, or direct (a LOT faster): Jon Severt/WB8YJF,
5586 Babbitt Rd., New Albany, OH - 43054 (w/SASE or a Green
stamp to cover postage is appreciated).

SA-060. (Update) Operators Orlando/PT2OP and Fred/PY2XB will be active
from Cotejuba Island (DIB PA-14, WLOTA L-2855, ARLHS BRA-278),
Para State, Northern Brazil, between July 2&#65533;5th. Look for
activity in the WLOTA Contest. Orlando, PT2OP, will sign ZX8C,
mostly on SSB. Fred, PY2XB, will signs ZX8W, mostly on CW. QSLs
for are via PT7WA. QSLs for ZX8C are via PT2OP.

I.C.P.O. BULLETIN STILL IN BUSINESS. Dave, VA3RJ, announced this past
week: "NOTE: A secretary has been found to help keep the I.C.P.O. bulletin
alive! The news will continue, as usual, with all the bad spelling mistakes,
poor grammar and typo's! :o) If you signed up on the I.C.P.O. e-mail
reflector, do not forget that you can also post good DX info for everyone
to read. Continue to enjoy the bulletin......Dave, VA3RJ"

J2, DJIBOUTI (Update). Freddy, F5IRO, will be active as J28RO on July
6th, and is expected to stay for 2 years. Activity will be on the HF
bands using CW, SSB and the Digital modes. Operations will be mainly on
the weekends (Friday and Saturday) and during the afternoons and evenings
(starting around 1200/1300z). His QSL Manager is F8DFP. QSL direct (w/SAE
+ valid IRC &#65533; PLEASE NO MONEY AT ALL), or by the French REF-Union Bureau.
The direct cards without the above mentioned will be answered by the
Bureau. Freddy will join Vincent, F5MJV/J28JV, and activate the Islands
of Mucha and Maskali (AF-053) several times while there. For updates and
more info, visit his Blog at: http://j28ro.blogspot.com

JW, SVALBARD. Operators Thomas/OZ1AA, Alex/OZ7AM and Ken/OZ1IKY will be
active as JW/homecall from Spitsbergen (EU-026) between July 23&#65533;27th.
QSL via their home callsigns. They also plan to be active from the JW5E
club station in Longyearbyen during the RSGB IOTA Contest (July 24-25th)
as a Multi-Op entry. QSL JW5E via LA7XM.

KH6BZF PROPAGATION FORECAST/REPORT (For June 28-July 4th)....
Jun 28 HN-AN SOLAR REFERENCE KEYS
Jun 29 HN-AN --------------------
Jun 30 AN BN - Below Normal
Jul 1 AN AN - Above Normal/Geomagnetic Level is QUIET
Jul 2 AN LN - Low Normal
Jul 3 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jul 4 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

NCDXF PRESS RELEASE (June 24th, 2010). Glenn Johnson, W0GJ, Vice President
of NCDXF, reports: "A newly designed Northern California DX Foundation
Web site is now on line! http://ncdxf.org
We hope this new interactive Web site will tell our story, provide
resources for DXers, and enable everyone to follow past and future
DXpeditions that NCDXF has sponsored. Visitors to the website will find
it both informative and pleasant to explore.
There are resources on the worldwide Beacon system, an online store
for NCDXF supplies, information about our scholarship program, our video
library and other resources.
John Miller (K6MM) our Webmaster, and Doug Bender (WW6D) of Members
Services have spent countless hours on this project.
Have you listened to the Beacon system lately? You can follow NCDXF
on Facebook or Twitter.
Joining or renewing membership has never been easier!"

OX, GREENLAND (Also OZ!). Masaru, JA5AQC, will be active as OX1JA from
Jesper, OX3KQ, QTH in Kangerlussuaq (Sondre-Strom) between August 13&#65533;16th.
Bands and modes of operation were not provided. Also, look for Masaru to
be active as OZ5AQC from Ole, OZ7OX, QTH in Odder, Denmark, between
August 17&#65533;19th. QSL both operations via his home callsign only direct.

S7, SEYCHELLES. Look for S79K to be active from Mahe during the CQWW DX SSB Contest (October 30-31st). QSL via G3NKC. Operators mentioned are: David/G3NKC, Fred/G4BWP, Martin/G4XUM and Mike/G7VJR.

V4, ST. KITTS. Jon, W5JON, will once again be active as V47JA from the Calypso Bay, St. Kitts (NA-104, WW Loc. FK87SG), hillside QTH overlooking the Caribbean Sea and Atlantic Ocean, between October 20th and November 10th. Activity will be on 160-10 meters using an ICOM IC-7000 w/KL-400 amp (350 watts) into a ZS6BKW design "All-Band Dipole" antenna. His operations will include the CQWW DX SSB Contest (October 30-31st) as a Single-Op/All-Band entry. QSL via W5JON.

VP8/O, SOUTH ORKNEY ISLANDS. The following press release was received on June 23rd: "The Microlite Penguins DXpedition team is pleased to announce the major equipment sponsors for our upcoming South Orkneys DXpedition. The world-famous Elecraft will be providing us with a full set of K3 transceivers. Light in weight but heavy on performance, the K3 was the obvious choice for this challenging polar DXpedition. We will also be taking along a set Acom 1010 amplifiers, which will help overcome some of the low-band difficulties and help keep our signals above the noise. The main force behind our antenna field is DX Engineering, who will be supplying VP8ORK with brand new hardware for a complete set of verticals from 40m through 10m.
Complementing the DX Engineering antenna field is SteppIR, who will also be providing two of their rugged BigIR vertical antennas. This will allow us maximum flexibility with propagation, and two stations active within the same band whenever possible.
We will also have with us the "gold-standard" in extreme location DXpedition antennas: The Battle Creek Special. This proven low-band performer will provide the backbone to the VP8ORK effort on 80 and 160, ensuring you hear us. And so we can hear YOU, we'll also have one of DX Engineering's 4-square receive antenna systems.
And for additional firepower on the low bands, we will have 60 foot and 85 foot Spiderbeam fiberglass masts supporting vertical wires tuned for 80 and 160. Again, this allows simultaneous CW and SSB operation on 80 and gives us redundancy on 160.
Additional sponsors include Primus, who has graciously donated over 3000 feet of LMR-400 coax, and RigExpert Canada, who has come through with a full set of interfaces for our K3s.
With this fantastic range of equipment and some of the most experienced operators ever assembled, VP8ORK is set to be the premier DX event of 2011.
Major DXpeditions to polar regions come at a heavy price. Only with your generous donations can we ensure this adventure is a success. Please consider donating at: http://www.vp8o.com
73 and see you on the bands! ..... The Microlite Penguins DXpedition Team"

DXNL 1680 - Jun 16, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

C5 - GAMBIA
C5E (applied call) will show up a few days late (Jun 28 or 29) until
Jul 6. Details can be found in the last DX Newsletter 1681.

D2 - ANGOLA
Valeriy,UA0QV, got the callsign D2QV. He will enter Angola on Jul 1
and radio activities can be expected only shortly thereafter. The
length of his stay is not known. His QSL route is: Valeriy Grabovskiy,
Vila Catoca, Province Lunda Sul, Angola.

D4 - CAPE VERDE, AF-086
Michel,HB9BOI, will be QRV as D44TOI from Sal Island (AF-086) from
Jul 1-13. QSLs direct or via bureau to his homecall.

FP - ST PIERRE ET MIQUELON, NA-032
Paul,FP/K9OT, and Peg,FP/KB9LIE, will be active from Miquelon (NA-032)
again from Jul 5-14. They will also take part in the IARU HF Champion-
ship Contest (Jul 10/11). They are working in CW and SSB on 80m-10m,
maybe also on 160m and 6m. QSLs via bureau or direct to their homecalls
or via LoTW.
You can also visit their website at: http://www.hamradio.pnpfarms.com

GJ - JERSEY, EU-013
Gordon,G3USR (GJ3USR), Tom,GM4FDM (GJ4FDM), Ronald,PA3EWP (MJ/PA3EWP),
Jo,PA9JO (MJ/PA9JO), Alex,PA1AW (MJ/PA1AW), and Rien,PA1BDO (MJ/PA1BDO)
are staying on Jersey (EU-013) from Jun 29 until Jul 6. Activities will
take place mainly on 6m but also on HF and 2m.
QSL routes: GJ3USR via G3USR, GJ4FDM via GM4FDM, all others via PA1AW.
See also: http://www.jersey-2010.info

JW - SVALBARD, EU-026
Toshi,JW/JA8BMK, will be QRV from Svalbard (EU-026) working in CW, SSB
and RTTY on 20m-6m from Jul 1-11. QSLs direct or via bureau to JA8BMK.

JX - JAN MAYEN, EU-022
Stan,SQ8X (team leader), Pete,SQ9DIE, Vicky,SV2KBS, Decan,EI6FR,
Leszek,NI1L, Tomek,SQ9C, Bernie,HB9ASZ, Pekka,OH2TA, and Deon,K6WH,
will activate three stations SSB, CW and RTTY from Jul 4-16. They have
also climbers in the team and want to ascend the 2277m high vulcano
"Beerenberg" during this time.
See also: http://en.wikipedia.org/wiki/Beerenberg

KP4 - PUERTO RICO, NA-099
The "Puerto Rico Amateur Radio League" (http://www.prarl.org) is going
to activate the special event station K4C between Jul 4 and Aug 1
during the XXI. Central American and Caribbean Games in Mayaguez.
QSL via KP4ES.

OJ0 - MARKET REEF, EU-053
During his "50 years OH1VR tour" Seppo,OH1VR, plans to show up as
OJ0VR from Market Reef (EU-053) between Jun 30 and Jul 3. Seppo will
be accompanied by Markus,OH3RM, who will use the callsign OJ0A.
QSLs should be sent direct to their homecalls.

TK - CORSICA, EU-014
Fabrizo,TK/IK5WOB, will be QRV only in CW from Algaiola (EU-014)
from Jul 3-11.

4O - MONTENEGRO
Starting on Jul 1 Acim,YU1YV, plans to become active as 4O3A (guest OP)
or as 4O/YU1YV. He prefers working on 80m but can be found also on 6m,
10m, 15m and 20m. He will join the single OP/allband class in the IARU
HF Championship Contest on Jul 10/11.
QSLs for 4O3A via YU1FW (B/d/L), QSLs for 4O/YU1YV via his homecall.

9J - ZAMBIA
Katsumi,JF1OKX, is working in the capital Lusaka until September 2011.
He will sign 9J2KK on 80m-6m concentrating on the digital modes PSK31
or 62, RTTY, WSJT and SSTV but will also work in SSB and CW.
His QSL manager is JK1NSR.

USA, SPECIAL EVENT STATION
Some members of the OKC DX CLUB (KX5T) are celebrating the peak of the
Sporadic E season 2010 with the special callsign W5E which will be
activated in SSB on 6m and 10m (50150 and 28425 kHz, +-20 kHz) from
Jul 2-11. Special QSLs are available via KX5T.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 1: RAC Canada Day Contest
Jul 3/4: DL RTTY Contest
Jul 3/4: Original QRP Contest

Jul 4: DARC Digital Contest Corona

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-020, SM1, Gotland County Group: Pontus,SM0RUX, and Jaan,SM0OEK, will be
QRV as SM0R/1 from Gotska Sandon Island (WFF SMFF-010) from Jul 2-4.
QSL via SM0R (direct/bureau).

NA-025, J8, The Grenadines: Dave,J8/W9DR, and Mike,J8/W8IF, are working from
Bequia Island between Jun 28 and Jul 5. Both QSLs via KB3RHR (QRZ.com).

NA-108, J6, St. Lucia: Howard,J6/WB6WXE, is QRV from St. Lucia until Jul 6.
QSL via homecall (direct/bureau).

NA-110, W4, SC State Group: Dragan,K0AP/4, and Vlado,N3CZ/4, are activating
Fripp Island/South Carolina from Jul 3-10. QSLs via homecalls.

SA-060, PY8, Para State East Grp: Fred,ZX8W (PY2XB) and Orlando,ZX8C (PT2OP)
will be active from Cotijuba Island (DIB PA-014) from Jul 1-5.
QSLs for ZX8C via PT2OP, QSLs for ZX8W via PT7WA (direct/bureau).

SA-071, PY2, Sao Paulo State Centre Group: The "LABRE SPW" will sign PW2K
(PS2G in the WLOTA Contest) from Moela Island from Jul 2-4.
QSLs for both calls should be sent via PY2WAS (direct/bureau).

DXNL 1682 - Jun 30, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

C5 - GAMBIA
C5E (applied call) will show up a few days late (Jun 28 or 29) until
Jul 6. Details can be found in the last DX Newsletter 1681.

D2 - ANGOLA
Valeriy,UA0QV, got the callsign D2QV. He will enter Angola on Jul 1
and radio activities can be expected only shortly thereafter. The
length of his stay is not known. His QSL route is: Valeriy Grabovskiy,
Vila Catoca, Province Lunda Sul, Angola.

D4 - CAPE VERDE, AF-086
Michel,HB9BOI, will be QRV as D44TOI from Sal Island (AF-086) from
Jul 1-13. QSLs direct or via bureau to his homecall.

FP - ST PIERRE ET MIQUELON, NA-032
Paul,FP/K9OT, and Peg,FP/KB9LIE, will be active from Miquelon (NA-032)
again from Jul 5-14. They will also take part in the IARU HF Champion-
ship Contest (Jul 10/11). They are working in CW and SSB on 80m-10m,
maybe also on 160m and 6m. QSLs via bureau or direct to their homecalls
or via LoTW.
You can also visit their website at: http://www.hamradio.pnpfarms.com

GJ - JERSEY, EU-013
Gordon,G3USR (GJ3USR), Tom,GM4FDM (GJ4FDM), Ronald,PA3EWP (MJ/PA3EWP),
Jo,PA9JO (MJ/PA9JO), Alex,PA1AW (MJ/PA1AW), and Rien,PA1BDO (MJ/PA1BDO)
are staying on Jersey (EU-013) from Jun 29 until Jul 6. Activities will
take place mainly on 6m but also on HF and 2m.
QSL routes: GJ3USR via G3USR, GJ4FDM via GM4FDM, all others via PA1AW.
See also: http://www.jersey-2010.info

JW - SVALBARD, EU-026
Toshi,JW/JA8BMK, will be QRV from Svalbard (EU-026) working in CW, SSB
and RTTY on 20m-6m from Jul 1-11. QSLs direct or via bureau to JA8BMK.

JX - JAN MAYEN, EU-022
Stan,SQ8X (team leader), Pete,SQ9DIE, Vicky,SV2KBS, Decan,EI6FR,
Leszek,NI1L, Tomek,SQ9C, Bernie,HB9ASZ, Pekka,OH2TA, and Deon,K6WH,
will activate three stations SSB, CW and RTTY from Jul 4-16. They have
also climbers in the team and want to ascend the 2277m high vulcano
"Beerenberg" during this time.
See also: http://en.wikipedia.org/wiki/Beerenberg

KP4 - PUERTO RICO, NA-099
The "Puerto Rico Amateur Radio League" (http://www.prarl.org) is going
to activate the special event station K4C between Jul 4 and Aug 1
during the XXI. Central American and Caribbean Games in Mayaguez.
QSL via KP4ES.

OJ0 - MARKET REEF, EU-053
During his "50 years OH1VR tour" Seppo,OH1VR, plans to show up as
OJ0VR from Market Reef (EU-053) between Jun 30 and Jul 3. Seppo will
be accompanied by Markus,OH3RM, who will use the callsign OJ0A.
QSLs should be sent direct to their homecalls.

TK - CORSICA, EU-014
Fabrizo,TK/IK5WOB, will be QRV only in CW from Algaiola (EU-014)
from Jul 3-11.

4O - MONTENEGRO
Starting on Jul 1 Acim,YU1YV, plans to become active as 4O3A (guest OP)
or as 4O/YU1YV. He prefers working on 80m but can be found also on 6m,
10m, 15m and 20m. He will join the single OP/allband class in the IARU
HF Championship Contest on Jul 10/11.
QSLs for 4O3A via YU1FW (B/d/L), QSLs for 4O/YU1YV via his homecall.

9J - ZAMBIA
Katsumi,JF1OKX, is working in the capital Lusaka until September 2011.
He will sign 9J2KK on 80m-6m concentrating on the digital modes PSK31
or 62, RTTY, WSJT and SSTV but will also work in SSB and CW.
His QSL manager is JK1NSR.

USA, SPECIAL EVENT STATION
Some members of the OKC DX CLUB (KX5T) are celebrating the peak of the
Sporadic E season 2010 with the special callsign W5E which will be
activated in SSB on 6m and 10m (50150 and 28425 kHz, +-20 kHz) from
Jul 2-11. Special QSLs are available via KX5T.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 1: RAC Canada Day Contest
Jul 3/4: DL RTTY Contest
Jul 3/4: Original QRP Contest

Jul 4: DARC Digital Contest Corona

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-020, SM1, Gotland County Group: Pontus,SM0RUX, and Jaan,SM0OEK, will be
QRV as SM0R/1 from Gotska Sandon Island (WFF SMFF-010) from Jul 2-4.
QSL via SM0R (direct/bureau).

NA-025, J8, The Grenadines: Dave,J8/W9DR, and Mike,J8/W8IF, are working from
Bequia Island between Jun 28 and Jul 5. Both QSLs via KB3RHR (QRZ.com).

NA-108, J6, St. Lucia: Howard,J6/WB6WXE, is QRV from St. Lucia until Jul 6.
QSL via homecall (direct/bureau).

NA-110, W4, SC State Group: Dragan,K0AP/4, and Vlado,N3CZ/4, are activating
Fripp Island/South Carolina from Jul 3-10. QSLs via homecalls.

SA-060, PY8, Para State East Grp: Fred,ZX8W (PY2XB) and Orlando,ZX8C (PT2OP)
will be active from Cotijuba Island (DIB PA-014) from Jul 1-5.
QSLs for ZX8C via PT2OP, QSLs for ZX8W via PT7WA (direct/bureau).

SA-071, PY2, Sao Paulo State Centre Group: The "LABRE SPW" will sign PW2K
(PS2G in the WLOTA Contest) from Moela Island from Jul 2-4.
QSLs for both calls should be sent via PY2WAS (direct/bureau).

Lighthouse activities (WLOTA/ARLHS/ILLW)

D44TOI LH 0610 Sal Jul 1-13

503. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2010-07-01 06:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1277964001@panix.com>
Source record: 5672
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

** WSJT 8 **

hi ho all... did have some good discussions with some MS-DXer at
the HAM RADIO in Friederichshafen (biggest Exhibition in DL, or
better say in Europe) past days and all did tell the same...
As long as the requirements for an FULL MS QSO (as described in
paragraph 8.d.ii, App.4 - Revised MS Procedure - Interim Meeting,
Vienna (2004)) is NOT fullfilled (as now in WSJT8) we shall stay
at FSK441 from WSJT 7 (or earlier) in europe!
As well it make NO sence to have only the version which decode
from up 144 ms - we do wants to stay at version which puzzle us
the 40 ms and 60ms reflections...
Also the "hashed calls" solution is NOT usable at expeditions!
They need prior to have the facility (now as STANDARD) to see
more than one caller and that during an other QSO is going on...
We (MMMonVHF) will send these conclusion to Joe, K1JT, as a short
info whats the "mouth to mouth" propaganda here in Europe and hope
he will find a solution after his BETA tests to come back for a
version on WSJT 8 which will be usuable here as well
REPLY??? USE: http://www.mmmonvhf.de/minibb/index.php?action=vthread&forum=14&topic=110
Meantime there are comment direct by Joe, K1JT on the page!!!

** MS Propagation Preview at MMMonVHF **

Shower activity in July is concentrated around the end of the month.
Most remarkable shower this month is Southern Delta-Aquariids,
peaking July 28th. This medium-ZHR shower is characterized by
relatively faint meteors, but its maximum can be quite broad,
leading to similar ZHR from July 28th to 30th. Take also advantage
of very good Sporadic Meteors rates: Sporadics rates are now
approaching annual maximum, which will take place in late summer.

Have a look to shower predictions for July 2010 at our MMM MS
Propagationpage: http://www.mmmonvhf.de/ms.php
SOURCE: Massimo, IV3NDC, on behalf of the MMMonVHF Team

** July VHF Contest 2010, 3-4th July **

As well as in past years, Matej, OK1TEH, did setup a list of
stations participating at the July VHF Contest 2010 (and the
61.st OK Field day) 3-4th July. For details please do refer
the following WEBPAGE: http://www.darkside.cz/qrv.php
SOURCE: Matej, OK1TEH at OK2KKW webpage

** JA CubeSat now QRT .. SK **

Though it is a situation of negai CubeSat. I lost sight of the CW
Beacon signal on June 19. was not possible to find it though it
looked for afterwards. The atmosphere entry of negai is the for
ecast of the Space track June 26. It seems to have become a
shooting star. The photograph where sentences and one picture that
drew children's wishes had been taken in the micro photograph was
put on the negai. In the story that exists for a long time in
Japan There is a legend said that it fulfills the wish when it
wishes hope when the shooting star is found. The meaning of
Japanese negai is a meaning said the wish in English. This negai
will always realize the wish of you who assisted that this sat.
made from Soka University Student on Tokyo. Please let me
introduce a part of the mail that reaches me. Though it apologizes
because of an unskilled translation. Thank you really for your
report of satellite On June 24th micro space satellite Negai that
The operation of the satellite was ended. It was possible to take
a picture of the image, and to receive it aiming thanks to every
body of the radio ham. Negai website In Google English

A team of six operators will head to the island of Jersey between
june 29th and july 6th 2010. Team members are: G3USR - GM4FDM -
PA1AW - PA1BDO - PA3EWP - PA9JO. Callsigns used are : GJ4FDM,
GJ3USR and MJ/PA1BDO, MJ/PA3EWP, MJ/PA9JO & MJ/PA1AW.
Main focus will be on 6 meter. The team will also bring HF and
2 meter stations. In total 3 HF stations and dedicated 6 and
2 meters stations will be active. There will be no 4 meter op.
The team will an entry in the 6 meter and VHF contests during the

weekend of 3 & 4 July 2010. GJ4FDM will be the main callsign used
on 6 meter. The team will focus their activity on 50.125 SSB and
50.105 CW +/- QRM. When the band is "closed" a beacon will be on
50.105 beaming West. Please alert the team via team@jersey-2010.
info (constantly monitored) The team will be on the ON4KST chat
and also take skeds for digital modes. EME is still optional
depending on actual antenna situation. During the 3 & 4 July 2010
contest another callsign will be used on 6 meter.
2 meter: MJ/PA3EWP will be the main callsign used on 2 meter.
The team will focus their activity on 144.325 SSB +/- QRM. The
team will be on the ON4KST chat and also take skeds for MS.

BV2A (PL05SH) : Next activities on 144 MHz EME
LATEST NEWS from Bodo, DL3OCH, dated 2010-06-29: Even during a weekend with very bad EME conditions, we were able to show a little activity on the moon. I was able to log SV8CS(-25), IK3MAC(-20) and RK3FG(-21). Additionally I received DK7KF(-20), ES6RQ(-23) and DK3BU(-24) but we could not complete a QSO.
It can only get better. We will be active on Sunday the 11th of July. The conditions are pretty good and we have a much nicer window to NA. If everything goes well, we will have 2x17element agi (one H and one V with coax switch).

** DEADLINE for your NEWS input to MMMonVHF**

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php)
to the next MMMonVHF Newsletter will be next wednesday 2359 UTC...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all USER who send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the info
does not violate with our MMMonVHF-Policy.

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

73 de Guido "Guy" DL8EBW
on behalf of the MMMonVHF-Team

I'm not that surprised, I've had similar responses to shareware type
donations.

Never the less, you've chipped in, perhaps others who are pro-digital but
anti DSTAR will follow your example.

There is no way that is going to happen. The Codec2 will not be compatible
with AMBE, so a commercially manufactured transceiver will not be able
to talk to an open one. D-Star does not have the capability to negotiate a
CODEC in the protocol, so beside the low level of the coded the higher
levels will also need to be redone.
There is no way the "proprietary technology can be replaced", the only
thing that could happen is that a second network, incompatible with
the current D-STAR network, could be setup using open technology.
Frankly, I don't think we still have the userbase to make that happen.

I am probably not the only one with this opinion, and I am not amazed
that there are not many that would sponsor a development like this that
cannot be put to real use.

The only useful development would be the development of a free, open
codec that is compatible with AMBE. But that would have to be done in
an environment that does not bow to US Patents etc, or it will have to
wait until all the patents have expired.

"ICOM's D*STAR transceivers, even the handie-talkies, have their AMBE
codec on a removable daughter card. This is wonderful, because it gives
us a path to change the codec. "

WIANEWS FOR WEEK COMMENCING JULY 4 2010.

Aunty takes over Radio TV interference

VKCWIA

D-STAR FOUND TO BE illegal

QRM from PLAMA TVs

DEAD AND BURIED / UNDERGROUND RADIO

Operating Tip #1 for the RD..

A look at Amateur Radio Magazine for July

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF
AUSTRALIA FOR WEEK COMMENCING JULY 04 2010

Amateur radio is alive and well, although as this snippet from ABC
radio
demonstrates there’s a perception in the community that we no
longer exist!

(Play Death_of_Amateur_Radio tape)

We'll come back to that item later in this broadcast and hear how Justin Giles-Clark VK7TW responded to explain that amateur radio is going strong.

BBC takes over Radio/TV Interference investigation

In the UK Ofcom are passing responsibility for investigating Radio and TV interference complaints to the BBC from June 30.

From: http://www.ofcom.org.uk/complain/inter/

BBC will be taking responsibility for investigating complaints of interference to UK radio and television.

If, following the investigation by the BBC, there is evidence of interference caused by something outside your control and which is unlawful, the BBC may refer your case back to Ofcom for possible enforcement action.

WIA Centenary Update

Changing your callsign does not affect your WIA Centenary Award log

During the week the WIA Office received an inquiry from a member who had just upgraded to the Standard Licence.

He queried whether contacts made under his Foundation callsign, that has been replaced by his new Standard callsign, still counted towards the WIA Centenary Award.

Most of the 100 points needed for the award were made under the Foundation callsign.

The answer is yes. He will now submit a claim for the award under his new callsign but include the contacts made under his Foundation call.

This is normal practice with most amateur radio operating awards

News from the west of VK100WIA plans for the Royal Perth Show

A combined week-long display involving a number of radio groups is planned for this well attended event in September.

The Western Australian Repeater Group is on the VK100WIA roster for the 26th to the 29th of that month, to be followed by the VHF group on the 30th to the 1st of October.

Event organiser Heath Walder VK6TWO advises that the plan is to have a link between the Perth Showgrounds and Wireless Hill where remotely operated transceivers will be located. That will help avoid the high level
of QRM associated with the show.

Heath VK6TWO says the Royal Agricultural Society has granted access to the
rooftop of the main building for antennas or any other equipment, and it
is very supportive of the proposed public education and celebratory aspects of the WIA Centenary.

And just like the former OTC Wireless Station in Queens Domain, Hobart, the Wireless Hill heritage site in Perth will celebrate its 100th anniversary in 2012. Plans are being made for both milestones to involve
amateur radio.

The Morsecodeans Society of Western Australia will also be at the Perth Show as they have been previously, with a fully operational telegraph system.

WIA affiliated club the Radio Electronics Association of South Tasmania did
extremely well with its roster slot using the special callsign VK100WIA from the
old coastal radio station site, Queens Domain in Hobart. Special Event Manager,
Justin Giles-Clark VK7TW reports that nine REAST members ended up with 415 contacts over the three days.

IRLP and Echolink on 2 metres, ATV, and HF phone, CW and PSK31.

While the activity would normally be newsworthy it clashed with much bigger news
of last week, Australia getting a new Prime Minister. However ABC 936 radio ran
an interview with Justin VK7TW lasting five minutes.

Announcer Michael Veitch actually did his research before the interview by seeing
the VK100WIA station in action. The result was a very interesting, sometimes
humorous but also highly informative interview.

Let's listen to part of that interview.

(ABC_Hobart_VK7TW_intrvu. It ends with Veitch hamming it up with the VK100WIA callsign and a Justin laugh).

After it was aired a half a dozen interested ABC listeners visited VK100WIA to
learn more.

Another WIA Supported Centenary Activity

The Centenary of Organised Amateur Radio in Australia is very much an occasion
for the entire amateur radio community, individual radio amateurs and clubs
to join in and celebrate this milestone.

The WIA has urged its affiliated clubs to develop and implement activities
to promote amateur radio in their community.

The activity must be one, that in the view of the WIA Centenary Committee,
either promotes amateur radio, is of general interest to radio amateurs or
is otherwise worthy of support.

The very latest WIA Supported Centenary Activity, is the Sunraysia Radio
Group’s participation at the Tri Annual Junction Rally, a major event featuring
Vintage Engines, Paddle Boats, Steam Engines, Barges, Vintage machinery,
Tractors, Bikes and Cars. The club also plans to provide a vintage radio
display.

This major event will be held at the junction of the Murray and Darling Rivers
in Wentworth New South Wales on Saturday the 10th and Sunday the 11th of
July.

The previous WIA Support Centenary Activities were:

* The VK9NA VHF/UHF/Microwave DXpedition to Norfolk Island

* The Centre Victoria RadioFest Kyneton Victoria

* Radio, Astronomy and Electronics Expo, Bendigo

* The Re-enactment in June of the first wireless press message received from
United Kingdom in Australia at Koo-Wee-Rup

Any club, group or individual seeking the WIA's support for an activity to
be associated with the Centenary Celebrations should either write to the
Centenary Committee, WIA at PO Box 2042, Bayswater, Victoria 3153, or

email
to centenary@wia.org.au

VKCWIA on 23cm EME

The Special Event Callsign VKCWIA will be activated on 23cm (1296 MHz) moon
bounce on this weekend July 4-6. To the best of my knowledge this is the first
use of a call from VK without a numeral!!

As part of the Wireless Institute of Australia's centenary celebrations, the
Orange and District Amateur Radio Club

Operation will be in CW and JT65C modes with spots on the HB9Q logger
and the usual dx clusters when active. Southgate Amateur News in a story
on this from Orange in VK2 say "Please note that due to the callsign
length limitations in WSJT65C, this VK club will, during the actual QSO use
vkCwia (with C being the roman numeral for 100)."

Orange and District Amateur Radio Club http://www.odarc.org/

A look ahead at the VK100WIA roster

Sunday the 4th through to Tuesday the 6th of July is the Orange & District
Amateur Radio Club. It is operating HF Phone, CW, PSK31, and Slow Scan TV,
plus VHF/UHF SSB and FM repeater, and bouncing signals of the moon using
SSB, CW and WSJT.

The 7th to the 9th of July, Gympie Communications and Electronics Group members
are keen to put the callsign on air, particularly using CW.

Next weekend the 10th and 11th of July has the Sunraysia Amateur Radio Group
at the Tri Annual Junction Rally, Wentworth a WIA Supported Centenary Activity.

Now finalising preparations for their rostered slots are the Darwin Amateur
Radio Club and the Waverley Amateur Radio Society we'll have more details
on next week's broadcast.

The special callsign VK100WIA has made around 4,500 contacts in its first
six weeks.

The WIA Centenary Committee met last Tuesday to review the celebration to
date and identify further actions needed in the coming six months.

All aspects were discussed including the special callsign VK100WIA, its
on-line logging, the receipt and issuing of QSL cards and the very first
VK and DX claims for the WIA Centenary Award having been received.

A copy of this month?s JARL news was produced at the meeting. It?s the
latest overseas magazine to report on the WIA?s Centenary and the WIA
Centenary Award.

Japanese radio amateurs have featured heavily among the DX stations making
contact with VK100WIA.

The WIA National Field Day to be held on Sunday the 23rd of October is a
major promotional opportunity for amateur radio.

In particular, the Committee considered the type of support that can be
provided to participating clubs to maximise the public relations benefit
of this event.

Reports were received on the promotion of the Centenary through the news
media and also the webmaster tabled statistics that showed a staggering
level of visits to the WIA website reading the WIA Centenary section.

The committee heard that there appears to be increased levels of inquiry
from prospective radio amateurs.

The on-line requests for information on the WIA website in May and June
are higher than the same time last year.

The committee also noted the comments of clubs that have already activated
the VK100WIA callsign resulting in them receiving new inquiries from
people wanting to know more about amateur radio.

HAMS ACROSS AUSTRALIA.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news

Central Coast Amateur Radio Club say progress is under way for February's
Wyong Field Day to maintain this day as the biggest event for Amateur
Radio in
Australia.

There are some changes to the main entry at the Wyong Race Course, the entry
will be from Rose St., which is at right angles to the railway.

This will mean an easier walk in from the entry to the Traders Area.

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP with an explanation.....

It has been asked whether I have the answers to all the questions that I
raise? Simply, no but the purpose of this segment is to try and stimulate thought about things that can make a difference to our hobby.

One of the fascinations of recreational pursuits is that enthusiasts like to learn and share their interest. That has been a strong feature of Amateur Radio for as long as I can remember. I don't know how something should go together but I bet there is some-one who can explain
it. I don't have a component for a project and how many times does the part arrive in the letter box or is located from a fellow amateur's junk
box and handed over? This happens more than we ever hear on broadcasts such as this!

In the same spirit being able to share the experience's gained in other

pursuits on how to grow this hobby is part of the growing process AR depends on. At times having the memory jogged can draw out solutions for
us and our clubs and the wider hobby.

AR has a reputation for being hands-on in its approach. Sometimes we have to be able to get past the blasts of hot air that some our self promoters surround themselves in. At times we have to ask the questions

of the people who know, who are involved rather than the blowhards who just spread rumours. This is where grounding ourselves in the Amateurs Code provides the static relief that is sometimes necessary.

This is another reason for getting the news from those who write the stories you hear on QNEWS. It's your choice as to whether you ask the organ grinder or his monkey, its your choice whether you get the facts from the source or are prepared to have it from the rumour mill.

I’m Geoff Emery VK4ZPP and That’s What I think... how about you.....?

CLUBBING -

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF with news from the Redcliffe AR Club.

On a cold Monday night, about 40 club members gathered for the weekly meeting
but none were brave enough to leave the warmth of the club rooms to participate
in the monthly fox hunt. So instead members gathered in small groups to discuss
topics of interest. One topic of hot gossip was the new loop antenna of Roger,
VK4ZLQ, who has cut out a lot of his noise at the QTH but someone reckoned it
was because Australia was out of the World Cup and the plasma tv’s had been
turned off which caused the noise reduction.

It was good to see Lauren VK4FLMC, her mother Anita and brother Shaun all the way
from a much colder Stanthorpe to meet again with club members. Anita said that
the house is not finished yet but as soon as the warmer weather starts, husband
Gary, VK4FGAZ, will have the house completed.

While members were talking, Peter, VK4EA, was about the club house collecting
the important membership fees of $30 single or $35 Family membership which are
now due. EFT payment option is also available. See Peter or a member of the
Executive for further details. An email will go out shortly to all members
advising the EFT details for this option.

The club conducts Technical talks given by members for club members each 3rd
Monday night of the month. Listed talks for the up coming months

include:-

July, James, VK4TJF, Working DX & the QSL card system in the club.

August, John, VK4YJB, How to use EZNEC and antenna modelling

September, Kevin VK4UH, Expedition to Norfolk Island

October, Peter VK4TGV, Codan NGT radio and modem

November, Mal, VK4UMS, 2010 Dayton Hamfest – Would you like to
go 2011?

The RD contest is coming up in August. Shaun VK4FY & Scott VK4FLAE
will be
leading the event. Camping will be available at the Murrenbong scout
camp site
for those who wish to stay over night. Please contact either Shaun or
Scott for
further details.

The club house is open each Wednesday morning from about 9 am and last
Wednesday
a group of about 20 members were present with Charlie VK4YZ and a small
group
sorting out the old copies of Electronics Australia and re-organizing
the
library. So if you have a special project and have no room at home or
just need
help to finish it come down each Wednesday and see Charles, VK4BTC or
Ken VK4FKEN.

So until next week, for Redcliffe club, I'm Ray VK4CF and you're
listening to
QNEWS from VK4WIA

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greetings from Rockhampton and District Amateur Radio Club, the RADAR
club.
This is Les, VK4VIL reporting.

With the International Lighthouse and Lightship Weekend (ILLW)
approaching,
Jason, VK4FJGS has organized a luxury 50 foot power cat to transport
RADAR
participants to Cape Capricorn Lighthouse some 30 nautical miles east
of the
mouth of the Fitzroy River. Cape Capricorn has never been activated for
this

event before so keep an ear out for lighthouse AU0059.

Approximately 14 members will attend. The cottages at the lighthouse have been converted to a holiday escape theme, open to the public, with power, refrigeration, full cooking facilities and even TV and video. This is a far call from the clubs ILLW effort last year. In 2009, all equipment was carried approximately a kilometre uphill to the Sea Hill Lighthouse, AU0060, on two wheeled trolleys and set up under a tarp. The Cape Capricorn Escape cottages are also being offered on Mates Rates – cost of diesel to power generators only.

As another initiative of the RADAR club, President Jack, VK4JRC is in the middle of organizing establishment of an emergency group within the club. Jack and others will be demonstrating equipment suitable for emergency comms at Rockhampton Heritage Village's emergency day on 25th July.

Interesting times.

Listen out next week for our comms involvement in a couple of major car rallies in the district."

A thought for the week from Benjamin Franklin. "Life's tragedy is that we get old too soon and wise too late.

I'm Les, VK4VIL on behalf of the Rockhampton and District Radio Club.

TOWNSVILLE
vk4wit@wia.org.au
4773 1196 or 0408 001142
po box 333 Garbutt East, QLD 4814
www.tarc.org.au

GREETINGS ! THIS IS DON VK4FNQA, WITH NEWS FROM 'SHOWTIME CITY' TOWNSVILLE HERE IN NORTH QUEENSLAND.

THE MANAGEMENT MEETING OF THE TARC INC HAPPENS THIS TUESDAY 6TH OF JULY FROM SEVEN THIRTY PM AT THE CLUB ROOMS PERCHED ATOP OF THE SES HEADQUARTERS IN GREEN STREET WEST END.
MAKE SURE YOU BRING SOMETHING FOR THE SHOW AND TELL SESSION.
BRING YOUR THINKING CAPS TOO AS THE MEETING

WILL BE PLANNING FOR THE AGM AND CHRISTMAS
PARTY VENUES.
ALL WELCOME.

HERE IS SOME EXCITING NEWS !
THE NEXT ANN RENTON MEMORIAL NET HAPPENS ON
TUESDAY JULY 27TH FROM SEVEN THIRTY PM AND IN
CONJUNCTION WITH THE TARC INC OPERATIONS OF
VK100WIA FOR THE CENTENARY CELEBRATION OF
THE WIA AND TARC WILL BE DOING SOMETHING
VERY SPECIAL...
THE NET WILL NOT ONLY BE CONDUCTED ON THE
TOWNSVILLE VHF REPEATER BUT WILL ALSO BE
PROVIDED WITH A TWO WAY AUDIO FEED ON THE
TOWNSVILLE UHF REPEATER AND IRLP NODE 6444
LINKED TO ROCKHAMPTON IRLP NODE 6973 SO
THAT YL AND OM OPERATORS THERE CAN ALSO
PARTICIPATE..... A TWO WAY AUDIO FEED FROM
3605.4 KILOHERTZ WILL ALSO BE PROVIDED AND
FULL LOGGING WILL ENSURE ALL CONTACTS
MADE ON ALL BANDS WILL BE ENTERED INTO
THE ONLINE VK100WIA LOG....
START SPREADING THE WORD AROUND ABOUT
THIS SPECIAL EVENT AND MAKE SURE THE YL'S
GET ACTIVE ON RADIO FOR THE NIGHT.
(AND THAT ESPECIALLY MEANS YOU TOO MARY VK4PZ!)

FINALLY NEWS THAT TOWNSVILLE RADIO
AMATEURS HAVE YET AGAIN BEEN GIVEN THE
BIG TASK TO PROVIDE LOGISTIC
COMMUNICATIONS SUPPORT FOR THE ANNUAL
MAGNETIC ISLAND TO TOWNSVILLE SWIM...
OPERATIONAL DURATION WILL BE FROM 7AM TO
4PM ON SUNDAY 18TH JULY.
THERE ARE OVER ONE HUNDRED SWIMMERS
REGISTERED TO COMPETE.
THANKS TO THOSE OPERATORS WHO HAVE
ALREADY PUT UP THEIR HANDS TO BE AT SEA
OR MAN RACE BASE ON LAND. SNOW VK4ME
IS EVEN PROVIDING ONE OF THE SAFETY BOATS.
IF YOU WANT TO GET INVOLVED OR FIND OUT
MORE PLEASE CONTACT GAVIN VK4ZZ ON EITHER
MOBILE 0427182469 OR EMAIL
VK4ZZ@WIA.ORG.AU

I AM NOW OFF TO THE SHOW FOR A DELICIOUS
SHOWTIME... "DAGWOOD DOG"... SO THAT IS ALL
THERE IS TIME FOR THIS WEEK AND I WILL BRING
THIS EDITION OF QNEWS FOR SUNDAY FOURTH
OF JULY TO A CLOSE.

THIS HAS BEEN DON VK4FNQA IN TROPICAL
PARADISE FOR THE TOWNSVILLE AMATEUR
RADIO CLUB INC, AND YOU HAVE BEEN
LISTENING TO, AND ENJOYING
QNEWS FROM VK4WIA..

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL,
Amateur Radio Newsline, NZART and the WW sources of the WIA.

BPL WAR: ITU TO STUDY BPL INTERFERENCE

The International Telecommunications Union's Working Parties 1A and 1B
met in Geneva, Switzerland. between June 21 and 28. A major item
of discussion was protection of radio services from interference
caused by Broadband over Powerline or BPL. Amateur Radio Newsline's
Bruce Tennant, K6PZW said:

"The International Amateur Radio Union or IARU has already contributed
to a report titled "The Impact of Powerline Telecommunication Systems
on Radiocommunication Systems Operating in the Low Frequency, Medium
Frequency, High Frequency and VHF Bands Below 80 MHz." In it, the
acceptable criteria for degradation of the High Frequency radio noise
floor caused by BPL is defined as being one half of one db. Now, this

group will concentrate on the protection of radio services from the
effects of BPL in range from 80 to 200MHz. The reports conclude that
when the
differences in range between BPL devices versus the other spectrum
users are
taken into account, the acceptable levels of radiation to protect the
amateur
service users are of the same order as those needed to protect other
services.

In the UK a recent Ofcom report on the polluting Power Line
Telecommunications
system is discussed in an article in The Register.

The article says that an extensive study commissioned by Ofcom
concludes that
power line networking could crash aeroplanes and block Radio 4.

Existing PLT systems operating across 2-32 MHz have already been
causing major
problems to radio listeners, now a new generation of PLT device
threatens the
FM, DAB and aeronautical bands as well.

www.theregister.co.uk/2010/06/28/ofcom_pln/

D-STAR illegal in France

While Radio Amateurs here in VK and the rest of the world have embraced
modern
digital communications, it would appear D-STAR is illegal in France and

there
is now a European Parliament petition on the matter.

A report on a French digital ham radio website says that the regulator, the
ARCEP, has said the D-STAR protocol specifications could allow ham-radio
operators to connect their station to Internet and that is prohibited.

The ARCEP also cites alleged concerns regarding Cryptography & National Security as well as the use of a proprietary CODEC.

THE WORLDS BIGGEST RADIO TELESCOPE

Called the LOFAR the acronym stands for LOw Frequency Array, its owner is
the Netherlands Radioastronomy Institute which says that its construction
is unique. Instead of a traditional large dish the new radio telescope is
made up of 25,000 small antennas measuring between 50 centimetres and two
meters across.

The main unit is based near the north-eastern Dutch town of Assen, but the
antennas are spread out across the rest of the Netherlands and also in Germany, Sweden, France and Britain. When you combine all the antennas you
get a giant telescope with a diameter of about 1,000 kilometres or about
600 miles.

RSGB NEWS FROM G4NJH

QRM from Plasma TVs

CISPR, the international standards committee responsible for EMC matters, have launched an information-gathering campaign specifically aimed at determining the extent and seriousness of interference from plasma TV receivers.

Initially they have asked national standards organisations for this data and, in the UK, BSI contacted our Regulator, Ofcom. They posed the simple question, asking how many complaints have there been? Ofcom indicated that they had received only 12 to 15. Over the last few years, the EMC Committee have received many more complaints from members, but no recording system is in place.

So, we now need your help. If you have suffered, or are suffering now, from interference from a plasma TV receiver we need to know. All that you have to do is send a very brief e-mail to

plasma.tv@rsgb.org.uk

We only need to know the number of interference cases, no details, and no names/addresses. Please act as soon as possible, since the timescale for gathering this information is very tight.

Armed Forces weekend at Bletchley Park

Celebrating the role of the armed forces throughout history and in particular the role of the cadet forces, Bletchley Park in Buckinghamshire is hosting Armed Forces weekend on 3rd and 4th July.

The event will also look at how Bletchley Park assisted the armed forces during World War Two. Other activities during the weekend will include a display by the Vintage Military Amateur Radio Society of radio equipment spanning the last hundred years, showing how communication in the armed forces has changed over time and become ever more vital. More information can be found at their website www.bletchleypark.org.uk

NEWS FROM ARNEWSLINE

THREE IARU MEMBER SOCIETIES GO MISSING

The International Amateur Radio Union reports it has not been able to contact three national ham radio societies for at least five years and believes that there is no evidence of their continued existence. The three
groups are the Papua New Guinea Amateur Radio Society, CORA in French Polynesia and The Burma Amateur Radio Transmitting Society. Under its rules the IARU it has called for evidence to be submitted that these radio
societies are in existence by no later than September 13, 2010.

Meantime in other changes, the Radio Club of Paraguay has been reinstated
to full IARU membership status, the Union des Radio amateurs du Congo is a
newly is a newly elected member, and a membership application is being considered from the Montenegrin Amateur Radio Pool formed in October 2008.

FCC FINES THREE WHO AIDED UNLICENSED BROADCASTER

The FCC has jointly fined three Massachusetts residents $10000. This for
what the regulatory agency calls providing services and facilities incidental to the operation of an unlicensed transmitter.

In simpler terms, it means that the regulatory agency determined that Delroy Johnson, Paul Parara, and Richard Parara were in some way sanctioning or supporting the operation unlicensed transmitters on 97.5

MHz
in Hyde Park and Dorchester, Massachusetts. Its not asserting that any
of
the three ran the transmitting facility, but that their support made it

possible for the transmissions to be made.

QRZ.COM REACHES 400,000 USER MILESTONE

And a word of congratulations to our friends at QRZ.COM

This as the website registers its 400,000th user into the system over
the
weekend of June 19th and 20th. QRZ founder and owner Fred Lloyd,
AA7BQ, says
that he does not know exactly who it was when it happened, but it made
his
group very proud just the same.

Lloyd also says that on Friday, June 18th that QRZ installed another
12gb
of RAM into its two main servers which doubled the amount that they
previously were using. Prior to the upgrade, QRZ could service 350
simultaneous requests. Now, that number has jumped to nearly 1000.

SUMBANDILASAT BACK ON LINE

South Africa's Sumbandila amateur radio satellite is back on the
air. SO-67 as its known in AMSAT parlance carries an FM transponder
are
Uplink 145.875 MHz and Downlink 435.345 MHz +/- Doppler shift and is
available for all hams to use world-wide.

THE LUNAR LANDER CUBESAT PROJECT

In a story first reported in the European E-E Times, Vermont Technical
College, Norwich University, St. Michael's College, and the University
of
Vermont are working together to land a tiny CubeSat on the moon.

The design team is currently working on initial proposal for the
spacecraft. This, with the aim of achieving further NASA funding in
June
2011. Primary funding for this effort is already being provided by the

Vermont Space Grant Consortium under NASA grant.

In the current phase of the program The Vermont CubeSat project, led by

Professor Carl Brandon of Vermont Technical College aims to launch by
2015. It is developing the first CubeSat that can be launched from a
geostationary orbit to successfully land on the moon. The CubeSat
electronics are based on a Texas Instruments MSP430 processor and the
software will control navigation, communications, scientific

instruments,
camera and the CubeSat's propulsion system. No word on what modes and radio bands it will operate. More is on-line at tinyurl.com/22vuz7q

WEIRD AND WONDERFUL

Now this is not an 'urban myth' but really has just happened in the radio world.

Many of you are probably aware that this WIA National News Service is mixed at
the Brisbane studios of Australian Racing Networks 'Radio TAB' where your's
truly fullfills his normal daily duties.

It has come to notice that one of our race fans passed away a few weeks ago,
not good to lose a listener under any circumstance, however this listener was
SUCH an avid listener to RadioTAB that his family BURIED him with a transistor tuned and operating on 1008 our Brisbane AM outlet!

Truly taking pride of place in the files of the "Weird and Wonderful".

OPERATIONAL NEWS -

AR Australia Premier Contest starts August and VK4TI has a few reminders -

Operating Tip #1 for the RD..

Looking at the VHF /UHF category - 17 of the first 20 are from VK6 - obviously
the VK6's have hit on a way to make high scores in the RD -

How?

Assume these roughly 20 stations can work each other - every two hours a repeat is allowed, all modes are allowed, but lets assume they don't work
CW. They can work a minimum 40 contacts every two hours by working each other (per band) using a Multi Mode that gives a possible 120 contacts every
two hours 6,2, and 70 cm - or 120 X 1240 points per station

My tip?

Every State should hammer this category in 2010

WW SPECIAL INTEREST GROUPS --- RADIO SCOUTING

Are You a RadioActive Scout? Bob, VK6POP, is looking for RadioActive Scouts

"No. I’m not talking about the teenage boy, David Hahn, who attempted to build
a homemade breeder nuclear reactor in his parent’s Michigan house, as told in
a true story in Harper’s Magazine in 1998, and which was the inspiration for
Kevin Silverstein’s 2004 book “The Radioactive Boy Scout”.

I’m talking about Scouts getting Active on the Radio.

July is RadioActive month for Scouts. For the whole month of July, Scouts of
all ages can earn the RadioActive Award simply by getting on air, on echolink
or IRLP, and calling CQ RadioActive, or CQ Scouts.

This is the first Amateur Radio award exclusively for Scouts, and I look
forward to receiving lots of RadioActive logs from around Australia.

The best frequencies to use are those around the Australian JOTA calling
frequencies.

For details on how to participate, the rules of the Award, and how to earn
bonus points, visit http://radioactive.scouts.org.au

I think hams should be looking into using TETRA instead of DSTAR/P25, if we are to actually consider using digital voice technology. I believe there would be far fewer encumbrances than with P25, and there are LOTS more surplus radios around.

ACTIVATED FOR HURRICANE ALEX

As Tropical Storm Alex turned into Category 1 Hurricane Alex, three
Amateur Radio mainstays during the Atlantic hurricane season -- WX4NHC,
VoIP Hurricane Net and Hurricane Watch Net -- activated at 8 AM EDT on
Wednesday, June 30; WX4NHC is the Amateur Radio station at the National
Hurricane Center in Miami, Florida. Alex made landfall at Soto la
Marina, Mexico late Wednesday, but weakened Thursday as it moved across
Mexico and was downgraded to a tropical storm, dumping heavy rain over
Mexico and south Texas; the storm's center made landfall with 96 MPH
winds in San Fernando in the Mexican state of Tamaulipas, 75 miles
south of the Texas border. According to the NHC at 11 AM EDT Thursday,
Alex was centered about 165 miles west-southwest of La Pesca, Mexico,
and about 150 miles east of Zacatecas and was moving west at 12 MPH; it
is expected to stay on that trajectory for the next day or so. Read

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL TEACHERS INSTITUTES WRAP UP IN NEW MEXICO, SOUTH CAROLINA AND CALIFORNIA

After the first ARRL Teachers Institute on Wireless Technology (TI) of 2010 concluded this past February in Tucson, Arizona, three more TIs happened in quick succession -- New Mexico, South Carolina and California -- in May and June. The Teachers Institute on Wireless Technology is a four-day, expenses paid in-residence learning opportunity designed for motivated teachers and other school staff who want to learn more about wireless technology and bring that knowledge to their students. A variety of topics are covered during the TI, including basic wireless technology literacy, electronics, the science of radio, radio astronomy, how to bring space into the classroom ham radio operation, introduction to microcontrollers and basic robotics. Participants do not need to have an Amateur Radio license to attend a TI session. The Teachers Institute program is one component of the grant offerings within the ARRL's Education and Technology Program portfolio of resources made available to schools and school teachers to advance the integration of wireless technology literacy and ham radio into school curricula. Read more here <http://www.arrl.org/news/arrl-teachers-institutes-wrap-up-in-new-mexico-south-carolina-and-california>.

==> + ARRL FIELD DAY: IT'S A WRAP!

With more than 500 Field Day logs already received -- and more coming in every day -- it's safe to say that this year's ARRL Field Day was a smashing success! Conditions, at least on the East Coast, were quite good. Operators at W1AW, the Hiram Percy Maxim Memorial Station, worked almost 3000 stations during Field Day, including a few California stations on 6 and 10 meters, as well as North Dakota on 10 meters on Saturday. Don't forget to send in your Field Day logs. Logs for 2010 ARRL Field Day must be postmarked, e-mailed to the ARRL <fieldday@arrl.org>, posted to the Field Day Web Submission Applet site <http://www.b4h.net/cabforms/> or submitted by 2059 UTC Tuesday, July 27, 2010. Late entries cannot be accepted. You can also post your Field Day stories and photos on the Field Day Soapbox <http://www.arrl.org/contests/soapbox>. The 2011 ARRL Field Day will be June 25-26.

==> ARRL IN ACTION : WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including advocating for Amateur Radio operators at the national and international level, instructing classroom teachers on wireless technology, activating W1AW for ARRL Field Day and more. This installment covers the month of June. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-23>.

==> + THE DOCTOR IS IN: D-STAR, ANTENNAS AND AMPLIFIERS

Tom Copley, K4YAZ, finds that he needs to use more power to consistently reach my local D-STAR repeaters in the Tampa Bay area. I live in a condo and my VHF/UHF antenna is on a second floor porch. Moving it higher or into the clear is out of the question, due to my condo association. I am using a dual band transceiver with 50 W output on high power. This is not enough to consistently reach the local repeaters.

Since I am mainly using the 70 cm band, I have purchased an amplifier that has an output of 100 W with 30 W drive on 70 cm. The amplifier also has a useful receive preamp. To obtain the full 100 W output from the linear, one must input 30 W. My 50 W radio would be over the input rating of my linear, and the approximately 15 W output from the radio on medium power will not drive the linear to the full 100 W output. Is there an easy solution to this issue, or do I have to get a different amplifier?

Here's what the Doctor had to say:

If you are right on the edge of the coverage area, the 3 dB increase in power may make the difference. Also consider any other losses, such as in the coax run to your antenna -- at 70 cm, coax loss can be a big factor, and if the length is more than a few feet, better coax may reduce loss by almost as much as the amplifier gain -- get every decibel you can.

Your amplifier drive problem turns out to have an incredibly simple solution. If you have 2.2 dB loss between the radio and the amplifier, your 50 W radio output will be just 30 W at the amplifier. This only makes sense because of the preamp in the amplifier; otherwise, the loss would also reduce receiver sensitivity. With a preamp that has a reasonable gain, the noise figure and thus signal to noise ratio is determined largely by the noise figure of the preamp. On HF, making a reasonably accurate attenuator using power resistors can be easy. At UHF, component, lead and wiring inductance can make it a very difficult job -- but all is not lost!

Now for the really simple part. You need coax cable between the radio and amplifier anyway (see Figure 1). If you use coax with a loss of 2.2 dB, you're done. On 440 MHz, it takes just 16 feet of Belden 8259 RG-58 coax to get the loss -- hopefully emphasizing my earlier point! If you select a different cable, make sure you have the cable attenuation specs available. The extra coax can be neatly coiled out of the way, or better yet, move the amplifier closer to the antenna to reduce the coax length and attenuation between the amplifier ad antenna. Note that this all assumes that the amplifier input is a good match to 50 ohms; if not, the coax loss will be higher. If you have a wattmeter, it will be a good idea to confirm all the power levels when you're done -- and life being what it is -- plan to do a little trimming.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail
<http://groups.yahoo.com/group/AlleghenyValleyRadio/post?postID=zpPOqQ_tDRUgz

8PtrOLu7ReN8SebO3NBKYSpUQMK52ADP9llBYDxeNcBsVrABCPPnXowtP8cnIt4>
or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone
calls, please). Look for "The Doctor Is IN" every month in QST
<http://www.arrl.org/qst> , the official journal of the ARRL.

==> + INTERNATIONAL SPOTLIGHT: ARRL REPRESENTED AT EUROPE'S LARGEST
AMATEUR RADIO CONVENTION

Billed as Europe's biggest Amateur Radio exhibition, HAM RADIO 2010
was held in Friedrichshafen, Germany, June 25-27, 2010. The event is
held annually in the Lake Constance region. Each year, a contingent
from the ARRL has attended HAM RADIO in Friedrichshafen, greeting our
non-US members and networking with other national radio societies. ARRL
also supports DXCC card checking at its booth -- a very popular
activity among the international community who travels to this large
show. The ARRL, as International Secretariat for the International
Amateur Radio Union, also hosted a meeting area for IARU officials and
friends at the convention. Last year's HAM RADIO had 17,400 visitors
and nearly 200 exhibitors from 30 nations. Pictures from this year's
event have been posted to ARRL's Facebook page. Read more here
<http://www.arrl.org/news/arrl-represented-at-europe-s-largest-amateur-radio-
convention>.

==> AMATEUR RADIO IN SPACE: IARU INTERNATIONAL AMATEUR RADIO SATELLITE
FORUM SCHEDULED IN CONJUNCTION WITH AMSAT-UK MEETING

The IARU International Amateur Radio Satellite Forum will be held in
conjunction with the AMSAT-UK Colloquium
<http://www.uk.amsat.org/content/view/32/42/> in Guildford, England on
the weekend of July 31-August 1. The forum -- chaired by IARU Amateur
Satellite Advisor Hans van de Groenendaal, ZS6AKV -- will take place on
Sunday morning, August 1. A report back on the activities of the IARU
Satellite Adviser and his Advisory Panel will be one of many items on
the meeting's agenda. There will also be a brief presentation covering
the ITU notification requirements for satellites operating in the
Amateur Service and the requirement to disable transmissions should the
signals interfere with other users of the radio spectrum. The forum is
open to all delegates at the Colloquium. For more information,
including hotel and registration information, please see the AMSAT-UK
Web site <http://www.uk.amsat.org/content/view/32/42/>.

==> + SOLAR UPDATE

Tad "Like a vast river, stretching in the Sun
<http://www.bartleby.com/145/ww290.html>" Cook, K7RA, reports: The
conditions were not great for ARRL Field Day last weekend, but some
nice sporadic-E openings on 6 and 10 meters livened things up.
Geomagnetic conditions were quite active over the past week, which
increased absorption, with the higher latitudes more affected than
mid-latitudes. The average daily sunspot numbers over the past three
weeks were 26.9, 16.1 and 11.7, so quiet conditions continue with very
little solar activity. Look for more information on the ARRL Web site

on Friday, July 2. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by William Wordsworth's Growth of a Poet's Mind: Book Fourth, Summer Vacation <http://www.bartleby.com/145/ww290.html>.

==> + ARRL TO CLOSE IN OBSERVANCE OF FOURTH OF JULY

ARRL Headquarters will be closed in observance of Independence Day on Monday, July 5. There will be no W1AW bulletin or code practice transmissions that day. League Headquarters will reopen Tuesday, July 6 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

==> THIS WEEK ON THE RADIO

This week, there is another running of the NCCC Sprint Ladder on July 2. The DL-DX RTTY Contest and the Venezuelan Independence Day Contest are July 3-4. The Michigan QRP July 4th CW Sprint is July 4-5. Next week, the FISTS Summer Sprint is July 10 and the IARU HF World Championship is July 10-11. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, July 25, 2010, for this online course session <http://www.arrl.org/online-course-registration> beginning on Friday, August 6, 2010: Amateur Radio Emergency Communications Level 1. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1716 - July 2 2010

Amateur Radio Newsline report number 1716 with a release date of
Friday, July 2, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. French telecommunications regulator says
D-Star is illegal in that nation and French hams vow to fight. Also, a
change in U.S, technology export rules could help the ham radio space
program, Delaware legislators sponsor bill to exempt two way radio
users from restrictive cellphone law and the sounds of a very pleasant
Field Day. Hear it all on Amateur Radio Newsline(tm) report number
1716 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FRENCH TELECOMMUNICATIONS REGULATOR RULES D-STAR ILLEGAL

D-Star and possibly other digital voice protocols are not legal for
hams to use in France. At least not as far as that nations
telecommunications regulator is concerned. Amateur Radio Newsline's
Bill Pasternak, is here with the details:

--

A report on France's digital ham radio website DR@F says that the nations
telecommunications agency, the ARCEP, has said the D-STAR digital audio
protocol specifications could allow ham radio operators to connect their
stations to Internet. As far as that regulatory agency is concerned, that
is a prohibited practice.

The ARCEP also cites alleged concerns regarding cryptography and national
security. It also says that digital voice modes that use proprietary
codecs such as the AMBE vocoder in D-Star, uses patents, licenses and
proprietary undisclosed specifications that are against France's open
standard policy.

It should be noted that France has always exercised strong control on use
of cryptographic methods in all electronic communications. In this case,
it seems to be that the ARCEP views a codec using proprietary standards
such as AMBE as a way of encrypting or disguising the content of ham radio
communication.

But the French ham community counters by saying that the ARCEP is not
respecting the terms the agency's Directive 2009/140/CE art. 1 - paragraph
b. French hams claim this to be about the fundamental right to access to

the Internet by and from final users regardless of the way that access is made.

As a result the website is calling on all European amateur radio societies to help them in what they call a battle to allow all digital voice modes,. Also to permit Internet access, no restrictions on experimentation, and their first step is a big one. They have begun a region wide petition drive to the European Parliament of the European Union. One that asks that august body to direct the French government and its telecommunications regulator to respect the fundamental rights of that nations ham community to communicate using digital technology and Internet linking.

Where this all might lead is anyone's guess. We will keep you posted as we learn more.

For the Amateur Radio Newsline I'm bill Pasternak, WA6ITF, in the newsroom in the City of Angels.

--

More on this situation in electronically translated English can be found at draf.asso.fr (Southgate, DR@F)

**

HAM RADIO IN SPACE: CHANGE IN US TECHNOLOGY EXPORT RESTRICTIONSS COULD HELP THE HAM RADIO SPACE PTROGRAM

A small change in United States technology export restrictions could pave the way for closer cooperation among ham radio space related projects world-wide. The change comes to the area called Effective Export Policies in the latest US National Space Policy released June 28th.

The 2006 Space Policy statement said -- and we quote: "Exports of sensitive or advanced technical data, systems, technologies and components, shall be approved only rarely, on a case-by-case basis." This greatly impeded international collaboration between radio amateurs on ham radio satellites.

But the 2010 version appears slightly less restrictive. It says in part -- and again we quote: "The United States Government will consider the issuance of licenses for space-related exports on a case-by-case basis, pursuant to, and in accordance with, the International Traffic in Arms Regulations, the Export Administration Regulations, and other applicable laws, treaties, and regulations. Consistent with the foregoing space-related items that are determined to be generally available in the global marketplace shall be considered favorably with a view that such exports are usually in the national interests of the United States."

Translated into every day English, this policy change seems to say that technology that is essentially available from sources other than the United States will no longer be treated as secretive and secure. Most if not all ham radio related space hardware and software would likely fall into this

category. However, sensitive or advanced spacecraft-related exports may require a government-to-government agreement or other acceptable arrangement. You can read the full text of the 2010 National Space Policy of the United States of America on line at tinyurl.com/25v9wuv or http://www.whitehouse.gov/sites/default/files/national_space_policy_6-28-10.pdf
(Southgate)

**

RADIO POLITICS: PRESIDENT OBAMA GIVES NOD TO NATIONAL BROADBAND PLAN

President Barrack Obama has proposed almost doubling the spectrum available for current and new wireless devices to connect to the Internet. It's a plan that could eventually impact on all spectrum users., Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

On Monday, June 28th, President Obama signed a memorandum that commits the U.S. to free up 500 megahertz of government and commercial spectrum over the next 10 years. This, to meet demands for mobile access to broadband services.

The president's plan, which requires congressional legislation, would draw on government and commercial airwaves the administration considers to be underutilized. The White house says that revenue from auctioning the freed-up spectrum would help build a nationwide mobile broadband system for public-safety agencies as well.

The Presidents proposals which is based on the FCC's proposed National Broadband Plan calls for deploying the fastest and most extensive wireless networks of any nation by the year 2020, to ensure wider service and spur competition with cable and telephone companies. It also seeks 12 billion to 16 billion dollars in funding to build and operate a totally interoperable telecommunications network for emergency workers.

While wireless carriers and broadband suppliers are pleased with both the FCC and presidential plans, fierce resistance is expected from television station owners. They say that they already gave up significant spectrum in 2009 as part of their switch to digital. Broadcasters claim said they need all of their current band space to offer viewers multiple, simultaneous programs, and to expand into services such as mobile TV. They also back a proposal for congress to authorize a search for all unused or under utilized spectrum.

And here is where ham radio could at least theoretically be impacted. While only speculation at the moment, a full fledged spectrum review could eventually include most if not all ham radio allocations at 222 MHz and above. More realistically its frequencies at 902 MHz and higher that might be most at risk. This is because the shorter wavelengths and smaller physical size of antennas makes them a better choice for wireless broadband and mobile broadcast operations. But moving the current

users of spectrum above 900 MHz would also entail changes in service allocations in the various VHF and UHF bands below 900 MHz as well to give those displaced for broadband a new home.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Hams are not the only ones who might feel the impact of an across the board spectrum survey. If the government uses the amount the number of spectrum users of day to day activity as a basis for which services should retain spectrum and which should not, a lot of low utilization services could find themselves in a fight for survival. (Adapted from various published news stories)

RADIO LAW: DELAWARE REPRESENTATIVE SPONSORS LAW TO EXCLUDE TWO WAY RADIOI FROM STATES CELLPHONE BAN

A bill being filed in the Delaware State House of Representatives aims to allow the continued use of amateur, CB and other two-way radios by motorists. Amateur Radio Newsline's Frank Haas, KB4T, reports:

--

Introduced by State Representatives Ruth Briggs King who is the prime sponsor and Representative Dave Wilson, the bill is a reaction to a pending law that will have the unintended consequence of outlawing the use of two way radios along with cellular phone and texting devices by Delaware drivers in early 2011.

Having cleared the General Assembly, but not yet been signed into law by the governor, House Substitute 1 for House Bill 229 would prohibit Delaware motorists from using hand-held cell phones to hold conversations or send text messages. The pending statute would also bar the use of hand-held devices to access e-mail or browse the Internet while operating a motor vehicle.

Representative King says that the issue that was never fully explored during the debate on this measure. As such it will also inadvertently make it illegal to use two-way radios that are used to coordinate the operation of hundreds, if not thousands, of service and delivery trucks throughout the state.

Representative King, who also tried to amend the original bill to exempt amateur radio operators, said the new bill will also accomplish that goal. This by carving out an exemption for two-way radios with a fixed placement in the vehicle. She and Representative Wilson are hoping to garner full bi-partisan support for the corrective measure.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, reporting.

--

Governor Markell has said he plans to sign into law the bill banning the use of hand-held cell phones by motorists. King says that she is hoping that her bill will be signed into law at the same signing ceremony. (eHam, other published reports)

**

RADIO AID: L.A. REPEATER GROUP GIVES HOMELESS USERS FOOD AND SHELTER

Ham radio has come to the aid of two men who recently lost their home. According to Chris Baldwin, KF6AJM of Southern California's Desert Communications Network, Robert Martin, KE6YDO and Richard Martin, KE6RJI are brothers that lived in the City of Maywood until just recently. That's when their deceased mother's home was sold at probate and leaving them without a roof over their heads.

Baldwin says that both brothers are unemployed and have only one running vehicle between the two of them. They also had nowhere to go, with one of the few things in their lives being their friends on the Los Angeles area 435 repeater.

Hearing that the brothers were in dire straits, system owner Gary Elmer, K6GE, let the system users know that the Martin brothers were in need of help. Using PayPal, donations were submitted to the 435 Repeater Fund on the repeaters web page. In a matter of three hours $1014 was raised. Not only did donations come from those in the repeaters coverage area but also from across the region and the nation from those listening via a live audio feed on the internet.

The monies collected were to be given to the brothers in the form of gift cards for food. A motel room for them will be paid for directly by the repeater group.

According to Chris Baldwin, KF6AJM: "The powers that be on the repeater supervising this are in regular communications with them. Things are being taken care of and we can definitely tell that they were grateful for the help, and like we say: 'they would do it for us." So we are glad to help where we can."

Hopefully, KE6YDO and KE6RJI will soon have their share of the proceeds from the sale of the property in Maywood. Latest word is that it should be out of probate in about 5 weeks. In the meantime, hams who know them, and many who do not, are making certain that they have a roof over their head and food to eat.

And for those who are wondering: Yes this is the same 435 repeater that long ago gained world wide notoriety for its rather liberal form of operation. What many are not aware of is that since its earliest days the repeater and its user base have dedicated themselves to many charitable and community activities. This includes the first time ham radio went into hospitals at Christmas time to bring kids stuck there for the holidays a bit of season cheer. That was the original Operation Santa Claus that dates back in the early 1970's. (KF6AJM)

**

ENFORCEMENT: FCC ISSUES WARNING NOTICE FOR SAN FRAN UNLICENSED STATION

The FCC's San Francisco office has issued Notice of Unlicensed Operation the FCC has Phillip N. Reiker of Watsonville, California. This, regarding an unlicensed broadcast station operating from property that he owns in the city of Santa Cruz.

According to the June 3rd notice, the San Francisco FCC Office had received information that an unlicensed broadcast radio station on 101.1 MHz was allegedly operating in Santa Cruz. This past March 19th agents from this office confirmed that radio signal was coming from property that public records show Reiker as owning.

Reiker was told that he must immediately cease operation of the unlicensed transmitter. He was also given ten days to explain his activities to the FCC. That date has now past. (FCC)

**

RADIO RULES: 700 MHz BAND NOW OFF LIMITS TO WIRELESS MICS

The FCC has issued an Enforcement Advisory stating that as of June 12th that wireless microphones and similar devices are now prohibited from operation between 698 to 806 MHz. These devices include wireless intercoms, wireless in-ear monitors, wireless audio instrument links, and wireless cueing equipment.

By way of background, when some models of wireless microphones were originally designed, the frequencies they used were located between the frequencies utilized by television stations to broadcast programs. With the completion of the Digital TV transition on June 12, 2009, television stations no longer use the frequencies in the band in and adjacent to 700 MHz. These frequencies are now being used by commercial providers of wireless broadband and by public safety entities such as police, fire, and emergency response services. More is on line at tinyurl.com/2ez4rxb (FCC)

**

RADIO LAW: UK REGULATOR TURNS TVI INVESTIGATIONS TO THE BBC

United Kingdom Telecommunications regulator Ofcom is transferring responsibility for investigating radio and television interference complaints to the British Broadcasting Company.

As of June 30th all outstanding cases with Ofcom will be passed to the BBC for action from that date. On and after July 1st all UK residents will be required to file complaints to the BBC.

If, following the investigation by the BBC, there is evidence of interference caused by something outside the publics control and which is unlawful, the BBC may refer your case back to Ofcom for possible enforcement action. More on this is on-line at tinyurl.com/2adwckj. (Southgate)

**

HAM RADIO ON THE WEB: NCDXF INTRODUCES REDESIGNED WEBSITE

A newly re-designed website has been introduced by the Northern California DX Foundation. The redesigned cyberspace home of the NCDXF is intended to enable those interested to follow past and future DXpeditions that NCDXF has sponsored. There are resources on the worldwide Beacon system, an online store for NCDXF supplies, information about the foundations scholarship program, a video library and other information means. You can see the new offering on line at www.ncdxf.org (W&#65533;GJ)

**

RADIO ON THE WEB: NEW RADIO ASTRONOMY GROUP WEBSITE OPENED

The British Astronomical Association Radio Astronomy Group new website is now live. The aim of these web-pages is to show that there are aspects of radio astronomy that can be observed using relatively simple equipment. Also, that observations of scientific merit can be achieved by modest observatories that can be accommodated in an average-sized back garden. The website carries a short URL and is in cyberspace at www.britastro.org/radio, (BAA Radio Astronomy Group)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WITH NEWSLINE: WHAT IS TINY URL

Have you noticed a slight change here on Newsline? In case you have not noticed, about a month ago we began giving web addresses using a shorthand called Tiny URL. But what is Tiny URL you ask? Well it's a method of taking a very large and complex web address and making it really -- well -- tiny.

Tiny URL is a free web based service located in cyberspace at www dot tinyurl dot com. All you need do is cut and past in a long URL, click the box marked "Make Tiny URL" and the program that runs the website will created the shorthand version and display it on a new page.

By way of example. I was just reading a story about the FCC's ban on 700 MHz wireless mics and other devices. Its actually found in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-1053A1.pdf. Talk about a mouth full. But by plugging that in at TinyURL.com the result is http://tinyurl.com/2ez4rxb. Since all modern web browsers automatically insert the http:// all we need to give you is tinyurl.com/2ez4rxb to get to the website.

Anyhow, if your clubs website suffers from one of those longer than long Internet addresses because you are the guest on someone else's server, you might want to try shortening it using TinyURL.com. After all, it's the shortest URL's like ARRL.org, ARNewsline.org or even tinyurl.com that are the easiest to remember.

And less we forget: Our thanks to Bob Gonsett, W6VR, over at the C-G-C Communicator newsletter for putting us onto TinyURL.com. Its made things a lot easier for those of us who anchor these reports to give you a web address that short and easy to jot down. (ARNewsline, CGC)

**

WORLDBEAT: IARU REGION 1 NEWSLETTER 63 AVAILABLE

IARU-R1 High Frequency Committee Newsletter Number 63 is now available for free download. Among the subjects covered are Internet Gateways & remote Linking for H-F Operation, vandalism on our High Frequency Bands, the 40 meter band situation, the and of coarse WRC-12.

IARU Region 1 is the federation of national ham radio associations from Europe, Africa, Middle East and Northern Asia. The newsletter can be downloaded in PDF format at tinyurl.com/285wryy

(IARU Region 1)

**

HAM RADIO IN SPACE: GENERAL CONTACTS FROM THE ISS IS AN ON-ORBIT DECISION

Charlie Sufana, AJ9N, says that its up to the ham radio operators on board the International Space Station to decide if they do or do not want to make general ham radio contacts or just chat with kids in schools.

In a posting to the SAREX remailer, Sufana, who is one of the ARISS Mentors, notes that lately there have been some comments on the various Internet bulletin boards about having general contacts or leaving the packet or crossband repeater on. In response to those hams critical of the lack of time that the licensed astronauts and cosmonauts are devoting to contacts with the general ham public, Sufana says that as with anything in society, the International Space Station crew have many different interests and a very heavy work load. He notes that some have been ham radio

operators for many years before going on-orbit and may want to make a random contacts. Others have had next to no experience with the hobby and get on only sporadically. And notes Sufana, there have been quite a few who have gotten their license shortly before going up to the I-S-S and often times they only get on for the scheduled school contacts. And notes AJ9N, if they had not gotten their licenses then even the school contact list would have suffered because on some expeditions there would be no hams scheduled to fly.

Sufana says that after every school contact, the crew is told how to configure the radio. If the crew does not set up the radios for general usage, then there is not much ARISS can do about it other than to remind them. He also advises all of us that that ARISS is a guest onboard the International Space Station and if the crew elects to not turn something on or to operate, then that is their decision. AJ9N says that ARISS can only suggest; it can never demand. (ARNewsline(tm) from SAREX Remailer)

**

DX

In DX, RV3ACA will be active from Jersey Island as GJ2A during the RSGB Islands on the Air Contest on July 24th and 25th. as a Single-Operator SSB or Mixed Mode entry. She will be active outside of the contest between July 21st and the 26th. QSL via RV3ACA.

YU1YV is active portable 4 Zero from Montenegro, possibly as 4O3A. He likes 75 and 80, but will be active mostly on 6, 10, 15 and 20 meters. He will also be in the IARU HF Contest July 10th and 11th as a Single-Op/All-Band entry. QSL as directed on the air

I1FQH will be operational as 5V7DX from Kpalime Village in central Togo between July 15th and the 30th. His activity will be on 20 through 10 meters using a Spiderbeam and on 40 and 30 meters using a homebrew vertical. QSL via Logbook of the World, via his home callsign direct with a self addressed stamped envelope or by the bureau. He plans to put pictures and video of his operation on YouTube once he arrives home.

Lastly down the log a bit plan for S79K to be active from Mahe in the Seychelles during the CQ World Wide DX SSB Contest on October 30th and 31st. QSL via G3NKC.

(Above from various DX news sources)

**

THAT FINAL ITEM: A VERY PLEASANT FIELD DAY 2010

If there's one word we had to choose to describe Field Day 2010, that word might be pleasant. And while the underlying spirit of contesting was still there, it seemed like everyone taking part was enjoying the moment:

--

Actual Field Day Audio from Chicago

--

That's how Field Day sounded in the hamshack and studio of Hap Holly, KC9RP
in the Chicago suburb of Des Planes, Illinois. 1900 miles to the West, the fun of Field Day was just as prevalent:

--

Actual Field Day Audio from Los Angeles

--

And for those who were smart enough to include a 6 meter station, we can only say that the propagation gods seemed to be shining on that band. That's because one of the truly rarest states on that band is Wyoming and the operators at WY7U seemed to have a Field Day pipeline to the west coast:

--

Actual Audio of WY7U working N6RW

--

In all, Field Day 2010 sounded like everyone taking part was enjoying the moment and the contacts on the pleasant moments that they spent on the air. And we can't think of a nicer way to end this weeks newscast.

(ARNewsline(tm) with some audio supplied by KC9RP)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Fred Vobbe, W8HDU, saying 73 from Lima, Ohio, and we thank you for listening.

GB2RS NEWS

Sunday 4th July 2010

The news headlines

Ofcom transfers broadcast interference complaints to BBC

French amateurs gain access to 7.1 to 7.2MHz

Armed Forces weekend at Bletchley Park

Ofcom has announced that the first-line responsibility for handling issues of interference to broadcast TV and radio reception has transferred to the BBC. Responsibility for interference to other radio services, including the amateur services, appears to remain with Ofcom, although the RSGB is seeking clarification on a couple of points relating to this. We will provide more information when available. More information is available on the Ofcom website, www.ofcom.org.uk/complain/inter/.

F5VGJ and F5VMR report that with effect from 1 July, French amateurs are authorised to operate in the 7.1 to 7.2MHz segment of the 40m band. This was published in the Journal Officiel by the French authorities on 30 June. Travellers to France are recommended to take a look at the band plans on the REF Union web site at www.ref-union.org for information. They should also review D cision n 2010-0537 by following the link from the REF web site to the ANFR web site.

Today, Sunday 4 July, Bletchley Park is celebrating the role of the armed forces throughout history and in particular the role of the cadet forces. This is the Armed Forces weekend which is a family event, and Bletchley Park is open to the public today from 10am. In addition to the activities reported in our news item last Sunday, it has also been agreed that GB2RS news readings will take place at 1300 local time on 3650kHz LSB and 145.525MHz FM. A further reading will be put out at 1430 on 7150kHz LSB. The news readers will establish a news net 15-30 minutes before each transmission and will take calls after the bulletins using the RSGB HQ callsign GB3RS. In charge of the operation will be Alison, G8ROG and Jim, G0EJQ representing the RSGB's London and Thames Valley Region 9. Anyone interested in the activities is urged to pay a visit; the RSGB will be located in B Block. The event is open until about 5pm and further details can be found at www.bletchleypark.org.uk.

en they become available.

Chelmsford Amateur Radio Society is now taking bookings for their forthcoming Foundation evening course that runs for 6 weeks from 2 September. The cost is ?45, which includes room hire, the RSGB Exam Fee and the Foundation Now! manual. The course is always popular so to ensure a place contact Clive G1EUC on 01245 224577 or by email to training2010@g0mwt.org.uk.

And now for the details of rallies and events for the coming week

The Barford Norfolk Radio Rally takes place today, 4 July. This radio rally has both indoor tables and outdoor pitches and as well as being a traditional meeting place for many local as well as DX amateurs. Entry is just ?1 per person and outdoor pitches are under ?10, so together with hot and cold refreshments this is a good and affordable day out for the family. Gates open 8am for traders and 9am for visitors. Contact David, G7URP on 01953 457322 for more information.

On Thursday 8 July the Wakefield & District Radio Society is holding a table-top surplus equipment sale. Lee Marsh of LAM Communications will be in attendance and has kindly agreed to donate raffle prizes. Details from the Chairman, Ken Quinn, 2E0SSQ on 07900 563117 or by email to 2e0ssq@wdrs.org.uk.

The South Yorkshire Microwave Round Table will take place on 10 and 11 July. Organised by the UK Microwave Group and the Finningley Amateur Radio Society, the event will be held at the HQ of the Finningley ARS near Doncaster, South Yorkshire. Registration facilities and more information is online at www.g0ghk.co.uk, just follow the links on the left side of the homepage. Prior registration is essential and numbers will be limited for the various workshops and lectures.

On 11 July, the 47th Cornish Radio Amateurs Club mobile rally takes place at Penair School, Truro, Cornwall, TR1 1TN. There will be trade stands, a bring & buy as well as catering facilities. Doors open at 10.30am and admission is ?2. Details from Ken, G0FIC, on 01209 821073.

Now for the news of special events

Today, 4 July, GB4BLC will be operated by members of the Coventry Amateur Radio Society. This is a joint venture between Coventry Amateur Radio Society & Bedworth lions Club, operating from 30th Signals Regiment Gamecock Barracks, Bramcote near Nuneaton. The station is promoting amateur radio & Lions Club International to the public.

Special event station GB4FFR for Flight path Friendship Reconciliation will be on the air from the ex-RAF station at Elvington, the Yorkshire Air Museum, YO41 4AU, on 10 and 11 July from 9am. The event celebrates reconciliation between Doncaster Air Gunners Association with the German Night Fighters association. Operation will be mainly CW with some SSB, mostly on 80m using vintage equipment including R1154/T1155 and vintage spy sets including 1W suitcase radios crystalled on 3.577MHz. Contact Bernard Atkinson, G0SWO on 01482 351 907.

Dorking and District Radio Society will be operating from the summit of Leith Hill, near Dorking, which is 935 feet above sea level. Using the callsign G7DOR, they will be on air on Friday 9 July from 0900 to 1200UTC using 144.775MHz, 3.772MHz and 50.230MHz. The club welcomes QSOs and skeds may be made by email to windflowersuk@hotmail.com.

And now the HF DX news compiled from 425 DX News and other sources.

S79BWW is travelling back to the Seychelles between 17 and 31 July. This will be the first official WFF World Flora Fauna DXpedition at Seychelles WFF004. More details at www.ct1bww.com/s79bww.

Andrew, G7COD is now in Angola and will be there for the next 12 months on a work assignment. He will be operational nearly every day signing D2AK, on 80 through 10, SSB and CW. Check his D2AK website for the latest information

A US group will be active from the Bahamas using their individual C6 callsigns from 9 to 25 July, with three stations active on all bands and modes.

JA2NQG, JH2BNL and JI2UAY will be on from Wallis Island, which is IOTA reference OC-054, from 14 to 24 July. The team members have requested FW5M, TO2BNL and FW5FM respectively. QSL via the operators' home calls. They will also operate from Fiji on 13 and 14 July while en route.

Now the contest news

The RSGB VHF NFD finishes at 1400UTC today, 4 July. Using all modes on the bands, 6m, 4m, 2m, 70cm and 23cm, the exchange is signal report, serial number and locator. There are rules on which bands can be used at certain times, so please check the rules before taking part.

July is the final month of the 80m Club Championship Contest for this year. The CW leg is on the 5th between 1900 and 2030UTC. The exchange is signal report and serial number.

The following day, 6 July, sees the 144MHz UK Activity Contest take place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

In July every year the IARU HF Championship takes place. This year it is from 1200UTC on 10 July to 1200UTC on 11 July. It is a worldwide contest in which thousands of individuals take part, but there is also a section for HQ teams, that is, teams operating under the auspices of national societies. As an individual entrant, if you work the UK HQ team on a number of bands and modes you can qualify for a certificate. About 60 of Britain's top contesters will be devoting themselves to the HQ station this year, in a bid to win the coveted HQ section of the contest. Britain and has never yet been placed first, coming in at 5th place last year. As in previous years the UK HQ station will be spread right across Britain, with a total of twelve individual stations, although some stations share sites. Each station will be dedicated to a single mode and a single band; SSB and CW on each of the HF contesting bands from

160m to 10m. All the individual stations will be Internet linked, so every station will be able to tell exactly what frequency all the others are on, who they are working, etc. Each station will be located at the QTH of a top-flight club or individual and each station will have its own dedicated team of operators. The antennas for each station will be large, high, and selectable. There will be beams for every mode and every band as well as linear amps. The HQ team ask that amateurs try and work as many HQ stations on as many bands as possible, all you'll need to give is a signal report and your IARU Zone, which is 27 for Britain.

Now the solar factual data for the period from the 21st to the 27th of June, compiled by Neil Clarke, G0CAS on the 28th of June.

The latest smoothed sunspot numbers for September, October and November 2009 are now available and are 6.1 7.0 and 7.6 respectively.

The solar disc had spots every day except for the 25th and the 26th. The groups visible were small and stable and produced no solar flares. Solar flux levels increased slightly from 72 units on the 21st to 75 by the 25th and the 26th. The average was 74 units. The 90 day solar flux average on the 27th was the same level as last week at 75 units. X-ray flux levels showed little variation day to day and averaged A4.8 units. Geomagnetic activity started at quiet levels but on the 26th a coronal hole disturbance arrived and lasted through to the 27th with an Ap index of 15 and 13 units respectively. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 300 kilometres per second on the 24th to 570 by the 27th. Particle densities were low but increased to around 50 particles per cubic centimetre on the 25th. Bz varied between minus 3 and plus 1 nanoTeslas on the quiet days and between minus 10 and plus 8 nanoTeslas on the most disturbed day which was the 26th.

HF propagation was up to predicted levels and Sporadic-E continued daily on frequencies up to 70MHz, with some particularly good openings to the eastern Mediterranean.

And now the solar forecast. This week the slightly more active side of the Sun is expected to be looking our way. Saying that, solar activity is expected to remain at very low levels. Solar flux levels should be in the high 70's for most of the week. Geomagnetic activity is expected to be quiet every day. MUFs during daylight hours at equal latitudes should be around 18MHz for the south and 15MHz for the north. Darkness hour lows are expected to be about 11MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of about 26MHz. The optimum working frequency with a 90 per cent success rate will be around 21MHz. The best time to try this path will be between 0900 and 1500 hours. Sporadic-E is expected to still take place with openings on 144MHz during the larger more intense openings.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Sunday 4 July Kettering & District Amateur Radio Society is having an open meeting at 11am followed by a social meeting. Details on the web at http://kdars.co.uk.

On Monday 5 July Gloucester Amateur Radio & Electronics Society is having an operating and workshop evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 5 July South Birmingham Radio Society is having a shack clear out and painting session. Contact Don, on 0121 458 1603.

On Monday 5 July Wythall Radio Club is holding an Intermediate exam. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 6 July Derby & District Amateur Radio Society has a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 6 July Friskney and East Lincolnshire Communications Club is having a talk on kites and radar by G7AJP. Contact Chris, M0MFP, on 01507 442240.

On Tuesday 6 July Kettering & District Amateur Radio Society is having an operating night 7 - 9pm. Details on the web at http://kdars.co.uk.

On Tuesday 6 July Loughborough & District Amateur Radio Club is having a radio ramble to Start point. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 6 July Spalding & District Amateur Radio Society is taking part in the 144MHz UKAC from the Portakabin. For more information contact Graham Boor, G8NWC, on 07947 76448.

On Tuesday 6 July Wythall Radio Club is taking part in the 2m UKAC contest. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 7 July Bolsover Amateur Radio Society is having a natter night. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 7 July Hinckley Amateur Radio Society has an antenna workshop. Details from John, M0JAV, on 07836 731544.

On Wednesday 7 July Kettering & District Amateur Radio Society is having a gentleman's group afternoon. Details on the web at http://kdars.co.uk.

On Wednesday 7 July Lincoln Short-Wave Club is having a contest debrief. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 7 July Midland Amateur Radio Society is having a rag chew and training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 7 July South Birmingham Radio Society has a lecture in the main hall. Contact Don, on 0121 458 1603.

On Wednesday 7 July Telford & District Amateur Radio Society is having an open house with HF on the air and a committee meeting at LWVH. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 8 July Kettering & District Amateur Radio Society has a training night. Details on the web at http://kdars.co.uk.

On Thursday 8 July RAF Waddington Amateur Radio Club has a talk on Antennas by Bob Pickles, G3VCA, including different ways of making them, plus his insights into line stretchers. Details from Judy Rowlands, on 07544 456422.

On Friday 9 July Coventry Amateur Radio Society is taking part in Bunkers on the Air from Meriden, Haseley Knob & Church Lawford. Contact John, G8SEQ, on 07958 777363.

On Friday 9 July South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 10 July Lincoln Short-Wave Club is running a special event station using G5FZ/P from Boultham Summer Fair. For more information contact Pam Rose, G4STO, on 01427 788356.

On Sunday 11 July Kettering & District Amateur Radio Society is having a social meet from 10am. Details on the web at http://kdars.co.uk.

NEWS FOR THE NORTH OF ENGLAND

On Sunday 4 July Wakefield & District Radio Society is on the air operating GB0WSD from the new Wakefield Scout District Camp. Contact Ken, 2E0SSQ, on 07900 563117.

On Monday 5 July Angel of the North Amateur Radio Club invites all to come along and take to the air. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 5 July Hornsea Amateur Radio Club is taking part in the 80m CC CW home stations. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Monday 5 July Scarborough Amateur Radio Society is having a talk on the PJ9W 1990 CQWW SSB contest. Contact Jerry Scarr, G6LBL, on 01751 476601.

On Monday 5 July Sheffield Amateur Radio Club is having a social night and taking part in the RSGB 80m Club Contest. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

SARL NEWS - SUNDAY 4 JULY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

RADIO ZS IN THE MAIL

ANALOGUE VS ANALOGUE AND DIGITAL VERSUS DIGITAL

SUBSCRIPTIONS FOR 2010/2011 ARE NOW PAYABLE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

RADIO ZS IN THE MAIL

The May - June edition of Radio ZS was posted earlier this week. It is also available on the SARL WEB on the member's pages.

In this edition you can read about Amateur Radio the most versatile hobby in the world, IARU Region 1 President writes about "The future of Amateur Radio is with our youth", Kevin McDonald writes about "A ZS6KMD QRP Z-Match Antenna Matcher". "IdiomPress Rotator Interface - A novice's experience", is a good read from Marinus Willemstijn, ZS6MAW, also read about the Trust's innovation competition. A must read is "An unusual voyage into the world of CW", by Vidi La Grange, ZS1EL. Also in this edition "How I met Sofia!", a 1:1 balun for the lower bands by Frank van Wensveen, ZS6TMV / PA3GMP, and Komkar updated! Then there are the regulars on satellites and museums. Another Radio ZS that is not to be missed.

If you are not yet a member of the SARL and would like a sample copy in your inbox, send a request to armi@sarl.org.za with the "Radio ZS" in the subject line. Better still join now and you will get a copy six

times a year.

ANALOGUE VS ANALOGUE AND DIGITAL VERSUS DIGITAL

A number of important changes to VHF/UHF contest were agreed at the Indaba held on Saturday 26 June but not without surprises! While 3 persons had confirmed their attendance, 11 turned up to discuss the rules for the VHF/UHF contest that were published on the web for comment.

Present at the meeting:- ZS5Y - Derek Gravett ZS6GRL - Geoff Levey ZS6MHH - Tienie Herbst ZS6CBQ - Carl Minne ZS6UK - Richard Peer ZS6YOT - Jess Hawes ZS6YE - Heather Holland ZS6AVP - Clive Bean ZR6LHT - Lynette Human ZS6RH - Craig Symington ZS6PJH - Pierre Holtzhausen

Geoff Levy, SARL Contest Manager reports that the Indaba started off by going through the draft document that was published on the website. There was some lively discussion about a number of the points but the most hotly contested issue was whether the modes (analogue & digital) should be split and held on different weekends.

After Derek Gravett, ZS5Y, explained that there would in fact be different contests, it was decided to keep the modes together i.e. analogue vs. analogue, digital vs. digital. A station can decide to enter using analogue, digital or both modes, but separate logs would have to be submitted for each mode.

Another important discussion was around the dates of the contest. It was agreed to bring the September leg of the contest forward to the first week of September, instead of the 3rd week, due to the severity of the storms experienced in division 6.

Derek is currently compiling the new rules which should be available for scrutiny later this week.

The Indaba ended at around 17:00 when, during Derek's' demonstration on EME, Eskom decided enough was enough and switched the lights off.

The winner of the draw for an ARRL Antenna book was by Lynette ZR6LHT. Congratulations, your book will be mailed during the next two weeks.

The SARL Council would like to thank Geoff, Derek and all participants in the Indaba for their dedication and the positive outcome.

SUBSCRIPTIONS FOR 2010/2011 ARE NOW PAYABLE

Subscriptions for the 2010/2011 membership became due on 1 July 2010. Accounts were mailed during June and are now payable. Thank you to the 600 members who have already paid their 2010/2011 subscriptions, your promptness and support is much appreciated.

If you have mislaid your invoice please check the amount due for your membership grade on www.sarl.org.za or call Mariska on 011 675 2393. Please remember to identify your payment with your first name and

surname or callsign. Annually the SARL receives money in the bank account with no reference which then makes it impossible to allocate the payment to the correct person.

NEW CHAIRMAN FOR ICASA

The Minister of Communications has appointed Dr Stephen Mncube as the new chairman of the Independent Communications Authority of SA (ICASA) with immediate effect. Mncube succeeds Paris Mashile in the top position and will serve a five-year term to 2015.

Dr Mncube held the positions of chairman of the National Information Technology Forum, chairman of Sentech and as the manager of the Development Information Business Unit at the Development Bank of Southern Africa. He also holds a doctorate in philosophy, a master's degree in social science and a degree in science, which he obtained from the University of Syracuse, in the USA.

Parliament also agreed on three other new councillors. They are William Currie, who is with the Association of Progressive Communications; Joseph Lebooa, a business liaison manager with MTN; and Ntombela Ndhlovu, a legal advisor with MTN. The new councillors will occupy council seats left open by Kobus van Rooyen, Robert Nkuna and Brenda Ntombela.

RTA IN CAPE TOWN 24 JULY 2010

Have you had a look at the programme now available on the web? It is a symposium not to be missed. John Willescroft, ZS6EF, will take the lid of the mystery of digital signal processing and show you how it can change your on the air receive audio experience manifold. A DSP construction kit is also on offer at the RTA. With so much publicity around the Square Kilometre Array project, Adrian Tiplady of the SKA Project Office will bring us up to date with fascinating new information on how they will deal with radio frequency interference as well as details on progress and the new technologies emerging as a result of the project.

Learn about the latest CubeSat being built by students at the Cape Peninsula University of Technology. You will also have the opportunity to visit the satellite laboratory and clean room.

Make sure 24 July is in your diary. The full programme is available on www.sarl.org.za, click on rta or send an email to rta@sarl.org.za with RTA Cape Town in the subject line, and a PDF version of the programme will be mailed to you.

CONTEST NEWS

SARL Winter QRP Sprint

There are going to be 4 QRP contests a year from 2011. To get the timing right we are starting with a winter QRP Contest on the 17th July 2010. The times are from 12:00-15:00 UTC (14:00 - 17:00 CAT).

The rules have been posted on the forum, but if anyone would like to receive a copy please email Geoff Levey to glevey@gmail.com.

The Spring QRP contest has been moved from the 12 September 2010 to the 23rd October 2010.

The results for the recent ZS4 40 m Sprint held on 23rd May 2010 have been announced. Congratulations to all who persevered through the challenging band conditions. Twelve logs were received electronically. First place goes to Jan, ZS4JAN. Certificates are being prepared and will be mailed shortly. Queries may be directed to Riaan ZS4PR@QSL.NET. The calculated points for the competitors are as follows:

ZS4JAN 115 ZS1CF 73 ZS2A 69 ZS1CC 51 ZS2EC 37 ZR1AAH 35 ZS6QDW 31 ZS2J 29 ZS6BB 26 ZS4BFN 24 ZS4MP 16 ZS6AKU 13

CLUB NEWS

The West Rand ARC held its AGM on Saturday 19th June 2010.

The elected committee is as follows: Chairman - Philip van Tonder, ZS6PVT Vice Chairman - Geoff Levey, ZS6GRL Secretary - Rory Crouch, ZR6RBJ Treasurer - Craig Woods, ZS6CRW PIO - Willem Weideman, ZS6WWJ Members - John Brock

- Romeo Nardini, ZS6ARQ

- Ron Eva, ZR6RON.

The outgoing committee was thanked for their dedication to the club.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Currently Sunspot 1 084 has a simple magnetic field that does not harbor energy for strong solar flares. The effective sunspot number is expected to be less than 10 for the coming week.

20 m will provide the best opportunities for DX followed by 40 m. Conditions to India will be good from the afternoon till sunset. During sunrise and sunset it will be good towards Europe. Contacts with the USA are still challenging. Contacts with Australia and New Zealand are possible on 40 m after sunset. Contacts with Brazil and South America are challenging.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Local conditions are going to be good during the day time on 40 m. With the change of season 30 m has taken over from 20 m for contacts over the longer distances during the middle of the day. With the decrease in noise levels 80 m is best for the shorter distances and also during the early mornings and late afternoons.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

10/11 July - IARU HF Championships and WRTC; 15 July - Last date to submit mane for CubeSat project; 17 July - Winter QRP Contest 14:00 to 17:00 CAT; 18 July - Intechnet at 19:30 on VHF-/UHF- and microwave matters; 23 - 24 July - Preparation and launch of the HABEX balloon project; 24 July - RTA symposium in Cape Town; 2 August - Closing date for PIC course in Pretoria on 14 August;

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO.For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav,ZS6BWN, and edited by George, ZS6NE.

Thank you for listening, 73.

/EX

Debby Says...

Amateur Radio Calendars

At Conference Peter Loveridge ZL1UKG was advertising an amateur radio Calendar, details of which are below if you would like to order one.

The calendar covers July 2010 to June 2011 so it ties in with Conferences.

The date information includes public holidays for NZ and Provinces plus contests on both HF and VHF that are managed from New Zealand. The photographs are chosen from activities associated with the hobby and in this year include history (Musick Memorial radio station), AREC (Rally of NZ), Telegraph and SPAM equipment, VHF Contest, a "shack" and equipment, Kiwi Sat, a Working Bee at the Klondyke repeater site.

The cost is $13 per copy. Postage is $1.50 for up to 4 copies in a C4 envelope. Inquiries may be addressed to the Auckland VHF Group or to Peter Loveridge, 5 Mostyn Street, Kingsland, Auckland 1021, email peterlov@ihug.co.nz

Payment may be by cheque or Internet Transfer to 12-3019-0781605-00. Payment is required before the order is posted out.

Please do not send any order requests to NZART headquarters.

Nelson Branch

Members from Nelson Branch have arranged to keep a daily sked for a special expedition of six young sea cadets sailing to Noumea starting from Saturday 3rd July. For more details see the following web site:

http://www.stuff.co.nz/nelson-mail/news/3865181/Cadets-sail-to-Noumea/

You are invited to monitor this activity at the sked times (and also 147.025 for talkback to Nelson Branch Members operating)

Full details of frequency and times can be found at:

http://www.nzart.org.nz/pdf/2010/VE0CCM-Schedule.pdf

SMART Applications for a Certificate of Competency

I may have mentioned, but it is timely to do so again. As at 1 October 2010,it will be mandatory for any new Certificate of Competency and call sign application to include a passport photo. A witness must authenticate this photo before being submitted with the Radio 4A Application.

Talk soon...Debby ZL2TDM

Answers to "A 1928 Description of Amateur Station 1AS"

Hi Jamie:

Yes, the "felix" was a play on words for "helix" which was the coil in the transmitter.

While nowadays we think of "helix" as the generic form of an inductance for hf work, in those days a flat spiral or "pancake" coil was also widely used.

Oil in the rectifiers. Presume this station used "slop jar" rectifiers to convert ac from the power transformer secondary to something like dc. The slop jars were electrolytic, made use of the principle that certain electrolytes with electrodes of different metals suspended in them conducted better in one direction than another. These devices were connected in series to handle the voltages involved. Oil was floated on top of the electrolyte to stop it from evaporating under natural conditions or the considerable warmth generated by the passage of the current through them when in use.

Most electrolytes were highly corrosive, hence not popular with her indoors as they sputtered at times and burned holes in carpets, wallpaper or pet animals.

"Troubled Hartley". The typical Hartley power oscillator had a parallel tuned circuit between plate and grid of a valve, with a tapping point at rf ground somewhere along the coil, typically about 1/3 way up from the grid connection.

There were numerous techniques used to couple the power from the oscillator to the antenna. Could include tapping the antenna directly on to the coil, or various capacitive or inductive methods. So the final result could well be a "troubled" Hartley.

Although these transmitters were very simple, in fact there were many variables and it usually required a great deal of nous and experiment to get one to work well.

Notwithstanding, the globe was circled with just such technology.

73 es gl

Barry ZL1DD

Ps ZL2JJ has a replica 1929 TPTG single valve tx which he has used with success on 80m, even showing up well in the Sangster Shield. First time I ever worked Peter he was using this rig. Lovely bell like note, frequency shifting slightly and ever so slowly as his antenna swung in the breeze. Interested persons might drop him a line, could get a demonstration.

B

Thank you Barry
The whole machine sounded mighty primitive to me and your description confirms it.
Jamie ZL2NN ED

****

ZL1CLUB HF Node

Do you not have the space for a 160 m dipole?

Do you have difficulty hearing on some HF bands due to high QRM?

Do you do not have a tri band beam antenna but would like to use one?

Have you moved to a new QTH and are not able to put up HF equipment?

Do you travel a lot and want to be able to access HF to make contact with your Ham friends?

If you can answer yes to any of the above questions then we may have the answer to help.

Why not try the ZL1CLUB HF node at the Papakura Radio Club, go to:
http://www.qsl.net/zl1club/
and learn all about how you can have access to the ZL1CLUB Link, a shared HF station to help you keep in contact with your ham friends.

"ZL1CLUB" by the number One Club helping Amateur Radio operators stay on the air

FMTAG NOTES FOR JULY 2010

PROPOSALS

Branch 11 Gisborne has applied for a 2 metre APRS Digipeater at Whakapunake, Topo50 map reference BH42 992.89 915.63. An engineering evaluation confirms that there will be no interference to other stations and that the transmit and receive frequency will be 144.575 MHz.

Branch 30 Otago has applied for a 70 cm repeater at Rudd Road, Topo50 map reference CE17 032.61 204.29. We have selected a repeater transmit frequency of 439.150 MHz. The associated repeater receive frequency will be 434.150 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 81 Waikato VHF has applied to relocate a simplex linking transceiver from Te Aroha to Te Uku, Topo50 map reference BD32 733.36 067.57. An engineering evaluation confirms that there will be no interference to other stations and that the transmit and receive frequency can remain on 430.2125 MHz.

Branch 81 Waikato VHF has applied for a simplex linking transceiver at Te Uku, Topo50 map reference BD32 733.36 067.57. FMTAG has chosen a transmit and receive frequency of 439.350 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 81 Waikato VHF has applied for a simplex linking transceiver at Te Weraiti, Topo50 map reference BD36 558.18 103.12. FMTAG has chosen a transmit and receive frequency of 439.350 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 81 Waikato VHF has applied to relocate its 2 metre repeater from Te Aroha to Te Weraiti, Topo50 map reference BD36 558.18 103.12. An engineering evaluation confirms that there will be no interference to other stations and that the repeater transmit frequency can remain on 146.950 MHz. The associated repeater receive frequency will be 146.350 MHz.

Branch 88 Tauranga Emergency Communications has applied for a 2 metre repeater at TECT All Terrain Park, Topo50 map reference BE36 749.37 969.25. FMTAG has chosen a repeater transmit frequency of 147.025 MHz and associated repeater receive frequency of 147.625 MHz. An engineering evaluation confirms that there will be no interference to other stations.

MED CHANGES SMART FROM THE NZ1949 TO THE NZ2000 GEOID

The Radio Spectrum Management (RSM) section of the MED has changed the station location module of its Spectrum Management And Registration Technology (SMART) system from the NZ260 map (NZ1949 Geoid) to the Topo50 map (NZ2000 Geoid).

For more information, please see:

http://www.topo50.govt.nz/

The above applications are the first to use the new system.

Please delete old versions of the NZART Licence Application Form 10 from your computer and download the new version from the NZART web site.

http://www.nzart.org.nz/fmtag/index.html#afai

FINAL RECOMMENDATION TO COUNCIL

None this month.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to:

fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to

fmtag@nzart.org.nz

****

ZL3 Buildathon Christchurch

ZL3 Buildathon Christchurch events will be held Thursday July 8th and Thursday July 15th as part of the CCC Kidsfest.co.nz holiday programme at Kendal School, Kendal Avenue, Burnside, Christchurch, 8:30am for a 9am start.

Fifteen Christchurch kids 10-14 years will be building AM radio kitsets and theyï¿½d welcome some local hams to guide soldering and assembly.

If you could spare just a morning, please call David Searle 03 358 2424 or

e-mail zl3dws@nzart.org.nz today.

More info at:

http://sites.google.com/site/zl3buildathon/

****

Did You Notice?

Did You Notice that there was a request from NZART Council, for a volunteer(s) to help with information for amateurs that are coming to New Zealand for The Rugby World Cup 2011?. 'Infoline 208' and 'The-Rugby-World-Cup.pdf' have the full details of what is required. These two documents can be found on the NZART Web at:

http://www.nzart.org.nz/pdf/2010/The-Rugby-World-Cup.pdf, and
http://www.nzart.org.nz/infoline/2010/infoline-208.html.

****

Did You Know That Exam Candidates Can Join NZART For $30?

A special fee structure for new candidates is offered to encourage them to join the Association at the time of making application for a new call sign and certificate of competency.

Examination
Callsign and certificate allocation
NZART membership for first year
Total payable $15.00
$75.00
$30.00
$120.00

See:
http://www.nzart.org.nz/exam/examprocedures.html#examproc

RSM Call Book Database is on The NZART Website

The NZART Administration Liaison Officer, Don Wallace ZL2TLL, has obtained a pre-Call Book copy of the RSM Call Book Database that is on the NZART Website, but sadly not to stay ED.

The purpose of this is to give people the ability to check their own and their friends listings and for the person with the entry in error to get in touch with RSM to correct any errors. This will then give us a more accurate Call Book.

Details can be updated either online at:

http://www.rsm.govt.nz/smart-web/smart/page/-smart/WelcomePage.wdk

(you will need your log in details) or by phoning RSM on 0508 776 463.

For Silent Keys, there is a form available at

http://www.nzart.org.nz/policies/2006-callsign-removal-form.html

and this can be filled in and posted to Debby at HQ (PO Box 40-525 Upper Hutt 5140) with relevant supporting documentation by a person authorised to do so.

For further information, please see the help files online at:

http://www.nzart.org.nz/call-book/index.html

or contact RSM as above

Tony Case ZL1UD

Minister Releases Decision on 900 MHz Band

Steven Joyce, Minister for Communications and Information Technology, has just announced details of the changes planned for the 806-960 MHz radio spectrum band.The parts of the decision that affect amateurs are as follows:

**Add 915-920 MHz (5 year lead-time)

**Remove 928-929 MHz

**give Amateurs access to all of 915-928 MHz (5 year lead-time)

**allow RFIDs increased power (4 W) in the sub-band 920-926 MHz

These will be published in the 15 July NZ Gazette.Most changes will be effective immediately, except for the removal of the 928-929 MHz frequencies from the Amateur GURLs, which will not come into force until 28 days later (12 August).

For a summary of the changes, please see this link:

http://www.rsm.govt.nz/cms/policy-and-planning/current-projects/radiocommunications/806-960-mhz-band-replanning/summary-of-changes

Members wanting further information can access the full report at:

http://www.rsm.govt.nz/cms/policy-and-planning/current-projects/radiocommunications/806-960-mhz-band-replanning

Don Wallace ZL2TLL

NZART Administration Liaison Officer

****

Internet Connected Amateur Radio

The Ministry has raised some concerns with NZART about IRLP, D-Star, Echolink, APRS and similar modes as they do not appear to fit within our current licence (GURL) conditions.

Concerns raised include:

*the use of unattended transmitters and unlicensed digipeaters for APRS and

*Amateurs based overseas operating (via the Internet) a NZ amateur station.

The ALO, Don Wallace ZL2TLL is currently putting together a paper on this topic and would appreciate input from interested amateurs.

Will anyone interested in contributing please send an email to

alo@nzart.org.nz with "Internet Connected Amateur Radio" in the subject line

Please feel free to contact me with any queries.

Regards

Don Wallace ZL2TLL

NZART Administration Liaison Officer

UPPER HUTT NZART Conference 2011 - Pre-registration

On behalf of the Steering Committee, we welcome you to the Upper Hutt NZART Conference 2011. The Conference will build on the success of the previous conferences, which were held in Upper Hutt in 2000 and 1979. The objective of this conference is to further enhance NZART as an organisation and amateur radio. The conference will maintain the quality of the previous conferences while incorporating new features to enhance your experience.

Location:
Silverstream Retreat
3 Reynolds Bach Drive
Upper Hutt
Phone: 04 562 9080
Reservation free phone:
0800 800 499
Fax: 04 563 5284

Wouxun KG-UVD1P Dual band VHF/UHF Handheld by pre-registration, valued at $300.00. (with additional accessories of a USB Programming Cable and a Speaker/Microphone) Send a cheque for $25.00 to pre-register before 5-November-2010 and be in the draw to win this transceiver. It will be pre-programmed with New Zealand 2 m and 70 cm Repeaters (including National System Repeaters).

Prize draw will be announced in Break-In November/December 2010 issue.

Pre-Registration: UH Conference 2011, 204 Plateau Road, Upper Hutt 5018

(Note: there is no refund on this deposit by pre-registration.)

Waitakere Sprints Phone 24-JUL To Rules ï¿½

IOTA Contest 24/25-JUL To Rules ï¿½

Contest Manager's Report For 3/4-July-2010

Nothing much in the way of international HF contests for 3/4 July, except possibly the Lighthouse and DL-RTTY Contests - information below.

HF propagation is really poor at the moment anyway.

NZART Memorial Contest:

However propagation should be super fantastic on 80m on Saturday & Sunday evenings during the NZART Memorial Contest - rules plus log and summary sheet templates can be found at: www.nzart.org.nz/contests/rules.html

Logs with summary sheets should be sent to:

NZART Contest Manager,
8 Manu Crescent,
New Plymouth 4310,

to arrive no later than four weeks after the contest date. Logs as email attachments in either Word, Excel or plain Text format sent to zl2br@ihug.co.nz are also accepted and encouraged!

Sangster Shield Contest Results:

Results and Report for this years contest are now available at:

http://www.nzart.org.nz/contests/2010/Results-2010-Sangster.pdf

Courtesy of Glenn ZL2KZ.

73 & GL, Frank ZL2BR

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 4th July 2010

---

80 Metre Counties Contest

Stations who participated in the recent IRTS Contest please send your logs to the contestmanager /at/ irts.ie deadline for receipt of logs is 20th July.

This weekend IRTS UHF / VHF Field Day

The annual UHF / VHF field day is happening this weekend. Further details can be found on the IRTSwebsite.

Increased Power for Contests

The Society is continuing to pursue with ComReg the question of securing increased power for the duration of contests on a list of international HF and VHF contests still to be finalised. In order to take this matter further, ComReg wish to have submitted a list of licensed amateurs who would be interested in getting permission to operate with increased power for the contests concerned.

Anyone who wishes to have their name included on this list should e mail the contest manager Thos Caffrey EI2JD at contestmanager /at/ irts.ie or to thoscaffrey /at/ hotmail.com

HAM RADIO 2010

The now famous HAM RADIO took place in Friedrichshafen from 25th to 27th June. A large contingent of EIs travelled to the rally. Some flew to Zurich and by train and ferry to Friedrichshafen while others flew to Memmingen and onwards by train. The lucky few were on holiday and took in the Friedrichshafen rally in their travels.

Similar to the last number of years IRTS had a stand at the rally. The two themes displayed on the stand were the Engineers Ireland Steps Programme in which the Society has had a significant involvement for the last two years and 'How Radio Amateurs got their Bands'. The latter theme was illustrated by a set of charts from the second part of a lecture on this theme by John EI7BV.

These eleven charts traced the changes in frequency allocations in the VHF/UHF/SHF bands over the various World Radio Conferences starting with the one in Atlantic City in 1947.

There was a large attendance of visitors to the rally on each day and the flea market section really has to be seen to be believed. Centrepiece of the Yaesu stand was the FTDX 5000. This is a 200 watt HF and 50 MHz transceiver with two independent receivers and an optional real time band scope. It seems to have a first class, low noise receiver and was generating considerable interest.

Eighteen EIs signed in at the IRTS stand and we would like to particularly thank those who gave some of their exhibition time to staff the stand.

OFCOM Ethernet devices report

OFCOM, the UK's telecoms regulator, has released a report on interference issues caused by power line Ethernet devices.

The report concludes that improved notching and power control are necessary to prevent interference and that as the speed of these devices increases, bands up to 300MHz are potentially subject to interference.

The report can be found via a google search.

WAI Squares Activation

Peter EI4GZB Declan EI9HQ will be out activating Squares on the 18th July

Planned squares to be worked are Oscar 33 34 35 36 County Dublin. All squares will be activated /MM from the boat it is planned that the above squares will be activated both times during the day, on the outward and return journeys.

Bands to be used will be 20m 40m & 80m 14.268 7.068 & 3.680/760KHz SSB only + - QRM.

CQ CQ calling news items

As is common through the year we have occasional lulls in news. If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

Rallies

For further details on Rallies please see www.irts.ie/rallies

---

History this Week

1896 Marconi transmits 400 metres between London PObuildings.

1897 Marconi receives first patent for a radio devicein Britain.

1928 Baird demonstrates colour TV.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

522. Ohio/Penn DX Bulletin #966

DX Bulletin No. 966
BID: $OPDX.966
July 5, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, KH2AR/W4, NG3K & ADXO, N4AA & QRZ DX, K8GI, K8JE, K8YSE, W8GEX (60m News), AT International, DF4SA, DL1SBF, DK8JB, DL7MAE & The DX News Letter, DX World.Net, F6AJA & Les Nouvelles DX, G1VDP, HA0HW, I1JQJ/IK1ADH & 425 DX News, I2MOV, IK4RUX, LX2A, OH2BN, ON5NT, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

*** SPECIAL NOTE FROM EDITOR: There is a "strong possibility" that there "may not" be a bulletin next week. This all depends on how I feel after my knee surgery on Thursday, July 8th. Your editor is having a torn meniscus (anterior) repaired. Please continue to send your DX info and hopefully, recovery will not be too bad.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th-June, through Sunday, 4th-July there were 204 countries active. Countries available: 3A, 3B8, 3D2, 3V, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V8, VE, VK, VP2M, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Armin, DK9PY, will be active as 3B8/DK9PY between July 5-21st. Activity will be CW only on 40/30/20/17/15/12/10 meters. Look for him on 10 kHz from the lower band edges. He states that he has received his license. He might make a side trip for 2 days to Reunion Island (FR) or Rodriguez Island (3B9), but he is not sure yet. He will use a FT857 w/100 watts into dipoles and a longwire. He will have internet access and might announce himself on the DXcluster. No QSL info was given, but probably via his homecall.

5K200, COLOMBIA (Special Event). Look for "duly authorized" members of the Colombian Radio Amateur Association (LCRA) to activate special event callsign 5K200LR throughout 2010 to celebrate the bicentennial and independence of Colombia. QSOs will be uploaded to LoTW (preferred). Direct QSLs will be handled via HK3LR.

9Q, DEMOCRATIC REPUBLIC OF CONGO. By the time you read this Patrick, ON4HIL, will be active (July 5th or 6th) using a special callsign, 9Q50ON, from Kinshasa for one week. The special callsign is to celebrate D.R.C.'s 50th anniversary of independence. Activity will be limited because he is actually on a scouting trip for a larger group of Belgian operators to activate the D.R.C. within a few months. No specific dates have been announced yet. Look for more info and updates to be announced.

9J, ZAMBIA. Katsumi, JF1OKX, will be active as 9J2KK from Lusaka beginning early July and staying until the end of September 2011. Activity will be on 80-6 meters, but concentrating on the Digital modes (PSK31 or 62, RTTY, WSJT and SSTV), with some SSB and CW. QSL via JK1NSR.

C6, BAHAMAS. Kenny, K2KW, will be active as C6ATA between November 20-29th. Activity will be mainly CW on 40 meters and the 30/17/12 meter bands. He will also be in the CQWW DX CW Contest (November 27-28th) as a Single-Op/ Single-Band/Low-Power entry. QSL via WA4WTG.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
FT5WO • Crozet Island; between December 1, 2008, - November 30, 2009
If you had credits rejected for this operation send a note to dxcc@arrl.org with the date of your submission. Please check your LoTW account, or the DXCC live daily numbers. When the update is done it will appear here.

HA8, HUNGARY (WFF Op). Look for a youth radio camp to activate the Natural Reserves Pusztaszeri Tk.(HAFF-036) between now and July 9th. They will use the special callsign HA8KID. Other callsigns such as HA8CX/p, HA8DD/p, HA8KW/p and HA8ZE/p will also be active. Activity will be on 80-2 meters using a FT-450. Antennas are: W3DZZ for 80/40/20/15/10m, possibly a 6m vertical dipole, GP for the WARC bands and a short yagi on 2m. The instructors ask patience with the young operators!

IOTA NEWS.....
AF-004. Luke, SQ9IVD, will be active as EA8/SQ9IVD from Fuerteventura Island (DIE S-006, WLOTA L-0883) between July 19th and August 5th. Activity will be on the HF bands, mostly on CW, using 100

watts and wire antennas. Operations on SSB and RTTY is possible. QSL via his home callsign, direct or by the Bureau. Look for the logs to be uploaded to LoTW.

EU-017. Vanni, IK4RUX, will be active as ID9/IK4RUX from Lipari Island (IIA ME-001) between July 5-15th. Activity will be on the HF bands using SSB. QSL via IK4RUX, direct or by the ARI Bureau. PLEASE NOTE: During this operation some other reference numbers could be activated which will be valid for the IIA Award, D.C.I. or WAIL-ARLHS awards.

EU-047. Chris, DL4FO, will be active as DL4FO/p from the Island of Spiekeroog (N-008 for the German Islands Award) between July 11-16th. Activity will be QRP only, mainly CW, on all HF bands. QSL via his home callsign, direct or by the Bureau.

EU-057. Joachim, DL5KUD, will once gain be active from Ruegen Island (O-07 for the German Islands Award) during the RSGB IOTA Contest (July 24-25th) as a Single-Op/12H/CW entry. QSL via DL5KUD; bureau is preferred.

EU-114. Frank, PA4N, will be active as MU/PA4N from the Island of Guernsey (WLOTA L-0013) between July 12-19th. Activity will be on 80-10 meters using CW, with the possibility of some 160 or 6 meters and some RTTY and SSB. QSL via his home callsign, by the Bureau or direct.

EU-124. Once again the members of the Strumble Head DX and Contest Group (SHDXCG) are heading over the water to activate the rare Welsh coastal Island of Ramsey. Activity will take place between July 22nd and July 26th or 27th (all dependent on tides) using the club callsign MC0SHL. This trip also takes place during the RSGB IOTA Contest (July 24-25th) where they will be on the air using the club contest callsign MW9W over the weekend. Last year they tried to work as many Asian and Pacific stations as this is the 18th most wanted on the IOTA listings for that area. They will again try to make as many contacts both before and during the contest. They will have 3 stations using the following equipment: two Elecraft K3 Transceivers, one Yaesu FT2000, two G3TXQ Hexbeams (built by Ant MW0JZE), 80m Dipole, 40m Vertical and three Acom 1000. The team will be using MC0SHL on 17 and 12 meters during the contest to try to give as many contacts on these bands. They will be on the air mostly on SSB, but with some RTTY and CW thrown in. This year's team includes: Rob/MW0RLJ, Jane (Robs wife), Ant/MW0JZE, Oli/MW0JRX, Tim/M0URX, Chris/ G1VDP and Tony/G4LDL. Sadly, Charles/M0OXO is not joining them but will be acting as a pilot station and will be in contact with the team throughout the trip as they are taking mobile internet so they can get on SKYPE and provided updates on their Web site. Full details and photographs of last year's operation are on the group's Web site at: http://www.mc0shl.com

There may be live access to the station via a webcam if they
can get this up and running on this Web page. All QSL requests
should go via the team's QSL Manager M0URX. Online QSL requests
and details on how to get the QSL quicker are available on
M0URX's Web page at: http://www.m0urx.com
All logs will be uploaded to the ARRL Logbook of the World
(LoTW) upon getting back to the farm HQ on their return.

EU-146. Danny, ON4ON, will be active as PA/OT7X/P from Schouwen
Duiveland, The Netherlands, during the RSGB IOTA Contest
(July 24-25th). QSL via ON4ON.

EU-171. Tom, DL4VM, will be active as OZ/DL4VM from Vendsyssel-Thy/
Nordjylland (DIA NJ-001) between September 4-18th. Activity
will be on 40/30/15/6 meters using CW and PSK31. QSL via his
home callsign, direct or by the Bureau.

EU-176. Peteris, YL2PN, will once again be active as ES0/YL2PN from
Ruhnu Island (WLOTA L-4244), Estonia, during the RSGB IOTA
Contest (July 24-25th) as a Single-Op/Low-Power/All-Band/Mixed
entry. QSL via his home callsign. He hopes to beat his 2008
RSGB IOTA Contest score.

NA-036. Patrick, WD9EWK, will be active as VA7EWK from Vancouver
Island (CISA BC001, WLOTA L-0858) through July 11th. Activity
will be on several satellites from various locations from
several grids. Watch satellites: AO-51, SO-50, AO-27, HO-68,
AO-7, FO-29, VO-52, possibly SO-67 if it is back in service.
QSL via WD9EWK, direct or by the Bureau. Look for updates on
his Web site at: http://july2010.wd9ewk.net

NA-110. Rich, K3RWN, will be active as K3RWN/4 from the Isle of Palms
(USI SC001S, Charleston county) South Carolina) until July
9th. He plans to attempt to operate on several satellites
while on the island, especially AO51 and possibly some SSB
birds if he has the proper equipment. QSL via his home
callsign (QRZ.com).

NA-158. RARE ONE! Look for Mike/AD5A and his two sons, Michael/AB5EB
and Jake/KB5SKN to activate Kalgin Island, in the Kenai-Cook
Inlet Group in August. This Alaskan island has only been
worked by 10% of the IOTA chasers. Activity will take place
sometime Friday, August 6th, and they will go QRT mid-afternoon
(local time), on Sunday, August 8th. Their plan is to have
two stations on the air running 100 watts using two separate
callsigns. The CW callsign will be AD5A/KL5 and the SSB callsign
will be AB5EB/KL0. The team will be equipped to operate on 6m
if the band opens up, but it will not be a priority. QSL route
will be announced as soon as it finalized.

OC-142. Operators Peter/VK4FSSB and Andrew/VK4HAM will be active as
VK4HAM from Fraser Island (WLOTA L 2976), Queensland State,

Australia, between July 23&#65533;27th. Ryan, N0OJ, was expected
to join them but will not be there for the RSGB IOTA Contest
(July 24-25th). Activity will be on 80-10 meters using CW
and SSB. QSL via VK4HAM. For more info and updates, go to:
http://www.vk4ham.webs.com

IS0, SARDINIA (EU-024). Flaviano, I2MOV, informs OPDX that he will depart
for Sardinia on July 13th and be active as IS0/I2MOV from Dolianova,
20 km North from Cagliari (Locator JM49OJ), until the end of September.
Activity will be on 40/30/20/17/15/12/10/6 meters using mainly CW. His
rig will be an IC706MKIIG into a 7 band vertical antenna and a home-made
50 MHz dipole. QSL via his home callsign, by the Bureau or direct. Visit
his Web page at: http://i2mov.tk

JD1, OGASAWARA. Koji, JI1LET, will be active as JI1LET/JD1 from Chichijima
Island (AS-031) between July 24-30th. Activity will be on 40-6 meters, CW,
SSB and RTTY. QSL via JI1LET by the JARL Bureau or direct.

JY6, JORDAN. Chuck, KG9N, will be active as JY6ZZ between July 7-15th.
Activity will be mainly CW (bands were not mentioned). QSL via JY6ZZ.

KH6BZF PROPAGATION FORECAST/REPORT (For July 5-11th)....
Jul 5 AN SOLAR REFERENCE KEYS
Jul 6 AN --------------------
Jul 7 AN BN - Below Normal
Jul 8 AN AN - Above Normal/Geomagnetic Level is QUIET
Jul 9 AN LN - Low Normal
Jul 10 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jul 11 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP4, PUERTO RICO (Special Event). Members of the Puerto Rico Amateur
Radio League (PRARL) will activate special event station K4C between
now and August 1st. Activity is to celebrate the XXI Central American
and Caribbean Games that will take place in Mayaguez, Puerto Rico
(NA-099, USi PR006S, WLOTA LH-2802). QSL direct to KP4ES. Visit the
PRARL's Web page at: http://www.prarl.org

LX, LUXEMBOURG. Philippe, LX2A, informs OPDX to look for LX0HQ to be
active again from the Headquaters of the Luxembourg Amateur Radio Society
(RL) during the IARU World HF Championship Contest (July 10-11th). They
will have ten stations (w/25 operators) active from 2 different locations
in Luxembourg: Eschdorf (QTH of LX7I) and Esebuer(QTH of LX0RL). Photos
of the LX0HQ stations will be available after the contest on their Web
sites at: http://www.rlx.lu --or-- http://www.lx2a.com

A live webcam will be available during the contest from the LX7I QTH (on www.lx2a.com). Please try to work LX0HQ on as many bands and modes as possible during the 2010 IARU World HF Championship. The log will be uploaded to LoTW, and you can request a bureau QSL via lx0hq@rlx.lu (no need to send a card via bureau!). QSL via LX2A (New QSL Manager since 2009!).

PACIFIC TOUR. Bodo, DL3OCH, will be in the Pacific from the following location and will be using his stateside callsign. Activity will probably be on 40-12 meters (depending on conditions), mostly on CW and possibly some RTTY and PSK31, using an IC-7000 (w/100 watts only) into a vertical antenna. Bodo may also try some 80 meters. His tentative schedule is as follows: August 1-7th - Guam; callsign KH2/KT3Q
August 7-14th - Marianas Island; callsign KH0/KT3Q
QSLs for this activity are only via DL3OCH or HB9EHJ. Do not send QSLs to his U.S. address. It might take a year until he receive them. Online logs (updated daily) will be available at: http://www.clublog.org
QSOs will be uploaded on LoTW in December. ADDED NOTE: Bodo was reported last week active as BW/DL3OCH from Taiwan.

QSL INFO AND NEWS.....
Con, DF4SA, reports that he is NOT the QSL Manager for 7X2ARA. He states, "I am receiving hundreds of QSLs via Bureau and also some direct, but I am NOT the manager. I only operated from the 7X2ARA club station in November 2003 and have long already confirmed all my QSOs. I can NOT confirm any other QSLs for any other date and time. Please help me to spread the word to delete this wrong information from QSL databases. THANKS!!"

QSLS VIA LoTW: 4B3DX, 6W1RY, 9K2MU, CE2WZ, CX5UR, DL1ROJ, DM2GG, EU7SA, F5SIB, FO8RZ, G0JKZ, HK3ARR, JA0BES, MD0MDI, NP2KW, OK2ZDL, OM1ZL, PE2MC, PY2YW, RK6CM, RV0AUI, SM5FWW, SP3BGD, SP7GAQ, UT7QF, VE9NC, VK2PN, VP5/WB2REM, XU7ACY, ZL3RG and ZL3TE

QSLS RECEIVED VIA MAIL: 1B1AB, 3W6C, 4A1DXXE, 5K4T, 5K8T, 5N7M, 8Q7NA, 9U1KI, AO8FLH, AX5CP, CF3NAVY, CO4SM, CR2X, CU2A, DA0HEL, FM5AA, GB4GEO, GI8HXY, H44MS, HI8HCJ, HS0ZBS, J39BS, K4T, M1MST, NP2KW, OA4TT, OH2BC, SP7GAQ, SP9YFF/7, SQ6ILC, TX3A, V85DX, VE1DLC, VE1SKY, VG7G, VG7W, VK9LL, W1ASB, YV400D and YW8AJ

QSLS RECEIVED VIA THE BUREAU: S04R

SU, EGYPT. Gab, HA3JB, will once again be active from Cairo between September and November. He has renewed his license as SU/HA3JB. Activity will be on CW, RTTY, SSTV, PSK and some SSB. No bands of operations were provided, but on past operations he was heard on 80/40/20 meters. He also plans to be in the CQWW RTTY DX Contest (September 25-26th). QSL via HA3JB. More information and updates will be available at: http://www.ha3jb.com/suha3jb.html

TK, CORSICA. Charles, F5OWT, will be active as TK0WT between July 4-16th. Activity will be holiday style on SSB using a FT-100 into a R7000 vertical

antenna. He will focus on 17 and 12 meters. QSL via his home callsign, direct or by the Bureau.

W1AW/8, UNITED STATES. Members of the Southwest Ohio DX Association (SWODXA) will operate as W1AW/8 during the coming International Amateur Radio Association (IARU) HF Contest (July 10-11th). The club will put 11 stations on the air from 160-10 meters from the members' stations in several southwest Ohio counties.

WRTC NEWS.....
PRESS RELEASE # 22 (Awards and prizes for HAM radio community world-wide):" To encourage the HAM radio community worldwide to make contacts with WRTC-2010 participants during the IARU HF Championship Contest the weekend of July 10-11th, 2010, we would like to announce our special awards and prizes program.
WRTC-2010 awards, special plaques, T-shirts and trophies will be issued based upon the following rules:
1. QSO points - All WRTC stations will use distinctive callsigns from the block R30A-R39Z. The same WRTC-2010 station may be worked once on CW and once on SSB on each band (80, 40, 20, 15 and 10m). The WRTC stations will not operate on 160m.
- Each confirmed two-way CW or SSB QSO with a WRTC-2010 station counts 1 point.

2. The logs - The WRTC Committee needs as many IARU contest logs as possible to create the QSO data base it will use to cross check the WRTC competitors' logs. We ask all stations working the IARU contest to please send copies of their electronic, Cabrillo formatted logs to logs@wrtc2010.ru or upload them to <http://www.wrtc2010.ru//upload/> no later than 18:00 UTC on Sunday, July 11, 2010, (Note: this is only six hours after the end of the contest). The subject field should contain your contest callsign, e.g., "Subject: RA5AA".
The Committee guarantees that these logs will be used only to determine winners of the WRTC awards and prizes and for cross checking the WRTC-2010 teams' logs. Please understand that sending us a copy of your log does NOT constitute a log submission for the IARU HF Championship; for that, you should also e-mail your log to IARUHF@iaru.org.

3. Awards and Prizes -
* WRTC-2010 Certificate: For making 50 QSO points with the WRTC-2010 stations in any combination of modes and bands.

* WRTC-2010 Special Trophies:
For making QSOs with ALL WRTC-2010 Stations on CW
For making QSOs with ALL WRTC-2010 Stations on SSB
For making QSOs with ALL WRTC-2010 Stations Mixed

* WRTC-2010 T-shirt:
DX: for making 100 QSO points with WRTC-2010 stations
EU: for making 180 QSO points with WRTC-2010 stations

ITU Zone 29: for making 140 QSO points with WRTC-2010 stations

* WRTC-2010 plaques - WRTC-2010 plaques will be issued to the
stations with the highest number of QSO points in the following
categories:
Worked all WRTC-2010 - Single op CW
Worked all WRTC-2010 - Single op SSB
Worked all WRTC-2010 - Single op Mixed
Worked all WRTC-2010 - Multi op CW
Worked all WRTC-2010 - Multi op SSB
Worked all WRTC-2010 - Multi op Mixed

* WRTC-2010 plaques will be awarded for each of the following
areas: Europe USA
Asia Japan
North America HQ stations
South America European Russia (R1-R7)
Africa Asiatic Russia (R8-R9)
Oceania Asiatic Russia (R0)

You can: <http://www.wrtc2010.ru/press/wrtc_callsigns.pdf> upload
the complete list of WRTC-2010 station callsigns in a comfort-
able form which you can use to mark stations worked per
band/mode.
We also ask you to cooperate with requests from R30A-R39Z stations
to move to another band or mode with them for a new multiplier or QSO.
..... WRTC-2010 organizing committee"

WRTC 2010: BREAKING NEWS FROM THE TOP OF THE WORLD
Helsinki, Finland
dated - July 4, 2010 (edited)

"The Finnish WRTC 2002 gang in association with Radio Arcala, OH8X
will
activate four (4) valuable DXCC countries and ITU zones in the IARU HF
World Championship, July 10-11, 2010 saluting those in the heat of the
race in Moscow and around the world. If you ask them gently, they may
even QSY to other bands.

Greenland, OX8XX: Operators Martti/OH2BH, Ville/OH2MM and Pekka/OH2TA
together with Jesper, OX3KQ, will be on all bands from Kangerlussuaq
on the Greenland Arctic Circle. Outside the contest they will also be
active with another station on 17m and 30m. QSL via OH2BH.

Aland Islands, OH0X: Pertti, OH2PM, stands ready to put another X-rated
station on from the renowned Brando contest QTH with good IARU scores
to boot. Pertti may do both modes just to be more visible and make a
serious effort even on 10m. QSL via OH2TA.

Iceland, TF4X: Jouko, OH1RX, together with Thor, TF4M, will put Thor's
lineup of rhombics on with an eye and ear to Moscow alongside their
salmon fishing. TF, OX and OH0 are a rare catch on the low bands as

they stay in total daylight at this time of year. QSL via G3SWH.

Azores, CQ8X: Francisco, CU2DX, will put Radio Arcala's westernmost outpost on SSB on all bands. As he just became a new father, Francisco may handle several chores at once. If you call him father Frank, he may move more easily. QSL via OH2BH.

Following the IARU weekend, and sailing out from the port of Reykjavik, Iceland, you may catch Martti, OH2BH, and Leena, OH2BE, cruising in Greenland waters, zigzagging among the icebergs for a period of eleven days. You can follow OH10X/MM, 14235 kHz, en route to the Maritime DX Forum in Halifax, Canada <http://www.halifax-arc.org/> aboard an old-time steamer M/S Kristina Regina on her last journey before retiring with fond memories of the 1960's Steamship Era:

DXNL 1683 - Jul 7, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

C6 - BAHAMAS, NA-001
Alan,K5AB (C6AAB), Renee,N5BW (C6AMR), Carolyne,W5ETY (C6ATY),
Mark, NA6M (C6AMS), and Scott,K2CK (C6ASH), are going to activate
Eleuthera Island (Great Bahama Bank Group, NA-001) from Jul 9-25.
They will use three stations with amplifiers running in CW, SSB and
digital modes on 160m-6m. QSLs via their homecalls.
More information and a livestream can be found at: http://www.c6ams.com
---
David,WD9CMD/C6A, will be QRV in SSB on 6m, 20m, 40m, 15m and 10m from
New Providence (NA-001) from Jul 3-9. QSL via homecall.

CT3 - MADEIRA, AF-014
Jose,CT1BOH, will be the operator of CR3E from Madeira (AF-014, ITU 36)
during the upcoming IARU HF World Championship (Jul 10/11).
QSLs direct via W3HNK.
You can find more information on his homepage http://www.qsl.net/ct1boh
---
Members of the Portuguese DX Group (CS1GDX) will be QRV in all modes
and bands signing CT3/CS1GDX (AF-014, DIP MA-001, WLOTA LH-0053,
DPRN FF-101) from Jul 10-13. QSL via CS1GDX, eQSL, bureau or direct.

FW - WALLIS & FUTUNA / 3D2 - FIJI
On their way to Wallis Mini,JA2NQG, Yuji,JH2BNL, and Shige,JI2UAY, are
going to make a stop on Nadi (Fiji) on Jul 13. Calls are not known yet.
From Jul 14-24 they will activate Wallis (OC-054) with 100 watts and
simple antennas working in CW, SSB, RTTY, SSTV and FM on 160m-10m as
FW5M (JA2NQG), FW2DA (JH2BNL) and FW5FM (JI2UAY).
They will try to become active also from Hoorn Island (OC-118) in the
Futuna island group signing .../p from Jul 15-17.
QSL cards shoud be sent to their homecalls.

IS0 - SARDINIA, EU-024
Moro,IS0/I2MOV, will be QRV mostly in CW from Dolianova (20 km north of Cagliari) from Jul 13 until the end of September. He is using an IC706 with a vertical for 40m-10m and a selfmade dipole for 6m.
QSLs via bureau or direct to his homecall. See also: http://i2mov.tk

J2 - DJIBOUTI
Freddy,F5IRO, will work in Djibouti for the next two years starting on Jul 6. Freddy will sign J28RO in CW, SSB and digital modes mostly on his weekends (friday/saturday) around 1200-1300 UTC and the evening hours of the week. His QSL manager is F8DFP, who confirms via bureau or direct. From time to time Freddy wants to activate also the islands Mucha and Maskali (AF-053) together with Vincent,F5MJV/J28JV.
See also his website at: http://j28ro.blogspot.com

JT - MONGOLIA
Alex,JT1/IW5ELA, and Giampiero,I5NOC, are visiting Mongolia from Jul 7-22. They will stay in the capital Ulan Bator for one week and may use the station of the radio club. The rest of the time they will travel around showing up mobile from different regions.
QSLs via bureau or direct to IW5ELA.

JY - JORDAN
Chuck,KG9N, will be QRV mostly in CW from the Jordanian clubstation JY6ZZ from Jul 7-15.

LG5/SJ9 - MOROKULIEN
On his way back from the Lofoten Wolf,DM2AUJ, will activate Morokulien in CW and SSB signing LG5LG and SJ9WL (changing daily) from Jul 11-14.
The QSL manager LA4EKA confirms all QSL cards direct or via bureau.

TK - CORSICA
Laurent,F8BBL, will show up as TK10OB from Golfe de Valinco from Jul 10-24. He tries to activate also Sanguinaires Island (EU-104) and Lavezzi Island (EU-164) and maybe also a third IOTA island.
QSLs via bureau or direct to his homecall.

TK0WT is the callsign of Charles,F5OWT, from Jul 4-16. He is working in SSB on 12m-17m during his holidays. QSLs via bureau or direct to F5OWT.

V3 - BELIZE
San,K5YY (V31YY), Bill,W5SJ (V31SJ), and Bob,W5UQ (V31UQ), will QRV from Placencia in Southern Belize from Jul 12-19. They will work on all bands (also on 60m) and in the CQ VHF Contest.
V31YY QSLs via K5YY, W5JAY is the manager of V31UQ and V31SJ.

3B8 - MAURITIUS, AF-049
Armin,3B8/DK9PY, is working from Mauritius (AF-049) from Jul 5-21. Armin is working only in CW, 10 khz from the lower band edge, on 40m/30m/20m/17m/15m/12m/10m using a FT-857 with 100 watts, dipoles and longwires. If possible he wants to activate also Rodriguez Island (3B9) for a few days. QSL cards should be sent to his homecall.

9Q - DEMOCRATIC REPUBLIC CONGO
Patrick,ON4HIL, from Kinshasa, applied for the special call 9Q50ON to
celebrate 50 years of independence of the Congo for one week starting
around Jul 6. QSL via ON4BR.
This is also an exploration trip because Patrick wants to activate
the Democratic Republic of Congo with some friends later this year.

AUSTRIA, SPECIAL EVENT STATIONS
The special event stations OE2XXM (St. Gilgen) and OE5XXM (Gosau) are
working mainly on 2m, 70cm and 80m/40m/20m from the XXVI. International
Amateur radio meeting in Gosau (Dachstein) from Jul 1-31.
See also http://www.qrz.com/db/oe2xxm and http://www.qrz.com/db/oe5xxm

COLOMBIA, SPECIAL EVENT STATIONS
Members of the "Liga Colombiana de Radioaficionados" (HK3LR) may use
the special prefixes 5K and 5J (instead of HK and HJ) in July to
celebrate 200 years of Colombian independence.
The special event stations 5K200LR and HK200LR will be QRV until the
end of this year (both QSLs via HK3LR).
The "Colombia Bicentennary Contest" will take place on Jul 17.
Ses also: http://www.lcra.org.co

JA - JAPAN: Nine Japanese HQ stations are representing the JARL in the
IARU HF World Championship on Jul 10/11:
Call Band/Mode QTH

8N1HQ 10m-CW Minato-ku, Tokyo
8N1HQ 15m-Ph Kimitsu-shi, Chiba
8N1HQ 80m-Ph Minamiashigara-shi, Kanagawa
8N2HQ 10m-Ph Nakatsugawa-shi, Gifu
8N3HQ 15m-CW Nara-shi, Nara
8N3HQ 160m-CW, 40m-CW Kobe-shi, Hyogo
8N3HQ 20m-CW Miki-shi, Hyogo
8N4HQ 80m-CW, 40m-Ph Okayama-shi, Okayama
8N8HQ 20m-Ph Iwamizawa-shi, Hokkaido
All stations are already active since Jul 1.

DXCC: QSL cards of FT5WO (Crozet Island; Dec 1, 2008, until Nov 30, 2009)
are accepted for DXCC credit now.

WRTC Callsigns: The "WRTC 2010" takes place near Moscow this year during the
2010 IARU HF World Championship Contest (Jul 10/11). The participants
will use following calls:
R31A R31D R31N R31U R31X
R32C R32F R32K R32O R32R R32W R32Z
R33A R33G R33L R33M R33Q R33U
R34C R34D R34O R34P R34W R34X R34Y R34Z
R36C R36F R36K R36O R36W R36Y R36Z
R37A R37G R37L R37M R37P R37Q R37U
R38F R38K R38N R38O R38W R38X
R39A R39D R39M R39R
Find more about this on the WRTC homepage http://www.wrtc2010.ru/?id=39

The Finnish "WRTC 2002 Gang" will activate four DXCC entities this weekend:

OX - Greenland: Martti,OH2BH, Ville,OH2MM, Pekka,OH2TA, and Jesper,OX3KQ,
will sign OX8XX. Outside the contest, they will also be active with
another station on 17m and 30m. QSLs direct or via bureau to OH2BH.

OH0 - Aland Islands: OH0X is the call of Pertti,OH2PM, from the contest QTH
in Brando. Pertti works in CW and SSB and makes a serious effort even
on 10m. QSL via OH2TA.

TF - Iceland: Jouko,OH1RX, and Thor,TF4M, will sign TF4X. QSL via G3SWH.
TF, OX and OH0 are a rare catch on the lowbands as they stay in total
daylight at this time of the year.

CU - Azores: Francisco,CU2DX, works as CQ8X in SSB on all bands from this
contest station. QSL via OH2BH.
Following the IARU weekend, and sailing out from the port of Reykjavik,
Iceland, you may catch Martti,OH2BH, and Leena,OH2BE, cruising in
Greenland waters among the icebergs for a period of eleven days.
You can follow OH10X/mm around 14235 kHz en route to the Maritime DX
Forum in Halifax/Canada (http://www.halifax-arc.org) aboard the
old-time steamer M/S Kristina Regina on her last journey before
retiring with fond memories of the 1960s Steamship Era.

Indeed... D-Star radios will always talk AMBE... and thier legality on
amateur bands will always be questionable.

Nothing stops however, someone coming up with an open system ... but
then say, modifying the D-Star gateway software to make *that*
interoperable with the aforementioned open system.

So yes, D-Star radios will be able to talk to some other digital radio
standard, but only through a repeater or translator of some
description.

> I am probably not the only one with this opinion, and I am not amazed
> that there are not many that would sponsor a development like this that
> cannot be put to real use.

I think there are lots of possible options for a low-bandwidth and
royalty-free CODEC. VoIP on slow links... digital voice on HF... just
to name two.

> The only useful development would be the development of a free, open
> codec that is compatible with AMBE. But that would have to be done in
> an environment that does not bow to US Patents etc, or it will have to
> wait until all the patents have expired.

I'm not sure that "following the leader" is the way to go here. Yes,
if I wanted a Mickey Mouse-like character to use in a cartoon, I
could wait for Buena Vista's copyright on him to expire (lawyers
already managed to negotiate a 70-year expiry on the copyright). I
dare say AMBE will be locked down for at least several years yet.

The question is, do we want to sit around, or do we want to actively seek our own. I personally have little money to contribute (don't have PayPal... so that option is not open to me) but I will probably have a look at it and see if there are other ways to help the cause. However, like the original author of CODEC2, I have limited time too.

531. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.misc

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

==> SPECIAL WORLD RADIOSPORT TEAM CHAMPIONSHIP ISSUE

- Together Again - IARU and WRTC
- CQ Worldwide VHF Contest
- Last-minute WRTC News
- WRTC Results and Records
- Making Good Decisions

NEW HF OPERATORS - THINGS TO DO

Get on the bands and chase the WRTC2010 stations as they scramble for
every QSO during the IARU HF Championship! If you are new to the IARU
contest, part of the exchange is your ITU Zone (not your CQ WW Zone).
US stations are in zone 6 (West Coast), 7 (Midwest), or 8 (East Coast)
as explained on the RSGB site listed in Word To The Wise below.

BULLETINS

Jim AD1C reports that the Country (CTY) Files
<http://www.country-files.com/cty/> used by many logging programs were
updated on 01 July 2010. These are particularly important during IARU
HF because of the use of ITU Zones (not CQ Zones). He request, "Please
test this BEFORE the IARU Contest starts. I don't have all the
different logging programs to check for errors. "

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

10-11 July

- IARU HF World Championship
- World Radiosport Team Championship <http://wrtc2010.ru/>
- FISTS Summer Sprint--CW
- Feld-Hell Monthly Sprint
- Straight Key Weekend Sprint
- QRP ARCI Summer Homebrew Sprint--CW
```

17-18 July

- CWops Mini-CWT Test (July 14)
- DMC RTTY Contest
- NA RTTY QSO Party
- CQ WW VHF Contest
- CQC Great Colorado Gold Rush--CW
- Run For the Bacon--CW

==> WRTC2010 NEWS & PRESS RELEASES

Combining several reports and press releases from Moscow...

The WRTC2010 Committee has created an online scoring system <http://www.wrtc2010.ru/online> that will report team scores in nearly real time during the competition. All teams will have special hardware at their locations which will send scores from their computers every 5 minutes. (This is backed up by referees sending scores via text messaging.) You can also watch real-time video <http://www.wrtc2010.ru/video> from the WRTC-2010 opening ceremony, location and call drawings, competitors' meeting, and closing ceremony. The WRTC photo team will also be uploading pictures <http://www.wrtc2010.ru/photos> to the Web site during the entire competition.

The WRTC2010 Committee also needs as many of your IARU contest logs as possible to create the QSO data base it will use to cross check the WRTC competitors' logs. All stations that make contact with the WRTC teams are requested to please email copies of their electronic, Cabrillo-formatted logs to logs@wrtc2010.ru or upload them to www.wrtc2010.ru/upload/ <http://www.wrtc2010.ru/upload/> no later than 1800 UTC on Sunday, July 11, 2010 - this is only six hours after the end of the contest. The subject field should contain your contest call sign, e.g., "Subject: W1AW". The Committee guarantees that these logs will be used only to determine winners of the WRTC awards and prizes (see the next News item), and for cross checking the WRTC-2010 teams' logs. Please understand that sending us a copy of your log does NOT constitute a log submission for the IARU HF Championship; for that, you should also e-mail your log to iaruhf@iaru.org <IARUHF@iaru.org>.

To encourage the HAM radio community worldwide to make contacts with WRTC stations, the WRTC2010 committee has created a special awards and prizes program. WRTC-2010 awards, special certificates, plaques, T-shirts and trophies will be issued based on a number of criteria, including QSO points made with the WRTC stations. A form is provided <http://www.wrtc2010.ru/press/wrtc_callsigns.pdf> so that you can check off each of the 50 stations on each band and mode. (That's 50 stations x 5 bands x 2 modes = 500 contacts - a whole weekend of operating on its own!)

Reminder - all WRTC stations will use distinctive call signs from the block R30A - R39Z. They may be contacted on each band (80 - 10, no WRTC stations will operate on 160 meters) and mode (CW and SSB).

The National Contest Journal is hosting a team of WRTC Bloggers <http://ncjweb.com/wrtc2010blogs.php>. Read words of wisdom like Monday's tale of travel confusion by Eric K9GY, "Going to see the real Lenin this morning but I'm taking the subway to get there. Not sure if they require pants or not because the sign says "trunks" are not allowed..." Watch the international news for any signs of disturbances on the Moscow subway. Other contributors include K1ZM, VE3DZ, JK6GAD, K6LA, K6XX, K5ZD, N6XI, KL9A, RA3CO, and N5AW.

The Southwest Ohio DX Association (SWODXA) asked for and was chosen to host W1AW for the IARU HF Championship. IARU chairman Scott N9AG has coordinated the efforts of a team across Ohio that will put out a big signal on all bands:

- 160 (both modes) N0FW - Hamilton, Ohio - Full sized vertical
- 80 CW - N0FW - 4-square
- 75 SSB - K8DV - Goshen, Ohio - wires and Hy-Tower
- 40 CW - N8BJQ - Thackery, Ohio - 2 elements at 110 ft + dipole
- 40 SSB - N8NR - Palestine, Ohio - 2 elements at 130 ft + dipole
- 20 CW - N8AA - Oxford, Ohio - 2x tribander stack
- 20 SSB - N8BJQ - 4 elements @ 90' and 3x tribander stack
- 15 CW - N8NR - 5/5 at 110'/75'
- 15 SSB - N0FW - 4 elements @ 90' + tribander
- 10 CW - N8NR - 5/5/5 at 120/90/60 + tribander
- 10 SSB - K4ZLE - Lebanon, Ohio - TH-11 + tribander

All teams will be using W1AW/8 as the call sign. QSLs for all W1AW QSOs are handled by the ARRL.

The Daily DX <http://www.dailydx.com/> newsletter reports that K1TTT and W1KM will run the NU1AW station this weekend in the IARU HF World Championship. Operators at K1TTT will be K1SFA, K1MK, K5UZ, KU5B, K1TTT, NJ1F, W1TO, W5MPC, W1EQO and JA1BPA. NU1AW is the IARU Club station call and will count as an HQ station.

WORD TO THE WISE

ITU Zones - a set of 90 geographic zones assigned by the ITU and completely different from CQ Zones. The RSGB has developed a nice Web page on ITU Zones <http://www.rsgb.org/spectrumforum/hf/hfawards/witu.php> in support of its Worked ITU Zones Program.

==> RESULTS AND RECORDS

You can review results for all prior WRTC events, starting with the first one held in Seattle in 1990, at the WRTC history <http://www.wrtc.info/> Web site. Web pages with information about all of the WRTC's are there for you to read while waiting for 1200Z on Saturday!

OPERATING TIP

The WRTC2010 committee asks that you cooperate with requests from R30A-R39Z stations to move to another band or mode with them for a new multiplier or QSO. Every point is important!

==> CONVERSATION

Making Good Decisions

This weekend will see contesters from around the world operating from Russia in the sixth World Radiosport Team Championship. The hosts - Soyuz Radioljubiteley Rossii (SRR) - are the Russian national Amateur Radio society and they have been working very, very hard to handle the logistics for several hundred participants (and their radio equipment). Held in the wide-open grasslands of Domodedovo, near Moscow, this WRTC is modeled on the Russian championships with the teams operating "Field Day-style" in tents. No effort has been spared to equalize the operating locations and the antennas available to each team. This will be the most level playing field ever for WRTC - literally!

Well, it should be the most equal WRTC ever. The sponsors can only do so much to insure that all teams compete on an equal footing. It is up to the rest of us to help insure that the winners are determined by their skill and stamina. How can we support the competition? By scrupulously operating with the highest ethics and without favoritism.

Radiosport is nearly unique as a competition in that it requires the competitors to cooperate with each other and with the general ham radio public in order to make contacts and score points. It is generally assumed that every operator gives an equal and full chance for any other operator to make contact. Contacts are not to be withheld, disrupted, or falsified in any way. Similarly, participants are expected to attempt contact any station such that everyone has an equal pool of potential contacts. This is required if the final results are to be an indicator of operator skill.

Such is not always the case. If you have been following the IARU HF Championship reports, you know of the serious dispute over the 2009 HQ station results. It was claimed that amateurs in one country worked only their own HQ station on multiple bands, multiple modes, and with multiple calls. Anyone familiar with the IARU contest knows the practice of "cheerleading" and "favoritism" has been a problem in the HQ station category for years. Now that the issue has come to a head, hopefully the HQ station community will come together to define a set of rules that encourages and rewards good behavior and operating ethics in future contests.

Sad to say, WRTC has also seen its share of "irrational exuberance" from hams who are "overly eager" to assist their country's team or teams. Beginning in 1990, rules were constructed to prevent teams from identifying themselves in any way so as to combat the urge to "work our team". Yet in 2006, log checkers had to make the drastic decision to remove all unique call signs from the logs of all stations in order to preserve a credible order of finish among the teams. As a US competitor

with KL9A that year, I was unaware of anyone trying to "pack our logs" and would not have supported any such effort. I endorsed the decision by the sponsors to remove unique calls from our log, even though we lost some QSOs, I'm sure.

The desire to see the contest decided solely on the merits of the operators is why I endorse the DARC press release this week by Bernd DL6FBL, "Please support all teams, and do not address teams in their own language, but only in English. Cluster spots are very welcome, as long as they do not compromise the anonymity of the team."

Resist the temptation to post spots or announcements with comments identifying a team or preferentially spotting a team that you believe to be "your" team. The competition's success depends just as much on fair play from us as it does from the teams in the tents. Imagine spectators along the routes of Tour de France jumping out to block riders or running onto the World Cup pitch to tackle an opponent's player! Encourage, congratulate, and support - but do not corrupt the competition.

Radiosport is not and should not be a popularity contest. Don't fall into the childish trap of, "But everybody else is doing it!" No, everybody else is NOT doing it. While we would all very much like to see "our" team atop the first-place podium, let's not let our national pride lead to bad decisions that compromise the very competitions that we so enjoy and upon which the WRTC hosts have worked so hard to make fair and open.

73, Ward N0AX

==> CONTESTS

July 7 through July 20

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

IARU HF World Championship--Phone,CW, from Jul 10, 1200Z to Jul 11, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and IARU zone. Logs due: 30 days. Rules <http://www.arrl.org/contests>

World Radiosport Team Championship--Phone,CW, from Jul 10, 1200Z to Jul 11, 1200Z. Bands (MHz): 3.5-28. Exchange: RS(T) and ITU zone or 3-letter code. Logs due: See Web. Rules <http://www.wrtc2010.ru/>

FISTS Summer Sprint--CW, from Jul 9, 2000 EDT to Jul 9, 2400 EDT. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, name, FISTS number or pwr. Logs due: 30 days. Rules <http://www.fists.org/>

Feld-Hell Monthly Sprint--Digital, from Jul 10, 1600Z to Jul 10, 1800Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Feld-Hell member nr or age. Rules <http://sites.google.com/site/feldhellclub/Home/contests>

Straight Key Weekend Sprint--CW, from Jul 11, 0000Z to Jul 11, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member number. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

QRP ARCI Summer Homebrew--CW, from Jul 11, 2000Z to Jul 11, 2400Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, QRP number or power. Logs due: Aug 13. Rules <http://www.qrparci.org/>

CWops Mini-CWT Test--CW, from Jul 14, 1100Z to Jul 15, 0400Z. Bands (MHz): 3.5-14. Frequencies (MHz): 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

DMC RTTY Contest--Digital, from Jul 17, 1200Z to Jul 18, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Aug 19. Rules <http://www.digital-modes-club.org/>

NA RTTY QSO Party--Digital, from Jul 17, 1800Z to Jul 18, 0600Z. Bands (MHz): 3.5-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://www.ncjweb.com/>

CQC Great Colorado Gold Rush--CW, from Jul 18, 2000Z to Jul 18, 2159Z. Bands (MHz): 14. Exchange: RST, serial, category, CQC member nr. Logs due: 30 days. Rules <http://www.cqc.org/contests/gold2008.htm>

Run For the Bacon - Monthly--CW, from Jul 19, 0100Z to Jul 19, 0300Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.com/fpqrprun.php>

VHF+ CONTESTS

Straight Key Weekend Sprint--CW, from Jul 11, 0000Z to Jul 11, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member number. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

CQ WW VHF Contest--Phone,CW,Digital, from Jul 17, 1800Z to Jul 18, 2100Z. Bands (MHz): 50,144. Exchange: 4-digit grid square. Logs due: Sep 1. Rules <http://www.cqww-vhf.com/>

** Rare Grid (EM87) on During CQ WW VHF... **

Hello all, For all who may still need EM87 I, WK4P, am planning
a trip to Southwestern Virginia July 10-25. I plan to be on the
air from EM87 by Monday July 12 and will operate as much as my
schedule and band condx permit until Saturday July 24. I plan to
be quite active during the period, although I do have some other
things I will be doing as well. During the CQ VHF contest only,
we will be operating as W4APP. Please listen for us during the
contest as well. More info can be found on our website,
www.w4app.com I am looking to be on or near 50.157 (SSB) and
50.087 (CW). Of course these frequencies may change as band
condx and QRM dictate. My planned stations is: Icom 756 ProII,
Heathkit SB200 converted to 6 meters (500 watts), M2 6M5X.
Hopefully this will be enough to work the West Coast, EU, and
into SA if the band opens up. Let's hope for some good condx.
I will use LoTW and will QSL 100 percent by snailmail with SASE.
Please send a SASE if you want a paper QSL. I hope to hear many
who need EM87 while I am in the grid. Peace and 73 Adam WK4P
SOURCE: tnx to Andy N8OFS GOT6??? direct to MMMonVHF

** SPECIAL EVENT STATIONS OE2XXM & OE5XXM **

The special event stations OE2XXM (St. Gilgen) and OE5XXM (Gosau)
are working mainly on 2m, 70cm and 80m/40m/20m from the XXVI.
International Amateur radio meeting in Gosau (Dachstein) from
Jul 1-31.See also http://www.qrz.com/db/oe2xxm and

** Montserrat qrv until 12th July **

Graham M0AEP will be back in Montserrat from 14 June through 12th
July and re-activating the VP2MDD call - LATEST NEWS from VP2MDD
in Montserrat, dated 2010-07-04: Thank you to all those EU 6M ops.

who tried today, Sat 04 July, to pull my 6M sigs through. If condx do not improve enabling 2-way contact from our west coast home before Fri 9th July, I may try /P operation (100W + 5 el yagi) from cliff top east coast site either Sat. and / or Sun 10 / 11 July. This will depend on my work schedule, WX condx and, of course, no adverse volcanic activity. I cannot guarantee propagation but it may help a few more in EU work VP2M on Six?
SOURCE: Graham, M0AEP via UKSMG Announce

** SOTA Activity from EU-123 **

On the week commencing September 25th, members of Sands Contest Group and Workington Radio Club, along with Brendan Minish (EI6IZ) will be visiting the Isle of Aran off the coast of southwestern Scotland, and will operate under the callsign MM0SCG. They will be active on VHF, HF, SSB, CW and the Data modes. The island has lighthouses and the following reference numbers are good: SCOTIA Island number CS14 and IOSA number CL01. They will also activate SOTA summits, with time permitting.
SOURCE: Ohio/Penn DX Bulletin #965

** IOTA Activity from Guernsey **

Frank, PA4N will be signing MU/PA4N from the island of Guernsey on 12-19 July 2010. Activity will be focused on 80-10m CW, with possibly some 160 or 6 metres and possibly some RTTY or SSB from (EU-114, WLOTA L-0013, WWLOC: IN89). QSL via home call, bureau or direct. SOURCE: [rsgbiota.org] ICPO Bulletin

** Kuwait, 9K qrv 50 MHz **

9K2YM (Kuwait) is installaing a 5el LFA Yagi after the fantastic results of his good friend A92GR. Yasser will be QRV on 6 within the next few days and said he will mail me to tell me he is now active. I will post here to let you all know to listen out for him
SOURCE: Justin G0KSC via UKSMG Announce

** IOTA Activity from Isle of Palms **

Rich, K3RWN will be signing K3RWN/4 from Isle of Palms (NA-110, USi SC001S, Charleston county), South Carolina, on 3-9th July 2010 He will attempt several Satellite contacts while on the island. AO51 for sure; he may try some SSB Sats if he has the proper equipment. QSL via home call (QRZ.com).
SOURCE: [rsgbiota.org] ICPO Bulletin

** VO2MK on 10-20 July 2010 qrv HF and 6m from GO14 **

Ken, VO1KVT will be active on the HF bands and 6 metres as VO2MK from Labrador between 10 and 20 July. He plans to operate from Mundy Island (NA-205) for a couple of days during that time frame QSL via VO1KVT, direct or bureau. SOURCE: rsgbiota.org

** Vendsyssel-Thy (JO47) qrv on HF and 50 MHz **

Tom, DL4VM will be active from Vendsyssel-Thy [Nordjylland]
(EU-171, DIA NJ-001, JO47) on 4-18 September 2010. QRV on 40,
30, 15 + 6m, CW + PSK31. QSL via home calll, direct or bureau.
SOURCE: [rsgbiota.org] via ICPO Bulletin

** Sattelite Activity from Vancouver Island **

WD9EWK will be signing VA7EWK from Vancouver Island (NA-036, CIsA
BC001, WLOTA L-0858) on 3-11 July 2010. QRV on the satellites from
various locations in several grids (CN78 CN79 CN88 CN89 CO60 CO70)
Satellites: AO-51, SO-50, AO-27, HO-68, AO-7, FO-29, VO-52,
possibly SO-67 if it is back in service. QSL via WD9EWK, direct or
bureau. Website: july2010.wd9ewk.net/
SOURCE: [rsgbiota.org] ICPO Bulletin

** HA8, HUNGARY (International WORLD FAUNA Foundation) **

Look for a youth radio camp to activate the Natural Reserves
Pusztaszeri Tk.(HAFF-036) between now and July 9th. They will
use the special callsign HA8KID. Other callsigns such as HA8CX/p,
HA8DD/p, HA8KW/p and HA8ZE/p will also be active. Activity will
be on 80-2 meters using a FT-450. Antennas are: W3DZZ for 80/40/
20/15/10m, possibly a 6m vertical dipole, GP for the WARC bands
and a short yagi on 2m. The instructors ask patience with the
young operators! SOURCE: Ohio/Penn DX Bulletin #966

** IS0, SARDINIA (EU-024) qrv HF and 50 MHz **

Flaviano, I2MOV, informs OPDX that he will depart for Sardinia
on July 13th and be active as IS0/I2MOV from Dolianova, 20 km
North from Cagliari (Locator JM49OJ), until the end of September
Activity will be on 40/30/20/17/15/12/10/6 meters using mainly
CW. His rig will be an IC706MKIIG into a 7 band vertical antenna
and a home-made 50 MHz dipole. QSL via his home callsign, by the
Bureau or direct. Visit his Web page at: http://i2mov.tk
SOURCE: Ohio/Penn DX Bulletin #966

** Alaska, KL, qrv HF and 50 MHz **

Look for Mike/AD5A and his two sons, Michael/AB5EB and Jake/KB5SKN
to activate Kalgin Island, in the Kenai-Cook Inlet Group in August
This Alaskan island has only been worked by 10% of the islands
chasers. Activity will take place sometime Friday, August 6th,
and they will go QRT mid-afternoon (local time), on Sunday, August
8th. Their plan is to have two stations on the air running 100 W
using two separate callsigns. The CW callsign will be AD5A/KL5 and
the SSB callsign will be AB5EB/KL0. The team will be equipped to
operate on 6m if the band opens up, but it will not be a priority.
QSL route will be announced as soon as it finalized.
SOURCE: Ohio/Penn DX Bulletin #966 and CQ SIX

** 50 MHz Activity from JO55 in Nordic Activity Contest **

Hello Guys, I (OZ6OM) will be QRV in the Nordic Activity Contest
Thursday evening (July 8 th.) between 17 and 21 UT. I intend to
go hilltopping JO55CE and to be QRV with 100 w. into a 5 elm. or
2 stack, from 128 masl. with a 360 deg. clear view. If the weather
ConDX is to poor, operation will be from an alternate QTH in
JO55EJ running 100 w. into a 5 or Yagi at 35 m. above ground.
In any case I intend to keep activity round 50.173 MHz (SSB/CW)
and 50.230 MHz / 50.236 (JT6m). Iï¿½m open for skeds at CW/SSB the
first 2ï¿½ hours, and JT6m the last 1ï¿½ hours. I can be reached at
email oz6om(at)uksmg.net prior to the contest and SMS +45 2066 7388
during the contest. (The reason I have to operate like this is,
my attempt at setting up reasonable antennas at my QTH have ended
in a court twist) Hope to see You down the log ... vy 73 de Matt

==> + CAN I HAVE AMATEUR RADIO FOR $1000, ALEX?: YOUNG AMATEUR MAKES
HER MARK ON JEOPARDY!

For hams who are fans of the television quiz show Jeopardy! -- where
contestants have to answer in the form of a question -- the July 6 show
was a real treat: Andrea Salt, KE7OPV, of Gilbert, Arizona, was a
contestant. But what makes Andrea's time on Jeopardy even more special
is that she is only 13. All this week, Jeopardy! is hosting their
annual Kids' Week. To be eligible to participate in Kids' Week, all
contestants must be between the ages of 10-13 and pass an online test
consisting of 30 questions. The questions cover a variety of categories
and the kids must answer each question within 20 seconds. And yes,
spelling does count! Read more here
<http://www.arrl.org/news/can-i-amateur-radio-for-1000-alex-young-amateur-mak
es-her-mark-on-jeopardy>.

==> + ON THE AIR: ARRL'S 500 KHZ EXPERIMENT SHOWS SLIGHT GROWTH

<http://www.arrl.org/images/view/News/WD2XSH_Map0310-0510.JPG> In
the quarterly report for the ARRL's 500 kHz Experimental Station for
```

the period ending May 2010, Experiment Coordinator Fritz Raab, W1FR, reported that since the experiment began in late 2006, 20 of the 32 participating stations are currently active. The FCC's Office of Engineering and Technology granted the WD2XSH experimental license to the ARRL in September of that year. "Our present license grant expires on August 1," Raab said. "We are planning to do an 'as-is' renewal this month." Raab said that during the quarter, one additional QSO was made, bringing the total number of WD2XSH contacts to 405. The WD2XSH Web site has received 511 reports since the end of February, bringing the total number of reports to 11,234 since the beginning of the issuance of the experimental license. Raab said more than 60,000 hours of activity has been logged on the Web site since September 2006. Stations do not have to be members of the experimental team to post reception reports. Read more here <http://www.arrl.org/news/arrl-s-500-khz-experiment-shows-small-growth>.

==> + ARRL NOW ON FACEBOOK!

With more than 400 million active users, Facebook <http://www.facebook.com/> is the most popular social network site on the Internet. And since radio amateurs are generally a social bunch, many hams are active on Facebook. Thanks to Herman May, KE5HYW, the ARRL has its own Facebook page <http://www.facebook.com/?ref=logo#%21/pages/ARRL-the-National-Association-for-Amateur-Radio/20069212407?ref=ts>.
Check out the page to see a lot of features you won't find anywhere else, such as pictures from ARRL events and interactive status updates. We invite hams to "like" the ARRL Facebook page and leave productive comments. Joining Facebook is free, and you just might be surprised at who you'll find on the site.

==> + COMING UP IN QST : CHECK OUT THE AUGUST ISSUE OF QST

The August issue of QST is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including April's EME event from the Arecibo Observatory at the National Astronomical and Ionospheric Center in Puerto Rico -- the upcoming issue of QST has something for just about everyone.

One of the joys of Amateur Radio is building your own equipment; there's nothing like putting something on the air that you've built with your own two hands -- and a little solder and sweat. Not only is it fun, it's a good way to not spend a lot of money. In his article "Build a Two Finger Key," Burt VanderClute, N4ERM, explains how he put together an effective dual-lever paddle at practically no cost using only common household tools. In the television series Star Trek, Captain Kirk was always asking Scotty for more power (and Scotty usually replied that he was utilizing all the power available). Many hams like using power, too, but what if we got rid of some of that power? Phil Salas, AD5X, finds that sometimes throwing away power is better than trying to reduce it in his article "Simplify Transceiver to

Amplifier Interfacing with an In-Line Attenuator."

Proving that you don't have to be a big gun with big antennas on a big lot to work top band, Greg Crossman, WE0D, shows it can be done. In his article "Earning 160 Meters WAS in 117 Days," Crossman relates how he was able to work all 50 US states on topband from a lot with limited space in a community with antenna restrictions. QST Editor Steve Ford, WB8IMY, takes a look at how to make connections for your iPhone, iTouch, iPod and iPad in his monthly column "Eclectic Technology." This month, he builds on his April 2010 column that discussed Amateur Radio apps for these devices. Now he explains how to make the proper connections between your "iDevice" and your transceiver.

<http://www.arrl.org/multimedia> QST Technical Editor Joel Hallas, W1ZR, takes a look at accessories for the Elecraft K3 HF/VHF modular transceiver in this month's Product Review. "The K144XV internal 2 meter transverter, KDVR3 voice recorder and KAT3 internal automatic antenna tuner integrate seamlessly and add even more functionality to the versatile K3," he reports. Hallas also checked out a pair of Mirage 2 meter amplifiers for use with the K3. "Either the Mirage B-310-G or the slightly larger B-2518-G can follow the K3 with its internal transverter and deliver 75 W PEP SSB with reasonable distortion," he said. "The smaller unit can also provide 100 W on CW or FM. The latter can do better with a transverter that can put out a bit more power, such as the external Elecraft XV144, delivering up to 110 W PEP on SSB and 160 W on CW or FM. The preamps will only help with the K3 if you have considerable line loss between amplifier and radio."

The results from February's ARRL DX CW Contest are also in the August issue. There were a few upsets, as well as some new records set in this ever-popular contest. Speaking of contests, you will also find official announcements for the 2010 ARRL International EME Competition, the ARRL August Rookie Roundup, the ARRL 10 GHz and Up Contest and the 2010 ARRL September VHF QSO Party. You will also find the results from the 2010 ARRL Photo Contest spread out over three pages in the August QST.

Of course, there are the usual columns you know and expect in the August QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more. Look for your August issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + SOLAR UPDATE

Tad "Till the broad Sun withdraws his lessening ray <http://www.english.upenn.edu/Projects/knarf/Byron/charold2.html>" Cook, K7RA, reports: The average daily sunspot numbers for this week rose from 11.7 to 16, back to the level that we saw two weeks ago. The geomagnetic indices have quieted down, with average mid-latitude A index dropping more than five points from the previous week. The latest

NOAA/USAF forecast shows a rising solar flux for July 8-10 of 74, 75 and 76 and then 78 for July 11. This is accompanied by a low planetary A index of 5 on July 8, 8 on July 9, followed by 5 for July 10-13 and then 8, 15, 8 and 5 for July 14-17. Look for more information, including some 6 meter double-hop sporadic-E reports, on the ARRL Web site on Friday, July 9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" brought to you by George Gordon, Lord Byron's Childe Harold's Pilgrimage <http://www.english.upenn.edu/Projects/knarf/Byron/charoldt.html> (Canto II <http://www.english.upenn.edu/Projects/knarf/Byron/charold2.html>, Verse XX).

==> + SILENT KEY: FORMER ARRL STAFFER MIKE KACZYNSKI, W1OD (SK)

Michael B. Kaczynski, W1OD, of Bristol Connecticut, died unexpectedly on Tuesday, July 6, 2010 at Bristol Hospital. He was 51. An ARRL Life Member, Kaczynski worked at ARRL Headquarters from 1979-1987 starting off at the DXCC Desk, then becoming a Communications Assistant, Technical Information Specialist, Lab Technician and eventually an Assistant Technical Editor and Contest Manager; at the time of his death, he was employed at ESPN. While at the ARRL, he authored almost 50 articles in QST, including contest results and product reviews. He was also President of the Newington Amateur Radio League (NARL <http://www.narl.net/>) from 1991-1992 and a member of the ARRL's A-1 Operator Club <http://www.arrl.org/a-1-op>. Kaczynski enjoyed and was a member of many organizations related to bowling, sport shooting, model airplanes, astronomy and geocaching. He also held a private pilot's license. Funeral services will be held on Saturday, July 10 at 10:30 AM at Funk Funeral Home in Bristol, followed by a Mass of Christian Burial at St Stanislaus Church. Relatives and friends may call at the funeral home on Friday between 4-8 PM. In lieu of flowers, memorial donations may be made to the Kaczynski Scholarship Fund, c/o St Stanislaus Church, 510 West St, Bristol, CT 06010 or to Special Olympics, 2666 State St, Suite 1, Hamden, CT 06517-2232. Kaczynski's family has set up a memorial Web site <http://www.funkfuneralhome.com/obituaries/Michael-B.-Kaczynski1811410971/> where friends may leave condolences.

==> THIS WEEK ON THE RADIO

This week, the FISTS Summer Sprint is July 10 and the IARU HF World Championship is July 10-11. Next week, North American QSO Party (RTTY), the DMC RTTY Contest and the CQ Worldwide VHF Contest are July 17-18. The Run for the Bacon QRP Contest is July 19. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more

info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/special-events>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, July 25, 2010, for these online course sessions <http://www.arrl.org/online-course-registration> beginning on Friday, August 6, 2010: Amateur Radio Emergency Communications Level 1. To learn more, visit the CEP Course Listing page <http://www.arrl.org/online-courses> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members and registered guests may subscribe at no cost or unsubscribe by editing their profile <http://www.arrl.org/Users/edit#!/edit-info-email_subscriptions>.

Amateur Radio Newsline(tm) Report 1717 - July 19 2010

Amateur Radio Newsline report number 1717 with a release date of
Friday, July 9, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. New Zealand's telecommunications regulator questions the legality of Internet connected ham radio. The 2010 World Radiosports Competition takes place in Russia. The FCC to host a big meeting regarding wireless medical electronics. Delaware exempts ham radio from its new cellphone law and a new Cube-Sat will investigate interference to High Frequency communications. Find out the details on Amateur Radio Newsline(tm) report number 1717 coming your way right now.

**

RADIO LAW: NEW ZEALAND REGULATOR VOICES CONCERNS OVER INTERNET CONNECT HAMRADIO

New Zealand is the latest nation to look at Internet linked ham radio operation and question its legality. Jim Meachen, ZL2BHF, is in Auckland with more:

--

New Zealand's Ministry of Economic Development -- the MED -- which acts as the nations telecommunications regulator has raised some concerns with the New Zealand Amateur Radio Transmitters or NZART. This, over Internet connected ham radio operations such as IRLP, D-Star, Echolink, APRS and all similar unattended transmitter supervision. This is because they do not appear to fit within the nations current ham radio license conditions.

Among the concerns raised by the MED, is the use of unattended transmitters and unlicensed digipeaters for APRS. They are also concerned over the possibility of overseas radio amateurs operating a New Zealand based amateur station without specific MED sanction to do so.

The NZART Administration Liaison Officer is Don Wallace, ZL2TLL. He is currently putting together a paper on this topic and would appreciate input from all interested New Zealand amateurs.

And from down-under in Auckland, I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

The concern voiced by New Zealand's Ministry of Economic Development comes closely on the heels of France banning ham radio use of D-Star and possibly other digital voice modes because they use codecs based on proprietary software and algorithms. As reported here on Amateur Radio Newsline last week, Frances telecommunications regulator ARCEP says that this is a violation of that nations open standard policy. The ARCEP also cites alleged concerns regarding cryptography and national security. (ARNewsline(tm), Southgate))

**

RESTRUCTURING: NEW ZEALAND RESTRUCTURES THE 806 TO 960 MHz BAND

Still down-under, word that Minister for Communications and Information Technology Steven Joyce has just announced details of the changes planned for the 806 to 960 MHz radio spectrum band. The parts of the decision that affect New Zealand amateurs are adding 915 to 920 MHz and giving hams access to all of 915 to 928 MHz over 5 year lead-time.

On the down side, hams will loose access to 928 to 929 MHz. They will also have to accept a shared sub-band 920 to 926 MHz with RFID tags capable of running up to 4 watts power out.

These changes were to be published in the July 15th New Zealand government NZ Gazette. Most will be effective immediately, except for the removal of the 928 to 929 MHz frequencies from the Amateur service which will not come into force until August 12th. (NZART News)

**

RADIOSPORTS: WRTC 2010 HELD IN RUSSIA

The Ham Radio Olympics are on. This as the World Radiosport Team Championship for 2010 is getting under way as we go to air.

This year the games are being hosted by the Russian national amateur radio society and taking place near Moscow. 50 teams from all over the world are competing. The contest was scheduled to begin at 1200 U-T-C on July 10th and end at 1200 U-T-C on July 11th. More is on-line at www.wrtc2010.ru (WRTC)

**

WORLDBEAT: INCREASED CONTEST POWER IN IRELAND UPDATE

The Irish Radio Transmitters Society which is Irelands national ham radio society is continuing to pursue with Ireland's regulator ComReg. This, regarding its request to secure increased power for Irish hams during a list of international HF and VHF contests still to be finalized.

At this point ComReg says that it wants to get a list of licensed amateurs in Ireland who would be interested in getting permission to operate with increased power for the contests. Hams in Ireland who wish to have their name included should e mail the Irish Radio Transmitters Society contest manager Thos Caffrey`, EI2JD to contestmanager (at) irts (dot) ie. (IRTS)

**

HAM RADIO IN SPACE: NEW SA CUBESAT TO INVESTIGATE HF INTERFERENCE

The world of amateur radio may soon have greater insight into sources of interference on the High Frequency bands. This with word that an important mission of the upcoming South Africa AMSAT CubeSat will be to measure the High Frequency noise levels over South Africa and report this information back to Earth for analysis and action to reduce these unwanted signals.

S-A Amsat's Hans van de Groenendaal, ZS6AKV, will be giving a presentation on South Africa's first CubeSat at the AMSAT-UK Colloquium in Guildford, England, that runs from July 31st through August 1st. According to ZS6AKV the information from the tiny satellite will identify the areas where the H-F frequency polluters are situated and will help in reducing or eliminating the source. It is also hoped to include a 30 kHz linear transponder and an Automatic Packet Reporting System in the CubeSat.

More on this interference detection experiment from space is on-line at www.uk.amsat.org/colloquium We will have more ham radio space related news later on ion this weeks Amateur Radio Newsline report. (ANS, AMSAT-SA)

**

RESCUE RADIO: FCC AND FDA TO HOST JOINT MEETING ON WIRELESS MEDICAL ELECTRONICS

An important meeting dealing with wireless broadband and medical electronics is skated for Washington DC later this month. Fred Vobbe, W8HDU, has the details:

--

The Federal Communications Commission and Food and Drug Administration will be seeking comment on converged communications and health care devices impact on regulation. This, at a public meeting to discuss topics related to this issue is scheduled for July 26 and 27th.

According to a joint news release there have been significant developments in recent years in medical and health care devices using radio technology to monitor various body functions and conditions. These include including critical care elements as well as those used to deliver treatment and therapy. Examples of the latest implant or body-worn monitoring, therapeutic, and treatment technologies include blood glucose monitors and automated insulin pumps, heart monitors, pacemakers, defibrillators, and neural pathway replacements that stimulate muscle movement. There has also been an increasing proliferation of devices using established commercial communications networks, including those providing Internet connectivity to communicate with care providers.

The FCC and FDA say that they both recognize the need to work with all providers and users of these devices to identify pathways and strive to improve processes that will help continue to spur innovation in these areas while maintaining safety and effectiveness and promoting public health. Therefore the objective of this meeting is to gather information

and to better understand issues and perspectives so the agencies can identify potential areas where each agency's jurisdiction can be identified
and clarified for affected parties. Also to gauge how the collection and assessment of each agency's respectively appropriate information can be improved, expertise can be shared, and regulatory approval can be coordinated and simplified.

Im Fred Vobbe, W8HDU.

--

The public meeting will be held July 26 and 27th from 8:00 a.m. to 5:30 p.m Eastern Daylight time at the FCC Commission Meeting Room, 445 12th St., SW, Washington, DC. Those interested in attending or participating in the meeting must register by 5 p.m. on July 19th . (FCC)

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the K9UXP repeater serving Eau Clare Wisconsin.

(5 sec pause here)

**

RADIO LAW: DELAWARE EXEMPTS HAMS FRON MOBILE CELLPHONE BAN

A big win for mobile ham radio operations in Delaware. This with word that in a unanimous vote, both houses of that states legislature passed an amendment to a Delaware house bill that outlaws mobile use of "two-way communication" devices, but now specifically allows amateur radio use.

As reported last week, the original wording of the states cellphone law would have also banned all sorts of two-way radio operations as well. But State Representatives Ruth Briggs King and Dave Wilson recognized the deficiencies in the wording and introduced an amendment to correct them. It then became the work of the Delaware ham community to assure its passage.

According to a public posting by Dennis Karol, KB3MJ, on the QRZed.com website, some 15 Delaware amateurs not only wrote, called and emailed to their state Representatives and Senators, but actually spent endless hours at Legislative Hall in Dover on Tuesday and Wednesday nights. They spent that time educating legislators about radio communications in general and amateur radio in particular. In the end, the amendment passed with yes votes from 100% of the Representatives and Senators who were present in both Houses. (KB3MJ via QRZ.com)

**

ENFORCEMENT: FCC ISSUES WARNING NOTICE FOR SAN FRAN UNLICENSED STATION

The FCC's San Francisco office has issued Notice of Unlicensed Operation the FCC has Phillip N. Reiker of Watsonville, California. This, regarding an unlicensed broadcast station operating from property that he owns in the city of Santa Cruz.

According to the June 3rd notice, the San Francisco FCC Office had received information that an unlicensed broadcast radio station on 101.1 MHz was allegedly operating in Santa Cruz. This past March 19th agents from this office confirmed that radio signal was coming from property that public records show Reiker as owning.

Reiker was told that he must immediately cease operation of the unlicensed transmitter. He was also given ten days to explain his activities to the FCC. That date has now past. (FCC)

**

ENFORCEMENT: YOU CANT CLOSE THOSE SHUTTERS WITH A NON CERTIFIED TRANSMITTER

The FCC has issued an official Citation to the USA Shutter Company, LLC, doing business as MaestroShield of Naples, Florida for allegedly marketing unauthorized radio frequency devices in the United States. This, in violation of Section 302(b) of the Communications Act and Sections 2.803 and 15.201 of the Commission's Rules.

According to the FCC, back in 2009 it received a complaint alleging that USA Shutter was selling unauthorized wireless remote control transmitters used to control window shutters. On December 3, 2009 a Letter of Inquiry to USA Shutter regarding this matter. In its response on December 18th, USA Shutter replied stating that it do not manufacture remote control transmitters but did admit to importing and marketing four models of these devices beginning in January of 2007 and another model later on. It also admitted that these wireless remote control transmitter models are not FCC certified.

In the Citation the FCC told USA Shutter that intentional radiators such as the wireless remote control transmitters are required by Section 15.201 of the Rules to be approved through the certification procedures prior to marketing within the United States. Since these devices have not received FCC certification, USA Shutter was warned to cease selling them. If the company continues to do so it can be fined up to $16,000 for each such violation or each day of a continuing violation.

USA Shutter was given the customary 30 days from the June 21st issuance date of the Citation to respond and to specify the actions that it has taken to ensure that it does do not violate the Commission's rules governing the marketing of radio frequency equipment in the future. (FCC)

**

RESCUE RADIO: HAMS PRIOVIDE EMERGENCY RESPONSE AT NORTH CAROLINA BARBACUE

Hams in North Carolina were ready when the heat of the day took its toll on a woman attending the regions Hog Day barbecue. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the rest of the story:

--

On June 19th, members of the Orange County Radio Amateurs and Orange County ARES had been on duty at the annual street fair in Hillsborough , North Carolina, known as "Hog Day," since about 8:00AM. The hams were providing backup communications for the event when at about 12:40 in the afternoon when a woman came into an exhibitor's booth and collapsed. She was able to tell onlookers that she was feeling weak from the 90 degree heat.

At just about the same time two ham radio operators happened to be at the same booth. One of them, Lad Carrington, W4ORD, immediately radioed the situation to net control Ken Kauffmann, KR4FM. Kaufmann in turn dispatched paramedics from Orange County Emergency Services.

The call over the repeater was also heard by Woody Woodward, K3VSA, whose assignment was to shadow David Hunt, the chief judge for the event's barbecue cookoff. Hunt is also a volunteer fireman immediately made for the location with a bottle of chilled water. When Woodard and Hunt arrived on the scene woman was slumped down in a camp chair. Hunt used some of the cold water to apply a compress to the back of her neck.

And the bottom line: Another time when emergency trained ham radio operators were in the right place at the right time.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

The paramedics arrived just moments later to provide emergency care and transport the victim further inside an air conditioned space. (K3VSA)

**

NAMES IN THE NEWS: VK7TBM HONORED FOR CREATING COAST RADIO NETWORK

Tasmanian radio engineer Barry McCann, VK7TBM, has received international recognition in the Queens Birthday honors. This, for his contribution to maritime communications.

VK7TBM was the co-founder of what has become Australia's largest marine radio network known as Coast Radio. This is radio communications system manned by volunteers that provides radio services to commercial fishers and recreational boaters.

The Coast Radio Network covers a large stretch of water from the South Australian Victorian border, to 300 nautical miles south of Tasmania, and up to the New South Wales Victorian border. The idea for the marine radio network came about after Barry spent an unplanned night at sea in the mid 1970's, after the engine in his boat failed. (WIA)

**

NAMES IN THE NEWS: VE2KHC APPOINTED RAC DIRECTOR FOR QUEBEC

Congratulations to James Keep, VE2KHC who was recently appointed as the Radio Amateurs of Canada Director for the Quebec. This, for the remainder of a two year term which started June 24, 2010 ending December 31, 2012. VE2KHC is a Certified Emergency Coordinator, has trained with the S&#65533;curit&#65533; Civil Quebec and is also a registered Radio Amateurs of Quebec member. (RAC)

**

NAMES IN THE NEWS: MARSHALL RADIO CLUB REACTIVATED

And a radio club that assisted in the 1980's video Amateur Radio's Newest Frontier has recently been reactivated. This with word that the George C. Marshall Radio Club in Huntsville, Alabama has come bact to active status after being dormant for many years.

On July 1st, one of the first meetings of the club was held with eight in attendance. Leaders say that there are many items that need to address as a club, but they have high hopes of bringing this club back to its formal glory.

Back in the early 1980's it was members of this radio club that made possible the taping of segments of Amateur Radio's Newest Frontier dealing with the European Space Agency's Spacelab that was carried to orbit by the United States Space Shuttle. (Via e-mail)

EMERGING TECHNOLOGY: NEW PC FOR THE ELDERLY

A new desktop P-C aimed at people aged over 60 who are unfamiliar with Personal Computers and the internet has been unveiled in the United Kingdom. Called Simplicity, the simplified desktop has only six buttons directing users to basic tasks such as e-mail and chat.

The Simplicity computer has no log-in screen when it starts up, contains no drop-down menus and comes pre-loaded with 17 video tutorials. The operating system is a version of Linux that can be customized by users.

So far the SimplicITy computer system is only available in the Europe. According to the BBC story introducing it, more than 6 million people in the UK over the age of 65 have never used the internet, according to British government figures. (Science OnLine)

EMERGING TECHNOLOGY: NEW TERAHERTZ RECEIVER DEVELOPED

Sandia National Laboratories researchers in Albuquerque, New Mexico have taken the first steps toward reducing the size and enhancing the functionality of devices in the terahertz frequency spectrum. This, by combining a detector and laser on the same chip to make a compact receiver.

Researchers say that this development has rendered unnecessary the precision alignment of optical components formerly needed to couple the laser to the detector. The new solid-state system puts to use the so-called "neglected middle child" frequency range between the microwave and infrared parts of the electromagnetic spectrum.

Terahertz radiation is of interest because some frequencies can be used to "see through" certain materials. Potentially they could be used in dental
or skin cancer imaging to distinguish different tissue types. They also permit improved nondestructive testing of materials during production monitoring. Other frequencies could be used to penetrate clothing, and possibly identify chemical or biological weapons and narcotics. More is on line at tinyurl.com/33o2n2j (Sandia National Labs Press Release)

HAM RADIO IN SPACE: EASA COLUMBUS AIS SYSYEM ANTENNA BUILT BY HAM

SpaceDaily.com reports that the European Space Agency's Columbus module maritime Automatic Identification System or AIS aboard the International Space Station was switched on. The A-I-S antenna, mounted externally on the Columbus module, was fabricated by AMSAT and ARISS member Lou McFadin, W5DID and the United States ARISS team. The group has also constructed a nearly
identical amateur band antenna for ARISS operations that will be used when the Ericsson amateur radio gear is activated in early 2011.

And how well does the new antenna work? The European Space Agency reports receiving more than 90,000 Class A AIS messages during a 14 hour test between 1900 GMT on June 2nd and 0900 GMT on June 3rd. This generated a global view of maritime traffic as the ISS orbit crosses all major shipping lanes. (ANS)

RADIO IN SPACE: A POSSIBLE BONUS SHUTTLE MISSION

The July 2 UniverseToday.com newsletter reports that NASA announced new target dates for the final two or maybe three shuttle missions. STS-133 is now aiming for November 1 at approximately 4:33 p.m. EDT for the final flight of shuttle Discovery,. STS-134 will happen on February 26, 2011 at around 4:19 p.m. EST for shuttle Endeavour's last launch.

However there's now word for the potential of a bonus mission titled STS-135. If approved by Congress, it would launch sometime in August 2011. The latest word on that was that NASA officials hope the decision on whether or not to fly STS-135 would be made sometime this month. (ANS,

HAM RADIO NEAR SPACE: STUDENTS TO BUILD PAYLOAD FOR SUTH AFRICAN HABEX BALLOON

Students assisted by area hams will be building the payload for the South African High Altitude Balloon Experiment or HABEX project. This for the ZS6SCI SciBono Discovery Center in association with the Gauteng Department of Education.

The objective is to involve schools in Gauteng in the entire process of developing and building a payload that will be launched using an unmanned meteorological balloon.

SciBono approved a budget for the building of HABEX. A team of radio amateurs who are engineers and designers are assisting the schools in developing the payload. Approval has been obtained from authorities for the launch of HABEX which is currently slated now for July 24th from nearby Klerksdorp Airfield. At airtime its not known what type of ham radio gear will be on board at liftoff.

HABEX was inspired by the United States BACAR or Balloon Carrying Amateur Radio project. (SARL)

HAM RADIO IN SPACE: INDIA HAMSAT MAY LAUNCH IN SEPTEMBER

An Amateur Radio satellite being built by students at S-R-M University may be launched by the Indian Space Research Organization in September. An S-R-M University press release describes the new bird called S-R-M-SAT as a 15 watt satellite weighing between 10 and 15 kg and measuring one meter,

S-R-M-SAT may use the bands 145.8MHz for the uplink and 434.5MHz for the downlink. It will launch along with the primary payload known as load Cartosat and two other amateur radio satellites called STUDSAT and TISat-1. (NDTV-India)

ON THE AIR: THE 5K200, COLOMBIA SPECIAL EVENT

On the air, keep an ear open for what are being called duly authorized members of the Colombian Radio Amateur Association to be active as 5K200LR throughout 2010. This is a special event call to celebrate the bicentennial and independence of Colombia. QSL electronically via Logbook of the World or direct to HK3LR. (Southgate)

**

ON THE AIR: KP4 TO CELEBRATE THE XXI CENTRAL AMERICAN AND CARIBBEAN GAMES

Members of the Puerto Rico Amateur Radio League should be on thre air using the special event call sign K4C. This operation is to Activity is to celebrate the XXI Central American and Caribbean Games that will take place in Mayaguez, Puerto Rico. K4C will conclude operations on August 1st. QSL direct to KP4ES. (Various)

**

PROPAGATION: POLANDS FIRST 10 METER BEACON ON THE AIR

Poland first ever amateur radio 10 meter beacon in on the air. SR4TEN is located in the office of the Polish amateurs' radio journal QTC Magazine in Grid Square JO94RG. It operates on 28.203 MHz with 3 watts power output. If you receive SR4TEN, please send your Q-S-N reports by e-mail your qtc (at) post (dot) pl.
(SP2FAP)

DX

In DX, word that F5IRO is headed to Djibouti and will be active as J28RO beginning July 6th and is expected to stay for 2 years. Activity will be on the HF bands using CW, SSB and the Digital modes mainly on the weekends and during the afternoons and evenings starting between 1200 to 1300 UTC. His QSL Manager is F8DFP.

The KL7RRC 2010 Alaska tour will take to the air from Kodiak Island from July 19th to the 21st . This will b e followed by an operation from uninhabited Chirikof Island beginning July 22nd and running through August 1st or 2nd with a final swing back to Kodiak Island on August 3rd and 4th. QSL via UA9OBA or N7RO.

JF1OKX, will be active as 9J2KK from Lusaka, Zambia beginning through the end of September 2011. Operation will be on 80 through 6 meters concentrating on the Digital modes such as PSK, WSJT and RTTY, but there may be time for some SSB and CW as well. QSL via JK1NSR.

YL2PN operating portable ES0 will be on from Ruhnu Island, Estonia, during the RSGB Islands on the Air Contest on July 24th and 25th. He will be a Single-Operator/Low-Power/All-Band/Mixed entry. If you work him QSL via his home callsign.

Lastly, JI1LET, will be on the air stroke JD1 from Chichijima Island between July 24th through the 30th. His activity will be on 40 through 6 meters using CW, SSB and RTTY. QSL to JI1LET direct or via the JARL Bureau.

(Above from various DX News Sources)

THAT FINAL ITEM: MILITARY SURPLUS AND THE FREE ENTERPRISE SYSTEM

And finally this week, we all know that after World War 2 a lot of United States military surplus began showing up in the marketplace. This was especially true of two way radio equipment such as the famed ARC 5

receivers and transmitters. These units cost the government thousands of dollars but hams in the 1950's and 1960's could by as many as they wanted for under ten bucks. But not every country disposed of its military surplus on the open market. The United Kingdom was one of those that took a different approach that did not always work as we hear from Jim Linton, VK3PC.

--

At the end of World War II, with peace declared, huge quantities of equipment were simply dumped.

A story published in Signal, the magazine of the Vintage Military & Amateur Radio Society, concerns reports of Royal Air Force radio gear being tipped down dis-used coal mine shafts in Staffordshire.

A local farmer Thomas Weston retrieved thousands of these units and through an associate George Eyre sold them on the open market to make a tidy profit.

Everything was going well until the farmer's local member raised a question in the British Parliament about this disgraceful waste of resources occurring at a time the nation was undergoing tough post-war financial restraint.

That caused a political storm and the farmer was threatened with legal action by the Coal Commission on the grounds that he was trespassing when entering the mines.

But in the following year 1947 the farmer got under their guard by buying land containing two old mine shafts and without restriction restarted his enterprise.

It seems that other things were dumped after the war too. Rumors include items ranging from old mess hall cutlery through to boxed unassembled aircraft.

I'm Jim Linton VK3PC.

--

More proof that in the end the free enterprise system works best, even if its takes going through the proverbial back door to make it happen. (WIA)

WIANEWS FOR WEEK COMMENCING JULY 11 2010.

First WIA Centenary Award issued

Internet Connected Amateur Radio

Amateur Satellite to Investigate Power Line Interference

Official opening of a new radio museum

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING JULY 11 2010

WIA Centenary Update

First WIA Centenary Award issued

John Fisher VK3DQ is the first to qualify for this award and during a
surprise visit to his QTH last weekend by WIA President, Michael Owen
VK3KI, was presented with his award certificate.

The award claim by VK3DQ had three contacts with VK100WIA, one with the
WIA during May, then with the Wagga and Midland Amateur Radio Clubs in
June, plus 14 WIA members to tally up the required 100 points.

John VK3DQ was absolutely delighted and considered it a real privilege and
an honour to be the very first to receive the award.

Also announced is that the first DX station to qualify for the is Masami Shinhaze JF6CHY

The second VK to get their award certificate is Heidi Tobin VK3FHID and in a close third Jean Fisher VK3VIP.

Fine And Dandy @ 5,000

The special callsign VK100WIA continues to be in strong demand and logged its 5,000th contact on Monday the 5th of July.
